Review of Article X, Sections 16 Through 24, Constitution of Missouri
Appendix C

TSR Exclusions

Various revenue amounts are excluded from Statewide Accounting System for Missouri (SAM II) revenue amounts to arrive at Total State Revenue (TSR), as shown on Appendix A. These exclusions, which include certain funds, certain revenue types, and other exclusions and limits, are discussed below.

Excluded Funds

From the revenue amounts obtained from SAM II, certain funds are entirely excluded to arrive at TSR, as defined in Article X, Section 17(1), Missouri Constitution, as follows:

(A) Lottery Funds

In November 1984, the voters approved Article III, Section 39(b), Missouri Constitution, which authorized the creation of the Missouri State Lottery. This provision states that revenues produced from the conduct of a state lottery shall not be a part of TSR. Since the voters approved the state lottery, all revenue and expenditure refunds related to the state lottery are excluded. Beginning in fiscal year 2017, lottery proceeds are deposited in the State Lottery Fund. In prior fiscal years, lottery proceeds were deposited in the Lottery Enterprise Fund.

(B) Alternative Care Trust Fund

The Alternative Care Trust Fund was established in 1989 under Section 210.560, RSMo. The Department of Social Services uses this fund to account for funds held in trust for the benefit of children who have been placed in the legal custody of the state. The Department of Corrections, Department of Mental Health, and the Missouri Veterans Commission hold funds in trust for inmates and patients. Funds held in trust are not state funds since the funds remain the property of the individual. Since the Alternative Care Trust Fund does not account for state funds, it is excluded.

(C) Student Loan Funds

Federal legislation passed in 1997 made changes in the accounting required for federal education loans. Starting in federal fiscal year 1998, the federal government considers all monies in these funds as property of the federal government or guaranty agency. As a result, the state excludes the two student loan funds held in trust.

(D) Pansy Johnson-Travis Memorial State Gardens Trust Fund

The state received an endowment in 1987 for the purpose of establishing a memorial state garden. The state is to invest the endowment for 100 years before using the funds to establish the memorial garden. Since the funds cannot be appropriated until 2087, the revenue is excluded from TSR.

(E) Division of Youth Services Child Benefits Fund

The Division of Youth Services (DYS) Child Benefits Fund was administratively created to account for payments from the Social Security Administration held in trust for the benefit of youth in the DYS custody. Funds held in trust are not deemed to be state funds, and are therefore excluded. This fund was added as an excluded fund in fiscal year 2016. In prior years, most of the fund revenues were excluded as federal funds.

Excluded Revenues

From the revenue amounts obtained from SAM II, certain types of revenues are excluded to arrive at TSR, as defined in Article X, Section 17(1), Missouri Constitution, as follows:

(1) Federal Funds

Article X, Section 17, Missouri Constitution, specifically excludes federal funds.

(2) Proposition C Sales and Use Tax/Interest

In November 1982, the voters approved Proposition C, which increased the state sales and use tax by 1 percent. Since Proposition C received direct voter approval as provided in Article X, Section 16, Missouri Constitution, the proceeds from the additional 1 percent sales and use tax, including any interest earned on the investment of such taxes, are excluded.

(3) Proposition A Gas Tax and License Fee Increases

In April 1987, the voters approved Proposition A, which increased the motor fuel tax by 4 cents per gallon and increased the annual registration fee for certain motor vehicles, effective July 1, 1987. Since the increase in tax and fees received direct voter approval, these revenues are excluded. Also, see item (24).

(4) Bond Sales

Attorney General Opinion 22-1982 concluded that proceeds of the state's general obligation bonds were not to be included in TSR.

(5) Refunds

Refunds received due to the overpayment of obligations by the state, as identified by certain revenue source codes, are excluded. Refunds also include cost recoveries and prescription drug rebates received through the Medicaid and Children's Health Insurance programs.

(6) Interagency Sales and Receipts

Since interagency transactions do not generate additional revenue for the state as a whole, interagency sales and receipts, as identified by certain revenue source codes, are excluded.

(7) Soil and Water Sales and Use Tax/Interest
and
(8) Parks Sales and Use Tax/Interest

In August 1984, the voters approved a one-tenth of 1 percent sales tax for soil and water conservation and state parks. Article IV, Section 47(c), Missouri Constitution, states that the additional revenue provided by the tax shall not be part of TSR. Since the voters approved the sales tax, the sales tax and any interest earned on the investment of the balance in these funds are excluded.

(9) Redeposit of Investment Principal

The redeposit of investment principal is excluded.

(10) Outlawed Checks

Outlawed checks (issued checks not cashed by the payee within the time allowed) are redeposited in the state treasury and are excluded.

(11) Redeposit of Loan Principal

Redeposits of loan principal are excluded.

(12) Bingo Tax

The August 1992 amendment to Article III, Section 39(d), Missouri Constitution, related to gaming activities also applies to bingo games, in that all state revenues derived from the conduct of gaming activities shall be appropriated beginning July 1, 1993, solely for public education and shall not be included in TSR. Section 313.007, RSMo, requires the bingo tax to be deposited in the Bingo Proceeds for Education Fund. The bingo tax, certain fees, and the interest earned on the investment of the fund are excluded from TSR.

(13) Riverboat Gambling and Other Gaming Proceeds

In August 1992, voters approved an amendment to Article III, Section 39(d), Missouri Constitution that requires all state gaming revenues be appropriated for public education and excludes these revenues from TSR.

In 1993, the Missouri General Assembly enacted Senate Bills 10 and 11. This comprehensive gaming legislation established riverboat gaming in the state. This law repealed House Bill 149 related to riverboat gaming, which had been enacted by voters as Proposition A in November 1992.

Under Senate Bills 10 and 11, the legislature imposed a 20 percent tax on adjusted gross receipts from gambling games. In November 2008, the voters approved increasing the tax to 21 percent. The state treats 90 percent of this revenue as state gaming revenues under Article III, Section 39(d), Missouri Constitution, and earmarks the revenues to the Gaming Proceeds for Education Fund. The remaining 10 percent of this revenue is allocated to the home dock city or county. Under Article III, Section 39(d), Missouri Constitution, the 90 percent portion of the adjusted gross receipts tax is exempted from TSR. The remaining 10 percent portion of the adjusted gross receipts tax is also excluded from TSR because these funds are distributed by the Department of Revenue without deposit in the state treasury and without appropriation.

Under Senate Bills 10 and 11, the legislature also established a Gaming Commission Fund in the state treasury and authorized gaming commission license fees, penalties, administrative fees, reimbursements, and admission fees to be deposited in this fund and expended pursuant to state appropriation for various purposes.

On November 24, 1998, the Missouri Court of Appeals, Western District, entered its final decision in *Kelly v. Hanson*, 984 S.W. 2d 540 (Mo. App. W.D. 1998). The Missouri Court of Appeals, Western District, held that revenue from the $1 portion of the state-imposed $2 admission fee payable to the state is excluded from TSR, while the revenue from the payments to the state to recoup public safety and regulatory enforcement costs is included in TSR. The remaining $1 portion of the $2 admission fee is also excluded from TSR because these funds are distributed by the Department of Revenue without deposit in the state treasury and without appropriation.

	In 2016, the general assembly passed HB 1941 that requires licensed fantasy sports contest operators to pay an annual operation fee equal to 11.5 percent of the operator's net revenue from the previous calendar year. These revenues are deposited in the Gaming Proceeds for Education Fund. Section 313.822, RSMo, provides all monies deposited in the Gaming Proceeds for Education Fund are to be treated as proceeds of river boat gambling. Under Article III, Section 39(d), Missouri Constitution, these annual operation fees are excluded from TSR.
(14) Redeposit of State Funds	The redeposit of state funds for which a state expenditure was originally incurred, such as from closing a petty cash fund and returning the funds to the state treasury, is excluded.
(15) Loan Proceeds	The state receives loans or advancements from the federal government, local governments, or private sources, to finance the acceleration of state projects. Since the loans must be repaid in the future, they are excluded.
(16) Conservation Sales and Use Tax/Interest	In *Conservation Federation of Missouri v. Richard Hanson*, 994 S.W. 2d 27 (Mo. Banc. 1999), the Supreme Court held that the revenue derived from the one-eighth of 1 percent conservation sales tax, and any interest earned on the investment of these funds, are excluded.
(17) State Employee Expense Reimbursement	The state receives reimbursement from private individuals, firms, partnerships, corporations, etc., for state employee expenses incurred in providing testimony in a court of law, for which the employee has already been reimbursed by a state expense account. These reimbursements are excluded.
(18) Recovery Costs	Monies received from others for costs incurred by the state or to be incurred by the state are excluded. Monies received from tobacco companies under the Tobacco Master Settlement Agreement are included in the recovery costs exclusion. See Tobacco Master Settlement Agreement Proceeds section. Also, see item (19).
(19) Cost Reimbursements	Monies received from other governments for reimbursements of costs incurred by the state are excluded. Regarding items (18) and (19), the state has excluded from TSR receipts for cost reimbursements since fiscal year 1982 and receipts for recovery costs since fiscal year 1988. Although the constitution does not specifically mention cost reimbursements and recovery costs and they have not been the subject of a court decision, we have agreed with such exclusions because from an accounting standpoint, they would not be considered revenue.

(20) Canceled Checks	Receipts derived from the redeposit of state checks that have been canceled are excluded.
(21) Local Match	Local governments provided funds to the state to use as a local match to qualify for federal or state funding. Since these funds are not state funds, they are excluded.
(22) Proceeds of Surplus Property Sales	The proceeds from some sales of surplus property are excluded. Although the constitution does not specifically mention proceeds of surplus property sales and they have not been the subject of a court decision, we have agreed with such exclusions because from an accounting standpoint, they would not be considered revenue.
(23) DHSS Program Rebates	The Department of Health and Senior Services (DHSS) receives rebates through various federal programs, including the Special Supplemental Nutrition Program for Women, Infants, and Children and the HIV Care Formula Grants. These rebates are related to purchases made with federal funds and are therefore excluded.
(24) Amendment 3 Revenue Derived From Highway Users	In November 2004, the voters approved an amendment to Article IV, Sections 29 and 30(a) through 30(c) and added Section 30(d), Missouri Constitution, effective July 1, 2005. Section 30(a)(4) provides for the apportionment and distribution of net proceeds of motor fuel tax. This section further provides that, "The net proceeds of fuel taxes apportioned, distributed and deposited under this section to the state road fund, counties, cities, towns and villages shall not be included within the definition of 'total state revenues'. . . ." Section 30(b) provides for the use and distribution of revenue derived from highway users as an incident to their use or right to use the highways of the state (including all state license fees and taxes on motor vehicles, trailers and motor vehicle fuels and excepting sales tax on motor vehicles and trailers which are not distributed to the state road fund). This section further provides that, "The moneys apportioned or distributed under this section to the state road fund, the state transportation fund, the state road bond fund, counties, cities, towns or villages shall not be included within the definition of 'total state revenues'. . . ." As a result, motor vehicle sales tax and special fuel non-gas tax, and fees from motor vehicle licenses or permits, interstate transportation licenses or permits, driver's licenses or permits, overdimension/overweight permits, other licenses and permits, and non-motor fuel decals credited to the State Road Fund, State Road Bond Fund, and/or State Transportation Fund are excluded from TSR.

	The increase in interstate transportation license or permits for certain motor vehicles excluded under this section were previously excluded and, as a result, have no impact on TSR. (See item (3)) Sections 29, 30(c), and 30(d) have no Hancock implications.
(25) Interest - Federal	Interest assessed and received on advances made to the state by the federal government. Since the interest is due to the federal government, it is excluded from TSR.
(26) Suspense Holding	The collection of unidentified funds for both state and non-state entities. Since these monies have not been identified, they are excluded from TSR.
Other Exclusions and Limits	Other exclusions and limits have been considered to arrive at TSR, as follows:
Cash Management Improvement Act (CMIA)	The state has to enter into an agreement with the federal government that governs the timing of when the state can obtain federal grant monies. If the state holds federal funds longer than needed, the state has to reimburse the federal government for interest earnings. Since the interest was earned on federal funds and has to be returned to the federal government, it is excluded from TSR.
Agency Remitted Sales Tax	Some state agencies sell goods or services to the public and collect sales tax. To avoid counting the same receipts in TSR twice, the sales tax remitted by state agencies to the Department of Revenue is excluded from TSR.
Abandoned Funds Claim Payments	Under Section 447.543, RSMo, the state receives abandoned funds from various sources (banks, businesses, insurance companies, etc.). These funds are placed in the state Abandoned Fund Account. The rightful owner may receive these funds if properly claimed. The state includes the receipts in TSR. Starting in fiscal year 1998, the state excludes from TSR amounts paid to the rightful owner.
Circuit Courts Escrow and Debt Offset Escrow	Under Section 488.5028, RSMo, the Department of Revenue and State Lottery Commission make setoffs of income tax refunds and lottery prize payouts, respectively, for amounts owed to circuit courts. Similarly, under Section 143.784, RSMo, the Department of Revenue makes setoffs of income tax refunds for amounts due to state agencies. Amounts setoff under both provisions are placed in escrow accounts until any review hearings are held and the matter is resolved. As a result, this revenue is not included in TSR.
Expenditure Refunds	Under Article X, Section 17(1), Missouri Constitution, TSR shall exclude the amount of any credits based on actual tax liabilities. Refunds disbursed due to the excess collection by the state of liabilities owed the state, largely tax refunds, as identified by certain expenditure object codes are excluded.

The method used to determine expenditure refunds is not specified in the amendment. Although the OA-BP initially used the appropriation basis to determine expenditures refunds, during fiscal year 1984, the OA-BP changed to the cash basis. In *Kelly v. Hanson*, 959 S.W.2d 107 (Mo. Banc 1997), the Supreme Court held that a cash basis of accounting should be used to determine compliance with the Hancock Amendment. A schedule of expenditure refunds is included at Appendix B.

Tobacco Master Settlement Agreement Proceeds

The OA-BP excluded $138,311,530 received from tobacco companies during fiscal year 2018. The Master Settlement Agreement was entered into effective November 23, 1998, between the major cigarette manufacturers and the states' Attorneys General. Missouri received its first payments under the settlement agreement during fiscal year 2001 and future payments from tobacco companies extend in perpetuity. The payment received in 2001 included amounts under the settlement agreement for 1998, 2000, and 2001. The settlement agreement did not require a payment for 1999. Payments for fiscal years 2001 through 2018 were as follows:

Fiscal Year	Amount
2001	$ 338,230,653
2002	172,679,543
2003	166,895,179
2004	142,829,966
2005	144,964,644
2006	133,078,222
2007	139,292,616
2008	153,277,453
2009	168,066,958
2010	140,318,927
2011	132,631,552
2012	135,246,224
2013	135,166,246
2014	66,085,418
2015	132,261,643
2016	123,645,603
2017	191,261,135
2018	138,311,530

The amounts received were coded in the state's accounting system to revenue source code 1806 - recovery costs, which is excluded from TSR. Recovery costs are defined under revenue source code 1806 as, "*all money recovered from others for costs incurred by the state or to be incurred by the state.*" The OA-BP believes these receipts should be excluded from TSR because the amounts represent a recovery of health care costs previously incurred or to be incurred by the state attributable to smoking.

Public information was not readily available to determine if the amounts recovered from the tobacco companies under the master settlement agreement were more or less than the health care costs incurred. For our fiscal year 2001 report, we reviewed three extensive research projects conducted by experts. We limited our analysis to Medicaid costs incurred in fiscal years 1998 through 2001. We did not consider Medicaid costs prior to fiscal year 1998. In addition, we did not consider other costs incurred by the state, such as employee health care costs attributable to smoking. These three research projects showed that Medicaid costs attributable to smoking were higher than the amount the state received from the tobacco companies under the settlement agreement. As a result, in our 2001 report we concluded it was proper for the OA-BP to exclude the amounts received from the tobacco companies as a recovery cost.

A study, "Tobacco Damages to the State of Missouri" by Glenn W. Harrison, was commissioned by the Missouri Attorney General's Office for use in a lawsuit against tobacco companies filed May 12, 1997. This lawsuit was dropped because Missouri joined a consortium of states in December 1998, in the Master Settlement Agreement with the tobacco companies. As a result, the Harrison study was not fully completed. However, the draft report provided an estimate of Medicaid costs attributable to smoking for 1970 through 2007 and an estimate of state employee health care costs attributable to smoking for 1970 through 1997. This study estimates that state costs attributable to smoking were higher than the amount the state received. OA officials could not locate any current studies, but they believe continued exclusion is reasonable.

Federal Reimbursement Allowance and Nursing Facility Reimbursement Allowance

The Federal Reimbursement Allowance and the Nursing Facility Reimbursement Allowance tax imposed by the state to pay the state's share of the costs of the Medicaid program when collected by an offset against Medicaid claims, is not directly deposited in the state treasury. As a result, this revenue is not included in TSR.

Appendix D

Review of Article X, Sections 16 Through 24,
Constitution of Missouri
Schedule of SAM II Revenues - Largest 5-Year Cumulative Revenue Types

Revenue Source Code	Type of Revenue	Year Ended June 30, 2014	2015	2016	2017	2018	5-Year Total	Percentage	Cummulative Percentage of Total

Review of Article X, Sections 16 Through 24, Constitution of Missouri
Appendix E

Article X, Sections 16 through 24, Constitution of Missouri (Adopted November 4, 1980, Amended April 2, 1996*)

TAXATION

Section 16. Taxes and state spending to be limited--state to support certain local activities--emergency spending and bond payments to be authorized. Property taxes and other local taxes and state taxation and spending may not be increased above the limitations specified herein without direct voter approval as provided by this constitution. The state is prohibited from requiring any new or expanded activities by counties and other political subdivisions without full state financing, or from shifting the tax burden to counties and other political subdivisions. A provision for emergency conditions is established and the repayment of voter approved bonded indebtedness is guaranteed. Implementation of this section is specified in sections 17 through 24, inclusive of this article.

Section 17. Definitions. As used in sections 16 through 24 of Article X:

(1) **"Total state revenues"** includes all general and special revenues, license and fees, excluding federal funds, as defined in the budget message of the governor for fiscal year 1980-1981. Total state revenues shall exclude the amount of any credits based on actual tax liabilities or the imputed tax components of rental payments, but shall include the amount of any credits not related to actual tax liabilities.

(2) **"Personal income of Missouri"** is the total income received by persons in Missouri from all sources, as defined and officially reported by the United States Department of Commerce or its successor agency.

(3) **"General price level"** means the Consumer Price Index for All Urban Consumers for the United States, or its successor publications, as defined and officially reported by the United States Department of Labor, or its successor agency.

Section 18. Limitation on taxes which may be imposed by general assembly--exclusions--refund of excess revenue--adjustments authorized.

(a) There is hereby established a limit on the total amount of taxes which may be imposed by the general assembly in any fiscal year on the taxpayers of this state. Effective with fiscal year 1981-1982, and for each fiscal year thereafter, the general assembly shall not impose taxes of any kind which, together with all other revenues of the state, federal funds excluded, exceed the revenue limit established in this section. The revenue limit shall be calculated for each fiscal year and shall be equal to the product of the ratio of total state revenues in fiscal year 1980-1981 divided by the personal income of Missouri in calendar year 1979 multiplied by the personal income of Missouri in either the calendar year prior to the calendar year in which appropriations for the

fiscal year for which the calculation is being made, or the average of personal income of Missouri in the previous three calendar years, whichever is greater.

(b) For any fiscal year in the event that total state revenues exceed the revenue limit established in this section by one percent or more, the excess revenues shall be refunded pro rata based on the liability reported on the Missouri state income tax (or its successor tax or taxes) annual returns filed following the close of such fiscal year. If the excess is less than one percent, this excess shall be transferred to the general revenue fund.

(c) The revenue limitation established in this section shall not apply to taxes imposed for the payment of principal and interest on bonds, approved by the voters and authorized under the provisions of this constitution.

(d) If responsibility for funding a program or programs is transferred from one level of government to another, as a consequence of constitutional amendment, the state revenue and spending limits may be adjusted to accommodate such change, provided that the total revenue authorized for collection by both state and local governments does not exceed that amount which would have been authorized without such change.

(e). **Voter approval required for taxes or fees, when, exceptions--definitions--compliance procedure, remedies.**

1. In addition to the revenue limit imposed by section 18 of this article, the general assembly in any fiscal year shall not increase taxes or fees without voter approval that in total produce new annual revenues greater than either fifty million dollars adjusted annually by the percentage change in the personal income of Missouri for the second previous fiscal year, or one percent of total state revenues for the second fiscal year prior to the general assembly's action, whichever is less. In the event that an individual or series of tax or fee increases exceed the ceiling established in this subsection, the taxes or fees shall be submitted by the general assembly to a public vote starting with the largest increase in the given year, and including all increases in descending order, until the aggregate of the remaining increases and decreases is less than the ceiling provided in this subsection.

2. The term "new annual revenues" means the net increase in annual revenues produced by the total of all tax or fee increases enacted by the general assembly in a fiscal year, less applicable refunds and less all contemporaneously occurring tax or fee reductions in that same fiscal year, and shall not include interest earnings on the proceeds of the tax or fee increase. For purposes of this calculation, "enacted by the general assembly" shall include any and all bills that are truly agreed to and finally passed within that fiscal year, except bills vetoed by the governor and not overridden by the general assembly. Each individual tax or fee increase shall be measured by

the estimated new annual revenues collected during the first fiscal year that it is fully effective. The term "increase taxes or fees" means any law or laws passed by the general assembly after May 2, 1996, that increase the rate of an existing tax or fee, impose a new tax or fee, or broaden the scope of a tax or fee to include additional class of property, activity, or income, but shall not include the extension of an existing tax or fee which was set to expire.

3. In the event of an emergency, the general assembly may increase taxes, licenses or fees for one year beyond the limit in this subsection under the same procedure specified in section 19 of this article.

4. Compliance with the limit in this section shall be measured by calculating the aggregate actual new annual revenues produced in the first fiscal year that each individual tax or fee change is fully effective.

5. Any taxpayer or statewide elected official may bring an action under the provisions of section 23 of this article to enforce compliance with the provisions of this section. The Missouri supreme court shall have original jurisdiction to hear any challenge brought by any statewide elected official to enforce this section. In such enforcement actions, the court shall invalidate the taxes and fees which should have received a public vote as defined in subsection 1 of this section. The court shall order remedies of the amount of revenue collected in excess of the limit in this subsection as the court finds appropriate in order to allow such excess amounts to be refunded or to reduce taxes and/or fees in the future to offset the excess monies collected.

Section 19. Limits may be exceeded, when, how. The revenue limit of section 18 of this article may be exceeded only if all of the following conditions are met: (1) The governor requests the general assembly to declare an emergency; (2) the request is specific as to the nature of the emergency, the dollar amount of the emergency, and the method by which the emergency will be funded; and (3) the general assembly thereafter declares an emergency in accordance with the specifics of the governor's request by a majority vote for fiscal year 1981-1982, thereafter a two-thirds vote of the members elected to and serving in each house. The emergency must be declared in accordance with this section prior to incurring any of the expenses which constitute the emergency request. The revenue limit may be exceeded only during the fiscal year for which the emergency is declared. In no event shall any part of the amount representing a refund under section 18 of this article be the subject of an emergency request.

Section 20. Limitation on state expenses. No expenses of state government shall be incurred in any fiscal year which exceed the sum of the revenue limit established in sections 18 and 19 of this article plus federal funds and any surplus from a previous fiscal year.

Section 21. State support to local governments not to be reduced, additional activities and services not to be imposed without full state funding. The state is hereby prohibited from reducing the state financed proportion of the costs of any existing activity or service required of counties and other political subdivisions. A new activity or service or an increase in the level of any activity or service beyond that required by existing law shall not be required by the general assembly or any state agency of counties or other political subdivision, unless a state appropriation is made and disbursed to pay the county or other political subdivision for any increased costs.

Section 22. Political subdivisions to receive voter approval for increases in taxes and fees--rollbacks may be required--limitation not applicable to taxes for bonds.

(a) Counties and other political subdivisions are hereby prohibited from levying any tax, license or fees, not authorized by law, charter or self-enforcing provisions of the constitution when this section is adopted or from increasing the current levy of an existing tax, license or fees, above that current levy authorized by law or charter when this section is adopted without the approval of the required majority of the qualified voters of that county or other political subdivision voting thereon. If the definition of the base of an existing tax, license or fees, is broadened, the maximum authorized current levy of taxation on the new base in each county or other political subdivision shall be reduced to yield the same estimated gross revenue as on the prior base. If the assessed valuation of property as finally equalized, excluding the value of new construction and improvements, increases by a larger percentage than the increase in the general price level from the previous year, the maximum authorized current levy applied thereto in each county or other political subdivision shall be reduced to yield the same gross revenue from existing property, adjusted for changes in the general price level, as could have been collected at the existing authorized levy on the prior assessed value.

(b) The limitations of this section shall not apply to taxes imposed for the payment of principal and interest on bonds or other evidence of indebtedness or for the payment of assessments on contract obligations in anticipation of which bonds are issued which were authorized prior to the effective date of this section.

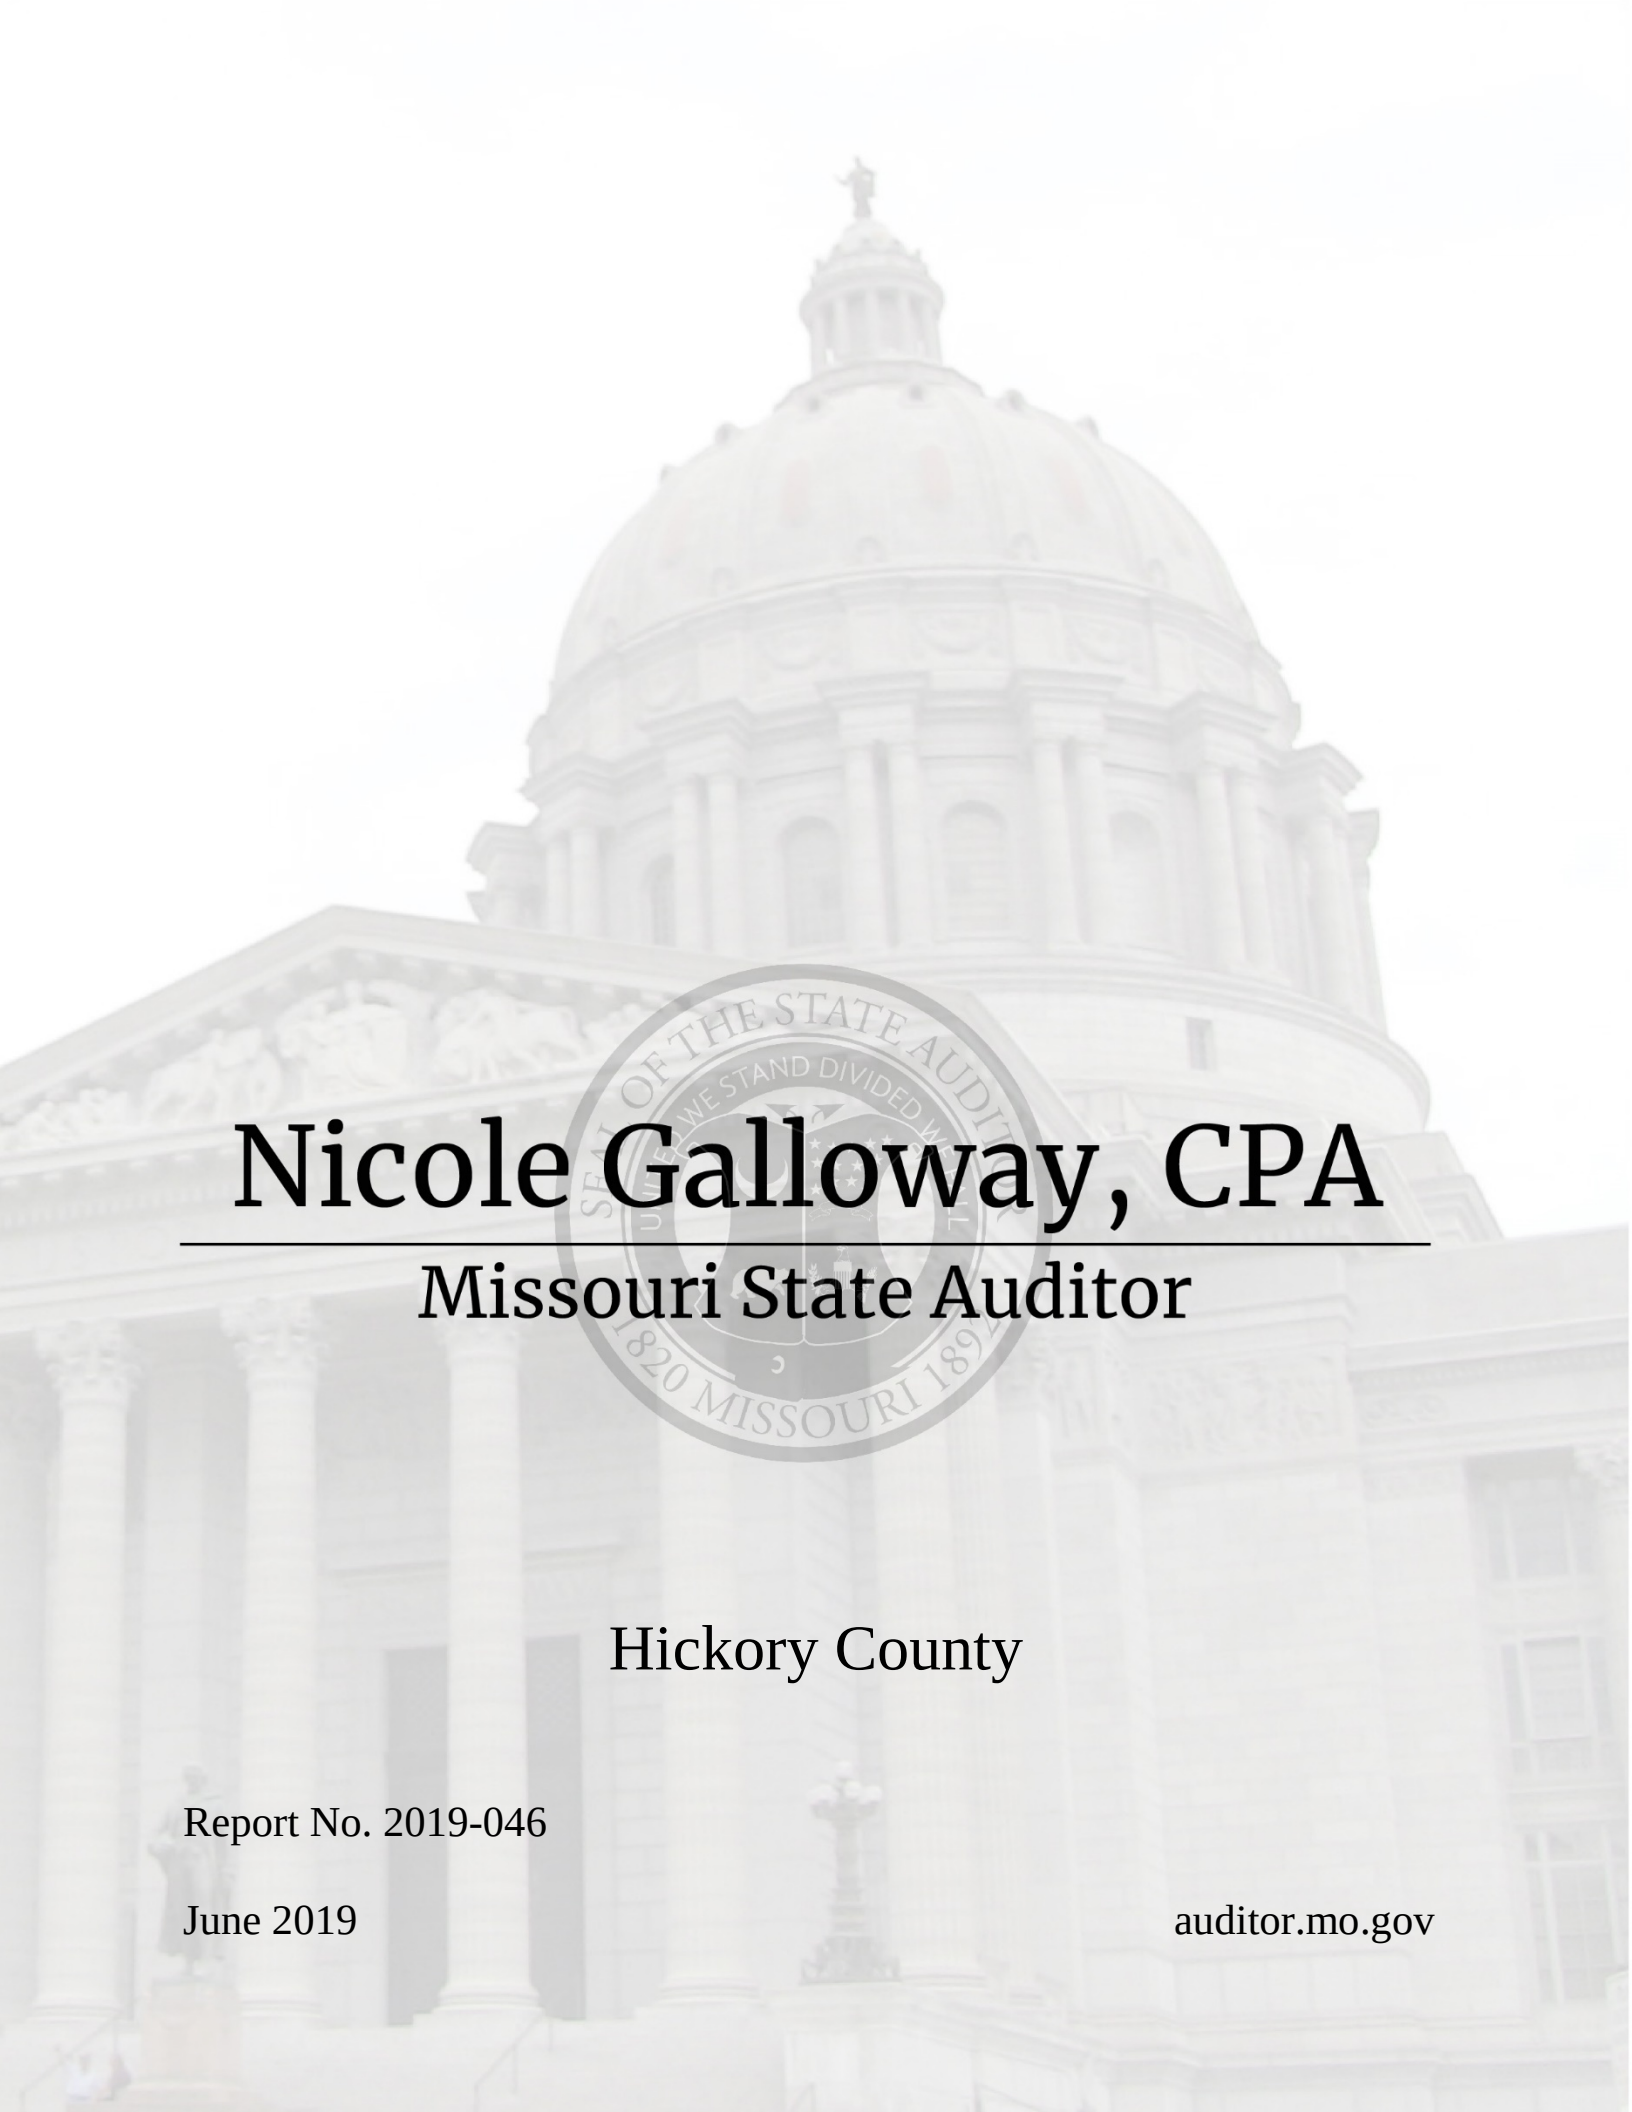
Section 23. Taxpayers may bring actions for interpretations of limitations. Notwithstanding other provisions of this constitution or other law, any taxpayer of the state, county or other political subdivision shall have standing to bring suit in a circuit court of proper venue and additionally, when the state is involved, in the Missouri supreme court, to enforce the provisions of sections 16 through 22, inclusive, of this article and, if the suit is sustained, shall receive from the applicable unit of government his costs, including reasonable attorneys' fees incurred in maintaining such suit.

Section 24. Voter approval requirements not exclusive--self-enforceability.

(a) The provisions for voter approval contained in sections 16 through 23, inclusive, of this article do not abrogate and are in addition to other provisions of the constitution requiring voter approval to incur bonded indebtedness and to authorize certain taxes.

(b) The provisions contained in sections 16 through 23, inclusive, of this article are self-enforcing; provided, however, that the general assembly may enact laws implementing such provisions which are not inconsistent with the purposes of said sections.

* The 1996 amendment added Section 18(e).



Nicole Galloway, CPA
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of Hickory County

Sheriff's Controls and Procedures	Controls and procedures over receipting and depositing need improvement. Receipt slips are not issued for some receipts, deposits of concealed carry weapon permit fees are not always made timely or intact, and checks received are not restrictively endorsed until deposits are prepared. The Sheriff's office did not timely disburse fees and other receipts to the County Treasurer. A monthly list of liabilities was not prepared for the civil account, and consequently, liabilities are not agreed to the reconciled bank balance. A complete and accurate inventory listing of seized property is not maintained and a physical inventory of seized property has not been performed. The Sheriff does not periodically review cases and dispose of related seized property items.
Prisoner Boarding	The Sheriff has not billed surrounding counties for boarding prisoners, has not established a daily housing rate to recover the costs for this service, and has not entered into written agreements with the counties for the services provided.
Assessment Fund Withholdings	The County Collector does not withhold amounts from the county's general property tax collections for the Assessment Fund in compliance with state law.
Electronic Data Security	Controls over county computers are not sufficient. As a result, county records are not adequately protected and are susceptible to unauthorized access or loss of data.
Additional Comments	Because counties are managed by several separately-elected individuals, an audit finding made with respect to one office does not necessarily apply to the operations in another office. The overall rating assigned to the county is intended to reflect the performance of the county as a whole. It does not indicate the performance of any one elected official or county office.

In the areas audited, the overall performance of this entity was **Good**.*

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

Organization and Statistical Information 10

NICOLE GALLOWAY, CPA
Missouri State Auditor

County Commission
and
Officeholders of Hickory County

We have audited certain operations of Hickory County in fulfillment of our duties under Section 29.230, RSMo. In addition, McBride, Lock & Associates, LLC, Certified Public Accountants, was engaged to audit the financial statements of Hickory County for the 2 years ended December 31, 2017. The scope of our audit included, but was not necessarily limited to, the year ended December 31, 2018. The objectives of our audit were to:

1. Evaluate the county's internal controls over significant management and financial functions.

2. Evaluate the county's compliance with certain legal provisions.

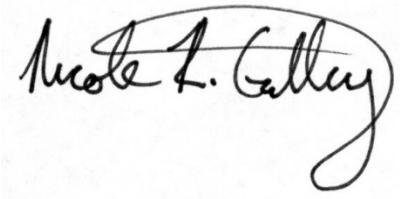
3. Evaluate the economy and efficiency of certain management practices and procedures, including certain financial transactions.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the county, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of applicable contract, grant agreement, or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the county's management and was not subjected to the procedures applied in our audit of the county.

For the areas audited, we identified (1) deficiencies in internal controls, (2) noncompliance with legal provisions, and (3) the need for improvement in management practices and procedures. The accompanying Management Advisory Report presents our findings arising from our audit of Hickory County.



Nicole R. Galloway, CPA
State Auditor

The following auditors participated in the preparation of this report:

Director of Audits:	Randall Gordon, M.Acct., CPA, CGAP
Audit Manager:	Julie A. Moulden, MBA, CPA
In-Charge Auditor:	James C. Kayser, CFE, CGAP
Audit Staff:	Keisha Guthrie
	Joy Stevens, CFE
	Samantha A. Bull

1. Sheriff's Controls and Procedures

Controls and procedures in the Sheriff's office need improvement. The Sheriff's office collected civil paper service fees, concealed carry weapon (CCW) permit fees, inmate monies, and other miscellaneous receipts totaling approximately $46,000 during the year ended December 31, 2018.

1.1 Receipting and depositing

Controls and procedures over receipting and depositing need improvement.

- Receipt slips are not issued for phone card commissions, report copy fees, and civil paper service fees. A log of civil paper service fee receipts is maintained; however, entries are not numbered to help ensure all fees collected have been accounted for properly.

- Deposits of CCW permit fees are not always made timely or intact. For example, $490 of CCW permit fees were collected from April 13, 2018, through July 1, 2018, and a deposit of $430 was made on July 3, 2018. The dispatcher responsible for handling CCW permit fees indicated $60 in cash was withheld from the deposit to establish a change fund for CCW receipts. Our cash count of the CCW change fund on February 20, 2019, totaled $55. The dispatcher could not explain the $5 shortage.

- Checks received are not restrictively endorsed until deposits are prepared. All 5 checks counted during our cash counts on February 20, 2019, totaling $199, had not been restrictively endorsed.

Failure to implement adequate receipting and depositing procedures increases the risk that loss, theft, or misuse of monies received will go undetected. Procedures should be established to ensure receipt slips are issued immediately for all monies received, the receipt slip number is posted to the civil paper service fee log, all monies are deposited timely, and checks are restrictively endorsed immediately upon receipt.

1.2 Disbursements

The Sheriff's office does not timely disburse fees and other receipts to the County Treasurer.

- The Sheriff's office disburses inmate monies received from commissary sales and phone card sales and other receipts approximately every 2 to 3 months to the County Treasurer. In addition, receipts from September and October 2017 totaling $5,037 were disbursed by a check dated February 14, 2018, from the Sheriff's office and not received by the County Treasurer until February 20, 2018. The November and December 2017 receipts totaling $3,295 were disbursed by a check dated January 19, 2018, and not received by the County Treasurer until February 13, 2018, one week before the September and October monies were received.

- CCW permit fees totaling $2,532 received from January to December 2018, were not disbursed to the County Treasurer from the CCW account until February 15, 2019.

Section 50.370, RSMo, requires all county officials who receive fees or any other remuneration for official services to pay such monies monthly to the County Treasurer. Section 50.380, RSMo, indicates the Sheriff may be subject to penalties for failure to timely disburse monies.

1.3 Civil paper service liabilities

The dispatcher responsible for handling the civil account does not prepare a monthly list of liabilities for the account, and consequently, liabilities are not agreed to the reconciled bank balance. The Sheriff's office procedure is to collect civil paper service fees before papers are served. The fees are deposited upon receipt and distributed after the papers are served.

At our request, office personnel prepared a list of all civil paper service fees received, which totaled $1,230 as of April 20, 2019. The Sheriff distributed refunds of $90 for excess fees collected, leaving $1,140 in undistributed collections at that date. The April 20, 2019, check register balance of $3,136, exceeded the identified liabilities, resulting in a balance of $1,996, which represents civil paper service fees collected prior to April 2019 that have not been distributed.

Regular identification and comparison of liabilities to the available cash balance is necessary to ensure accounting records are in balance, all amounts received are disbursed, and monies are available to satisfy all liabilities. Differences must be adequately investigated and explained.

1.4 Seized property

The Sheriff's office has not established adequate controls and procedures over seized property. A complete and accurate inventory listing is not maintained and a physical inventory of seized property has not been performed. In addition, the Sheriff does not periodically review cases and dispose of related seized property items. Some seized property has been held for years.

Two different computerized systems are used to track seized property, and neither of the systems are accurate or complete. Items obtained since August 2018 are maintained in one system and items obtained prior to August 2018 are maintained in the other system. We tested 21 seized property items and identified the following concerns:

- The owner of $116 in cash seized in February 2017 was not identified on the evidence tag or in the old computerized system. In addition, $40 in cash was found in a locked box in the seized property room with a note indicating it was drug buy money. No other information on this money could be located.

- A cell phone seized in September 2018 and entered into the new computerized system could not be located in the evidence room.

- The Sheriff has not disposed of drugs and drug paraphernalia seized on 4 closed cases. The oldest of these items was seized in 2010.

Considering the often sensitive nature of seized property, adequate internal controls are essential and would significantly reduce the risk of loss, theft, or misuse of the property. Complete and accurate inventory control records should be maintained, and periodic physical inventories performed with the results compared to inventory records to ensure seized property is accounted for properly. The use of multiple systems to track seized property is cumbersome and reduces the assurance that all information is accurately recorded and accounted for properly. Section 542.301, RSMo, provides the requirements for the disposition of seized property that has not been forfeited or returned to the claimant.

Similar conditions previously reported

Similar conditions to sections 1.1 and 1.4 were noted in our prior audit report.

Recommendations

The Sheriff:

1.1 Issue receipt slips for all monies received, post receipt slip numbers to the civil paper service fee log, deposit monies timely and intact, and restrictively endorse all checks immediately upon receipt.

1.2 Disburse fees and other receipts to the County Treasurer monthly in accordance with state law.

1.3 Prepare a monthly list of liabilities for the civil account and reconcile the list to the reconciled bank balance. Any differences between accounting records and reconciliations should be promptly investigated and resolved.

1.4 Maintain a complete and accurate seized property evidence log, and ensure a periodic inventory is conducted and reconciled to the seized property evidence log, and investigate any differences. The Sheriff should also make timely and appropriate dispositions of seized property in accordance with state law, and maintain adequate release records.

Auditee's Response

1.1 We will issue receipt slips for all monies received, post receipt slip numbers to the civil paper service fee log, deposit monies timely and intact, and restrictively endorse all checks immediately upon receipt.

1.2 We will disburse fees and other receipts to the County Treasurer monthly in accordance with state law.

1.3 We will prepare a monthly list of liabilities for the civil account, reconcile the list to the reconciled bank balance, and any differences will be promptly investigated and resolved.

1.4 We will maintain a complete and accurate seized property evidence log, will ensure a periodic inventory is conducted and reconciled to the seized property evidence log, and investigate any differences. As Sheriff, I will also make timely and appropriate dispositions of seized property, and maintain adequate release records. Also, I will review any unidentified seized property on hand and obtain written authorization from the court to dispose of applicable property.

2. Prisoner Boarding

The Sheriff has not billed surrounding counties for boarding prisoners, has not established a daily housing rate to recover the costs for this service, and has not entered into written agreements with the counties for the services provided. Such agreements should detail the housing rate to be paid, the services to be provided, or any required notification for emergency or non-routine situations. In addition, the Sheriff has a verbal agreement to allow Hickory County to house prisoners at another jail at no cost if Hickory County will house prisoners for that county at no cost.

The Sheriff housed prisoners for other counties for a total of 176 days during the year ended December 31, 2018. Surrounding counties charge Hickory County $35 and $37 a day to house prisoners. Using those rates, the county did not bill between $6,160 and $6,512 for boarding prisoners for 2018.

Procedures should be established to ensure all amounts owed for prisoner housing are properly billed at a rate sufficient to recover all costs. Section 432.070, RSMo, requires contracts for political subdivisions to be in writing. Written agreements, signed by the parties involved, should specify the services to be rendered and the manner and amount of compensation to be paid. Written contracts are necessary to ensure all parties are aware of their duties and responsibilities and to prevent misunderstandings.

Recommendation

The Sheriff bill surrounding counties for boarding prisoners. In addition, the Sheriff should work with the County Commission to establish billing rates sufficient to recover costs and obtain written agreements with those counties for boarding prisoners.

Auditee's Response

As Sheriff, and with the consent of the County Commission, I have established a daily housing rate of $45.00 per day to recover the costs for boarding prisoners.

Procedures are being established to ensure all amounts owed for prisoner boarding are properly billed to recover all costs incurred by the county. Written contracts will be created to ensure all parties are aware of their duties and responsibilities and to prevent misunderstandings. With the County Commission's help, written agreements will be created and entered into with surrounding counties regarding boarding prisoners.

3. Assessment Fund Withholdings

The County Collector does not withhold amounts from the county's general property tax collections for the Assessment Fund in compliance with state law. For the 2 years ended February 28, 2019, the General Revenue Fund received $9,320 that should have been disbursed to the Assessment Fund.

Section 137.720.1, RSMo, requires a one percent commission on ad valorem property tax collections allocable to each taxing authority be deducted from the collections of taxes each year and deposited into the assessment fund of the county. Section 137.720.3, RSMo, requires an additional one-half percent commission. Adequate monitoring and proper calculation of Assessment Fund withholdings is necessary to ensure compliance with statutory provisions.

Recommendation

The County Collector review Assessment Fund withholdings for past years, calculate the amount owed by the General Revenue Fund, and disburse amounts under withheld to the Assessment Fund.

Auditee's Response

I understand that I incorrectly disbursed funds from tax collections that were not in compliance with state law. I have been doing the same process that I was shown since I was elected in 2011. I have been through other state audits, as was the previous County Collector, and it was never brought to anyone's attention. The County Assessor's office is partially funded by an annual transfer from the General Revenue Fund to the Assessment Fund. The County Assessor's office was not affected by this error.

As of March 2019, we will withhold the 1.5 percent from collections from the county's general property tax collections and disburse that money to the Assessment Fund.

4. Electronic Data Security

Controls over county computers are not sufficient. As a result, county records are not adequately protected and are susceptible to unauthorized access or loss of data.

4.1 Passwords

The County Assessor, Recorder of Deeds, and County Collector have not established adequate password controls to reduce the risk of unauthorized access to computers and data. Employees in the offices of the County Assessor and Recorder of Deeds are not required to change passwords periodically, and employees in the County Collector's office only change their passwords every 6 months.

Passwords are required to authenticate access to computers. The security of computer passwords is dependent upon keeping them confidential. However, since passwords in certain offices are not required to be periodically changed or are changed infrequently, there is less assurance they are effectively limiting access to computers and data files to only those individuals who need access to perform their job responsibilities. Passwords should be confidential and changed periodically to reduce the risk of a compromised password and unauthorized access to and use of computers and data.

A similar condition was noted in our prior 2 audit reports.

4.2 Security controls

Security controls are not in place to lock computers in the offices of the County Assessor, Record of Deeds, and County Collector after a certain period of inactivity.

Inactivity controls are necessary to reduce the risk of unauthorized individuals accessing an unattended computer and having potentially unrestricted access to programs and data files. Without effective security controls, there is an increased risk of unauthorized access to computers and the unauthorized use, modification, or destruction of data.

Recommendations

The County Commission work with other county officials to:

4.1 Require confidential passwords that are periodically changed to prevent unauthorized access to county computers and data.

4.2 Require each county computer to have security controls in place to lock it after a certain period of inactivity.

Auditee's Response

We agree with the State Auditor's recommendations. An updated password policy was approved by the County Commission on June 10, 2019. Our new policy requires passwords to be changed every 90 days and requires computers to lock after a period of inactivity. On June 6, 2019, at 9:30 a.m., a meeting was held with all elected officials. The new policy was reviewed and they all agreed to follow the new policy.

Hickory County
Organization and Statistical Information

Hickory County is a county-organized, third-class county. The county seat is Hermitage.

Hickory County's government is composed of a three-member county commission and separate elected officials performing various tasks. All elected officials serve 4-year terms. The county commission has mainly administrative duties in setting tax levies, appropriating county funds, appointing board members and trustees of special services, accounting for county property, maintaining county roads and bridges, and performing miscellaneous duties not handled by other county officials. Principal functions of these other officials relate to law enforcement, property assessment, property tax collections, conduct of elections, and maintenance of financial and other records important to the county's citizens. In addition to elected officials, the county employed 30 full-time employees and 10 part-time employees on December 31, 2018.

Elected Officials

The elected officials and their compensation paid for the year ended December 31 (except as noted) are indicated below:

Officeholder	2019	2018
Robert Sawyer, Presiding Commissioner	$	27,080
Chase Crawford, Associate Commissioner		25,080
Rick Pearson, Associate Commissioner		25,080
Pamela Hutton, Recorder of Deeds		38,000
Jeanne Lindsey, County Clerk		38,000
J. Michael Brown, Prosecuting Attorney		45,000
W. Brian Whalen, Sheriff		43,000
Kenny Ratliff, County Treasurer		38,000
Connie Boller, County Coroner		11,000
Venessa Prettyman, Public Administrator		20,000
Karen Stokes, County Collector, year ended February 28,	38,000	
Clint D. Baker, County Assessor, year ended August 31,		39,462

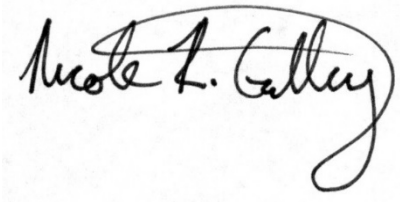
NICOLE GALLOWAY, CPA
Missouri State Auditor

Honorable Michael L. Parson, Governor
and
Members of the General Assembly
Jefferson City, Missouri

The primary objective of this compilation is to report the filing status for political subdivisions other than cities, towns, and villages, required to file a financial report, under Section 105.145, RSMo, and 15 CSR 40-3.030. Section 105.145, RSMo, provides that the State Auditor's Office notify the Department of Revenue if any political subdivision fails to timely submit a copy of its annual financial report. Because of different filing requirements, a separate report is issued for cities, towns, and villages.

The filing status for the 9 political subdivisions required to file a financial report by May 31, 2019, is presented in summary on page 3 and by individual entity in Appendix A. We have not audited the reports submitted and, accordingly, do not express an opinion or any other assurance on them.

This report also includes the updated filing status for political subdivisions, other than cities, towns, and villages, that filed a financial report in May 2019, after their filing deadline. The filing status for these 11 entities is presented in summary on page 3 and by individual entity in Appendix B-C.



Nicole R. Galloway, CPA
State Auditor

Senior Analyst:	Jill Wilson, MBA

Monthly Report on Political Subdivision Filings
May 2019
Executive Summary

Executive Summary

Section 105.145, RSMo, requires the governing body of each political subdivision in the state, except counties and school districts, to prepare and remit to the state auditor an annual report of financial transactions. 15 CSR 40-3.030 requires the financial report to be remitted to the state auditor within 6 months of the end of the political subdivision's fiscal year. The State Auditor's Office posts individual annual financial reports to its website. A searchable link is available at http://auditor.mo.gov.

Section 105.145, RSMo, requires the state auditor to notify the Department of Revenue if any political subdivision fails to timely submit a copy of its annual financial report. Any political subdivision that fails to timely submit the annual financial report shall be subject to a fine of $500 per day upon notice by the Department of Revenue, except transportation development districts with a gross revenues less than $5,000 in the fiscal year of the annual financial report.

This report includes the filing status for the 9 political subdivisions, other than cities, towns, and villages, with a fiscal year end of November 30, 2018. Cities, towns, and villages have additional filing requirements and their reporting status is included in a separate report. Of the 9 political subdivisions, 5 filed an annual financial report timely.

This report also includes the filing status for 11 political subdivisions, other than cities, towns, and villages, that filed their financial report in May 2019, after their filing deadline.

NICOLE GALLOWAY, CPA
Missouri State Auditor

Honorable Michael L. Parson, Governor
and
Members of the General Assembly
Jefferson City, Missouri

The primary objective of this compilation is to report the filing status for the municipalities required to file a financial report by May 31, 2019, under Section 105.145, RSMo, and 15 CSR 40-3.030, and, when applicable, an addendum under Section 479.359, RSMo, and 15 CSR 40-3.170 and a municipal court certification under Section 479.360, RSMo, and 15 CSR 40-3.180.

Section 105.145, RSMo, provides that the State Auditor's Office (SAO) notify the Department of Revenue if any city, town, or village fails to timely submit a copy of its annual financial report. Additionally, Section 479.362, RSMo, provides that the SAO notify the Department of Revenue whether counties, cities, towns, and villages have timely filed under Sections 479.359 and 479.360, RSMo. Because of different filing requirements, a separate report is issued for all other political subdivisions required to file a financial report.

The filing status for 2 cities is presented in summary on page 3 and by individual entity in Appendix A. This compilation is limited to presenting information submitted to our office. We have not audited the information submitted and, accordingly, do not express an opinion or any other form of assurance on it.

This report includes the updated filing status for municipalities that filed at least one of the items (financial report, addendum, or certification) in May 2019, after their filing deadline. The filing status for these 14 cities is presented in summary on pages 4 and by individual entity in Appendixes B to D.

General Counsel:	Paul Harper, JD
Senior Analyst:	Jill Wilson, MBA

Executive Summary

Section 105.145, RSMo, requires the governing body of each political subdivision, except counties and school districts, in the state to prepare and remit to the state auditor an annual report of financial transactions. 15 CSR 40-3.030 requires the financial report to be remitted to the state auditor within 6 months of the end of the political subdivision's fiscal year. The State Auditor's Office (SAO) posts individual annual financial reports to its website. A searchable link is available at http://auditor.mo.gov.

Section 105.145, RSMo, requires the state auditor to notify the Department of Revenue if any political subdivision fails to timely submit a copy of its annual financial report. Any political subdivision that fails to timely submit the annual financial report shall be subject to a fine of $500 per day upon notice by the Department of Revenue, except transportation development districts with a gross revenues less than $5,000 in the fiscal year of the annual financial report.

Section 479.359.1, RSMo, requires every county, city, town, and village to annually calculate the percentage of its annual general operating revenue received from fines, bond forfeitures, and court costs for minor traffic violations.

Section 479.359.3, RSMo, provides that all entities having a municipal court file an addendum to the annual financial report containing items listed in 15 CSR 40-3.170, which also provides the procedures to file an addendum.

Section 479.360, RSMo, requires every county, city, town, and village that has a municipal court to file, with its annual financial report, a certification of substantial compliance with 10 municipal court procedures. This certification must be signed by the municipal court judge. 15 CSR 40-3.180 provides the procedure to file the municipal court certification. Any county, city, town, or village that does not have a municipal court judge is not required to file a certification.

Section 479.362, RSMo, requires that the SAO notify the Department of Revenue whether counties, cities, towns, or villages have timely filed their addendums under Section 479.359 and certificates of substantial compliance under Section 479.360, RSMo. Section 479.368, RSMo, provides penalties for counties, cities, towns, and villages that fail to file, including loss of revenue and mandatory ballot measure to dissolve the political subdivision.

This report includes the filing status for the 2 cities with a fiscal year end of November 30, 2018, whose financial reports, addendums, or certifications were due by May 31, 2019. Of the 2 municipalities required to file an annual financial report, both filed the report timely. Of the 2 municipalities required to file an addendum, 1 filed an addendum timely. One municipality was required to file a certification and filed the certification timely.

This report includes the filing status for 14 cities that filed at least one of the items (financial report, addendum, or certification) in May 2019, after their filing deadline. Of these entities, 6 filed an annual financial report, 8 filed an addendum, and 5 filed a certification.

Nicole Galloway, CPA

Missouri State Auditor

Howell County

Report No. 2019-043

June 2019

auditor.mo.gov

Nicole Galloway, CPA
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of Howell County

Sheriff's Controls and Procedures	The Sheriff's office has not established adequate procedures for depositing and refunding inmate monies. Sheriff's office personnel do not prepare a monthly list of liabilities to reconcile to the available cash balance for the commissary account. Records of commissary net proceeds are not maintained and distribution of net proceeds to the County Treasurer for deposit into the county Inmate Prisoner Detainee Security Fund are not made monthly as required by state law. Inventory procedures have not been developed by the Sheriff's office for electronic cigarettes and telephone cards sold to inmates. Procedures over prisoner board billings need improvement.
Property Tax System Controls and Procedures	The county has not adequately restricted property tax system access. Personnel in the County Collector's office has access rights in the property tax system to make changes such as addition, abatements, and deletions, but can also make corrections or changes to information entered into the property tax system.
County Collector's Controls and Procedures	The County Collector improperly withholds and personally retains commissions on surtax and railroad and utility taxes collected for cities.
Electronic Data Security	The County Clerk, County Collector, County Treasurer, County Assessor, Recorder of Deeds, Public Administrator, and Sheriff have not established adequate password controls to reduce the risk of unauthorized access to computers and data. Security controls are not in place to lock computers in the offices of the County Clerk, County Collector, County Treasurer, County Assessor, Recorder of Deeds, or Sheriff after a specified number of incorrect logon attempts or after a certain period of inactivity.
Personnel Policies	The County Commission has not adopted formal policies regarding the maximum amount of compensatory time allowed to be accrued for all employees to ensure policies are in accordance with the Fair Labor Standards Act.
Additional Comments	Because counties are managed by several separately-elected individuals, an audit finding made with respect to one office does not necessarily apply to the operations in another office. The overall rating assigned to the county is intended to reflect the performance of the county as a whole. It does not indicate the performance of any one elected official or county office.

In the areas audited, the overall performance of this entity was **Good**.*

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

Organization and Statistical Information 11

NICOLE GALLOWAY, CPA
Missouri State Auditor

County Commission
and
Officeholders of Howell County

We have audited certain operations of Howell County in fulfillment of our duties under Section 29.230, RSMo. In addition, Deidiker Accounting & Consulting, LLC, Certified Public Accountants, was engaged to audit the financial statements of Howell County for the year ended December 31, 2017. The scope of our audit included, but was not necessarily limited to, the year ended December 31, 2017. The objectives of our audit were to:

1. Evaluate the county's internal controls over significant management and financial functions.

2. Evaluate the county's compliance with certain legal provisions.

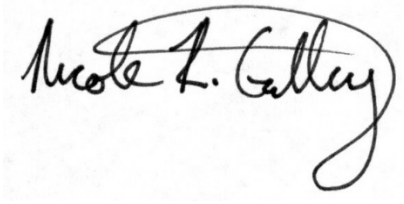
3. Evaluate the economy and efficiency of certain management practices and procedures, including certain financial transactions.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the county, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of applicable contract, grant agreement, or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the county's management and was not subjected to the procedures applied in our audit of the county.

For the areas audited, we identified (1) deficiencies in internal controls, (2) noncompliance with legal provisions, and (3) the need for improvement in management practices and procedures. The accompanying Management Advisory Report presents our findings arising from our audit of Howell County.



Nicole R. Galloway, CPA
State Auditor

The following auditors participated in the preparation of this report:

Director of Audits:	Randall Gordon, M.Acct., CPA, CGAP
Audit Manager:	Todd M. Schuler, CPA
	Deborah Whitis, MBA, CPA, CIA, CFE
In-Charge Auditor:	Troy Royer
Audit Staff:	Misty Bowen, MSED
	Kent Aaron Dauderman, M.Acct., CPA, CGAP
	Ethan D. Evans

1. Sheriff's Controls and Procedures

Controls and procedures in the Sheriff's office need improvement. The office processed inmate monies, paper service fees, concealed carry weapon permit fees, bonds, and other miscellaneous receipts totaling approximately $339,000 during the year ended December 31, 2017.

1.1 Depositing and refunding inmate monies

The Sheriff's office has not established adequate procedures for depositing and refunding inmate monies. Office personnel typically only make one deposit each month for this money. The deposit made on March 27, 2017, totaling $4,793, represented receipts occurring between February 24, 2017, and March 26, 2017. In addition, the Sheriff's office does not always refund inmates their money upon release. At August 15, 2018, the county held $4,758 for released inmates.

Failure to implement adequate depositing and refunding procedures increases the risk that loss, theft, or misuse of monies received will go undetected. Proper depositing and refunding procedures are necessary to ensure all monies are handled and accounted for properly.

1.2 Commissary liabilities

Sheriff's office personnel do not prepare a monthly list of liabilities to reconcile to the available cash balance for the commissary account.

We requested office personnel prepare a list of liabilities for the account as of December 31, 2017. The list totaled $6,821, which included $5,896 of inmate monies and $925 due to the commissary vendor. The reconciled bank balance was $44,729, resulting in an overage of $37,908, which possibly represents commissary net proceeds. However, there is no documentation supporting the amount of net proceeds in the account.

Monthly lists of liabilities should be prepared and reconciled to cash balances to ensure records are in balance, errors are detected and corrected timely, and sufficient cash is available for the payment of all liabilities. Prompt follow up on discrepancies is necessary to resolve errors and ensure monies are properly disbursed. In addition, without a record of commissary net proceeds, the Sheriff cannot reconcile liabilities to cash balances to detect possible errors.

1.3 Commissary net proceeds

Records of commissary net proceeds are not maintained and distribution of net proceeds to the County Treasurer for deposit into the county Inmate Prisoner Detainee Security Fund are not made monthly as required by state law. All commissary net proceeds from commissary sales are retained with the inmate monies in the commissary bank account. Net proceeds totaling $51,263, were disbursed to the County Treasurer on June 22, 2018. Office personnel indicated this amount represented net proceeds from January 2017 through May 2018, however, they did not have any records to support how it was determined.

Section 221.102, RSMo, requires each county jail to keep revenues from its commissary in a separate account and pay for goods and other expenses from

that account, allows retention of a minimum amount of money in the account for cash flow purposes and current expenses, and requires deposit of the remaining funds (net proceeds) of the commissary account into the county Inmate Prisoner Detainee Security Fund held by the County Treasurer. In addition, Section 50.370, RSMo, requires county officials to turn over all fees to the County Treasurer monthly.

1.4 Commissary procedures

Inventory procedures have not been developed by the Sheriff's office for electronic cigarettes and telephone cards sold to inmates. A record is maintained to track who made purchases, but no records of inventory purchased and items remaining on hand are maintained.

Loss, theft, or misuse of the commissary inventory may go undetected without adequate inventory records and procedures. Detailed inventory records are necessary to adequately account for commissary inventory.

1.5 Prisoner boarding

Procedures over prisoner board billings need improvement.

- The Sheriff has not entered into written agreements with surrounding counties or cities for boarding prisoners. Such agreements should include the housing rate to be paid, the services to be provided, or any required notification for emergency or non-routine situations. The Sheriff has established verbal agreements with some jurisdictions (cities and counties) to allow Howell County to house prisoners at their jails at no cost if Howell County does the same for those jurisdictions.

  Section 432.070, RSMo, requires contracts for political subdivisions to be in writing. Written agreements, signed by the parties involved, should specify the services to be rendered and the manner and amount of compensation to be paid. Written contracts are necessary to ensure all parties are aware of their duties and responsibilities and to prevent misunderstandings. In addition, to ensure the county is billing at a rate that adequately recovers all costs, amounts charged for incarceration should be analyzed periodically and compared to billing rates.

- The Sheriff does not have procedures to follow up on unpaid prisoner incarceration billings to cities and counties. A spreadsheet is maintained to document amounts due from other cities and counties. This spreadsheet also includes amounts due from the state, courts, or the prisoner. Payers are requested to submit payment to the County Treasurer and when payments are received, the County Treasurer indicated she receipts the payment and provides a copy of the payment received, along with a copy of the receipt to the Sheriff's office. While payments received are posted to the spreadsheet, no follow up procedures are in place when payment is not received. Due to how the spreadsheet is maintained, office personnel cannot easily determine outstanding incarceration costs.

Procedures such as independent reconciliations of billing records to jail records and payments received should be established to ensure prisoner housing is properly billed and payments received are proper. Unpaid board bills should be monitored and appropriate follow-up action should be taken to ensure payment is properly received. Failure to monitor unpaid amounts due may result in a loss of revenue to the county.

Similar conditions previously reported

Similar conditions to sections 1.1 and 1.2 were noted in our 2 prior audit reports.

Recommendations

The Sheriff:

1.1 Deposit inmate monies timely and establish procedures to ensure the money is refunded upon release.

1.2 Prepare a monthly list of liabilities for the commissary account and reconcile it to the available cash balance. Any differences between accounting records and reconciliations should be promptly investigated and resolved.

1.3 Ensure existing and future commissary net proceeds not necessary to meet cash flow needs or current operating expenses are disbursed to the County Treasurer monthly for deposit in the Inmate Prisoner Detainee Security Fund.

1.4 Maintain accurate commissary transaction records and reconcile these records to inventory purchased and sold.

1.5 Work with the County Commission to obtain written agreements with counties and cities for boarding prisoners. In addition, the Sheriff and the County Commission should periodically review the costs of boarding prisoners and establish billing rates sufficient to recover costs. In addition, develop procedures to track, monitor, and pursue collection of costs for boarding prisoners.

Auditee's Response

1.1 We agree and will look into depositing more timely. We will also look into turning over old inmate monies held to the State Treasurer's Office and we have implemented a debit card system for returning inmate monies upon release.

1.2 We will start a spreadsheet of liabilities to document the amounts in our bank account and reconcile that list to the bank statement monthly.

1.3 We will determine a minimum amount to run the commissary and turn over the remaining net proceeds to the County Treasurer at least quarterly.

1.4 We agree and will implement.

1.5 We will work with the County Commission and determine a recommendation on a uniform process to handle contracts for boarding prisoners. We will also periodically review costs for boarding prisoners and determine rates, and we will expand our procedures for tracking and collecting billings for boarding prisoners.

2. Property Tax System Controls and Procedures

Controls and procedures over the property tax system need improvement. The County Collector processed property tax collections totaling approximately $22.2 million during the year ended February 28, 2018.

The county has not adequately restricted property tax system access. Personnel in the County Collector's office has access rights in the property tax system to make changes such as additions, abatements, and deletions, but can also make corrections or changes to information entered into the property tax system. Because the County Collector is responsible for collecting tax monies, the ability of personnel within this office to make changes to the property tax system represents a significant weakness in internal controls. Good internal controls require the County Collector and other office personnel not have access rights allowing alteration or deletion of information. Although all changes are printed by the County Assessor and sent to the County Clerk's office for review, neither the County Clerk nor the County Commission reviews the changes made in the property tax system.

Sections 137.260 and 137.270, RSMo, assign responsibility to the County Clerk for making changes to the tax books with the approval of the County Commission. If it is not feasible for the County Clerk to make corrections to the tax books, an independent reconciliation of approved changes to actual changes made to the property tax system would help ensure changes are proper.

A similar condition was noted in our 2 prior audit reports.

Recommendation

The County Commission and the County Clerk develop procedures to ensure all property tax changes are properly approved and monitored. In addition, the County Commission should work with the County Collector to ensure property tax system access rights are limited to only what is needed for the users to perform their job duties and responsibilities.

Auditee's Response

New procedures have been implemented by the County Clerk to ensure all abatements are properly accounted for and approved by the County

Commission. We plan over the next 2 years to assess how effective these procedures are and reevaluate the County Collector's access to the property tax system.

3. County Collector's Controls and Procedures

The County Collector improperly withholds and personally retains commissions on surtax and railroad and utility taxes collected for cities. These commissions totaled $3,738 for the year ended February 28, 2018.

The collection of surtax and railroad and utility taxes is a part of the County Collector's statutorily required duties, and he should not receive additional compensation for collecting these taxes. However, the County Collector withholds and personally retains a 3 percent commission from surtax and railroad and utility taxes for the cities of West Plains and Willow Springs.

The County Collector has written agreements with cities for property tax collection services, which provide for him to personally retain a 3 percent collector commission on all city tax collections. Because the collection of surtax and railroad and utility taxes is a statutorily required duty, these contract terms conflict with state law and the County Collector should not receive this additional compensation. The County Collector would collect surtax and railroad and utility monies for these cities even if he did not collect taxes for them.

Section 151.180, RSMo, requires the County Collector to collect all railroad taxes and Section 151.280, RSMo, requires the County Collector to withhold and pay a 1 percent commission on these taxes to the county's General Revenue Fund. Section 153.030, RSMo, requires utility taxes to be levied and collected in the same manner as railroad taxes. The collection of surtax, including those amounts distributed to the cities, is a statutory responsibility of county collectors under Section 139.600, RSMo, and commissions retained on surtax collections should be distributed to the county's General Revenue Fund.

Recommendation

The County Collector discontinue personally retaining commissions withheld on surtax and railroad and utility taxes and distribute these collections in accordance with state law.

Auditee's Response

I will discuss this recommendation with legal counsel and take it under advisement.

4. Electronic Data Security

Controls over county computers are not sufficient. As a result, county records are not adequately protected and are susceptible to unauthorized access or loss of data.

4.1 Passwords

The County Clerk, County Collector, County Treasurer, County Assessor, Recorder of Deeds, Public Administrator, and Sheriff have not established

adequate password controls to reduce the risk of unauthorized access to computers and data. Employees in these offices are not required to use passwords with a minimum number of characters and/or change passwords periodically. In addition, the County Collector and his employees share the same password.

Passwords are required to authenticate access to computers. The security of computer passwords is dependent upon keeping them confidential. However, since passwords do not have to contain a minimum number of characters or do not have to be periodically changed in certain offices and are shared by employees in the County Collector's office, there is less assurance they are effectively limiting access to computers and data files to only those individuals who need access to perform their job responsibilities. Passwords should be confidential, changed periodically, and contain a minimum number of characters to reduce the risk of a compromised password and unauthorized access to and use of computers and data.

A similar condition was noted in our 2 prior audit reports.

4.2 Security controls

Security controls are not in place to lock computers in the offices of the County Clerk, County Collector, County Treasurer, County Assessor, Recorder of Deeds, or Sheriff after a specified number of incorrect logon attempts or after a certain period of inactivity.

Logon attempt controls lock the capability to access a computer after a specified number of consecutive unsuccessful logon attempts and are necessary to prevent unauthorized individuals from continually attempting to logon to a computer by guessing passwords. Inactivity controls are necessary to reduce the risk of unauthorized individuals accessing an unattended computer and having potentially unrestricted access to programs and data files. Without effective security controls, there is an increased risk of unauthorized access to computers and the unauthorized use, modification, or destruction of data.

Recommendations

The County Commission work with the other county officials to:

4.1 Require each employee to have a confidential password with a minimum number of characters that is periodically changed.

4.2 Require each county computer to have security controls in place to lock it after a specified number of incorrect logon attempts or after a certain period of inactivity.

Auditee's Response

We will work with all county officials to implement these recommendations.

5. Personnel Policies

The County Commission has not adopted formal policies regarding the maximum amount of compensatory time allowed to be accrued for all employees to ensure policies are in accordance with the Fair Labor Standards Act (FLSA). Three Road and Bridge employees exceeded 240 hours of compensatory time as of December 31, 2017. As of August 20, 2018, two of these employees still had balances in excess of 240 hours with one having a balance of 341 hours and the other a balance of 351 hours. The third employee had no remaining hours. The FLSA allows emergency personnel to accrue 480 hours of compensatory time while 240 hours of compensatory time can be accrued for non-emergency personnel.

Complete and up-to-date personnel policies are necessary to ensure compliance and equitable treatment of employees and should address pertinent issues such as compensatory time and employment of related employees. Policies should also comply with applicable state or federal requirements.

Recommendation

The County Commission revise the personnel policies to adequately address compensatory time.

Auditee's Response

We will continue to monitor compensatory time balances and look into procedures to address any balances that exceed 240 hours. These 2 employees have been paid their excess compensatory time. This situation was due to flooding that occurred in 2017. We will discuss the need to make a formal change to our policy.

Howell County
Organization and Statistical Information

Howell County is a county-organized, third-class county. The county seat is West Plains.

Howell County's government is composed of a three-member county commission and separate elected officials performing various tasks. All elected officials serve 4-year terms. The county commission has mainly administrative duties in setting tax levies, appropriating county funds, appointing board members and trustees of special services, accounting for county property, maintaining county roads and bridges, and performing miscellaneous duties not handled by other county officials. Principal functions of these other officials relate to law enforcement, property assessment, property tax collections, conduct of elections, and maintenance of financial and other records important to the county's citizens. In addition to elected officials, the county employed 105 full-time employees and 20 part-time employees on December 31, 2017.

In addition, county operations include the Senate Bill 40 Board.

Elected Officials

The elected officials and their compensation paid for the year ended December 31 (except as noted) are indicated below:

Officeholder	2018	2017
Mark B. Collins, Presiding Commissioner	$	36,198
Bill Lovelace, Associate Commissioner		33,915
Billy Sexton, Associate Commissioner		33,915
Jeffrey (Jeff) Brasier, Recorder of Deeds		47,104
Sharon Trowbridge, Recorder of Deeds (1)		4,282
Dennis K. Von Allmen, County Clerk		51,386
Michael P. Hutchings, Prosecuting Attorney		62,805
James M. (Mike) Shannon, Sheriff		57,095
Nancy Franz, County Treasurer		51,386
James T. Tim Cherry, County Coroner		18,271
John Pruett, Public Administrator		51,386
Larry Spence, County Collector (2), year ended February 28,	84,046	
Daniel Franks, County Assessor, year ended August 31,		51,386
Ralph Riggs, County Surveyor (3)		

(1) Sharon Trowbridge served as Recorder of Deeds until January 31, 2017.
(2) Includes $32,673 of commissions earned for collecting city property taxes.
(3) Compensation on a fee basis.

Financing Arrangements

The county entered into a lease-purchase agreement with the Public Building Corporation of Howell County (corporation) on August 24, 2017. The terms of the agreement called for the corporation to obtain a loan of $155,000 for

the purpose of acquiring a building for road and bridge maintenance and for the corporation to lease the facility back to the county for payments totaling the principal, interest and administrative costs due on the outstanding loan. The loan is scheduled to be paid off in December 2032. The remaining principal and interest due at December 31, 2017, was $155,000 and $36,686, respectively.

Missouri State Auditor

De Soto School District #73

Report No. 2019-042

June 2019

auditor.mo.gov

Nicole Galloway, CPA
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of De Soto School District #73

District Compensation	District employees received stipends not included on Board of Education approved salary schedules. December 2017 professional development stipends may be unreasonable and some were unsupported. Some manual calculations to determine compensation were not reviewed for accuracy resulting in overpayments. Hours recorded in the district time clock system for classified employees are not always used to support their compensation and overtime hours are not always recorded in the time clock system to support overtime payments. The district has no documented basis for the Superintendent's $500 monthly vehicle allowance and did not report the extra compensation on his W-2 form. The district does not calculate and report the value of personal (commuting) mileage on employee W-2 forms as a fringe benefit.
Personnel Procedures, Records, and Policies	Several of the district's personnel procedures are not performed in accordance with Board policy. Accumulated compensatory time balances are not adequately tracked. The district does not always document how teacher absences are filled.
Cash Handling and Accounting Controls and Procedures	Weaknesses exist in receipting, transmitting, and depositing monies received at some schools. Accounting controls for district athletic events and concession sales need improvement.
Procurement Procedures, Contracts, and Disbursements	The district did not maintain documentation supporting some procurement decisions and did not always retain quotes received. The district has not periodically solicited proposals for legal services or formally evaluated those services. The district does not always monitor contracts effectively or enter into written contracts when appropriate. Disbursement documentation was not adequately detailed and mileage reimbursements were not always submitted timely. The district did not prepare 1099-MISC forms for payments to its law firm or 3 medical service vendors.
Budgets	The Board did not amend the district's budget prior to or when actual disbursements exceeded budgeted amounts.
Closed Meeting Minutes	The Board did not document its discussion of all topics listed as reasons for going into closed session.
Vineland Elementary Booster Organization	The Vineland Elementary Booster Organization (VBO) maintained funds in a bank account outside the district's control. The VBO did not consistently document meeting minutes and the meeting minutes were incomplete.
Homebound Attendance	The district incorrectly reported the attendance of homebound students for the 2017-2018 school year. In addition, records maintained to document homebound instruction provided were not sufficient.
Emergency Drills	The district did not have sufficient documentation to demonstrate that all required emergency drills were performed in accordance with policy.
Capital Assets and Fuel Use	The district did not record all capital asset purchases. The district did not reconcile fuel logs to fuel billings during the 2017-2018 school year.

Cafeteria Meals Charges	The district has not updated Board policy to agree with current procedures and did not always monitor collection activity on student cafeteria meal charges.
Subsequent Event	In April 2019, subsequent to our exit conference, the district was notified of irregularities in the handling of student meal monies at one school. A vendor employee opened envelopes that contained student meal monies, recorded the receipts in the accounting system, and prepared the deposit without a sufficient supervisory review.

In the areas audited, the overall performance of this entity was **Fair**.*

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

Organization and Statistical Information 23

NICOLE GALLOWAY, CPA
Missouri State Auditor

Board of Education
De Soto School District #73

The State Auditor was petitioned under Section 29.230, RSMo, to audit the De Soto School District #73. We have audited certain operations of the district in fulfillment of our duties. The district engaged Daniel Jones & Associates, Certified Public Accountants (CPAs), to audit the district's financial statements for the year ended June 30, 2018. To minimize duplication of effort, we reviewed the CPA firm's audit report. The scope of our audit included, but was not necessarily limited to, the year ended June 30, 2018. The objectives of our audit were to:

1. Evaluate the district's internal controls over significant management and financial functions.

2. Evaluate the district's compliance with certain legal provisions.

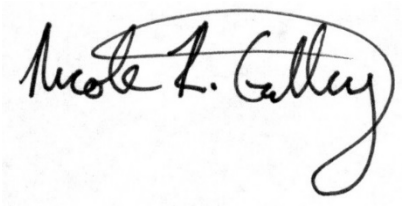
3. Evaluate the economy and efficiency of certain management practices and procedures, including certain financial transactions.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the district, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of applicable contract, grant agreement, or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the district's management and was not subjected to the procedures applied in our audit of the district.

For the areas audited, we identified (1) deficiencies in internal controls, (2) noncompliance with legal provisions, and (3) the need for improvement in management practices and procedures. The accompanying Management Advisory Report presents our findings arising from our audit of the De Soto School District #73.



Nicole R. Galloway, CPA
State Auditor

The following auditors participated in the preparation of this report:

Director of Audits:	Kelly Davis, M.Acct., CPA, CFE
Audit Manager:	Chris Vetter, CPA
In-Charge Auditor:	Robert McArthur II
Audit Staff:	Sheldon Hayes
	Rachel Cline, M.S. Acct., CPA
	Dacia Rush, M.Acct., CFE

1. District Compensation

We identified problems with the documentation, approval, and reasonableness of the compensation for various district employees.

District compensation totaled approximately $16.4 million for the 2017-2018 school year and $16.7 million for the 2016-2017 school year.

1.1 Stipends, supporting documentation, and manual calculations

District employees received stipends not included on Board of Education approved salary schedules (i.e. employee or extra-duty). December 2017 professional development stipends may be unreasonable and some were unsupported. In addition, some manual calculations made to determine compensation were not reviewed for accuracy resulting in overpayments.

- Stipend payments totaling approximately $192,000 for the 2017-2018 school year were not included on Board approved salary schedules. These stipends included additional pay for homebound instruction, grant collaboration, family/grandparent night, training and workshops, and additional tasks or support. The Superintendent indicated the stipends were included in the Board approved budgets, but the amounts were only included in total and/or did not list the individual stipend amount.

- In August 2017, the Board approved a $600 professional development stipend for all full-time staff completing a minimum of 6 hours of professional development tasks/work items by December 1, 2017. The rate of $100 per hour for the minimum required hours far exceeded most staff's approved hourly rate of pay. In addition, staff were required to complete the professional development during non-school hours (i.e. mornings, evenings, or weekends). However, supporting documentation did not always indicate the task or work item performed or the time when the professional development was completed. The stipends totaled approximately $206,000 for the 2017-2018 school year.

- Manually calculated payments to 2 of 47 employees were inaccurate. We reviewed 47 personnel files and related payroll disbursements for the 2017-2018 and 2016-2017 school years. One employee was paid twice for the same day's work after changing to a new position. As a result, the employee was overpaid $101. The other employee was paid twice for 12 sick leave days. Board policy requires annual payment of accumulated sick days over 150. The employee was overpaid for 12 sick days at a rate of $50 per day, or $600.

All compensation should be approved by the Board and included on salary schedules as necessary to ensure all employees are treated fairly and equitably and salaries are calculated consistently and are reasonable. In addition, adequate supporting documentation should be maintained to support all compensation and review of payroll disbursements is necessary to ensure all payroll transactions are accurate and accounted for properly. Without detailed

reviews of payroll documentation there is less assurance payments to employees are accurate.

1.2 Time reporting

Hours recorded in the district time clock system for classified employees are not always used to support their compensation. In addition, overtime hours are not always recorded in the time clock system to support overtime payments.

Classified employees are required to record their time in and out in the electronic time clock system, but the hours recorded in the system are not used to support their pay. Instead, the employees' established annual compensation is divided into 12 monthly payments. During our review we noted 14 employees, primarily custodial and maintenance staff, who received their full monthly compensation despite having less than 40 hours per week recorded in the time clock system.

In addition, because overtime is not always recorded in the time clock system, there was no way to verify the accuracy of overtime payments. For several of the same custodial and maintenance staff, overtime was manually approved on a payroll department change form. However, this form did not include the days the overtime was earned and/or the timeframe worked. Overtime payments totaled approximately $14,000 for the 2017-2018 school year.

According to a district official, the district has implemented a new time clock system for the 2018-2019 school year and employee compensation will be paid based on the hours recorded in the system.

To adequately account for all payroll expenses and ensure the accuracy of hours worked, the district should fully use its time clock system. In addition, the Fair Labor Standards Act (FLSA) requires records of actual time worked by employees be maintained.

1.3 Superintendent vehicle allowance

The district has no documented basis for the Superintendent's $500 monthly vehicle allowance and did not report the extra compensation on his W-2 form. The vehicle allowance, which is included in the Superintendent's contract, is intended to compensate him for driving his personal vehicle to conduct district business. Using the district's mileage rate of $0.485 per mile, the Superintendent would have to travel approximately 1,000 miles per month or 33 miles per day to equal the allowance.

The Internal Revenue Service (IRS) specifically requires expenses not accounted for to the employer to be considered as gross income and payroll taxes to be withheld from the undocumented payments. In addition, the district should periodically review the reasonableness of the vehicle allowance paid and, if necessary, adjust the allowance to reasonably reflect the actual expenses incurred by the Superintendent.

1.4 Personal use of vehicles

The district does not calculate and report the value of personal (commuting) mileage on employee W-2 forms as a fringe benefit. Three district maintenance and custodial staff, considered to be on call 24 hours a day, 7 days a week, are allowed to use district vehicles to commute to and from work. There were no logs or other accounting of the use of these vehicles.

IRS reporting guidelines indicate personal commuting mileage is a reportable fringe benefit. Because procedures have not been established to ensure IRS regulations are followed, the district may be subject to penalties and/or fines for failure to report all taxable benefits.

Recommendations

The Board of Education:

1.1 Provide additional oversight and approval regarding compensation decisions and ensure all payments to employees are accurate and have adequate supporting documentation.

1.2 Ensure the time clock system is used to support all compensation.

1.3 Ensure the Superintendent's vehicle allowance is subject to payroll taxes and properly reported on W-2 forms. The Board should also review the vehicle allowance paid to the Superintendent and set the allowance to reasonably reflect the actual expenses incurred.

1.4 Ensure personal (commuting) mileage is reported in accordance with IRS guidelines.

Auditee's Response

1.1 This matter is resolved. Future compensation, including stipends, will be made pursuant to Board approved salary schedules. Future payments for extra-duty positions and sick leave will continue to be properly documented.

1.2 This matter is resolved. The district self-identified the need to address the time clock system prior to this audit. The time clock is already fully operational and will ensure hourly employees are appropriately paid.

1.3 This matter is resolved. The Superintendent's contract was renegotiated in January 2019 and the car allowance was removed as a specific item of compensation.

1.4 This matter is resolved. The W-2 forms for all employees using district vehicles will reflect personal commuting mileage as a fringe benefit.

2. Personnel Procedures, Records, and Policies

District personnel procedures, records, and policies need improvement.

2.1 Procedures not consistent with policies

Several of the district's personnel procedures are not performed in accordance with Board policy.

- The district allows employees to earn overtime and compensatory time for hours in excess of 8 hours per day. Board Regulation 4221 and the FLSA require overtime or compensatory time for any hours in excess of 40 hours per week. In addition, prior approval of overtime and compensatory time is not always documented as required by district Form 4221.

- Contracts for administrators employed on 12-month contracts did not always include provisions for employee vacation as required by Board Policy 4330.

- New employees, at hire, are awarded the total amount of sick leave due for the remainder of the year. Board Regulation 4320 requires new employees earn leave at a rate of one day per month during their first year.

- The district paid mileage reimbursement at a rate of $0.485 for the 2017-2018 school year as shown on the district's approved mileage reimbursement form. Board Regulation 3440 allowed mileage reimbursement at a rate of $0.30 per mile. The regulation was updated in August 2018 to officially make the reimbursement rate $0.485 per mile.

Since district policies govern operations, it is important that the policies be maintained in an accurate, up-to-date manner, and are adequately communicated to district employees. If out-of-date, policies should be updated to reflect the district's intended and actual practices.

2.2 Compensatory time

Accumulated compensatory time balances are not adequately tracked. The district time clock system automatically calculates hours worked beyond the normal 8 hour day and reports total compensatory time for the month. However, accumulated hours are not maintained unless manually tracked by the individual employee.

Without centralized records, the district cannot ensure employee compensatory time balances are accurate and comply with Board Regulation 4221 and the FLSA.

2.3 Unfilled absences

The district does not always document how teacher absences are filled. As a result, it is not evident whether students are receiving instruction from certified personnel.

When a teacher is absent, substitute teachers are employed and applicable information about that teacher's hours are entered into the district's attendance system to support the substitute's teacher compensation. However, if the district cannot locate a substitute teacher the system indicates an unfilled absence. A district official indicated when a substitute teacher cannot be found, the unfilled absence is either filled by a paraprofessional or the class is split (i.e. students are split up between the other classes of the same grade). However, district officials do not record this information in the attendance system. As a result, attendance for students placed in other classes is not counted and there is no record of whether the student was under the supervision of a certified professional, which can impact state funding. For the 2017-2018 school year, we identified 204 unfilled teacher absences in the district's attendance system.

State teaching rules require proper certification to provide instruction to students. In addition, state attendance reporting requirements indicate "students must be in attendance in an instructional capacity under the direct supervision of a certificated employee of the district to be counted for attendance purposes." To alleviate any concerns that students may be receiving instruction from staff not qualified and certified by the DESE and to ensure students are properly counted for attendance purposes, documentation should be maintained showing how all teacher absences are filled.

Recommendations

The Board of Education:

2.1 Ensure compliance with district policies or revise policies as needed.

2.2 Ensure centralized compensatory time records are maintained for all district employees.

2.3 Document how all teacher absences are filled.

Auditee's Response

2.1 This matter is resolved. The district will continue to comply with its Board policies. The matters identified in the narrative of 2.1 are resolved per the adoption of the time clock system, modification of administrator contracts, and (as noted above) the previous revision of the mileage reimbursement rate set out in Regulation 3440.

2.2 This matter is resolved. The district self-identified the need to address the time clock system prior to this audit. The time clock is already

fully operational and will ensure the centralization of records related to the accrual of compensatory time.

2.3 This matter is resolved. The district manages its procurement of substitute teachers through an online automated system, which does not allow for manual selection of individuals. Where the system does not automatically reflect the certificated staff member serving as substitute, manual notations will be made in the online system as documentation.

3. Cash Handling and Accounting Controls and Procedures

Improvements are needed in the handling of student and athletic fees and concession monies. These receipts are at greater risk because a large portion is received in cash, and there are a variety of handling and record-keeping methods throughout the schools. As a result of numerous control weaknesses, there is less assurance these monies have been handled and accounted for properly. In April 2018, we reviewed cash controls and procedures at all district schools.

3.1 Receipt procedures

Weaknesses exist in receipting, transmitting, and depositing monies received at some schools.

Receipt slips

School district employees do not consistently issue receipt slips. In addition, supporting documentation for receipts is not always accurate or complete and not always provided with the transmittals to school secretaries.

- Receipt slips are not issued at Athena or Vineland Elementary schools for monies received or transmitted. In addition, receipt slips are not always issued at the Junior or Senior High schools and the composition (cash, check, or money order) of the receipt was not always noted.

- Receipts are sometimes transmitted to the school secretary by several employees (teachers and activity sponsors) before deposit and adequate documentation is not always provided (receipt slips or receipt log) to support these transmittals. We identified this weakness at Athena and Vineland Elementary schools, and the Junior and Senior High schools.

  For example at Athena Elementary, receipt logs maintained by teachers to track student milk money collections were not turned over to the school secretary with each transmittal. In addition, the receipt logs did not indicate the composition of collections.

As a result, deposits could not be reconciled to supporting documentation.

Restrictive endorsement and depositing timely

Employees do not always restrictively endorse checks immediately upon receipt and receipts are not always transmitted or deposited timely or intact.

- Checks received were not always endorsed at the Junior and Senior High schools. Checks collected by cafeteria workers and prepared for deposit at the Junior High School were not endorsed. In addition, checks collected at the Senior High School for track/wrestling meet fees, summer camp fees, and a soccer fieldtrip were not endorsed.

- Receipts are not always transmitted or deposited timely or intact. For example, during our cash count at Athena Elementary on April 23, 2018, we noted the deposits of milk and choir t-shirt monies collected included checks from January 2018. In addition, during our cash count at the Senior High School on April 24, 2018, we noted track/wrestling meet fees collected from February 2018. A district official indicated the monies were not to be deposited until after the event was held April 2018.

Reconciliation and oversight

Vineland Elementary School staff did not always complete and review the District Cash Verification Form (DCVF) in accordance with District Cash Verification Procedures. District employees are required to complete a DCVF for each district event where monies are collected. The event, date, and start-up monies are recorded on the form before the event and a cash reconciliation is recorded on the form after the event. For one of two deposits reviewed, Section III of the DCVF was not completed showing the composition of the receipts. In addition, for this deposit and the other one reviewed, the cash counted was not verified by a second employee and school administration (e.g. principal).

Conclusion

To properly account for all receipts and ensure monies are accounted for properly and deposited, official prenumbered receipt slips should be issued in numerical order for all monies received, and the method of payment should be recorded on receipt slips and reconciled to the composition of receipts recorded on the DCVF and deposits or transmittals. In addition, checks should be restrictively endorsed upon receipt and DCVFs should be properly completed and verified in accordance with district procedures. The failure to transmit and deposit monies intact and timely and properly document such procedures increases the risk of loss, theft, or misuse of funds.

3.2 Event gate and concessions

Accounting controls for district athletic events and concession sales need improvement. Tickets are not issued to attendees of district athletic events. Instead, for indoor events such as basketball games, tally sheets are used to count attendees and reconcile collections to deposits. The tally sheets are not used for outdoor events such as football games. Without some method of determining attendance, there is no way for the district to reconcile outdoor event collections to deposits and ensure all receipts are deposited. A district official indicated that outdoor events have too many points of entry to accurately count all attendees. The district collected approximately $29,000 in admissions fees for the 2017-2018 school year.

The district does not reconcile concession sales to deposits, nor require inventory records of concession items purchased, sold, and on hand to be maintained and reconciled to concession monies collected. The district collected approximately $52,000 in concession sales for the 2017-2018 school year.

To properly account for all event gate and concession receipts and ensure monies are accounted for properly and deposited, tickets should be issued or tally sheets used to account for attendees and concession sales reconciled to deposits. In addition, an inventory of concession merchandise purchased, sold, and on hand should be maintained and reconciled to collections.

Recommendations

The Board of Education:

3.1 Ensure monies are properly receipted, deposited timely and intact, and receipts are reconciled to the composition of deposits. In addition, checks should be restrictively endorsed upon receipt and DCVFs should be properly completed and verified.

3.2 Ensure gate monies deposited for all events are reconciled to the number of people paying and amounts collected for concessions are reconciled to deposits and changes in concession inventory.

Auditee's Response

3.1 This matter is resolved. The district is endorsing and depositing all checks for events, issuing numerical receipt slips, and reconciling deposits/transmittals per the DCVF.

3.2 This matter is resolved. As of the 2018 winter season, the district implemented tally sheets to track gate attendance and will continue that practice. The district is currently identifying electronic tools to track and reconcile attendance versus deposits and concession inventory purchase versus deposits and changes in inventory.

4. Procurement Procedures, Contracts, and Disbursements

District procurement, contracting, vendor monitoring, and disbursement procedures and practices need improvement.

4.1 Procurement procedures

The district did not maintain documentation supporting some procurement decisions and did not always retain quotes received.

- For the 2017-2018 school year, the district requested and received quotes for several services including occupational therapy and diagnostic services. Four vendors quoted prices lower than the vendor awarded the

occupational therapy contract and 2 vendors quoted lower prices than the vendor awarded the diagnostic services contract. A district official indicated the Board received recommendations for the selected vendors based on the district's past experience with the vendors, information from officials with other school districts familiar with the vendors, and/or the location of the vendors' operations (i.e. local vs. out-of-state). However, documentation could not be provided to support this information. The district paid $98,919 for the occupational therapy services and $64,131 for the diagnostic services for the 2017-2018 school year.

- The district could not locate some quotes solicited and received for student counseling services provided for the 2017-2018 school year. The district found the quote from the vendor awarded the contract, but not for other vendors. A district official indicated at least one other vendor provided the district a quote for the student counseling services. The district paid $15,000 for these services over the term of this contract.

Adequate documentation should be retained to support quotes received, the evaluation of the quotes, and the reasoning for the selected vendor to provide support if questions arise regarding the procurement process.

4.2 Legal services

The district has not periodically solicited proposals for legal services or formally evaluated those services. The district has used the same law firm for the last 13 years. The district paid approximately $23,000 for legal services during the 2017-2018 school year.

Board Policy 3180 allows the district to procure professional services, including legal services, without annually bidding such services, if district officials believe the quality of service, cost and working situation are acceptable. However, the Board did not periodically perform an evaluation of legal services provided to demonstrate the vendor met these criteria.

Periodically soliciting proposals for professional services is a good business practice, and, at a minimum, the district should periodically evaluate the services provided to ensure they are acceptable to justify continuation.

4.3 Contract compliance

The district does not always monitor contracts effectively or enter into written contracts when appropriate. We reviewed 11 purchased service contracts with disbursements totaling over $1.4 million for the 2017-2018 school year.

- The district did not enter into a signed written contract for occupational therapist services. While the Board approved the vendor's selection, the district could not locate a signed contract.

- Some contracts reviewed were incomplete and did not adequately define each party's responsibilities. The occupational therapy services proposal

did not include the rate of pay for a Certified Occupational Therapy Assistant. The vendor received $60 per hour for this service.

In addition, the diagnostic services contract did not stipulate the mileage reimbursement rate; however, mileage was reimbursed by the district at $0.485 per mile.

Also, a contract the district entered into with another school district to provide a student services in accordance with the student's Individualized Education Program did not include the cost of tuition to be paid by the De Soto School District and had an outdated schedule of related services costs. The district paid $10,620 for this student's tuition for the 2017-2018 school year.

- The district did not maintain fully executed copies of 3 of 10 service contracts reviewed. In addition to student counseling services previously discussed, the district did not maintain fully executed contracts for educational programming and deaf services. The district paid approximately $25,900 for educational programming services and $30,125 for deaf services for the 2017-2018 school year.

- The district did not ensure all contract deliverables were met. The student counseling service contract required the vendor provide the district copies of documents related to the services provided; however, the district could not provide this information upon our request.

  In addition, the educational programming contract required the vendor to provide signed invoices and attendance records. The invoices and attendance records provided to the district by the vendor were unsigned.

Clear and detailed written contracts, including reporting requirements and provisions to allow for proper monitoring, are necessary to ensure all parties are aware of their duties and responsibilities, prevent misunderstandings, and ensure district monies are used appropriately and effectively. Closely monitoring contractor performance and compliance with contract terms is important to ensure limited district resources and assets are used wisely and that expectations of the Board and the public are met. Section 432.070, RSMo, requires contracts for political subdivisions be in writing.

4.4 Disbursements

Our review of disbursements identified several concerns. We tested 40 district disbursements totaling approximately $167,000 for the 2017-2018 school year, as well as applicable disbursements associated with the purchased service contracts discussed in MAR finding number 4.3.

- Invoices submitted to the district for payment were not always adequately detailed limiting the district's ability to review them for reasonableness and accuracy.

  Invoices for legal services did not adequately detail each service, the number of hours, or rate charged. Rather, the invoice only included the total hours and costs for the month billed. Invoices for diagnostic services did not adequately detail the services provided by student, or the applicable mileage driven to provide these services. The invoice only included the total hours and miles for the month.

- Documentation provided by the nutrition services vendor for "other costs" was not adequate. These costs were only summarized by category (e.g. vehicle expenses, meals and entertainment, supplies, training, miscellaneous, etc.) for the month billed and supporting documentation for these disbursements was not submitted to the district for review. The total amount paid by the district for "other costs" in the 2017-2018 school year was approximately $40,700.

- Mileage reimbursements were not always submitted timely for payment. One invoice reviewed included employee travel between August 2017 and December 2017, totaling $165.

To ensure prudent and proper use of district funds, requests for reimbursements and payments should only be approved when adequate supporting documentation is submitted with the requests. Only by receiving detailed supporting documentation for reimbursements and payments can the district ensure the amounts claimed for reimbursement and payment are legitimate and accurate, and comply with district reimbursement and disbursement policies. In addition, claims for mileage should be submitted by district staff monthly for reimbursement.

4.5 Form 1099-MISC

The district did not prepare IRS Form 1099-MISC for payments to its law firm or 3 medical service vendors for the year ended December 31, 2017. During the year, the district paid approximately $30,300 for legal services, $80,000 for speech/occupational therapy services, $10,000 for student counseling, and $18,700 for private duty nursing services.

Sections 6041 through 6050W of the Internal Revenue Code require non-wage payments of at least $600 in one year for professional services or for services performed as a trade or business by non-employees (other than corporations, except for medical and legal services), be reported to the federal government on 1099-MISC forms. To ensure compliance with IRS requirements, the district should ensure these forms are prepared and issued in all applicable instances.

Recommendations

The Board of Education:

4.1 Ensure adequate documentation is maintained to support procurement decisions.

4.2 Ensure legal services are periodically solicited or formally evaluated to support a decision to continue with such services.

4.3 Establish procedures to properly monitor contract requirements and enter into written contracts defining services provided and benefits received.

4.4 Ensure invoices received for payment are adequately detailed to support the district's review. In addition, the Board should ensure employee mileage reimbursement requests are submitted for payment monthly.

4.5 Ensure payments totaling greater than $600 to non-employees and businesses are properly reported to the IRS. The district should file amended 1099-MISC forms for past years.

Auditee's Response

4.1 This matter is resolved. The district notes that the procurement decisions cited in this section relate to professional services, which are not required to be competitively bid. The district will ensure future procurement decisions as to the "lowest and best" bid are documented where final selection is not the lowest bidder.

4.2 The district will periodically evaluate the acceptability of its legal services pursuant to Board Policy 3180 as appropriate.

4.3 This matter is resolved. The district has established a process to ensure written contracts are executed and maintained in a central location. Written contracts will identify all essential terms, including deliverables, and cost per unit.

4.4 This matter is resolved. Written contracts will identify all essential terms, including deliverables and cost per unit. Vendors will be required to submit invoices aligning with these contract terms. Employees will be directed to submit mileage reimbursement requests monthly, absent exigent circumstances.

4.5 The matter is resolved. The district will ensure 1099-MISC forms are issued in all applicable instances as determined by its local auditor and/or tax professionals.

5. Budgets

The Board did not amend the district's budget prior to or when actual disbursements exceeded budgeted amounts. For the year ended June 30, 2018, actual disbursements exceeded budgeted amounts by $409,615 for the General Fund and $123,293 for the Debt Service Fund.

Section 67.040, RSMo, requires political subdivisions to keep disbursements within amounts budgeted, but allows for budget increases if the governing body officially adopts a resolution setting forth the facts and reasons. In addition, Section 67.080, RSMo, provides that no disbursement of public monies should be made unless it is authorized in the budget. Proper budget amendment prior to disbursing funds is necessary for the budget to be an effective management tool and comply with state law.

Recommendation

The Board of Education ensure the budgets are amended prior to actual disbursements exceeding budgeted amounts.

Auditee's Response

The matter is resolved. The circumstances related to the disbursement versus budgeted amounts arose from unique circumstances in the district's Self Fund Health Insurance expense. The debt service fund matter resulted from an opportunity the district took advantage of during favorable bond market conditions (lower interest rates) that resulted in a savings of $2,292,050 by refunding SE2015A Bonds early in fiscal year 2018. This unique refunding opportunity was non-routine as the district does not participate in similar transactions on an annual basis. Any future similar circumstances will result in an amended budget.

6. Closed Meeting Minutes

The Board did not document its discussion of all topics listed as reasons for going into closed session. For example, the November 16, 2017, and January 18, 2018, open meeting minutes indicated a closed meeting would be held to discuss topics including the "lease, sale or purchase of real estate." However, the closed meeting minutes did not document any discussion of real estate. District officials indicated topics discussed but not voted on are not documented in the closed meeting minutes. However, our review of closed meeting minutes identified documentation of topics discussed when no vote occurred.

Section 610.022, RSMo, mandates the discussion topics and actions in closed meetings must be limited to only those specifically allowed by law, requires the specific reasons for closing a meeting by citation to a specific section of the Sunshine Law be announced publicly at an open meeting, and requires documentation of the roll call votes to enter closed meetings in public minutes. To ensure compliance with state law and the public is accurately informed, the Board should only cite reasons for going into closed session it plans to discuss.

Recommendation

The Board of Education ensure the specific statutorily allowed reasons for closing a meeting are documented.

Auditee's Response

The matter is resolved. The district will ensure minutes from closed meetings comply with the Sunshine Law and are consistent in the matters recorded.

7. Vineland Elementary Booster Organization

The Vineland Elementary Booster Organization (VBO) did not always comply with Board regulations.

7.1 Bank account

The VBO maintained funds in a bank account outside the district's control. According to the April 12, 2018, meeting minutes, the balance of this account was $1,395.

Board Regulation 1490 regarding relations with booster clubs states that "the Superintendent or a designee has approval authority over booster clubs . . . and appropriate school accounting practices must be followed with oversight through the district Bookkeeper." Board regulations further indicate all receipts are to be deposited in the district's account and separate bank accounts are not allowed for any organization as the district is custodian of all funds.

To adequately safeguard district assets from loss, theft, or misuse all district funds should be controlled by the district and reviewed by the district bookkeeper in accordance with district policy.

7.2 Meeting minutes

The VBO did not consistently document meeting minutes and the meeting minutes were incomplete. Meeting minutes were only maintained for 5 of 22 meetings held between January 2016 and May 2018. For most of the other meetings, the minutes consisted only of handwritten notes written on the meeting agenda. In addition, the VBO's agendas and meeting minutes did not include the time and meeting place and the meeting minutes were not signed by the preparer or reviewed and approved ensuring the minutes represented a correct record of the matters discussed and actions taken during the meetings.

Board Regulation 1490 indicates booster clubs should have procedures to "plan and publicize meetings" and "properly take, distribute, and file meeting minutes." The regulation further states meetings "should be open to the public" and "minutes should be taken at each meeting and kept on file at the school."

Inadequate meeting minutes can lead to subsequent uncertainty as to the VBO's intentions and possible incorrect interpretation of the VBO's actions by the district, general public, or other outside entities.

Recommendations

The Board of Education:

7.1 Ensure any booster club bank accounts are closed and all funds are transferred to the district in accordance with Board regulations.

7.2 Ensure booster clubs maintain complete, accurate, and approved agendas and meeting minutes for all meetings in accordance with Board regulations.

Auditee's Response

7.1 This matter is resolved. The booster club bank account is closed and all funds are aligned with Board policies.

7.2 This matter is resolved. Booster club meetings are appropriately documented with an agenda and minutes.

8. Homebound Attendance

The district incorrectly reported the attendance of homebound students for the 2017-2018 school year. In addition, records maintained to document homebound instruction provided were not sufficient. In total, the district recorded approximately 1,600 hours of homebound instruction and reported approximately 1,900 days of homebound attendance to the Missouri Department of Elementary and Secondary Education (DESE).

DESE attendance reporting requirements indicate homebound instruction may be provided to students "so medically fragile that they cannot attend school . . . homebound students may be counted for full attendance if the student has received a minimum of 5 hours of one-on-one instruction per week by a certificated teacher (Sunday thru Saturday). If the instruction is below 5 hours then the student's attendance is only based on actual hours of instruction . . . "

District records supporting instruction provided to homebound students were summarized by month instead of by week, making it impossible to directly compare the records to weekly attendance reported to the DESE. However, during our review of available records we noted that 18 students reported to the DESE as receiving homebound instruction were not actually provided any homebound instruction. In addition, another 23 students did not likely receive the required 5 hours per week of instruction to justify full attendance.[1] As a result, an estimated 876 of the 1,900 (46 percent) district homebound attendance days may have been over reported to the DESE. Because attendance hours are used to determine state funding, in part, the overstated student attendance hours would have resulted in approximately $30,000 in excess state funding.

[1] Total hours of instruction did not average 5 hours per week.

Accurate attendance data is necessary to ensure the district complies with applicable state and federal guidelines and appropriately claims state funding.

Recommendation

The Board of Education ensure the district corrects attendance records for homebound attendance for the 2017-2018 school year and previous years as necessary to comply with DESE attendance reporting guidelines. In addition, the Board should ensure procedures are implemented to ensure future homebound attendance records are accurate and supported including maintaining weekly instruction hour records.

Auditee's Response

This matter is being resolved. The district is working with DESE to ensure accurate reporting of homebound attendance. The district has established new procedures to ensure the accuracy of weekly homebound records.

9. Emergency Drills

The district did not have sufficient documentation to demonstrate that all required emergency drills were performed in accordance with policy. We identified the following issues:

- The district could not provide documentation that a second earthquake drill was performed at the high school.
- There was no documentation a second quarter fire drill was performed at Vineland Elementary School. A district official indicated the fire drills were conducted in accordance with policy; however, two of the four drills were conducted in January 2018 instead of quarterly as required by policy.
- There was no documentation that 2 of 4 fire drills and a second earthquake drill were performed at Athena Elementary School. A district official indicated the additional Athena Elementary School drills were performed in August 2017, October 2017, and February 2018, but the employees that maintained documentation of the drills are no longer employed by the district.

Board Regulation 5240 requires the district conduct fire drills at each school in the first full week of the school year and quarterly thereafter and conduct two earthquake preparedness drills per school year. Properly planned, executed, and documented emergency drills are necessary, to the extent possible, to ensure the safety of all students, staff and visitors in district facilities. Supporting documentation of drills held is necessary to demonstrate compliance with Board regulations.

Recommendation

The Board of Education ensure sufficient documentation of emergency drills is maintained.

Auditee's Response

This matter is resolved. The district will continue to implement Board Regulation 5240 by performing fire drills at each school in the first full week of the school year and quarterly thereafter and conduct two earthquake preparedness drills per school year. Centralized documentation of performance of the drills will be maintained.

10. Capital Assets and Fuel Use

Controls and procedures over district property and fuel use need improvement.

10.1 Capital assets

The district did not record all capital asset purchases. At June 30, 2018, the district had approximately $53.8 million in capital assets. However, during our review of disbursements, we noted 2 of 7 capital asset purchases, a golf cart ($2,250) and a digital camera ($479), were not recorded in the district's capital assets records. District officials indicated these items were still in use by the district, but not added to the asset listing by building staff, as required, when the physical inventory was performed.

To ensure capital assets are properly accounted for and to help prevent theft or misuse of assets, capital asset records should be updated periodically. Adequate capital asset records are necessary to ensure better internal control over district property and provide a basis for determining proper insurance coverage on district property.

10.2 Fuel

The district did not reconcile fuel logs to fuel billings during the 2017-2018 school year. The district maintains 2 locked bulk fuel tanks at the transportation department and uses fuel logs showing the date, amount of fuel pumped, mileage, and the bus or vehicle obtaining the fuel to document fuel use. However, no comparison was performed between total gallons pumped, gallons purchased, and gallons on hand. The district purchased approximately $185,000 in fuel during the 2017-2018 school year.

Procedures for reviewing fuel use and reconciling use to fuel purchases (invoices) are necessary to ensure the reasonableness and propriety of fuel use and disbursements. The failure to promptly account for fuel use could result in theft and misuse going undetected.

Recommendations

The Board of Education:

10.1 Ensure complete and accurate capital asset records are maintained.

10.2 Ensure a documented periodic reconciliation of fuel purchased to fuel used is performed, with any significant differences investigated.

Auditee's Response

10.1 This matter is resolved. Both items identified in this section are added to the capital assets records.

10.2 This matter is resolved. The district will maintain current fuel use logs and reconcile to ensure appropriate fuel usage. As noted in the finding, access to fuel is restricted, and the district has no indication of misuse or theft of fuel.

11. Cafeteria Meal Charges

The district has not updated Board policies to agree with current procedures and did not always monitor collection activity on student cafeteria meal charges. In addition, district staff are allowed to accrue charges for meals. As of July 2018, outstanding balances totaled $42,734 for 1,103 student accounts and $1,130 for 78 staff accounts. Two student balances exceeded $1,000 each.

According to Board Policy 5550, elementary students are allowed to charge a maximum of $10 for meals, after which the student may be given a designated menu alternate; middle school students are allowed to charge $10 for meals, after which no additional charges are accepted; and high school students are allowed to charge one meal. However, according to the district's nutrition services vendor Board Policy 5550 was not followed for the 2017-2018 school year because only high school students meal purchases were limited by providing them an alternate lunch if they had a balance due of more than $5. District officials indicated they revised procedures for the 2017-2018 school year but have not updated the Board policy. Also, Board policy does not address whether staff members are allowed to incur outstanding balances for meal purchases or the collection of balances due.

If existing policies do not agree to current procedures and/or meet the intentions of the Board and the needs of the students, policies should be revised. Revised policies should address the Board's intentions and student needs, while allowing for the monitoring of outstanding balances due. Proper monitoring is necessary to provide information to the district when amounts are deemed uncollectible and should be written off.

Recommendation

The Board of Education establish and/or revise policies related to student and staff cafeteria meal charges. Policies should meet the needs of students and current intentions of the Board. The Board should monitor and resolve outstanding student cafeteria balances at year end.

Auditee's Response

The district will ensure the Board is aware of outstanding student cafeteria balances at the end of each school year to determine the need of addressing specific situations or revision of Board policy.

12. Subsequent Event

In April 2019, subsequent to our exit conference, the district was notified of irregularities in the handling of student meal monies at one school.

The district contracts with a vendor to provide food services in all of its schools. Services provided include meal preparation and the collection and management of payments received for meals. The district relies on this vendor

to have appropriate controls in place to ensure student meal monies are recorded and deposited. At one school, however, a vendor employee opened envelopes that contained student meal monies, recorded the receipts in the accounting system, and prepared the deposit without a sufficient supervisory review.

In accordance with Board Policy 3106, district officials, when notified about the irregularities, took immediate action to investigate the issue. They contacted the Jefferson County Sheriff's office and the Board held a special meeting to evaluate the concern and approved hiring a firm to conduct a forensic audit. The food service vendor also took action and removed the employee involved in the matter.

Prior to this incident, the district had already selected a new food service vendor through a competitive bidding process that will begin work in the next school year. School officials indicated they expect the forensic audit to be complete by that time and will consider any recommendations when working with the new vendor.

De Soto School District #73
Organization and Statistical Information

De Soto School District #73 is located in the eastern part of Missouri, covering parts of Jefferson, St. Francois, and Ste. Genevieve counties.

The district currently has one early childhood center, one preschool, two elementary schools (grades K-6), a junior high school (grades 7-8), and a senior high school (grades 9-12). Enrollment was approximately 3,100 students for the 2017-2018 school year. The district employed 481 full- and part-time employees, including 119 part-time substitutes (teachers, aids, custodians, nurses, and bus drivers) at June 30, 2018.

The De Soto School District #73 has been classified under the Missouri School Improvement Program as "Accredited" by the Missouri Department of Elementary and Secondary Education.

School Board

An elected board acts as the policy-making body for the district's operations. The board's seven members serve 3-year terms without compensation. Members of the board at June 30, 2018, were:

Jeffrey Russell, President
Beverly Wilson, Vice-President
Mark Ferrell, Member
Tarrole Milfeld, Member
Gene Moses, Member
Lori McKee, Member
Pamela Midgett, Member

Superintendent

The district's superintendent at June 30, 2018, was Dr. Joshua Isaacson. His total compensation for the 2017-2018 school year was $143,248 including an annual salary and costs associated with health, dental, and vision insurance dependent coverage. In addition, Dr. Isaacson receives a $6,000 travel allowance ($500 per month). The superintendent's compensation is established by the Board of Education.

Financial Activity

A summary of the district's financial activity for the year ended June 30, 2018, follows.

Missouri State Auditor

St. Francois County
Prosecuting Attorney

Report No. 2019-041

June 2019

auditor.mo.gov

Nicole Galloway, CPA
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the St. Francois County Prosecuting Attorney

Background

The former Prosecuting Attorney, Jerrod Mahurin, began employment with the county in 2008, as an Assistant Prosecuting Attorney. On January 16, 2012, he was appointed as Prosecuting Attorney, and he was subsequently elected as Prosecuting Attorney, and served through December 31, 2018. In July 2018, the State Auditor's Office (SAO) received complaints through its Whistleblower Hotline alleging fiscal mismanagement within the St. Francois County Prosecuting Attorney's office. The SAO started an audit in September 2018, after authorization by the St. Francois County Commission.

Bonuses and Payroll Records and Policies

The Prosecuting Attorney approved year-end bonuses for all legal secretaries and the Office Manager in 2012, 2013, 2015, and 2017 totaling $21,400 contrary to state law. Timesheets and leave records were not prepared for the 4 Assistant Prosecuting Attorneys as required by the county's personnel policy, and 2 Assistant Prosecuting Attorneys received compensation for private attorney work performed on county time.

Disbursements

Various employees of the Prosecuting Attorney's office, including the Prosecuting Attorney, frequently did not comply with the county's reimbursement policy and many employee reimbursements were not a prudent or necessary use of public funds. The Prosecuting Attorney and his employees requested and received reimbursement of meals that exceeded the county's meal limit by $2,621, and in some instances requested meal reimbursements when meals were already provided. The Prosecuting Attorney allowed county-owned vehicles to be taken home by the Investigator and had not established procedures to adequately review and document the necessity and justification for their use.

Accounting Controls and Procedures

Controls and procedures in the Prosecuting Attorney's office need significant improvement. The Prosecuting Attorney had not adequately segregated accounting duties or performed supervisory reviews of accounting records. The Prosecuting Attorney had not established proper controls or procedures for receipting and transmitting monies. The Prosecuting Attorney frequently reduced or dismissed charges on traffic tickets by requiring defendants to make a donation, ranging from $150 to $500, to The BackStoppers, Inc. Improvement is needed to better monitor and pursue collection of receivables. The Prosecuting Attorney had not established adequate procedures to ensure restitution amounts owed by defendants and other case information was accurately entered into the computerized accounting system.

Electronic Data Security

The Prosecuting Attorney had not established adequate password controls to reduce the risk of unauthorized access to office's computers and data. Employees were not required to change passwords periodically.

In the areas audited, the overall performance of this entity was **Fair**.*

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

NICOLE GALLOWAY, CPA
Missouri State Auditor

To the County Commission
and
Prosecuting Attorney of St. Francois County

We have audited certain operations of the St. Francois County Prosecuting Attorney's office in fulfillment of our duties under Section 29.200.3, and Section 50.057, RSMo. Due to a complaint received through its Whistleblower Hotline alleging fiscal mismanagement, the State Auditor's Office initiated the audit with the approval of the St. Francois County Commission. The scope of our audit included, but was not necessarily limited to, the period from January 16, 2012, through December 31, 2018. The objectives of our audit were to:

1. Evaluate the Prosecuting Attorney's internal controls over significant management and financial functions.

2. Evaluate the Prosecuting Attorney's compliance with certain legal provisions.

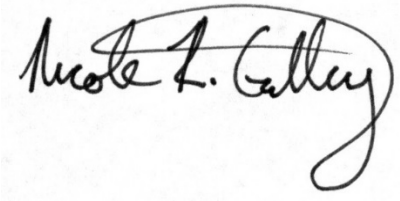
3. Evaluate the economy and efficiency of the Prosecuting Attorney's management practices and procedures, including certain financial transactions.

4. Determine if improper use of public resources occurred and, if so, quantify the amount to the extent possible.

Our methodology included reviewing written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the county, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of applicable contract or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

For the areas audited, we identified (1) deficiencies in internal controls, (2) noncompliance with legal provisions, (3) the need for improvement in management practices and procedures, and (4) improper disbursements including bonuses totaling $21,400, excessive meal reimbursements totaling $2,621, and other questionable employee reimbursements totaling $356. The accompanying Management Advisory Report presents our findings arising from our audit of the Prosecuting Attorney of St. Francois County.



Nicole R. Galloway, CPA
State Auditor

St. Francois County Prosecuting Attorney
Introduction

Background

State law defines the duties of county Prosecuting Attorneys, which include prosecuting civil and criminal actions of the county or state, defending all suits against the county or state, and prosecuting actions for the recovery of debts, fines, penalties and forfeitures accruing to the county or state. The Prosecuting Attorney's office collected $198,584 in bad check and court ordered restitution, administrative handling fees, and delinquent state taxes during the year ended December 31, 2018.

Bad check and criminal restitution is transmitted to victims, and administrative handling fees are transmitted to the County Treasurer for deposit into the Bad Check Fund and the Administrative Handling Fund as provided by Section 570.120, RSMo. The Administrative Handling Fund was opened in 2013 and the Bad Check Fund was closed in 2015, and both funds were used during 2013, 2014, and 2015. Pursuant to Section 136.150, RSMo, the Prosecuting Attorney assists the Missouri Department of Revenue in the collection of delinquent state taxes, licenses, and fees, and receives collection fees from the state that are deposited into the Delinquent Tax Fund as provided by Section 56.312, RSMo. Both types of fees are allowed to be expended by the Prosecuting Attorney for various expenses associated with the office's operation. Section 56.765, RSMo, provides for the collection of a surcharge in criminal and infraction cases by each court to be deposited into a fund for the purpose of providing training to the Prosecuting Attorney and his/her staff (Training Fund). The county's General Revenue Fund also provides funding for operating costs of the Prosecuting Attorney's office. All of these funds are held by the County Treasurer and disbursements go through the normal county process, where check requests and supporting documentation are submitted to the County Auditor's office and County Commission to review for compliance with bid requirements and other legal provisions, with checks then issued and distributed by the county.

The former Prosecuting Attorney, Jerrod Mahurin, began employment with the county in 2008, as an Assistant Prosecuting Attorney. On January 16, 2012, he was appointed as Prosecuting Attorney, and he was subsequently elected as Prosecuting Attorney, and served through December 31, 2018. During the year ended December 31, 2018, the Prosecuting Attorney received compensation of $138,738. The Prosecuting Attorney's office had 16 full-time employees, including attorneys, an investigator, and clerical staff, as of December 31, 2018. Melissa Gilliam was sworn into office as Prosecuting Attorney on January 2, 2019.

In July 2018, the State Auditor's Office (SAO) received complaints through its Whistleblower Hotline alleging fiscal mismanagement within the St. Francois County Prosecuting Attorney's office. The SAO conducted an initial review of these matters under Section 29.221, RSMo. After completion of a review of documentation and communications provided, the SAO determined further investigation was warranted under Section 29.221, RSMo. SAO personnel informed the St. Francois County Commission that our office had

received credible complaints and that under Section 50.057, RSMo, first class counties, such as St. Francois County, may request the State Auditor conduct an audit of a particular official or office. In August 2018, the St. Francois County Commission requested the State Auditor conduct an audit of the Prosecuting Attorney's office, and the audit began on September 11, 2018.

The scope of our audit included, but was not necessarily limited to, the period from January 16, 2012, through December 31, 2018. As of May 21, 2019, former Prosecuting Attorney Mahurin had refused to provide written representations to our office as requested on April 18, 2019. We asked him to provide, among other things, the following written representations:

- "We have not knowingly withheld from you any records that in our judgment would be relevant to your audit."

- "We have no knowledge of any fraud or suspected fraud affecting the Prosecuting Attorney's office and involving administrative officials; employees who have significant roles in internal control (e.g., processing transactions or safeguarding assets); or others."

Refusal to provide such representations is concerning and may indicate information potentially relevant to our audit was not provided.

St. Francois County Prosecuting Attorney
Management Advisory Report
State Auditor's Findings

1. Bonuses and Payroll Records and Policies

The Prosecuting Attorney approved bonuses to employees totaling $21,400 contrary to state law. Timesheets and leave records were not prepared for Assistant Prosecuting Attorneys as required by the county's personnel policy.

1.1 Bonuses

The Prosecuting Attorney approved year-end payments for all legal secretaries and the Office Manager in 2012, 2013, 2015, and 2017 totaling $21,400 from the Prosecuting Attorney Bad Check Fund, Prosecuting Attorney Delinquent Tax Fund, and/or the Prosecuting Attorney Administrative Handling Fund. The Prosecuting Attorney prepared and submitted a purchase order and requisition form for these payments each year, and the County Commission and County Auditor approved these forms. In addition, in December 2017, the Prosecuting Attorney submitted a letter indicating "the Prosecuting Attorney's office would like to take $7,000 from the PA Handling Fund and transfer it to the General Fund. We would like to donate $3,500 to St. Francois County and the other $3,500 to allocate as a temporary salary adjustment amongst 8 employees as follows: . . ."

The Prosecuting Attorney also transferred $1,637 from the Prosecuting Attorney Bad Check Fund to the General Revenue Fund in 2015 to cover the county's portion of payroll costs associated with the bonuses. During the other years (2012, 2013, and 2017), the county General Revenue Fund covered the costs associated with the bonuses.

The Prosecuting Attorney did not document or otherwise detail these year-end payments in annual budgets of these funds. No differences were noted between the budget documents prepared for 2012, 2013, 2015, and 2017 (the years these payments were made) and the budget documents prepared for 2014, 2016, and 2018 (the years these payments were not made). Documentation was also not maintained to show that these year-end payments were part of a defined compensation plan or that additional duties were performed to substantiate these additional payments. As a result, these one-time annual payments are bonuses. The following table provides a summary of the bonuses paid each year.

				Bonus Amount Paid From Each Fund			
Year	Number of Employees	Amount Paid per Person	Purpose Documented on the Purchase Order and Requisition Form	Bad Check Fund	Delinquent Tax Fund	Administrative Handling Fund	Total
2012	9	$ 500	Salary/training/salary supplements	$ 2,250	2,250	0	4,500
2013	8	550	Training with Karpel/salaries	2,000	2,400	0	4,400
2015	9	1,000	Supplemental income	3,300	2,000	3,700	9,000
2017	8	438	Temporary salary adjustment	0	0	3,500	3,500
			Total	$ 7,550	6,650	7,200	21,400

These payments represent additional compensation for services previously rendered and, as such, are in violation of Article III, Section 39, the Missouri Constitution, and contrary to Attorney General's Opinion No. 72-1955 (June 14, 1955), which states, ". . . a government agency which derives its power and authority from the Constitution and laws of this state would be prohibited from granting extra compensation in the form of bonuses to public officers or servants after the service has been rendered."

1.2 Assistant Prosecuting Attorneys time

Timesheets and leave records were not prepared for the office's Assistant Prosecuting Attorneys as required by the county's personnel policy. These employees are salaried and earn and take leave (sick and vacation); however, their leave was not tracked. The former Prosecuting Attorney indicated he did not require the Assistant Prosecuting Attorneys to prepare timesheets or leave records because he considered them salaried and exempt and that these employees would not be paid for any unused leave upon termination of employment. However, the county's personnel policy indicates each employee will complete a timesheet, and the timesheet will be verified by the department head or official. Also, tracking time is necessary to monitor leave earned and taken.

In addition, 2 Assistant Prosecuting Attorneys completed private work for wards of the probate court and received guardian ad litem fees from the ward and/or the county through the probate court for the services provided. One of the Assistant Prosecuting Attorneys was paid $2,350 and the other was paid $200 for these services. The former Prosecuting Attorney and the Assistant Prosecuting Attorney who was paid $2,350 indicated the work was completed during regular county work hours. The former Prosecuting Attorney indicated he allowed these employees to do this private work on county time and receive this compensation. Allowing completion of private work during regular county work hours is questionable and does not appear to be a prudent or necessary use of public funds.

Without timesheets and leave records, the Prosecuting Attorney and county does not have sufficient records to ensure the validity of payroll disbursements and compliance with leave policies.

Recommendations

The Prosecuting Attorney:

1.1 Discontinue the practice of paying bonuses.

1.2 Require Assistant Prosecuting Attorneys to prepare timesheets and leave records, and reevaluate the policy of allowing assistant prosecuting attorneys to complete private work for compensation during regular county work hours.

Auditee's Response

The current Prosecuting Attorney provided the following responses:

1.1 I will discontinue my predecessor's practice of paying bonuses.

1.2 I will require Assistant Prosecuting Attorneys to prepare timesheets and leave records. I have discontinued the practice of allowing private work for compensation during regular county work hours.

The former Prosecuting Attorney provided the following responses:

1.1 The prosecutor did not pay "bonuses," however the prosecutor made requests, which were then approved by the county commission for salary adjustments for employees, as was the practice of the office of Wendy Horn before Jerrod Mahurin became prosecutor. Further the commission gave approved salary adjustments out of the Administrative Handling Fund, which is provided for in Section 559.100, RSMo. There were years where the commission did not approve the salary adjustments and no adjustments were made.

1.2 Assistant Prosecutors are salaried not hourly employees. Second point the prosecutor does not control judges' decisions nor does the prosecutor mandate when an attorney is appointed as a Guardian ad Litem. Therefore, the prosecutor cannot disallow the attorneys to be summoned to work in court. The auditor addresses the prosecutor allowing work to be done, however, gives no mechanism for stopping a judge appointing an employee.

The County Commission provided the following responses:

1.1 After two years' concentrated effort of policy revision, we adopted an updated policy manual for the first time in decades on June 27, 2017. Section 6 of that policy outlines the requirement of the pay/grade step system. This system requires all salary adjustments be done through the Commission's approval. With one exception, at the end of that same year, no bonuses have happened since.

1.2 The new Prosecuting Attorney has already taken steps to solve this internal departmental process.

Auditor's Comment

Pertaining to the former Prosecuting Attorney's responses:

1.1 The transactions reviewed did not include the time period former Prosecuting Attorney Horn was in office. While Section 559.100, RSMo, provides for employee salaries, it does not authorize bonuses or additional compensation for services previously rendered that are in violation of the Missouri Constitution and contrary to Attorney

General Opinion. Regardless of County Commission approval, the payments represent bonuses that are contrary to state law. In addition, former Prosecuting Attorney Mahurin did not request year-end payments for his employees during 2014, 2016, or 2018.

1.2 While the Judge ordered the attorneys to serve as the ward's Guardian ad Litem; the order did not provide for the attorneys to complete private work on county time. This was authorized by former Prosecuting Attorney Mahurin, with no requirement for these employees to take leave or work extra hours to make up the time.

2. Disbursements

Significant weaknesses exist in the controls and procedures over the Prosecuting Attorney's office disbursements.

2.1 Employee reimbursements

Various employees of the Prosecuting Attorney's office, including the Prosecuting Attorney, frequently did not comply with the county's reimbursement policy and many employee reimbursements were not a prudent or necessary use of public funds. These employee reimbursements were made from the Administrative Handling Fund, the Bad Check Fund, the Delinquent Tax Fund, the Training Fund, and the General Revenue Fund. We reviewed employee reimbursements during the period January 16, 2012, through September 11, 2018, and noted various concerns.

Excessive cost of meals

The Prosecuting Attorney and his employees requested and received reimbursement of meals that exceeded the county's meal limit by $2,621 in total for the period reviewed, and in some instances requested meal reimbursements when meals were already provided. The Prosecuting Attorney exceeded the county meal limit for 15 of the 34 days for which he requested reimbursement of meal costs, with meals that exceeded the county's meal limit by $754; 2 Assistant Prosecuting Attorneys exceeded the county meal limit for 29 of 69 days for which they requested reimbursement of meal costs, with meals that exceeded the county's meal limit by $1,174; and the Investigator exceeded the county meal limit for 12 of 45 days for which he requested reimbursement of meal costs, with meals that exceeded the county's meal limit by $307. Various other employees of the Prosecuting Attorney's office also exceeded the county meal limit with meals that exceeded the county's meal limit by $386.

Examples of some evening meals that exceeded the county's meal limit included:

Employee	Date	Restaurant	Amount
Prosecuting Attorney	08/29/12	J. Bruner's	$ 127[1]
Prosecuting Attorney	08/29/13	JB Hook's	157[1]
Prosecuting Attorney	08/27/14	JB Hook's	119[2]
Assistant Prosecuting Attorney	04/05/12	JB Hook's	96[1]
Assistant Prosecuting Attorney	08/29/12	J. Bruner's	116[1]
Assistant Prosecuting Attorney	08/29/13	JB Hook's	88[1]
Assistant Prosecuting Attorney	04/16/14	JB Hook's	102[1]
Assistant Prosecuting Attorney	08/27/14	JB Hook's	86[1]
		Total	$ 891

[1]An itemized invoice detailing the items purchased was not submitted with the reimbursement.

[2]Oysters, steak, and lobster (one meal) were purchased.

County Auditor Burgess took office on January 1, 2015, and served until January 18, 2017, and he implemented procedures to limit meal reimbursement costs to county policy. However, the Prosecuting Attorney and his employees continued to submit meal costs in excess of county policy. We noted other limited instances during 2017 and 2018 where meal costs were reimbursed that exceeded county policy.

In addition, we noted several instances where employees were reimbursed for meals purchased from outside restaurants when the seminar provided a meal as part of the registration fee; therefore, the cost of the meal should not have been reimbursed. As a result, many of these meals were not a prudent or necessary use of public funds.

The county's travel expense policy from January 16, 2012, through June 27, 2017, provided for the maximum reimbursement of authorized meals and tips combined, whether in state or out of state, to be $36 per day (with no breakdown by meal). The county's travel expense policy was revised effective July 1, 2017, and provides for the reimbursement of authorized meals and tips combined, whether in state or out of state to be $50 per day ($10 for breakfast, $15 for lunch, and $25 for dinner). County policy from 2012 to current requires an itemized bill for the reimbursement of meals.

Supporting documentation

We identified numerous purchases without adequate supporting documentation, and in some cases no documentation beyond the travel expense form. In many instances, only a credit card charge slip was submitted rather than a detailed invoice or receipt slip. The county's travel policy requires reimbursement requests include itemized invoices. As a result of the lack of documentation, we could not determine if some non-reimbursable expenses, such as alcoholic beverages, entertainment, laundry and cleaning, etc. as outlined in the county's travel policy, were reimbursed.

In addition, we identified 19 instances where a travel expense form was not prepared and submitted to support employee reimbursements in compliance with county policy. In these instances, employees either sent an email listing the expenses incurred, prepared a list of expenses to be reimbursed, or submitted receipts to the Office Manager to be approved by the Prosecuting Attorney. This documentation was then transmitted to the County Auditor and County Commission for their approval. The county's travel policy requires travel expense forms be prepared by employees monthly and approved by the department head and County Commission before being processed for payment.

The county's travel policy indicates all efforts shall be made to keep travel expenses to a minimum and training courses will benefit both the employee and the county. However, no documentation was maintained to explain the necessity or benefit to the county as to reimbursements paid to an Assistant Prosecuting Attorney for travel to out of state seminars. The county reimbursed this Assistant Prosecuting Attorney $3,802 to attend 3 out of state National District Attorney Association seminars held in 2012, 2014, and 2015. The former Prosecuting Attorney indicated this Assistant Prosecuting Attorney attended training out of state because he did not attend some days of group trainings held within the state and covered the office while other attorneys attended these in-state group trainings.

Other questionable reimbursements

We identified other employee reimbursements that were questionable, or likely unnecessary and not a prudent use of public funds.

- The Investigator requested and received reimbursement of a $53 room service meal purchased on October 25, 2012, and a $56 room service meal purchased on April 17, 2014, twice, by submitting the meal cost with his meal reimbursement request and again with his separate hotel cost reimbursement request. These meal reimbursements are included in the $2,621 of meal costs that exceeded the county's meal limit as previously discussed.

- An Assistant Prosecuting Attorney requested reimbursement of $123, the cost of an additional night at a hotel where a seminar was held on July 13 through 14, 2012. The hotel bill included charges for 3 nights (July 12 through July 14, 2012). This Assistant Prosecuting Attorney requested reimbursement of $124, the cost of an additional night at a hotel where a seminar was held on July 19 and July 20, 2013. The hotel bill included charges for both nights. No documentation was included on the reimbursement claim forms to explain the extra night stay. The seminars were held approximately 3 hours from Farmington, the county seat, and ended at approximately 4 p.m. Therefore, the cost of the additional night's stay on July 14, 2012, and July 20, 2013, was likely unnecessary.

Conclusion

Internal Revenue Service (IRS) regulations require under an accountable plan that an employee must adequately account for his/her expenses for reimbursed amounts received. If that does not occur for some or all of the reimbursements received or if some of the expenses do not have a business connection, the unaccounted for portion or non-business related costs would generally be considered taxable income that would need to be reported on W-2 forms. Because procedures have not been established to ensure IRS regulations are followed, the county may be subject to penalties and/or fines for failure to report all taxable benefits.

Detailed supporting documentation improves the county's ability to review charges and provides better documentation of the items purchased to ensure charges are reasonable and in accordance with established policies. In addition, public funds should be spent only on items necessary and beneficial to the county. County residents have placed a fiduciary trust in their public officials to spend county revenues in a prudent and necessary manner.

2.2 Take home vehicle

The Prosecuting Attorney allowed county-owned vehicles[1] to be taken home by the Investigator and had not established procedures to adequately review and document the necessity and justification for their use. In addition, questionable repair costs to one of these vehicles were incurred, and the Investigator did not follow county policy.

The Prosecuting Attorney's office disbursed $57,938 related to obtaining these vehicles and for fuel, repairs, and maintenance during the period January 16, 2012, through July 19, 2018. Some of the fuel costs were paid by the Sheriff's office and could not be determined. A new vehicle was purchased for the Investigator's use on September 29, 2016, to replace the previous one assigned to him, and as of January 11, 2019, the vehicle's odometer indicated 47,113 miles had been driven. A vehicle usage log was not maintained by the Investigator, and he generally worked in the office.

We estimated the Investigator commutes 10,535 miles a year (43 miles*5 days*49 weeks [excludes 3 weeks of vacation]) in a county-owned vehicle. This averages 878 personal commuting miles a month, and personal commuting miles represent approximately 51 percent (24,145 miles) of the total miles driven in the new vehicle. While the former Investigator indicated he was deputized and on call, he also indicated it had been years since he was called out. IRS regulations do not consider commuting of law enforcement employees on call at all times in clearly marked law enforcement vehicles a taxable benefit when specific criteria are met; however it is not clear the vehicle usage of the Investigator meets this criteria. Federal regulations typically require employers to withhold payroll taxes and include the value of

[1] Two vehicles were used by the investigator during the audit period with only one vehicle assigned to the office at a time.

personal (commuting) use of a business-owned vehicle in taxable income. The IRS provides several methods to determine vehicle commuting values.

In addition, in May 2014, the Prosecuting Attorney's office incurred questionable vehicle repair costs totaling $1,513, and the Investigator did not report the accident in compliance with county policy. County policy states "Employees shall report to the police department any accidents involving a County vehicle and the property or vehicle of another party." The damages to the county-owned vehicle occurred at the Investigator's home involving an accident with his wife's personal vehicle. The former Investigator indicated that he did not file an accident claim with either his own personal vehicle insurance company or with the county's insurance company. The Prosecuting Attorney approved paying the repair costs from county funds.

Allowing an employee to take a county-owned vehicle home, results in additional and unnecessary costs to the Prosecuting Attorney's office. Given the high costs associated with vehicle ownership, and maintenance and fueling, the Prosecuting Attorney's office should periodically perform a cost-benefit analysis of owning a vehicle for office use. The county's residents have placed a fiduciary trust in their public officials to spend tax revenues in a necessary and prudent manner. The Prosecuting Attorney should ensure county funds are spent only on items necessary and beneficial to the county.

Recommendations

The Prosecuting Attorney:

2.1 Establish oversight procedures to ensure employee reimbursements are reasonable, proper, sufficiently documented, and follow county policy; and ensure the county subjects unsupported reimbursements to payroll tax withholdings as appropriate and amends prior W-2 forms, if necessary. The Prosecuting Attorney should also ensure all disbursements are a necessary and prudent use of public funds.

2.2 Reevaluate the assignment of a county-owned vehicle, ensure adequate documentation is maintained regarding the justification, approval, and monitoring of the vehicle, and ensure the county complies with IRS guidelines for reporting personal commuting mileage.

Auditee's Response

The current Prosecuting Attorney provided the following responses:

2.1 I will establish a procedure to provide oversight to ensure employee reimbursements are reasonable, proper, follow county policy and require sufficient documentation to support any and all disbursements.

2.2 The previous investigator is no longer employed with my office. The new investigator does not use the county car as a take home vehicle,

and he tracks his mileage and documents the purpose of each use of the county-owned vehicle.

The former Prosecuting Attorney provided the following responses:

2.1 The meal items listed were a correct reflection of what was approved by prior commissioners and prior prosecutor Wendy Horn. The policy for allowing for deviations from the county policy of certain amounts per day were set before Jerrod Mahurin took office and were continually approved by all commissioners, treasurers and auditors (including outside auditors) before now because of the standing agreement between the prior commissioners and prior prosecutor, further any other trips were compliant with the county policy as no deviations were approved.

2.2 The vehicle was routinely used by the investigator and only the investigator after hours for service of the prosecutor's office and was required to be used for those purposes alone.

The County Commission provided the following responses:

2.1 On July 1, 2017, we changed the meal reimbursement policy. No violations were cited for 2018 and 2019. Early on we questioned certain bills in our approval process and the practice has not been noted since.

2.2 The person involved with the lack of vehicle records is no longer employed by the Prosecuting Attorney's office. The current Prosecuting Attorney has taken steps to resolve this situation.

Auditor's Comment

Pertaining to the former Prosecuting Attorney's responses:

2.1 The transactions reviewed did not include the time period former Prosecuting Attorney Horn was in office. No documentation was provided of a "standing agreement" between prior County Commissioners and the prior Prosecuting Attorney, and the County Commissioners indicated they were unaware of any "standing agreement." County travel policies were in place during the period of our review for all county employees to follow.

2.2 The Investigator, the former Prosecuting Attorney, and other county officials/employees confirmed to audit staff that the Investigator used the county-owned vehicle for commuting purposes. The odometer reading of this county-owned vehicle and the vehicle damage incurred at the Investigator's home further substantiate that county-

owned vehicles were used by the Investigator for commuting purposes.

3. Accounting Controls and Procedures

Controls and procedures in the Prosecuting Attorney's office need significant improvement.

3.1 Segregation of duties

The Prosecuting Attorney had not adequately segregated accounting duties or performed supervisory reviews of accounting records. The Bad Check Clerk was responsible for receipting, recording, and transmitting bad check monies to the victim or the Office Manager, and the Restitution Clerk was responsible for receipting, recording, and transmitting court-ordered restitution monies to the victim or the Office Manager. The Office Manager was responsible for transmitting monies to the County Treasurer.

In addition, the Bad Check Clerk and Restitution Clerk had the ability to record adjustments and delete transactions in the computerized accounting systems without independent approval. Also, reports of adjustments made to the computerized accounting systems and deleted transactions were not generated and independently reviewed. At our request reports of adjustments and deleted transactions were generated, and during the period January 1, 2017, through September 11, 2018, the clerks made no adjustments and deleted 11 payments totaling $5,303. Adequate documentation was not retained to support or explain the reasons for the deletions.

Neither the Prosecuting Attorney, Office Manager, nor other clerks performed documented supervisory or independent reviews of accounting records to ensure all monies received were properly recorded and transmitted or disbursed to the appropriate party.

Internal controls would be improved by segregating the duties of receiving, recording, and transmitting monies. Proper segregation of duties is necessary to ensure all transactions are accounted for properly, adjustments are valid, and assets are adequately safeguarded. If proper segregation of duties cannot be achieved, documented independent or supervisory reviews of detailed accounting records are essential and should include comparing daily receipt activity to transmittals and a review of adjustments made to the accounting system.

3.2 Receipting and transmitting

The Prosecuting Attorney had not established proper controls or procedures for receipting and transmitting monies.

- The Traffic Clerk did not issue receipt slips for traffic ticket payments received or donations received for The BackStoppers, Inc.[2] The clerk transmitted the traffic ticket payments to the Circuit Clerk's office for deposit and the donations to the Sheriff's office to be passed on to The BackStoppers, Inc. In addition, the transmittals from both the Prosecuting Attorney's and Sheriff's offices were not documented.

- Office personnel did not account for the numerical sequence of receipt slip numbers of the bad check or court-ordered restitution computerized accounting systems.

- The Bad Check Clerk and the Restitution Clerk did not produce receipt reports from the computerized accounting systems listing the receipts comprising each deposit.

- The Bad Check Clerk and Restitution Clerk transmitted fees and restitution made payable to the Prosecuting Attorney and/or county to the Office Manager; however, the Office Manager did not reconcile the receipt slips issued to the monies transmitted. The Bad Check Clerk and Restitution Clerk did not generate a receipt report from the computerized accounting systems to document their transmittal of monies to the Office Manager, but instead prepared a list of monies on hand being transmitted to document the transmittal. As a result, there was no assurance that all monies receipted in the computerized accounting systems were accounted for and transmitted.

- The Prosecuting Attorney's office did not always transmit court-ordered restitution to victims and fees to the County Treasurer timely.

  During a cash count performed on September 11, 2018, we identified 13 money orders, totaling $995 in bad check fees, that were receipted between July 20 and September 11, 2018, but not transmitted to the Office Manager until September 20, 2018, and the County Treasurer until September 24, 2018. In another example, money orders receipted between May 23, 2018, and July 12, 2018, totaling $1,524 in bad check fees were not transmitted to the County Treasurer until July 18, 2018, and the transmittal from the Bad Check Clerk to the Office Manager was not documented.

[2] The BackStoppers, Inc., is a not-for-profit organization that provides financial assistance and support to the spouses and dependent children of police officers, firefighters, and publicly-funded paramedics and EMTs who have lost their lives in the line of duty. This organization also provides assistance to first responders who suffer a catastrophic injury performing their duty. The BackStoppers, Inc. coverage area includes 13 Missouri counties and 5 Illinois counties.

In addition, some money orders received became stale because office personnel did not timely process restitution and fees received. As a result, county funds were used to "cover" some of the stale money orders received and owed to victims and the ability to deposit fees received was lost. For example, 2 money orders made payable to the county dated October 9, 2008, and totaling $80 were held and not transmitted to the County Treasurer until May 31, 2012; however, the bank returned the money orders as unpaid and stale. The Prosecuting Attorney approved the County Treasurer paying the victim $50 from his Bad Check Fund for the victim's portion of the payments received. The other $30 stale money order represented bad check fees owed to the county. In another example, a $60 money order dated September 2010, received for bad check fees, was held and not transmitted to the County Treasurer until March 2015. The bank also returned that money order as unpaid and stale.

- Money orders and cashier's checks were not restrictively endorsed at the time of receipt or before transmitting them to the County Treasurer. A cash count on September 11, 2018, identified 15 money orders totaling $1,065, that had not been restrictively endorsed by the Bad Check Clerk. The former Office Manager indicated that she did not restrictively endorse money orders received prior to transmitting them to the County Treasurer.

To adequately safeguard receipts and reduce the risk of loss, theft, or misuse of funds, proper receipting and transmitting procedures are necessary. In addition, money orders and cashier's checks should be restrictively endorsed immediately upon receipt.

3.3 Unallowable donations

The Prosecuting Attorney frequently reduced or dismissed charges on traffic tickets by requiring defendants to make a donation, ranging from $150 to $500, to The BackStoppers, Inc. During the period January 2017 to March 2018, donations totaling at least $5,600, were transmitted to this organization. These arrangements/donations were also occurring prior to 2017; however, records were not available for our review. The Prosecuting Attorney's office did not track these arrangements or the subsequent donations made. Although there is an established fee schedule by the court, the amount paid to The BackStoppers, Inc. to amend or dismiss charges could be negotiated with the Prosecuting Attorney. There is no authority for the Prosecuting Attorney to require a donation to reduce or dismiss charges filed on traffic tickets. Article IX, Section 7, Missouri Constitution, states the proceeds of all penalties, forfeitures, and fines are to be distributed to the County School Fund.

In addition, the verbal donation agreement was not part of a written plea agreement and was not approved by the Judge or disclosed in court. Supreme Court Rule 24.02 states that if a plea agreement has been reached by the parties, the court shall require the disclosure of the agreement on the record.

3.4 Accounts receivable

Improvement is needed to better monitor and pursue collection of receivables. The Prosecuting Attorney's office did not generate or prepare monthly lists of unpaid bad checks or a report of unpaid court-ordered restitution, including court-ordered restitution for bad checks. As a result, the amount of unpaid receivables was unknown and the need for follow up on specific cases may not have been identified timely.

At our request, a list of accounts receivable for unpaid court-ordered restitution from 2015 through 2018 was prepared as of September 11, 2018, that identified $716,237 in court-ordered restitution outstanding. Also at our request, a list of accounts receivable for unpaid bad check restitution and fees from 2015 through 2018 was prepared as of March 7, 2019, that identified $188,255 in bad check restitution and fees outstanding.

Complete and accurate lists of unpaid bad checks and restitution would allow the Prosecuting Attorney's office to more easily review the amounts due, take appropriate steps to ensure amounts due are collected, and determine if any amounts are uncollectible.

3.5 Restitution procedures

The Prosecuting Attorney had not established adequate procedures to ensure restitution amounts owed by defendants and other case information were accurately entered into the computerized accounting system.

During our review of various bad check and court-ordered restitution cases, we noted the total restitution amount owed by the defendant per the computer system did not always agree to case documentation from the court. For example, the accounting system indicated a defendant owed a victim $1,300 as of January 10, 2019. A $70 payment was received on January 20, 2017, and entered into the computerized accounting system but subsequently deleted, leaving the balance due at $1,300. The case file contained a copy of the $70 money order and documentation that it was transmitted to the victim on January 20, 2017; therefore the balance due to the victim should have been $1,230. After we discussed this error with the Office Manager, she corrected the balance due on February 4, 2019.

Restitution entered into the computer system should be reviewed and compared with other court documentation to ensure the accuracy of amounts owed and subsequently paid by the defendants. Any differences should be promptly investigated and resolved to ensure the proper amount of restitution is collected.

Recommendations

The Prosecuting Attorney:

3.1 Segregate accounting duties or ensure an adequate independent or supervisory review of accounting records is performed and documented. In addition, the Prosecuting Attorney should require reports of adjustments and deleted transactions be generated and

reconciled to supporting documentation, and a supervisory review and approval of the documentation performed.

3.2 Issue prenumbered receipt slips for all monies received, account for the numerical sequence of receipts, produce receipt reports from the systems that reconcile to transmittals, ensure monies are transmitted timely and are adequately documented, and restrictively endorse money orders and cashier's checks immediately upon receipt.

3.3 Reevaluate the practice of requiring donations as part of reducing or dismissing charges filed.

3.4 Establish procedures to monitor and collect accounts receivable.

3.5 Establish procedures to review restitution amounts entered into the computer system to ensure amounts and information agree with court documentation. Any differences should be promptly investigated and resolved.

Auditee's Response

The current Prosecuting Attorney provided the following responses:

3.1 I will segregate accounting duties or ensure an adequate independent or supervisory review of accounting records is performed and documented. I will require reports of adjustments and deleted transactions be generated and reconciled to supporting documentation, and a supervisory review and approval of the documentation performed.

3.2 I will issue prenumbered receipt slips for all monies received, account for the numerical sequence of receipts, produce receipt reports from the systems that reconcile to transmittals, ensure monies are transmitted timely and are adequately documented, and restrictively endorse money orders and cashier's checks immediately upon receipt.

3.3 I have ended the practice of requiring donations as part of reducing or dismissing charges filed.

3.4 I will establish procedures to monitor and collect accounts receivable.

3.5 I will establish procedures to review restitution amounts entered into the computer system to ensure amounts and information agree with court documentation. Any differences will be promptly investigated and resolved.

The former Prosecuting Attorney provided no response to findings 3.1, 3.2, 3.4, and 3.5.

The former Prosecuting Attorney provided the following response:

3.3 Neither the prosecutor nor the court had a fee schedule.

The County Commission provided the following responses:

3.1 Our County Auditor's office now regularly monitors the segregation of duties in all county offices.

3.2 Prenumbered receipt slips are now the norm in the Prosecuting Attorney's office.

3.3 The practice of donation requirements as a part of a plea deal has ceased.

3.4 Accounts receivable are now regularly and properly monitored.

3.5 The Prosecuting Attorney has communicated to us her intent to upgrade her office software to better monitor restitution amounts tendered.

Auditor's Comment

Pertaining to the former Prosecuting Attorney's response:

3.3 The St. Francois County Circuit Court maintains a fine schedule for traffic offenses and provided it to our office.

4. Electronic Data Security

The Prosecuting Attorney had not established adequate password controls to reduce the risk of unauthorized access to the office's computers and data. Employees were not required to change passwords periodically.

Passwords are necessary to authenticate access to computers. The security of computer passwords is dependent upon keeping them confidential. However, since passwords do not have to be periodically changed, there is less assurance access to computers and data files is effectively limited to only those individuals who need access to perform their job responsibilities. Passwords should be confidential and changed periodically to reduce the risk of a compromised password and unauthorized access to and use of computers and data.

Recommendation

The Prosecuting Attorney require confidential passwords that are periodically changed to prevent unauthorized access to office computers and data.

Auditee's Response

The current Prosecuting Attorney indicated she will require confidential passwords that are periodically changed.

The former Prosecuting Attorney provided no response to this finding.

The County Commission is now directing the county's IT department to oversee the regular change of passwords among the staff of the Prosecuting Attorney's office.

St. Francois County Prosecuting Attorney
Appendix
Correspondence Documentation

The following emails and documents show correspondence between the State Auditor's Office and former St. Francois County Prosecuting Attorney, Jerrod Mahurin, and Mr. Mahurin's legal counsel regarding the draft audit report, exit conference and response process and deadline, and management representations.

Attachments: Confidential Draft St. Francois County Prosecuting Attorney1.pdf

Jarrod,
As discussed yesterday on the phone, attached is a confidential draft copy of the audit report for your review. As noted in the attached letter, we plan to meet with you at 10 a.m. in the County Auditor's conference room on April 15, 2019. Please have written responses prepared and if you have them prepared prior to the 15th, please email them to me so that we can have a better overall discussion on April 15th. Should you have any questions or concerns, feel free to contact me at the number below. Also, as this report is just a draft, we ask that you keep it confidential.

Thank you- Pam

Pamela Allison, CPA, CFE
Missouri State Auditor's Office
Supervisory Manager of the

Ms. Allison.

This is a follow up to our conversation in which I informed you that I have retained counsel based on your initial confidential findings. Please understand that I would like you to speak with my attorneys from Rosenblum, Shwartz and Fry. I would further like to reschedule our Monday meeting from April 15 which you seemed amenable to. Thank you.

Jerrod D. Mahurin

Subject: RE: Maherin

I just had a conversation with the attorney. Just to editorialize a bit, it was oddly casual. He really just wanted to know the process and where to go from here.

I briefly explained the process and that he has 30 days to get a written response in. I said that we typically have a face to face meeting to discuss but that if they just wanted to submit the written response that they could submit those responses in writing and it becomes a part of the audit. I explained that depending what is in that response we may need to do an auditor's comment to respond to his response.

He then asked who gets copies of the report and whether it would be sent to the AG. I said that yes the AG receives copies of all reports. I said that there are several entities that are required to get the report, such as the governor and the general assembly. I also said that there are others that get all reports, such as the AG. And there are others that are sent reports because they request it. I also mentioned that others just look at the reports online because they are all on our website.

He thanked me and said he would get back to me as to whether they want a sit down meeting with the auditors.

April 19, 2019

Honorable Nicole R. Galloway, CPA
Missouri State Auditor
P.O. Box 869
Jefferson City, MO 65102

Dear Madam:

We are providing this letter in connection with your audit of the St. Francois County Prosecuting Attorney's office for the period ended January 1, 2012 through December 31, 2018. We confirm, to the best of our knowledge and belief, as of January 13, 2019, the following representations made to you during your audit.

1. We have made available to you, if and to the extent requested by you, all financial records and related data for all of the St Francois County Prosecuting Attorney's funds, programs, and activities and all correspondence files. We have not knowingly withheld from you any records that in our judgment would be relevant to your audit.

2. There are no significant transactions that have not been properly recorded in the accounting records.

3. We acknowledge our responsibility for the design and implementation of programs and controls to prevent and detect fraud (intentional misstatements or omissions of amounts in financial records or misappropriation of assets).

4. We have no knowledge of:

   a. Any fraud or suspected fraud affecting the Prosecuting Attorney's office and involving administrative officials; employees who have significant roles in internal control (e.g., processing transactions or safeguarding assets); or others.

   b. Any allegations of fraud or suspected fraud affecting the Prosecuting Attorney's office and received in communications from employees, former employees, regulators, or others.

5. Any related party transactions and resulting effects have been properly recorded or disclosed to you.

6. There have been no communications from regulatory agencies concerning noncompliance with, or deficiencies in, financial or other practices.

7. We are responsible for the Prosecuting Attorney's compliance with provisions of laws, regulations, contracts. and grant agreements applicable to it; and we have identified, and disclosed to you, all such provisions that we believe have a significant effect on operations. We have complied with all aspects of laws, regulations, contracts, and grant agreements that would have a significant effect on operations in the event of noncompliance.

To the best of our knowledge and belief, no events have occurred subsequent to your audit period and through the date of this letter that should be disclosed to you because they would be relevant to your audit.

Re: St. Francois County Prosecutor Audit

Dear Mr. Hunsaker:

I am writing this letter as a follow up to our April 17, 2019, phone conversation regarding your client Jerrod Mahurin. During that conversation we discussed the audit process and that Section 29.200.12, RSMo, provides that an auditee shall provide responses to any recommendation contained in the draft report within 30 days of receipt of the draft report.

This office sent Mr. Mahurin the draft report on April 4, 2019. As such, he has until May 6 to provide any responses. As you know, a meeting had been scheduled to discuss the report and its findings on April 15. At your client's request, that meeting was cancelled. After the meeting was cancelled, this office sent Mr. Mahurin the management representation letter for signature.

As of the date of this letter, this office has not received any responses or the signed management representation letter. If this office does not receive these documents by May 6, this office will proceed with the finalization of the report and will note that your client did not provide responses to the findings.

If you need to discuss this matter, you may contact me by telephone at (573) 751-4213 or by email at Paul.Harper@auditor.mo.gov.

Sincerely,

Paul Harper

Paul:

Please give me a call when you can (314-313-2759)

I wanted to follow up with you about some of the language in the report. The main focus would be on the use of the phrase "unlawful bonuses" in **Section 1**. Mr. Mahurin had conversations with Ms. Allison on this topic and I wanted to follow up with you to talk about it.

Additionally, as to Section **2. Disbursements** -- was a review completed of prior individuals who ran the St. Francois County Prosecuting Attorney's Office to see how the items discussed in this section were handled when submitted for reimbursement?

I may have other topics to discuss when we have a chance to talk on the phone.

Thanks,

Timothy J. Hunsaker

pam here are my answers

jerrod

1

1.. The prosecutor did not pay "bonuses", however the prosecutor made requests, which were then approved by the county commission for salary adjustments for employees, as was the practice of the office of Wendy Horn before Jerrod Mahurin became prosecutor. Further the commission gave approved salary adjustments out of the Administrative Handling Fund, which is provided for in RSMO 559.100. There were years where the commission did not approve the salary adjustments and no adjustments were made.

1.2 Assistant Prosecutors are salaried not hourly employees.

Second point the prosecutor does not control judges' decisions nor does the prosecutor mandate when an attorney is appointed as a Guardian ad Litem. Therefore, the prosecutor cannot disallow the attorneys to be summoned to work in court. The auditor addresses the prosecutor allowing work to be done, however, gives no mechanism for stopping a judge appointing an employee.

2.1 The meal items listed were a correct reflection of what was approved by prior commissioners and prior prosecutor Wendy Horn. The policy for allowing for deviations from the county policy of certain amounts per day were set before Jerrod Mahurin took office and were continually approved by all commissioners, treasurers and auditors (including outside auditors) before now because of the standing agreement between the prior commissioners and prior prosecutor, further any other trips were compliant with the county policy as no deviations were approved.

2.2 The vehicle was routinely used by the investigator and only the investigator after hours for service of the prosecutors' office and was required to be used for those purposes alone.

3.1

3.2

3.3a

3.3b The prosecutor did not have a fee schedule, that is completely fictitious, with regards to reducing tickets or making donations.

3.4

Your client provided responses to our auditors.

Your client had responded as follows to the draft report:

> 3.3b The prosecutor did not have a fee schedule, that is completely fictitious, with regards to reducing tickets or making donations.

Finding 3.3 has been amended. I have attached a copy of the current draft finding.

Please let me know if you client wants to change his response to this finding.

3.3 Unallowable donations

The Prosecuting Attorney frequently reduced or dismissed charges on traffic tickets by requiring defendants to make a donation, ranging from $150 to $500, to The BackStoppers Inc[1]. During the period January 2017 through March 2018, donations totaling at least $5,600, were transmitted to this organization. These arrangements/donations were also occurring prior to 2017; however, records were not available for our review. The Prosecuting Attorney's office did not track these arrangements or the subsequent donations to BackStoppers program. Although there is an established fee schedule by the court, the amount paid to the BackStoppers program to amend or dismiss charges could be negotiated with the Prosecuting Attorney. There is no authority for the Prosecuting Attorney to require a donation to reduce or dismiss charges filed on traffic tickets. Article IX, Section 7, Missouri Constitution, states the proceeds of all penalties, forfeitures, and fines are to be distributed to the County School Fund.

In addition, the verbal donation agreement was not part of a written plea agreement and was not approved by the Judge or disclosed in court. Supreme Court Rule 24.02 states that if a plea agreement has been reached by the parties, the court shall require the disclosure of the agreement on the record.

DRAFT
Subject to Revision
Not For External Release

Recommendations

The Prosecuting Attorney:

3.3 Establish procedures to ensure court-ordered restitution is disbursed to victims and the county in a timely manner.

[1] The BackStoppers Inc., is a not for profit that provides financial assistance and support to the spouses and dependent children of police officers, firefighters, and publicly-funded paramedics and EMTs who have lost their lives in the line of duty. This organization also provides assistance to first responders who suffer a catastrophic injury performing their duty. The BackStoppers Inc. coverage area includes 13 Missouri counties and 5 Illinois counties. https://backstoppers.org/, accessed March 27, 2019.

Pam I haven't heard from anyone is some time ... I have emailed several times and I have asked for my exit interview... I now understand that you all are releasing findings tomorrow without allowing me to present documents or allowing me an exit Interview.... I certainly have not seen the final form but I understand you have supplied it to several office holders as they are speaking about it. Please advise ... I would request you hold the release one week and allow my exit interview... I will make myself available ASAP.

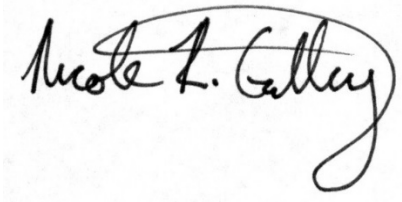
NICOLE GALLOWAY, CPA
Missouri State Auditor

Honorable Michael L. Parson, Governor
and
Members of the General Assembly
Jefferson City, Missouri

The primary objective of this compilation is to report the filing status for political subdivisions other than cities, towns, and villages, required to file a financial report, under Section 105.145, RSMo, and 15 CSR 40-3.030. Section 105.145, RSMo, provides that the State Auditor's Office notify the Department of Revenue if any political subdivision fails to timely submit a copy of its annual financial report. Because of different filing requirements, a separate report is issued for cities, towns, and villages.

The filing status for the 55 political subdivisions required to file a financial report by April 30, 2019, is presented in summary on page 3 and by individual entity in Appendix A. We have not audited the reports submitted and, accordingly, do not express an opinion or any other assurance on them.

This report also includes the updated filing status for political subdivisions, other than cities, towns, and villages, that filed a financial report in April 2019, after their filing deadline. The filing status for these 13 entities is presented in summary on page 3 and by individual entity in Appendix B-D.



Nicole R. Galloway, CPA
State Auditor

The following staff participated in the preparation of this report:

Director of Audits:	Jon Halwes, CPA, CGFM
General Counsel:	Paul Harper, JD
Senior Analyst:	Jill Wilson, MBA

Monthly Report on Political Subdivision Filings
April 2019
Executive Summary

Executive Summary

Section 105.145, RSMo, requires the governing body of each political subdivision in the state, except counties and school districts, to prepare and remit to the state auditor an annual report of financial transactions. 15 CSR 40-3.030 requires the financial report to be remitted to the state auditor within 6 months of the end of the political subdivision's fiscal year. The State Auditor's Office posts individual annual financial reports to its website. A searchable link is available at http://auditor.mo.gov.

Section 105.145, RSMo, requires the state auditor to notify the Department of Revenue if any political subdivision fails to timely submit a copy of its annual financial report. Any political subdivision that fails to timely submit the annual financial report shall be subject to a fine of $500 per day upon notice by the Department of Revenue, except transportation development districts with a gross revenues less than $5,000 in the fiscal year of the annual financial report.

This report includes the filing status for the 55 political subdivisions, other than cities, towns, and villages, with a fiscal year end of October 31, 2018. Cities, towns, and villages have additional filing requirements and their reporting status is included in a separate report. Of the 55 political subdivisions, 43 filed an annual financial report timely and 1 filed a financial report for only a portion of their fiscal year.

This report also includes the filing status for 13 political subdivisions, other than cities, towns, and villages, that filed their financial report in April 2019, after their filing deadline.

NICOLE GALLOWAY, CPA
Missouri State Auditor

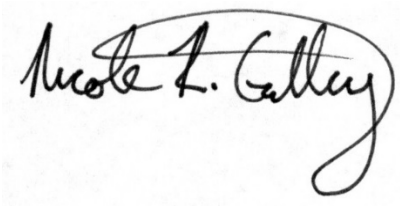
Honorable Michael L. Parson, Governor
and
Members of the General Assembly
Jefferson City, Missouri

The primary objective of this compilation is to report the filing status for the municipalities required to file a financial report by April 30, 2019, under Section 105.145, RSMo, and 15 CSR 40-3.030, and, when applicable, an addendum under Section 479.359, RSMo, and 15 CSR 40-3.170 and a municipal court certification under Section 479.360, RSMo, and 15 CSR 40-3.180.

Section 105.145, RSMo, provides that the State Auditor's Office (SAO) notify the Department of Revenue if any city, town, or village fails to timely submit a copy of its annual financial report. Additionally, Section 479.362, RSMo, provides that the SAO notify the Department of Revenue whether counties, cities, towns, and villages have timely filed under Sections 479.359 and 479.360, RSMo. Because of different filing requirements, a separate report is issued for all other political subdivisions required to file a financial report.

The filing status for 14 cities is presented in summary on page 3 and by individual entity in Appendix A. This compilation is limited to presenting information submitted to our office. We have not audited the information submitted and, accordingly, do not express an opinion or any other form of assurance on it.

This report includes the updated filing status for municipalities that filed at least one of the items (financial report, addendum, or certification) in April 2019, after their filing deadline. The filing status for these 30 cities, 1 town and 2 villages is presented in summary on pages 4 and by individual entity in Appendixes B to E.



Nicole R. Galloway, CPA
State Auditor

The following staff participated in the preparation of this report:

Director of Audits:	Jon Halwes, CPA, CGFM
General Counsel:	Paul Harper, JD
Senior Analyst:	Jill Wilson, MBA

Executive Summary

Section 105.145, RSMo, requires the governing body of each political subdivision, except counties and school districts, in the state to prepare and remit to the state auditor an annual report of financial transactions. 15 CSR 40-3.030 requires the financial report to be remitted to the state auditor within 6 months of the end of the political subdivision's fiscal year. The State Auditor's Office (SAO) posts individual annual financial reports to its website. A searchable link is available at http://auditor.mo.gov.

Section 105.145, RSMo, requires the state auditor to notify the Department of Revenue if any political subdivision fails to timely submit a copy of its annual financial report. Any political subdivision that fails to timely submit the annual financial report shall be subject to a fine of $500 per day upon notice by the Department of Revenue, except transportation development districts with a gross revenues less than $5,000 in the fiscal year of the annual financial report.

Section 479.359.1, RSMo, requires every county, city, town, and village to annually calculate the percentage of its annual general operating revenue received from fines, bond forfeitures, and court costs for minor traffic violations.

Section 479.359.3, RSMo, provides that all entities having a municipal court file an addendum to the annual financial report containing items listed in 15 CSR 40-3.170, which also provides the procedures to file an addendum.

Section 479.360, RSMo, requires every county, city, town, and village that has a municipal court to file, with its annual financial report, a certification of substantial compliance with 10 municipal court procedures. This certification must be signed by the municipal court judge. 15 CSR 40-3.180 provides the procedure to file the municipal court certification. Any county, city, town, or village that does not have a municipal court judge is not required to file a certification.

Section 479.362, RSMo, requires that the SAO notify the Department of Revenue whether counties, cities, towns, or villages have timely filed their addendums under Section 479.359 and certificates of substantial compliance under Section 479.360, RSMo. Section 479.368, RSMo, provides penalties for counties, cities, towns, and villages that fail to file, including loss of revenue and mandatory ballot measure to dissolve the political subdivision.

This report includes the filing status for the 14 cities with a fiscal year end of October 31, 2018, whose financial reports, addendums, or certifications were due by April 30, 2019. Of the 14 municipalities required to file an annual financial report, 11 filed the report timely. Of the 13 municipalities required to file an addendum, 6 filed an addendum timely. Of the 8 municipalities required to file a certification, 4 filed a certification timely.

This report includes the filing status for 30 cities, 1 town and 2 villages that filed at least one of the items (financial report, addendum, or certification) in April 2019, after their filing deadline. Of these entities, 14 filed an annual financial report, 20 filed an addendum, and 9 filed a certification.

Nicole Galloway, CPA

Missouri State Auditor

Dallas County

Report No. 2019-038

May 2019

auditor.mo.gov

Nicole Galloway, CPA
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of Dallas County

Sheriff's Inmate Monies and E-Cigarette Controls and Procedures	The Sheriff's office does not have adequate procedures for recording, depositing, and disbursing inmate monies. The Sheriff's office does not maintain adequate records to account for e-cigarettes purchased and sold to inmates and inventory remaining on hand. The Sheriff's office does not charge or collect sales taxes on e-cigarettes sales, and no sales taxes are remitted to the Missouri Department of Revenue.
Public Administrator's Controls and Procedures	The Public Administrator sold health and beauty goods totaling approximately $1,600 to a ward between July 2016 and February 2018 creating the appearance of a conflict of interest. The Public Administrator does not maintain adequate supporting documentation for fees assessed to wards and estates.
Recorder of Deeds' Bank Reconciliations	The Recorder of Deeds does not maintain an accurate check register balance and prepare adequate bank reconciliations.
Prisoner Boarding	The Sheriff does not have proper controls and procedures in place to ensure board bills for housing prisoners are collected.
County Procedures	The county has not established effective monitoring procedures over fuel and vehicle usage. The county does not report the value of personal (commuting) mileage for the personal use of county vehicles by a County Commissioner and 9 road and bridge department employees on their W-2 forms as required by the Internal Revenue Service. The County Commission has not issued an order or ordinance giving the Recorder of Deeds authority to provide passport services.
Electronic Data Security	The County Assessor, County Clerk, County Collector, and Public Administrator have not established adequate password controls to reduce the risk of unauthorized access to computers and data. Security controls are not in place to lock computers in the offices of the County Collector, Recorder of Deeds, Public Administrator, Prosecuting Attorney, and County Assessor after a certain period of inactivity.
Additional Comments	Because counties are managed by several separately-elected individuals, an audit finding made with respect to one office does not necessarily apply to the operations in another office. The overall rating assigned to the county is intended to reflect the performance of the county as a whole. It does not indicate the performance of anyone elected official or county office.

In the areas audited, the overall performance of this entity was **Good**.*

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

Organization and Statistical Information 12

NICOLE GALLOWAY, CPA
Missouri State Auditor

County Commission
and
Officeholders of Dallas County

We have audited certain operations of Dallas County in fulfillment of our duties under Section 29.230, RSMo. In addition, McBride, Lock & Associates, LLC, Certified Public Accountants, was engaged to audit the financial statements of Dallas County for the 2 years ended December 31, 2017. The scope of our audit included, but was not necessarily limited to, the year ended December 31, 2017. The objectives of our audit were to:

1. Evaluate the county's internal controls over significant management and financial functions.

2. Evaluate the county's compliance with certain legal provisions.

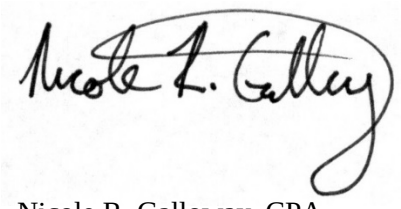
3. Evaluate the economy and efficiency of certain management practices and procedures, including certain financial transactions.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the county, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of applicable contract, grant agreement, or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the county's management and was not subjected to the procedures applied in our audit of the county.

For the areas audited, we identified (1) deficiencies in internal controls, (2) noncompliance with legal provisions, and (3) the need for improvement in management practices and procedures. The accompanying Management Advisory Report presents our findings arising from our audit of Dallas County.



Nicole R. Galloway, CPA
State Auditor

The following auditors participated in the preparation of this report:

Director of Audits:	Randall Gordon, M.Acct., CPA, CGAP
Audit Manager:	Heather R. Stiles, MBA, CPA, CFE

Audit Staff:	Misty Bowen, MSED
	Jacqueline E. Brown, MBA

1. Sheriff's Inmate Monies and E-cigarette Controls and Procedures

Controls and procedures over inmate monies and e-cigarettes need improvement. The Sheriff's office received $26,051 from inmates between January 1, 2017, and July 8, 2018.

1.1 Inmate monies

The Sheriff's office does not have adequate procedures for recording, depositing, and disbursing inmate monies. Inmate monies are not deposited, but are held in a safe in individual envelopes for each inmate until e-cigarettes are purchased by the inmate. A ledger indicating the total amount held and the amount held for each inmate is not maintained. In addition, cash returned to inmates upon release is not always documented.

We reviewed inmate receipt slips, e-cigarette sale records, and property release forms, which documented property, including cash, returned to the inmates upon release for 13 inmates between January 1, 2017, and July 8, 2018. We identified the following problems during our review.

- For 5 inmates, receipt slips issued exceeded e-cigarette sales by $965 and there is no money on hand for these inmates. The Sheriff's office could not locate property release forms for these inmates. For another inmate, receipt slips issued exceeded e-cigarette sales and the property release form by $60.

- E-cigarette sales exceeded receipt slips issued for 4 inmates by $271. The Deputy Sheriff responsible for selling e-cigarettes to inmates indicated his procedure is to determine the amount in each inmate's individual envelope before selling e-cigarettes and later take out cash from the envelopes for the e-cigarettes sold. However, 4 inmates purchased more e-cigarettes than they had cash available. He could not explain how this occurred.

Failure to implement adequate recording, depositing, and disbursing procedures increases the risk that loss, theft, or misuse of monies received will go undetected.

A similar condition was noted in our prior audit report regarding not properly receipting, recording, and depositing inmate monies.

1.2 E-cigarettes

The Sheriff's office does not maintain adequate records to account for e-cigarettes purchased and sold to inmates and inventory remaining on hand. In addition, periodic physical counts of the inventory are not performed. The Sheriff's office began selling e-cigarettes for $10 each to inmates in March 2017. According to expenditure records, the office purchased 2,725 e-cigarettes between March 2017 and August 15, 2018. Records indicate deposits for e-cigarette sales totaled $25,560 for the period March 2017

through August 15, 2018, indicating at least 2,556 e-cigarettes were sold. Our count of e-cigarettes on hand on August 15, 2018, was 106, resulting in a shortage of 63 e-cigarettes. As a result, records and procedures are not sufficient to account for e-cigarettes or monies collected, and loss, theft, or misuse may go undetected.

Adequate inventory records are necessary to account for e-cigarettes. Comparisons of e-cigarette purchases and sales to inventory records are necessary to ensure e-cigarettes and the associated monies are properly recorded and handled.

1.3 Sales tax

The Sheriff's office does not charge or collect sales taxes on e-cigarettes sales, and no sales taxes are remitted to the Missouri Department of Revenue (DOR). Pursuant to 12 CSR 10-110.955(3)(B), sales by the state of Missouri and its political subdivisions are subject to tax.

The Sheriff should contact the DOR for guidance on establishing procedures for charging and collecting sales taxes on e-cigarette sales and ensure all future sales tax collections are remitted to the DOR.

Recommendations

The Sheriff:

1.1 Establish procedures to deposit all inmate monies and maintain documentation to ensure all inmate's purchases are recorded and any remaining monies are disbursed to the inmate upon release.

1.2 Maintain inventory records of e-cigarettes, reconcile these records to e-cigarettes purchased and sold, and perform periodic physical inventory counts.

1.3 Contact the DOR for guidance on establishing procedures for charging and collecting sales taxes on e-cigarette sales and ensure all future sales tax collections are remitted to the DOR.

Auditee's Response

1.1 We have ceased collecting inmate monies for e-cigarettes. The only inmate monies on hand now are received at intake, recorded on inmate property sheets, and refunded to inmates upon release. Depositing these monies is unnecessary as the amounts on hand are no longer significant and are stored securely in a locked safe.

1.2 We have outsourced the sale of e-cigarettes, and no longer maintain any inventory of e-cigarettes.

1.3 We have outsourced the sale of e-cigarettes, and the vendor is responsible for collecting sales tax on e-cigarettes.

2. Public Administrator's Controls and Procedures

Controls and procedures in the Public Administrator's office need improvement. The Public Administrator is the court appointed personal representative for wards or decedent estates of the Circuit Court, Probate Division and was responsible for 51 wards and estates during the year ended December 31, 2017.

2.1 Conflict of interest

The Public Administrator sold beauty and nutrition goods totaling approximately $1,600 to a ward between July 2016 and February 2018 creating the appearance of a conflict of interest. The Public Administrator is an independent consultant for a company that sells beauty and nutrition products directly to consumers. While the goods were sold to the ward at the Public Administrator's cost, selling goods to a ward while also managing the ward's assets creates the appearance of a conflict of interest.

Section 475.130, RSMo, states a conservator has a duty to act in the interest of the protectee and to avoid conflicts of interest which impair the conservator's ability to perform that duty. The appearance of a conflict of interest creates a situation that could prevent the Public Administrator from objectively performing her duties. To avoid conflict of interests or the appearance of a conflict of interest, the Public Administrator should consult the Circuit Judge, Probate Division, before selling goods to wards.

2.2 Fees

The Public Administrator does not maintain adequate supporting documentation for fees assessed to wards and estates. The annual fee assessed to some wards and estates is the total estimated time expended on all tasks multiplied by $25 an hour. The total annual fees collected from wards during the year ended December 31, 2017, was $4,512.

The Public Administrator does not maintain time records or other documentation to support the services provided and the amount of time charged to some wards for similar transactions was not consistent. For example, 4 wards were charged 5 minutes for each check issued while another ward was charged 15 minutes. In addition, the Public Administrator does not have documentation to support the hourly rate charged.

To ensure fees are properly assessed, the Public Administrator should maintain adequate supporting documentation of the time expended on services provided and for determining the hourly rate. Without adequate supporting documentation, there is less assurance fees charged to each ward or estate are fair, reasonable, and properly assessed.

Recommendations

The Public Administrator:

2.1 Avoid the appearance of a conflict of interest that could prevent her from objectively performing her duties.

2.2 Ensure fees assessed against wards and estates are supported by adequate documentation and are consistent between wards and estates.

Auditee's Response

2.1 I will no longer sell goods to wards.

2.2 Fees are adequately supported and consistent. I use checkbook registers to log time spent on conservator's accounts. As a one person office with 51 cases it is difficult to keep a timesheet on each specific ward contacts. I typically log 5 minutes for writing checks out; 15 – 20 minutes when I physically take a deposit to the bank since it is no longer located downtown; and 30 minutes to reconcile bank statements each month. My hourly charge on conservator accounts has been $25 since I took office in 2009. My prior settlements have been approved by the Probate Judge at the $25 rate. However, I will take the recommendation under advisement.

3. Recorder of Deeds' Bank Reconciliations

The Recorder of Deeds does not maintain an accurate check register balance and prepare adequate bank reconciliations. The Recorder of Deeds collected various fees totaling approximately $134,000 related to recording documents, such as marriage licenses and deeds, during the year ended December 31, 2017.

The Recorder of Deeds does not maintain an accurate check register balance. At the end of each month the Recorder of Deeds records the bank statement balance into the check register because the balance does not agree with the check register balance. For example, the December 31, 2017, check register balance was $11,226 before the Recorder of Deeds recorded the bank statement balance of $10,923 into the check register. Thus, a $303 adjustment was made to the check register balance. As a result, adequate bank reconciliations cannot be performed because deposits in transit and outstanding checks are not identified and any differences between the check register balance and the reconciled bank balance are not investigated and resolved.

Maintaining an accurate check register balance and performing adequate monthly bank reconciliations helps ensure receipts and disbursements have been properly handled and recorded, and increases the likelihood errors will be identified and corrected timely.

Recommendation

The Recorder of Deeds maintain an accurate check register balance, ensure monthly bank reconciliations are adequately performed, and promptly investigate and resolve differences between the check register balance and the bank reconciliations.

Auditee's Response

I am in the process of implementing this recommendation and am now making a print out of all outstanding items with each monthly statement. In addition, I will keep an accurate check register in the future.

4. Prisoner Boarding

The Sheriff does not have proper controls and procedures in place to ensure board bills for housing prisoners are collected. Records indicate the county received approximately $37,000 for prisoner boarding during the year ended December 31, 2017.

The Sheriff's Office Administrator prepares and sends board bills to other counties and cities upon release or transfer of an inmate. A copy of all board bills is kept but a listing of all amounts billed is not maintained. Board bill payments are made directly to the County Treasurer and the County Treasurer does not report amounts received to the Office Administrator. As a result, the Office Administrator cannot monitor billed amounts to ensure payments are received. In addition, the Sheriff has not performed an analysis to support the current daily billing rate of $45 and has not entered into written agreements with the surrounding counties and cities for the boarding of prisoners detailing the housing rate to be paid, the services to be provided, or any required notification for emergency or non-routine situations.

Procedures such as independent reconciliations of billing records to payments received should be established to ensure boarding of prisoners is properly billed, collected, and recorded. Proper records and follow-up procedures are also necessary to safeguard against possible loss, theft, or misuse of funds going undetected. In addition, to ensure the county is billing at a rate that adequately recovers all costs, amounts charged for boarding prisoners should be analyzed periodically and compared to billing rates.

Section 432.070, RSMo, requires contracts for political subdivisions to be in writing. Written agreements, signed by the parties involved, should specify the services to be rendered and the manner and amount of compensation to be paid. Written contracts are necessary to ensure all parties are aware of their duties and responsibilities and to prevent misunderstandings.

Recommendation

The Sheriff develop procedures to ensure collection of costs for boarding prisoners and proper recording of payments received. In addition, the Sheriff and the County Commission should periodically review the costs of boarding prisoners and establish billing rates sufficient to recover costs and obtain written agreements with the political subdivisions for which the county boards prisoners.

Auditee's Response

We are looking into options to implement this recommendation.

5. County Procedures

Improvements are needed in the county's procedures over tracking fuel and vehicle usage, reporting commuting miles, and providing passport services.

5.1 Fuel and vehicle usage

The county has not established effective monitoring procedures over fuel and vehicle usage. Approximately $144,000 was paid for fuel for vehicles and equipment at the road and bridge department during the year ended December 31, 2017.

The county does not maintain vehicle usage logs or record odometer readings on the fuel logs maintained to record the number of gallons pumped from the road and bridge department's fuel tanks, making it impossible to compare mileage to fuel usage and evaluate the reasonableness of fuel costs.

Maintaining and reviewing vehicle fuel and usage logs and comparing these usage logs to fuel purchases is necessary to ensure vehicles and equipment are properly utilized and decrease the risk of theft or misuse of fuel occurring without detection.

A similar condition was noted in our prior 2 audit reports.

5.2 Commuting miles

The county does not report the value of personal (commuting) mileage for the personal use of county vehicles by a County Commissioner and 9 road and bridge department employees on their W-2 forms as required by the Internal Revenue Service (IRS). As noted in section 5.1, vehicle usage logs indicating business and personal use of the vehicles were not maintained.

IRS reporting guidelines indicate personal and commuting mileage is a reportable fringe benefit and require the value for all use of the provided vehicle to be reported if the employer does not require submission of detailed logs that distinguish between business and personal use. In addition, the district may be subject to penalties and/or fines for failure to report all taxable benefits.

5.3 Passports

The County Commission has not issued an order or ordinance giving the Recorder of Deeds authority to provide passport services. In addition, the Recorder of Deeds' office does not retain the entire fee collected for providing passport services as required by state law. One half of the fee assessed for processing passport applications and renewals is disbursed to the office's Passport Fund. The other half of the fee is incorrectly disbursed to the county's General Revenue Fund. The Recorder of Deeds received approximately $18,000 for providing passport services during the year ended December 31, 2017.

Section 49.130, RSMo, states the County Commission may designate by order or ordinance any county officer to provide passport services if the Circuit Clerk does not offer passport services, and fees charged for the service shall be retained by the county office providing the service.

Recommendations

The County Commission:

5.1 Establish adequate records and procedures to effectively monitor vehicle and fuel use.

5.2 Comply with IRS guidelines for reporting fringe benefits related to personal miles and require logs that distinguish between business and personal use.

5.3 Issue an order or ordinance granting the Recorder of Deeds the authority to provide passport services. In addition, work with the Recorder of Deeds to ensure passport fees are retained in accordance with state law.

Auditee's Response

5.1 We will add odometer readings to the fuel log and review them periodically.

5.2 The County Commissioner's vehicle has never been used for personal use other than commuting while on call. Take home vehicles are now only allowed for two road and bridge employees and one of the County Commissioners. We will keep logs of all trips in the future to comply with IRS guidelines. All commuting mileage will be reported on the employees' W-2 forms.

5.3 We are working with the county's attorney to implement a court order, and will work with the Recorder of Deeds to ensure passport fees are handled in accordance with state law.

6. Electronic Data Security

Controls over county computers are not sufficient to prevent unauthorized access. As a result, county records are not adequately protected and are susceptible to unauthorized access.

6.1 Passwords

The County Assessor, County Clerk, County Collector, and Public Administrator have not established adequate password controls to reduce the risk of unauthorized access to computers and data. Employees in these offices are not required to change passwords periodically to help ensure passwords remain known only to the assigned user.

Passwords are required to authenticate access to computers. The security of computer passwords is dependent upon keeping them confidential. However, since passwords do not have to be periodically changed, there is less assurance access to computers and data files is effectively limited to only those employees who need access to perform their job responsibilities. Passwords should be confidential and changed periodically to reduce the risk of a compromised password and unauthorized access to and use of computers and data.

6.2 Security controls

Security controls are not in place to lock computers in the offices of the County Collector, Recorder of Deeds, Public Administrator, Prosecuting Attorney, and County Assessor after a certain period of inactivity.

Inactivity controls are necessary to reduce the risk of unauthorized individuals accessing an unattended computer and having potentially unrestricted access to programs and data files. Without effective security controls, there is an increased risk of unauthorized access to computers and the unauthorized use, modification, or destruction of data.

Recommendations

The County Commission work with the other county officials to:

6.1 Require confidential passwords that are periodically changed to prevent unauthorized access to county computers and data.

6.2 Require each county computer to have security controls in place to lock it after a certain period of inactivity.

Auditee's Response

We will work with the officials to implement these recommendations.

Dallas County
Organization and Statistical Information

Dallas County is a county-organized, third-class county. The county seat is Buffalo.

Dallas County's government is composed of a three-member county commission and separate elected officials performing various tasks. All elected officials serve 4-year terms. The county commission has mainly administrative duties in setting tax levies, appropriating county funds, appointing board members and trustees of special services, accounting for county property, maintaining county roads and bridges, and performing miscellaneous duties not handled by other county officials. Principal functions of these other officials relate to law enforcement, property assessment, property tax collections, conduct of elections, and maintenance of financial and other records important to the county's citizens. In addition to elected officials, the county employed 66 full-time employees and 5 part-time employees on December 31, 2017.

In addition, county operations include a Senior Citizens' Services Board.

Elected Officials

The elected officials and their compensation paid for the year ended December 31 (except as noted) are indicated below:

Officeholder	2018	2017
Kevin D. Sharpe, Presiding Commissioner	$	28,400
Roger Bradley, Associate Commissioner		26,400
Jerry Brown, Associate Commissioner		26,400
Stacy Satterfield, Recorder of Deeds		40,000
Stephanie Hendricks, County Clerk		40,000
Barbara J. Viets, Prosecuting Attorney		137,745
Scott Rice, Sheriff		44,000
Becky Schofield, County Treasurer		40,000
Charles (Chuck) Nimmo, County Coroner		12,000
Carol Johnson, Public Administrator		40,000
Sheryl Ferrell, County Collector, year ended February 28,	40,000	
Emily Sue Doty, County Assessor, year ended August 31,		40,000
Greg Maynard, County Surveyor (1)		

(1) Compensation on a fee basis.

Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the Cape Girardeau County Collector and Property Tax System

Property Tax System	The county has not adequately restricted the County Collector's access to the property tax system. The County Commission does not review or approve most property tax additions and abatements, and annual settlements were not complete and accurate. Refunds of overpayments related to errors in property tax records are not always properly recorded in the property tax system.

In the areas audited, the overall performance of this entity was **Good**.*

***The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

State Auditor's Report 2

Management Advisory Report - State Auditor's Findings
1. Property Tax System 4

Organization and Statistical Information 6

NICOLE GALLOWAY, CPA
Missouri State Auditor

County Commission
and
County Collector
Cape Girardeau County, Missouri

We have audited the County Collector and Property Tax System of Cape Girardeau County. Section 52.150, RSMo, requires the State Auditor to audit the office of the County Collector after being notified of a vacancy in that office. On November 30, 2018, a vacancy occurred in the office of the County Collector of Cape Girardeau County. A successor was appointed and sworn into office effective December 1, 2018. The scope of our audit included, but was not necessarily limited to, the period of March 1, 2018, to November 30, 2018, and the year ended February 28, 2018. The objectives of our audit were to:

1. Evaluate the county's internal controls over significant property tax functions.

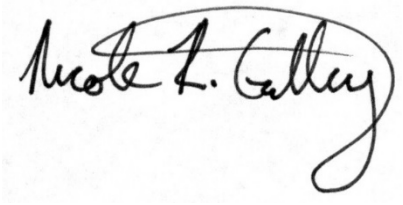
2. Evaluate the county's compliance with certain legal provisions.

Our methodology included reviewing written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the county, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of applicable contract, grant agreement, or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the County Collector and county management and was not subjected to the procedures applied in our audit of the County Collector and Property Tax System.

Section 52.150, RSMo, requires the County Commission to accept the State Auditor's report and, if necessary, to take certain specific actions if the State Auditor finds any monies owed to the county or the former County Collector. For the areas audited, we identified (1) deficiencies in internal controls, and (2) noncompliance with legal provisions. The accompanying Management Advisory Report presents our findings arising from our audit of the County Collector and Property Tax System of Cape Girardeau County.



Nicole R. Galloway, CPA
State Auditor

The following auditors participated in the preparation of this report:

Director of Audits:	Randall Gordon, M.Acct., CPA, CGAP
Audit Manager:	Josh Allen, CPA, CFE, CGAP
In-Charge Auditor:	David T. Olson
Audit Staff:	Morgan Alexander

1. Property Tax System

Controls and procedures over the property tax system need improvement. The County Collector's office processed property taxes and other revenues of approximately $72.4 million for the year ended February 28, 2018.

1.1 System access

The county has not adequately restricted the County Collector's access to the property tax system. The County Collector has access rights that allow changes to be made to individual property tax amounts throughout the tax year. The County Collector rarely changes tax amounts but since the County Collector is responsible for collecting tax payments, good internal controls require the County Collector not have access rights allowing alteration of property tax information.

To prevent unauthorized changes to the property tax records, access should be limited based on user needs. Unrestricted access can result in the alteration of data files and programs.

1.2 Additions and abatements

The County Commission does not review or approve most property tax additions and abatements, and annual settlements were not complete and accurate.

The County Assessor and County Collector process additions and abatements and print a court order for review by the County Clerk and a copy of the court order is also provided to the County Auditor. The County Commission reviews and approves outlawed taxes, but the County Commission does not review or approve additions or other abatements. In addition, during the year ended February 28, 2018, additions and abatements (excluding outlawed taxes) were combined instead of being shown separately on the annual settlement.

To help ensure the validity of tax book charges, collections, and credits, and for the County Clerk and County Commission to properly verify these amounts, it is important the County Collector file complete and accurate annual settlements. Sections 137.260 and 137.270, RSMo, assign responsibility to the County Clerk for making corrections to the tax books with the approval of the County Commission. Documented reviews and approvals of additions and abatements would help ensure changes made to the property tax system are proper.

1.3 Overpayments

Refunds of overpayments related to errors in property tax records are not always properly recorded in the property tax system. If an error in a property tax record resulting in an overpayment is identified after the related tax has been paid, the County Assessor adjusts the assessed valuation of the property in the subsequent tax year so that the tax liability is reduced to offset the amount of the overpayment, and enters a note into the tax system to verify the accuracy of the assessed valuation in the following year. However, a refund check should be issued by the County Collector for tax overpayments instead

of the County Assessor changing assessed valuations to lower a future payment.

Section 53.030, RSMo, requires the County Assessor to take an oath to assess property at what the official believes to be the actual cash value, and no provision of law permits the County Assessor to change the assessment based on overpayment of tax. Making adjustments to assessed valuations to satisfy overpayments increases the risk of improper assessments in future years and loss of tax revenues.

Recommendations

1.1 The County Commission ensure property tax system access is limited to only the areas needed by each user to perform his/her job duties and responsibilities.

1.2 The County Commission review and approve all property tax additions and abatements. In addition, the County Collector prepare complete and accurate annual settlements.

1.3 The County Assessor discontinue the practice of changing assessed valuations for subsequent billings when overpayments occur.

Auditee's Response

1.1 The County Commission has limited the property tax system access and implemented policy controls to ensure no one person can both assess and collect taxes.

1.2 While the County Commission approved all abatements and additions annually, the County Collector's office, as of March 14, 2019, is submitting monthly additions and abatements to the County Commission for approval versus reporting the net change as was being done. The County Collector's annual settlement for the year ended February 28, 2019, has been corrected categorizing additions and abatements separately versus reporting the net change. The County Clerk with approval of the County Commission will make any corrections to the tax books.

1.3 The County Assessor's office discontinued issuing Assessed Value Credits to offset overpayments caused by reporting errors. When errors occur, the County Assessor or Chief Deputy Assessor will verify funds availability with the County Collector or the Chief Deputy Collector for the relevant tax year. When available, a refund will be initiated by the County Assessor's office and executed by the County Collector's office.

Cape Girardeau County Collector and Property Tax System Organization and Statistical Information

The County Collector bills and collects property taxes for the county and most local governments. Pursuant to Section 52.015, RSMo, the term for which collectors are elected expires on the first Monday in March of the year in which they are required to make their last final settlement for the tax book collected by them. Annual settlements are to be filed with the county commission for the fiscal year ended February 28 (29).

Diane Diebold served as County Collector until November 30, 2018. Barbara Gholson was appointed the Cape Girardeau County Collector and sworn into office on December 1, 2018.

The former County Collector received compensation of $63,078 for the period March 1, 2018, to November 30, 2018. During the year ended February 28, 2018, the former County Collector received compensation of $78,096. Compensation was in accordance with statutory provisions.

May 2019

auditor.mo.gov

Nicole Galloway, CPA
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the City of Miller Police Department Disbursements and Seized Property

Background	The former Police Chief, Joshua Bruce, was employed by the City of Miller from July 5, 2011, until he was placed on administrative leave on March 29, 2017, and subsequently terminated on May 4, 2017, for preparing and approving false timesheets showing time worked by his brother when he was not on duty, failing to prepare fuel records, submitting unsupported mileage reimbursements, making unauthorized purchases on credit cards, and using city funds to purchase surplus property for personal use. On August 31, 2011, the city, at the request of the former Police Chief, hired his brother, Randall Bruce, as a Lieutenant. He was also terminated on May 4, 2017, due to false timesheets. Former Police Chief Bruce was charged with multiple criminal counts of receiving stolen property (felony and misdemeanor) in July and August 2017, and former Lieutenant Bruce was charged with a felony criminal count of receiving stolen property in August 2017. Both of these criminal cases are ongoing. The Missouri State Highway Patrol (MSHP) conducted an investigation, and the Prosecuting Attorneys in Lawrence and Christian County filed the related charges. The State Auditor's Office (SAO) was petitioned to audit the city and began an audit on March 1, 2018, at which time we were informed of the MSHP investigation and criminal charges.
Improper Payroll Payments	The audit identified estimated improper payroll checks totaling $24,623 issued to the former Lieutenant but negotiated by the former Police Chief during the period August 2014 through March 2017. The city's payroll records showed significant and unexplained increases in the amounts paid to and hours worked by the former Lieutenant. In addition, the city could not provide timesheets to support 12 payments made to the former Lieutenant totaling $5,606, the former Police Chief falsely prepared 55 timesheets for his brother, and the former Police Chief improperly negotiated at least 64 of the total 67 payroll checks made payable to the former Lieutenant. The audit also identified $1,758 in improper overtime payments to the former Police Chief related to highway safety grants. Former Police Chief Bruce and the former City Clerk also did not maintain and submit all required records for the highway safety grants and as a result, the city owes $1,779 in grant funding back to the Missouri Department of Transportation's (MoDOT) Highway Safety and Traffic Division, and timesheets maintained by the city and hours claimed per grant documents showed several discrepancies.
Mileage Reimbursements, Fuel Purchases, and City Vehicle Use	Unsupported and excessive mileage reimbursements totaling $12,795 were paid to the former Police Chief; at least $3,598 of fuel purchases made using city's credit cards assigned to the former Police Chief are questionable; and the city did not report the value of personal (commuting) mileage to the Internal Revenue Service (IRS) as required.
Credit Card Purchases and Missing Assets	The former Police Chief used city credit cards to purchase personal items/services ($1,859) and numerous meals that were likely not related to city business ($362). The Board and former City Clerk did not perform adequate reviews of credit card statements, invoices, and other supporting documentation, and as a result, questionable purchases made by the former Police Chief went undetected for several years. The city lacks adequate

controls and procedures over police department property items, and does not properly track receipt and use of state and federal surplus property items. Several city assets, including state and federal surplus property items, are missing.

Donations and Seized Property

Cash donations received by the former Police Chief and seized property are missing, and controls and procedures over donations and seized property need improvement. Cash donations collected by the former Police Chief totaling $1,445 are missing. Various seized property items, including firearms and cash, are missing and the MSHP located some of these items at the former Police Chief's residence after his termination.

In the areas audited, the overall performance of this entity was **Poor**.*

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

NICOLE GALLOWAY, CPA
Missouri State Auditor

To the Honorable Mayor
and
Members of the Board of Aldermen
City of Miller, Missouri

We have audited the City of Miller Police Department Disbursements and Seized Property. During our audit of certain operations of the City of Miller in fulfillment of our duties under Section 29.230, RSMo, we were made aware of improprieties with some disbursements and seized property and determined additional work was necessary to review transactions of the police department. The scope of our audit included, but was not necessarily limited to, the period from January 1, 2014, through March 31, 2017. The objectives of our audit were to:

1. Evaluate the city's internal controls over significant management and financial functions as they relate to the police department.

2. Evaluate the city's compliance with certain legal provisions as they relate to the police department.

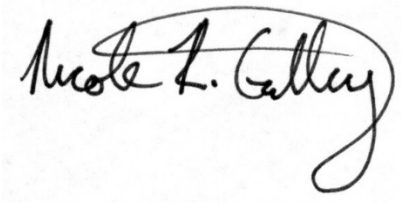
3. Determine the amount of improper payments and questionable disbursements, and the extent of missing assets and seized property.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the city, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of applicable contract, grant agreement, or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

For the areas audited, we identified (1) deficiencies in internal controls, (2) noncompliance with legal provisions, and (3) improper payments totaling $26,381, questionable disbursements totaling at least $18,614, missing donations of $1,445, and numerous missing assets and seized property items. The accompanying Management Advisory Report presents our findings arising from our audit of the City of Miller Police Department Disbursements and Seized Property.

An additional report, Report No. 2019-035, *City of Miller*, was issued in May 2019.



Nicole R. Galloway, CPA
State Auditor

The following auditors participated in the preparation of this report:

Senior Director:	Regina Pruitt, CPA
Audit Manager:	Pamela Allison, CPA, CFE
In-Charge Auditor:	Troy Royer
Audit Staff:	Terese Summers, MSAS, CPA
	Ethan D. Evans

City of Miller Police Department Disbursements and Seized Property
Introduction

Background

The former Police Chief, Joshua Bruce, began employment with the City of Miller (in Lawrence County) on July 5, 2011. He was placed on administrative leave on March 29, 2017, and was subsequently terminated by the city on May 4, 2017, for preparing and approving false timesheets showing time worked by his brother when he was not on duty, failing to prepare fuel records, submitting unsupported mileage reimbursements, making unauthorized purchases on credit cards, and using city funds to purchase surplus property for personal use. On August 31, 2011, the city, at the request of the former Police Chief, hired his brother, Randall Bruce, as a Lieutenant. He was also terminated on May 4, 2017, due to false timesheets. Former Lieutenant Bruce served as the City of Clever (in Christian County) Police Chief during the period he was employed by the City of Miller. The Clever City Clerk indicated Randall Bruce was a salaried employee and expected to work a minimum of 40 hours per work week (Monday through Friday).

Former Police Chief Bruce was charged with multiple criminal counts of receiving stolen property (felony and misdemeanor) in July and August 2017, and former Lieutenant Bruce was charged with a felony criminal count of receiving stolen property in August 2017. Both of these criminal cases are ongoing. The Missouri State Highway Patrol (MSHP) conducted an investigation, and the Prosecuting Attorneys in Lawrence and Christian County filed the related charges. Former Police Chief Bruce refused to cooperate with the MSHP investigation or be interviewed. The State Auditor's Office (SAO) was petitioned to audit the city and began an audit on March 1, 2018, at which time we were informed of the MSHP investigation and criminal charges. Audit work by the SAO confirmed the former Police Chief and his brother, former City of Miller Lieutenant/former City of Clever Police Chief, had misappropriated city monies, assets, and seized property, and identified additional monies improperly paid to the former Police Chief.

The MSHP indicated in a probable cause statement dated August 21, 2017, that during his time of employment with the city the former Police Chief stole approximately $27,481 in payroll, donation money, and equipment from the city. The probable cause statement also identified numerous firearms missing from evidence or stolen by the former Police Chief, some of which were located at the former Police Chief's residence.

The MSHP provided the SAO various records obtained through the agency's investigation including city records, investigative reports, interviews, and a time records analysis prepared by the Mid-States Organized Crime Information Center (MOCIC).

The MOCIC used Lawrence County computer aided dispatch (CAD) records,[1] City of Clever dispatch records,[2] and personal cell phone tower activity[3] to prepare the analysis. The time record analysis prepared by MOCIC pertained to the period August 1, 2016, through March 28, 2017. The MSHP also provided personal bank account records for a joint bank account held by the Bruce brothers for the period December 18, 2015, through May 17, 2017. The MSHP executed search warrants at the former Police Chief's residence on July 27, 2017, and August 18, 2017.

The lack of segregation of duties and adequate controls, and the absence of proper oversight, as discussed in the City of Miller, report No. 2019-035, issued in May 2019, resulted in the unsupported and improper payroll payments; overpayments; unsupported mileage reimbursements; questionable disbursements, and missing assets, donations, and seized property going undetected for a significant period of time.

[1] The City of Miller contracts with Lawrence County for dispatch services; therefore, these records were used to determine if the former City of Miller Lieutenant/former City of Clever Police Chief was working in the City of Miller during times reported on his timesheet.

[2] The City of Clever maintains its own dispatch services; therefore, these records were used to determine if the former City of Miller Lieutenant/former City of Clever Police Chief was working in Clever instead of Miller during the hours reported on his timesheet. The former City of Miller Lieutenant/former City of Clever Police Chief reported the start and end time of each shift worked with dispatch.

[3] Personal cell phone activity from towers in Miller and Clever were used to determine if the former City of Miller Lieutenant/former City of Clever Police Chief was working in the Clever or Miller area during the hours reported on his timesheet.

1. Improper Payroll Payments

The audit identified estimated improper payroll checks totaling $24,623 issued to the former Lieutenant, Randall Bruce, but negotiated by the former Police Chief, Joshua Bruce, during the period August 2014 through March 2017.

The audit also identified $1,758 in improper overtime payments to the former Police Chief related to highway safety grants. Some grant records were not maintained or submitted for grant funds received, and as a result, the city is being required to repay funds to the granting agency.

The Missouri State Highway Patrol (MSHP) investigation determined the former Police Chief stole $24,801 in payroll by forging numerous time records for his brother, the former Lieutenant from August 2011 through March 2017. Our review of city payroll records and the related payments made to the former Police Chief and former Lieutenant, and the time records analysis provided by the MSHP identified the following concerns, which further confirmed improper payroll payments occurred.

1.1 Improper payments and timesheets

The city's payroll records showed significant and unexplained increases in the amounts paid to and hours worked by the former Lieutenant. The city could not provide timesheets for some payroll checks issued to the former Lieutenant. The former Police Chief also improperly prepared timesheets for his brother, the former Lieutenant, and some of the timesheets prepared were not accurate. The related payroll checks issued to the former Lieutenant were also improperly negotiated by the former Police Chief.

Significant increases in reported hours

City personnel indicated the former Police Chief's brother was hired on August 31, 2011, to work limited hours on an as needed basis with no set schedule or hours established, while also serving as the City of Clever Police Chief on a full-time basis. City payroll records showed significant increases in the amounts paid to and hours worked by the former Lieutenant for the years ended December 31, 2014, 2015, and 2016, and in the first 3 months of 2017 in comparison to the years ended December 31, 2012, and 2013.

	(1)	Year Ended December 31,					(2)
	2011	2012	2013	2014	2015	2016	2017
Gross wages	$ 2,957	1,179	1,107	3,420	9,531	13,230	3,600
Hours reported as worked	329	131	123	380	1,059	1,400	381
Pay periods worked/Total pay periods available	8/8	8/24	5/24	13/24	24/24	24/24	6/6

(1) August 31 through December 31, 2011

(2) January 1 through March 31, 2017

The average number of hours reported as worked per pay period by the former Lieutenant was consistent in 2012 and 2013, but began to significantly increase in August 2014 and continued to increase through March 31, 2017.

The former Lieutenant's pay rate was $9.00 per hour during 2011 through 2015 and $9.45 per hour during 2016 and 2017.

The former Lieutenant only worked during 8 of 24 pay periods during 2012, 5 of 24 pay periods during 2013, and 4 of the first 14 pay periods of 2014. During the first 14 pay periods of 2014, the former Lieutenant's timesheets reported he only worked 52 hours; however, during 9 of 10 of the remaining pay periods (August through December) his timesheets showed he worked 328 total hours. Timesheets indicate the former Lieutenant worked every pay period during 2015, 2016, and 2017, until his termination, unlike earlier years where pay periods with reported hours were sporadic. An explanation of the significant increase in hours worked was not documented by the former Lieutenant, former Police Chief, or other city officials. Particularly for 2015, 2016, and 2017, reported hours seemed high considering the former Lieutenant's time obligations for the City of Clever. Also, former city personnel and police officers indicated the former Lieutenant rarely had a physical presence in the City of Miller.

The former Lieutenant indicated in a MSHP interview that he did not prepare or sign any of his timesheets, did not work the number of hours reported to the city, and was aware his W-2 forms were incorrect (more wages than he expected based on work performed). He also stated he did not notify anyone of the apparent problems and filed the W-2 forms, without questioning, with his personal income tax returns because he did not want to raise any red flags with the Internal Revenue Service (IRS).

Unsupported payments

The city could not provide timesheets to support 12 payments made to former Lieutenant Bruce totaling $5,606 for the following pay periods.

Pay Period	Hours Worked (1)	Check Date	Check Number	Gross Payroll Amount	Check Amount
09/16/14 through 09/30/14	80	09/30/14	3862	$ 720	633
01/16/15 through 01/31/15	48	01/29/15	4109	432	395
05/01/15 through 05/15/15	24	05/14/15	4336	216	199
05/16/15 through 05/31/15	31	05/29/15	4361	279	258
07/01/15 through 07/15/15	32	07/14/15	4461	288	265
10/01/15 through 10/15/15	62	10/15/15	4654	558	506
12/01/15 through 12/15/15	41	12/14/15	4785	369	339
12/15/15 through 12/31/15	54	12/30/15	4811	486	443

04/16/16 through 04/30/16	48	04/29/16	5089	454	414
05/01/16 through 05/15/16	61	05/12/16	5131	576	522
01/01/17 through 01/15/17	63	01/12/17	5710	595	547
Total	611			$ 5,606	5,090

(1) Hours worked were calculated based on hourly rate and gross pay.

The former City Clerk indicated for the undocumented payroll payments, the former Police Chief would verbally provide or indicate the number of hours worked on a slip of paper, and that some of these notes were thrown away after payment. Due to the lack of documentation, the propriety of these payments cannot be evaluated or determined, and these payments are included in the improper payroll estimate.

Falsified timesheets

According to former city personnel, the former Police Chief prepared 55 semi-monthly timesheets for his brother, the Lieutenant, and submitted them to the former City Clerk for payment during the time period January 1, 2014, through March 29, 2017.[4] The former Lieutenant did not review or sign these timesheets and was paid $24,175 (gross pay) during these pay periods (see Supporting Documentation for Falsified Timesheets). Of these 55 timesheets, 53 were not signed and 2 timesheets were initialed "RB" (Randall Bruce) in the former Police Chief's scripted handwriting. The former Lieutenant indicated in a MSHP interview, that he did not prepare or sign any of these timesheets submitted to the City Clerk for payment.

Time record analysis

The time record analysis prepared by Mid-States Organized Crime Information Center (MOCIC) for the period of August 1, 2016, through March 28, 2017, showed significant discrepancies in dates and times claimed to have been worked for the City of Miller by the former Lieutenant. We used the time record analysis information obtained from dispatch and cell phone tower records to determine how much of the time claimed to have been worked during this period was supported. Only 64.5 (8 percent) of the 857 hours reported as worked during this time period were corroborated, 721.5 hours (84 percent) were improperly reported, and the remaining 71 hours of work (8 percent) could not be determined.

Conflicting schedules

We also compared the hours reported as worked on the former Lieutenant's timesheets to the dates and times of City of Clever City Council meetings (where he was employed as Police Chief) and noted problems with hours reported as worked. For example, the City of Clever Council meeting minutes indicated the former Lieutenant was present at Council meetings held on October 18, 2016, December 20, 2016, January 17 and 24, 2017, February 21, 2017, and March 21, 2017, and that each meeting started at 6:30 p.m. However, the former Lieutenant's City of Miller timesheets indicated he worked from 4 p.m. until 12 a.m. on October 18, 2016; from 6 p.m. until 12 a.m. on December 20, 2016; from 5 p.m. until 12 a.m. on January 17, 2017; from 6 p.m. until 12 a.m. on January 24, 2017; from 4 p.m. until 12 a.m. on February 21, 2017; and from 6 p.m. to 10 p.m. on March 21, 2017. Considering the time of the council meetings in Clever, it was not possible for the former Lieutenant to have worked all of these hours in Miller.

[4] No payments were made to the former Lieutenant during 11 pay periods in 2014; therefore, no timesheets were needed for these pay periods.

Inaccurate timesheets

The timesheets prepared for the former Lieutenant were not always accurate. The total hours reported as worked did not always agree to the start and end times of work recorded on the timesheets. For example, the former Lieutenant's timesheet indicated he worked from 3 p.m. until 10 p.m. (7 hours) on Sunday, August 21, 2016; however, the total hours reported as worked on the timesheet was 10 hours. As a result, the former Lieutenant was incorrectly paid for 10 hours rather than 7 hours (overpayment of 3 hours).

Improperly negotiated checks

The former Police Chief improperly negotiated at least 64 of the total 67 payroll checks made payable to the former Lieutenant during the period January 1, 2014, through March 31, 2017. Of these 67 checks, 37 checks were endorsed "RB" with the additional endorsement of "Joshua Bruce" applied with both endorsements written in former Police Chief's scripted handwriting, 19 checks were endorsed "RB" in the former Police Chief's scripted handwriting, 6 checks were endorsed "Joshua Bruce" in the former Police Chief's scripted handwriting, and 2 checks were signed "Randall Bruce" with the additional endorsement of "Joshua Bruce" in the former Police Chief's scripted handwriting. Because images of the remaining 3 checks could not be obtained from the bank, we could not evaluate those endorsements. Many of these checks were deposited into a joint bank account maintained by the Bruce brothers. The former Lieutenant indicated in a MSHP interview that the former Police Chief gave him his City of Miller paychecks when he was first employed, but eventually the former Police Chief deposited these payroll checks into their joint account. The former Lieutenant also indicated in the interview that he did not endorse most paychecks issued to him by the City of Miller.

Estimated improper payments

Based on our detailed review of city payroll records and related procedures for the period January through March 2017, the MSHP investigative report documents and interviews, the MOCIC time analysis results, and discussions with former city personnel, it is likely a significant portion of the former Lieutenant's compensation was improper. We estimated improper payroll payments for the period August 1, 2014, through March 31, 2017 (the time period for which we noted significant increases in amounts paid and hours worked), using hours reported as worked for the City of Miller (from timesheets, handwritten notations of hours worked from the former Police Chief, and/or former City Clerk's handwritten notations of hours worked based on verbal instructions from the former Police Chief; however, some of the notes were thrown away after payment). We estimated the total improper payments using the 84 percent rate (improperly reported hours worked) determined in the MOCIC detailed time analysis previously discussed.

	August 1 through December 31, 2014	Year Ended December 31, 2015	2016	January 1 through March 31, 2017	Total
Gross wages	$ 2,952	9,531	13,230	3,600	$ 29,313
Percentage applied	84%	84%	84%	84%	84%
Estimated improper payments	$ 2,480	8,006	11,113	3,024	$ 24,623

The lack of sufficient reviews or oversight over the payroll process and transactions allowed these improper payments to occur and go undetected for a significant period.

In addition to the estimated $24,623 in improper payroll, the remainder of the report discusses other problems we identified regarding the former Police Chief, including improper overtime payments, excess mileage reimbursements, questionable fuel use and meal purchases, and improper handling of city assets and seized property.

1.2 Highway safety overtime grants

Former Police Chief Bruce and the former City Clerk did not maintain and submit all required records for 3 highway safety grants and as a result, the city owes $1,779 in grant funding back to the Missouri Department of Transportation's (MoDOT) Highway Safety and Traffic Division. In addition, the former Police Chief improperly requested and was paid $1,758 by the city for overtime related to these grants.

Four grants provided funding for overtime incurred during a driving while intoxicated (DWI) enforcement campaign from August 19, 2016, through September 5, 2016 ($579); a child passenger safety week campaign from September 18, 2016, through September 24, 2016 ($500); a holiday DWI enforcement campaign from December 15, 2016, through January 1, 2017 ($600); and a St. Patrick's Day DWI enforcement campaign from March 16, 2017, through March 19, 2017 ($600). The grant agreements required the city to provide timesheets, salary and payment verification, and an Overtime Enforcement Manpower report form with reimbursement requests. Other records were also required to be retained by the city including timesheets, dispatch records, and a report of traffic stops and activities performed during the grant hours. However, city officials submitted incomplete and inaccurate records, and did not maintain other required records.

In January 2018, a MoDOT investigator contacted former Police Chief Nay (Nay was promoted to Police Chief after former Police Chief Bruce's termination) and requested copies of payroll records showing grant time worked, dispatch records, traffic stop records, and records of other law enforcement activities completed during the hours worked on the grants; however, no records were provided to the MoDOT at that time.

On September 27, 2018, the MoDOT notified the city that an audit of the police department's traffic overtime grants identified the city had failed to maintain and submit accurate records to support the reimbursement of overtime hours worked by the police officers for 3 of the 4 grants, and that repayment of all funds received for these grants must occur. After receiving this notification, city officials compiled some records (timesheets, paystubs, and checks) to submit to the MoDOT for review. The additional submitted information did not satisfactorily meet grant requirements and the city received an invoice dated January 11, 2019, requesting repayment of $1,779.

Our review of timesheets maintained by the city and hours claimed per grant documents submitted to MoDOT by the former Police Chief for reimbursement showed the following discrepancies.

Per Grant Claim Form			Per Employee Timesheet		
Date Worked	Officer	Hours Worked	Date Worked	Officer	Hours Worked
			08/27/16	Welker	3.5
08/28/16	Welker	8.0	08/28/16	Welker	4.5
08/29/16	Nay	7.0	09/03/16	Nay	3.0
			09/01/16	Bruce	4.0
			09/02/16	Bruce	4.0
09/04/16	Bruce	13.0	09/03/16	Bruce	5.5
09/21/16	Welker	6.0	09/21/16 (1)	Welker	6.0
12/28/16	Peck	2.5	01/01/17	Peck	2.5
12/29/16	Nay	4.0	12/31/16	Nay	4.0
12/30/16	Bruce	10.5	(2)		
12/31/16	Bruce	10.5	(3)		

(1) The date recorded on the timesheet by Officer Welker was marked through and altered to this date in the former Police Chief's scripted handwriting.

(2) The former Police Chief's timesheet indicated he did not work on this day.

(3) The former Police Chief's timesheet indicated he worked 16 hours on this day, but did not indicate that any of the hours related to this grant, as other timesheets indicated.

The table shows that many of the discrepancies pertained to the former Police Chief. Also, the reimbursement claim form submitted for the holiday DWI enforcement campaign from December 15, 2016, through January 1, 2017, for $600 was improperly signed, "Lt. R Bruce" in Joshua Bruce's scripted handwriting.

In addition to inaccurately reporting time worked on grant reimbursement requests, the former Police Chief improperly requested and was paid $1,758 by the city for overtime related to these grants, even though he was not entitled to receive overtime compensation. The grant agreements do not allow for reimbursement of hours that do not constitute overtime by local policy.

The following chart shows the checks issued to former Police Chief Bruce for work related to the highway safety grants.

Check Date	Check Number	Gross Amount of Check	Grant Hours Claimed
09/19/16	5416	$ 371	13.5 hours worked from 09/01 to 09/03/16
09/29/16	5429	357	13 hours worked on 09/18, 09/20, 09/21/16
12/30/16	5663	508	21 hours worked on 12/30 and 12/31/16
03/31/17	5885	522	19 hours worked on 3/16 and 3/18/17
	Total	$ 1,758	

Failure to retain adequate documentation of grant disbursements limits the city's ability to prove compliance with grant agreement terms and conditions. To ensure the propriety of all city disbursements, the Board should review and approve all grant disbursements prior to payment and claim forms prior to submission.

Recommendations

The Board of Aldermen:

1.1 Continue to work with law enforcement officials regarding criminal prosecution of improper payments issued to the former Lieutenant and negotiated by the former Police Chief, and take the necessary actions to obtain restitution.

1.2 Develop procedures to ensure requirements are met for any future grants obtained and work with MoDOT to resolve the grant repayment request. In addition, the Board should continue to work with law enforcement officials regarding criminal prosecution of the improper overtime payments issued to the former Police Chief, and take the necessary actions to obtain restitution.

Auditee's Response

1.1 We will continue to work with law enforcement officials regarding criminal prosecution and take the necessary actions to obtain restitution.

1.2 In the future, before any grant payments are sought, the City Clerk, Mayor, and the Board of Aldermen will develop procedures to review all information to ensure proper and accurate information is submitted and all grant requirements are met. Our city attorney has been in correspondence with MoDOT to come to a resolution of this matter, and any repayments will be made upon resolution with MoDOT. We will continue to work with law enforcement officials regarding criminal prosecution and take the necessary actions to obtain restitution.

2. Mileage Reimbursements, Fuel Purchases, and City Vehicle Use

Unsupported and excessive mileage reimbursements totaling $12,795 were paid to the former Police Chief; at least $3,598 of fuel purchases made using city's credit cards assigned to the former Police Chief are questionable; and the city did not report the value of personal (commuting) mileage to the IRS as required.

The following table presents mileage reimbursements to and fuel purchases by the former Police Chief and bulk fuel purchases for the police department from July 1, 2014, through March 29, 2017. This information was obtained from city records.

	Year Ended June 30,		Period July 1, 2016, through
	2015	2016	March 29, 2017
Mileage reimbursements to former Police Chief	$ 6,139	4,981	1,675
Credit card fuel purchases by former Police Chief	1,496	2,247	802
Police department bulk fuel purchases	3,214	2,157	3,184
Total	$10,849	9,385	5,661

The former Police Chief lived in the City of Clever and typically used a city-owned patrol vehicle to commute to and from work. Former city officials indicated that sometimes he would drive a personal vehicle. Mileage from his home to the police department was 69 miles round trip, and mileage logs were not maintained for city or personal vehicles. Personal property tax records for 2014, 2015, 2016, and 2017 tax years, obtained from the Lawrence County Collector, indicate the former Police Chief owned a diesel truck and another truck that used unleaded fuel.

Former city employees indicated in interviews with the MSHP that the former Police Chief used city bulk fuel tanks and city credit cards to fuel up both city-owned and personal vehicles, and that he also requested reimbursements for miles driven in his personal vehicle. Former city officials indicated city employees were expected to obtain fuel for city-owned vehicles from the bulk fuel tanks and only use the city credit card to purchase fuel when traveling out of the area, and that the former Police Chief used 3 credit cards to make purchases. The police department did not maintain bulk fuel usage logs and the city reimbursed the former Police Chief for mileage at 36 cents per mile.

Unsupported and excessive mileage reimbursements

Unsupported and excessive mileage reimbursements totaling $12,795 were paid to the former Police Chief during the period of July 1, 2014, through March 29, 2017. Adequate supporting documentation of mileage reimbursements paid to the former Police Chief was not maintained, and in some instances no documentation was maintained.

The former Police Chief reported a total number of miles requested for reimbursement on his semi-monthly timesheets with no details regarding date

of travel, daily miles driven, destination, or the business purpose. There was no separate reporting of mileage incurred. Some timesheets did not report any miles claimed and some timesheets were not maintained, yet the former Police Chief was reimbursed for mileage for the corresponding time periods. The former City Clerk indicated for the undocumented mileage reimbursements the former Police Chief would verbally provide or indicate the number of miles requested for reimbursement and the former City Clerk would note this on a slip of paper, some of which were thrown away after payment.

Considering the lack of supporting documentation, the Chief's frequent use of a city-owned vehicle rather than his personal vehicle(s), local fuel purchases charged to the city's credit card contrary to city practice, and the use of bulk fuel to fuel personal vehicles, we concluded that all miles claimed for reimbursement by the former Police Chief were improper. Also, based on the number of miles claimed, the average miles per workday the former Police Chief would have driven ranged from 39 (lowest number of miles claimed) to 684 (highest number of miles claimed). This is not reasonable considering city limits cover only about 7/10 of one square mile.

The following table shows the mileage reimbursements paid to the former Police Chief.

Check Date	Check Number	Miles Claimed	Amount of Mileage Reimbursement
07/15/14	3706	6,842 (1)	$ 2,463
07/24/14	3713	3,465 (1)	1,247
08/13/14	3750	1,118 (1)	402
08/20/14	3780	1,539 (1)	554
09/10/14	3818	1,285 (1)	463
10/24/14	3910	730 (1)	263
12/29/14	4033	891 (1)	321
05/14/15	4344	1,184 (1)	426
08/12/15	4506	1,453	523
08/25/15	4535	385	139
09/10/15	4567	1,103	397
10/09/15	4649	1,045 (1)	376
11/10/15	4699	1,389	500
11/24/15	4733	1,245	448
02/11/16	4899	1,545 (1)	556
02/25/16	4929	761	274
03/10/16	4965	1,258 (1)	453
04/12/16	5038	928	334
05/11/16	5108	891	321
06/27/16	5214	1,833	660
08/09/16	5328	1,349	486
09/19/16	5417	1,948	701
01/30/17	5725	586 (1)	211
03/08/17	5819	769 (1)	277
	Totals	35,542	$ 12,795

(1) Mileage was not reported on timesheets for checks issued in 2014 and 2017, and timesheets were not retained for checks dated 05/14/15, 10/09/15, 02/11/16, and 03/10/16; however, we calculated the number of miles claimed for these pay periods using the amount paid and the mileage reimbursement rate of 36 cents.

To ensure reimbursement requests are reasonable and represent valid disbursements, the city should require use of a reimbursement form to document mileage incurred.

Questionable fuel purchases

Some fuel charges on the city's credit cards used by the former Police Chief are questionable. During the period July 1, 2014, through March 29, 2017, the former Police Chief purchased $1,253 of fuel from gas stations in Clever, $394 of fuel from gas stations in Miller, and $1,951 of fuel from gas stations

in neighboring areas[5] within 50 miles of the City of Miller using the city's credit card (purchases totaled $3,598). In addition, $1,265 of these purchases occurred on weekends and $574 were for diesel fuel, with almost all of these purchases occurring in neighboring areas. Given that the former Police Chief was expected to only use the city's credit card to purchase fuel when traveling out of the area, these local fuel purchases totaling $3,598 are questionable. The former Police Chief also documented on some of the weekend fuel invoices that the purpose of the fuel was to take evidence to the lab; however, the MSHP lab is not open on weekends. Also, city officials indicated the only police vehicles that used diesel fuel were 2 Humvees obtained through a federal surplus property program that were not taken outside city limits, and should have only been fueled at the city's bulk tanks. Therefore, the diesel fuel charges are questionable and likely for the former Police Chief's personal diesel vehicle. Because of the lack of bulk fuel logs, further analysis of bulk fuel use was not completed.

Personal use of city vehicle

The city did not report the value of personal (commuting) mileage for the former Police Chief's personal use of a city vehicle on his W-2 forms as required by the IRS and the city did not follow the city code. As previously noted, the former Police Chief frequently used a city vehicle to commute between his home in Clever and the City of Miller, and he used city bulk fuel tanks and city credit cards to purchase fuel. However, vehicle logs were not maintained to distinguish between personal commuting and city business related mileage, and personal mileage was not reported on W-2 forms. Based on mileage from his home to the police department (69 miles round trip), we estimated the former Police Chief could have accumulated approximately 17,250 in annual commuting miles (50 weeks of the year). In addition, allowing city employees to take their vehicles home (outside of city limits), results in additional and unnecessary costs to the city. In addition, city code 100.240 states "city-owned vehicles shall not be used for other than official city business…."

IRS regulations do not consider commuting of police department employees in clearly marked public safety vehicles a taxable benefit when specific criteria are met; however it is not clear the vehicle usage of the former Police Chief always met this criteria. The IRS reporting guidelines indicate personal commuting mileage is a reportable fringe benefit. Because procedures have not been established to ensure the IRS regulations are followed, the city may be subject to penalties and/or fines for failure to report all taxable benefits. Mileage logs should be maintained that clearly distinguish between official or city business and commuting use, and taxable benefits should be reported on the employees' W-2 forms.

[5] Neighboring areas including Republic, Springfield, Mt. Vernon, Aurora, Marionville, Nixa, Billings, Sarcoxie, and Ozark, Missouri.

Recommendation

The Board of Aldermen continue to work with law enforcement officials regarding criminal prosecution of unsupported and excessive mileage reimbursements issued to the former Police Chief, questionable fuel purchases, and take the necessary actions to obtain restitution. In addition, the Board should comply with IRS guidelines for reporting fringe benefits and ensure mileage logs clearly distinguish between official or city business and commuting use.

Auditee's Response

We will continue to work with law enforcement officials regarding criminal prosecution and take the necessary actions to obtain restitution. We have implemented a new detailed mileage form to be submitted monthly. The issue of "commuting mileage" has been discussed prior to the release of this audit, and there will be no compensation for this type of mileage. In the police department's Standard Operating Procedures (SOPs), we added that a patrol log must be filled out with starting time and mileage, as well as ending time and mileage. These logs will be turned in at the end of the employee's work week, so they can be reviewed with timecards and paychecks. If a personal vehicle is used to go to training, a copy of the training registration, and certificate of completion, if available, or training materials will be attached to the mileage reimbursement request. In regards to the negligence of reporting to the IRS on forms W-2, we will also have the city attorney look into this matter and advise us on what action to take, if any. The Board is in the process of approving police department SOPs, and there is a section that addresses the purchasing of fuel. The fuel must be purchased at a local gas station, and receipts must be turned in or the purchaser will be held liable for the cost.

3. Credit Card Purchases and Missing Assets

The former Police Chief used city credit cards to purchase personal items/services ($1,859) and numerous meals that were likely not related to city business ($362). In addition, supporting documentation was not retained for numerous other city credit card purchases made by the former Police Chief, and other meals purchased using the city credit cards looked excessive and lacked adequate supporting documentation. The MSHP located numerous city assets at the former Police Chief's residence after his termination, and several other city assets are missing.

3.1 Personal and unsupported purchases and questionable meals

The Board and former City Clerk did not perform adequate reviews of credit card statements, invoices, and other supporting documentation, and as a result, questionable purchases made by the former Police Chief went undetected for several years.

Personal purchases

The following personal purchases were made by the former Police Chief from February 1, 2014, through March 29, 2017.

Date of Purchase	Item/Service Purchased	Amount
02/08/14	Fuel purchased in Kansas City, Kansas (1)	$ 64
02/08/14	Shooting range fees in Olathe, Kansas (1)	102
02/08/14	Shooting range fees in Olathe, Kansas (1)	81
02/09/14	Charge to hotel in Kansas City, Missouri (1)	32
04/17/15	Paslode framing nailer (2), nails	319
08/02/15	Lumber, trim, Cardinals key chain, misc. items	90
08/09/15	2 Vacuums, paper towels, toilet paper	279
08/09/15	Paint, plastic sheeting, light bulbs	56
08/17/15	Building supplies	62
08/30/15	6 - 5 gallon buckets, duct and industrial tape	31
12/13/15	Premium retractable hose and coupler	70
12/13/15	24 inch Quickie squeegee	26
12/26/15	Bosch indoor laser distance measurer, 14 piece bit set	111
01/07/16	Swiffer sweeper, refills, household cleaning supplies	55
02/21/16	15 - 8 foot landscaping timbers	52
03/06/16	2 boxes of spike nails	41
04/27/16	6 quarts of oil, 200 count of shop towels	42
05/03/16	Custom lights, accessories for personal truck	310
12/30/16	Apple iTunes	6
01/20/17	Apple iTunes	30
	Total	$ 1,859

(1) The former City Clerk indicated to the MSHP that the Board of Aldermen did not authorize the former Police Chief to travel to Olathe, Kansas.

(2) Item found at the former Police Chief's home by the MSHP.

Each of these disbursements was determined to be a personal purchase based on our review of available documentation and/or discussions with city personnel.

Unsupported purchases

Supporting documentation was not submitted or retained for numerous other credit card purchases made by the former Police Chief throughout the period of January 1, 2014, through March 29, 2017. For example, the following disbursements made by the former Police Chief for the period January 1 through May 31, 2016, did not have supporting documentation.

Date	Vendor	Amount
01/16/16	O'Reilly Automotive	$ 22
01/28/16	Rick's Tire Shop	57
02/11/16	Walmart	14
02/19/16	Frog's Detailed Specialties	30
03/03/16	Southern Uniform and Equipment	174
03/07/16	Lowe's	30
03/11/16	Walmart	399
03/11/16	Walmart	58
03/11/16	SQ M&D Tactical	280
03/14/16	Lowe's	99
03/15/16	Old School Auto Parts	15
03/28/16	Walmart	163
04/11/16	Amazon Marketplace	100
05/03/16	Amazon Marketplace	100
05/03/16	Amazon Marketplace	34
05/06/16	Amazon Marketplace	68
05/09/16	Amazon Marketplace	151
	Total	$ 1,794

No other city departments made purchases from Amazon Marketplace during the period of our review. Without supporting documentation, we could not evaluate whether these purchases were for personal or city purposes. In addition, without adequate supporting documentation and proper approval, city officials cannot evaluate the purpose of these purchases.

Improper and questionable meals

The former Police Chief frequently used a city credit card to purchase meals that did not appear proper and/or to benefit the city. Many of the meals were purchased in areas between his home and the city or in other neighboring areas as follows.

Date	Vendor	Location	Amount
08/12/14	Subway	Mt. Vernon	$ 31
07/27/15	McDonald's	Mt. Vernon	10
07/27/15	McDonald's	Mt. Vernon	4
08/10/15	McDonald's	Mt. Vernon	14
10/20/15	Qdoba	Springfield	17
10/21/15	Firehouse Subs	Springfield	21

The city does not have a formal written policy regarding meal reimbursements, but city officials indicated the city's practice is for employees to use city credit cards only for meals when overnight travel is required. Therefore, the meals purchased from local areas were likely personal. In addition, we did not see any instances of other police officers receiving reimbursement for meals within local areas.

Also, adequate documentation including the business purpose of meals and the persons in attendance was not always maintained, and some of the itemized invoices showed multiple meals being purchased. As a result, some meals purchased looked excessive and/or questionable.

03/28/17	G & D Pizzeria (6)	Columbia	28
		Total	$ 570

(1) Multiple meals purchased and no indication of purpose or attendees.

(2) One meal and appetizer and no indication of purpose or attendees.

(3) No itemized invoice or indication of purpose or attendees.

(4) Multiple meals purchased and no indication of attendees. Purpose was documented as training.

(5) No supporting documentation.

(6) No itemized invoice or indication of attendees. Purpose was documented as training.

Also, the city does not have a formal policy regarding documentation required for meal reimbursements. The lack of a formal written policy and detailed supporting documentation, including the purpose and list of individuals attending, makes it difficult for city officials to ensure the propriety of payments made for meal expenses.

3.2 Missing assets

The city lacks adequate controls and procedures over police department property items, and does not properly track receipt and use of state and federal surplus property items. Some police department assets and state and/or federal surplus property items were located at the former Police Chief's residence by the MSHP after the former Police Chief's termination, and the city cannot account for some assets.

The city obtained state and federal surplus property items from the Missouri State Agency for Surplus Property (SASP) and federal Defense Logistics Agency (DLA) 1033 Program[6] through the state Department of Public Safety (DPS). The SASP distributes state and federal surplus property to eligible entities for a nominal service charge. The 1033/LESO Program makes excess military property available to state and local law enforcement agencies through the DPS at no cost.

Surplus property and 1033/LESO Program

The former Police Chief purchased some items from the SASP that are missing. In addition, some items obtained by the City of Miller through the 1033/LESO Program are also missing.

Surplus property items located at the former Police Chief's residence after his termination included a Panasonic Toughbook laptop computer purchased by the city on November 24, 2015, for $250, and a Whirlpool Duet steam dryer purchased by the city on November 25, 2014, for $50. In addition, a Dell D630 laptop computer transferred from DPS through the 1033/LESO Program to the City of Clever on April 12, 2012, was also located at the former Police Chief's residence. City officials indicated they were unaware these items were being used by the former Police Chief at his home and not for city business.

The DLA conducted a 1033/LESO Program inventory with the MSHP at the city on July 19, 2017, and determined 7 reflex sights were missing. Other items likely received through the SASP and 1033/LESO Program were also located at the former Police Chief's residence, such as a cold weather tent set, night vision case, and knee pads. Because these items were not tagged and did not have other identifying information, their source could not be definitely determined; however, items of this nature were included on the lists of items obtained by the city from these programs.

In addition, the city purchased/received an excessive amount of equipment and supplies from these programs given the city employed only the former Police Chief and 6 part-time police officers (including former Lieutenant Bruce) at the time the items were obtained. For example, the city received 15 large field packs, 11 rifleman sets, 18 regular field packs, and numerous computers and monitors. Many of the items obtained are missing such as assault packs, field packs, computers, monitors, clothing, rifleman sets, and tools. In addition, the city has no procedures in place to monitor SASP purchases or items transferred through the 1033/LESO Program. The Board approved checks issued to the SASP, but did not review and approve surplus property invoices or account for the items purchased.

[6] Renamed the Law Enforcement Support Office (LESO) Program in 2016.

Items purchased from the SASP should be used for city purposes and not converted to personal use. According to state and federal regulations, surplus property acquired through the state must be used by the authorized public agency making the purchase for promoting public services for the residents of the political subdivision. In addition, Federal Management Regulation 41 CFR Section 102-37.450 requires that federal surplus property be used only for its approved purpose, placed in use within 1 year, and used for at least 1 year by the eligible donee. 1033/LESO Program policies require all acquired property be deployed for law enforcement use only.

To ensure the validity and propriety of surplus property purchases and compliance with state and federal regulations, and to decrease the risk of theft or misuse of city assets occurring without detection, procedures should be established to monitor and account for surplus items obtained.

City assets

The Police Department did not maintain records or perform periodic inventories of weapons used by the department. Also, city officials failed to ensure city assets in the possession of the former Police Chief were returned at the time of his termination, including a Glock 19 pistol and a pressure washer, located at the former Police Chief's residence by the MSHP after his termination. The city purchased the pistol for $525 on November 18, 2015. Former city employees indicated to the MSHP that the former Police Chief took a city-owned pressure washer home with him, and the former Police Chief indicated to the MSHP at the time of a search warrant service that the pressure washer located at his residence belonged to the city.

In addition, the former Police Chief circumvented the city's normal disbursement process and purchased a Springfield-Armory MIA semi-automatic rifle from an area tactical vendor on July 7, 2016, for $1,685 with cash. The former Police Chief provided a letter to the vendor stating the purchase was being made for use by the Miller Police Department. The vendor indicated the letter was provided as documentation because background checks are not required for gun purchases made by police departments for official use by qualified officers. This vendor invoice showed the customer as the City of Miller and included another rifle, a Rock River AR-15, costing $1,100, also paid for with cash. However, a letter was not provided showing this rifle was a city purchase. City officials indicated they did not authorize the purchase of either rifle and did not know the source of the cash funds used to make these purchases. The MIA rifle was located at the former Police Chief's residence after his termination; however, the Rock River AR-15 is missing. Former city officials indicated additional city assets are missing such as printers, monitors, ballistic vests, and an electric drill.

Failure to properly account for city assets and establish termination procedures that require and document the return of city assets increases the potential for loss and theft to occur. In addition, to ensure all purchases are legitimate and properly approved for payment, disbursements should be

processed through the city's normal disbursement process in compliance with city code 135.090 that states, "All supplies and contractual service, except as otherwise provided in this chapter, when estimated cost thereof shall exceed one thousand dollars ($1,000.00), shall be purchased by formal, written contract from the lowest responsible bidder, after due notice inviting proposals…."

Recommendations

The Board of Aldermen:

3.1 Continue to work with law enforcement officials regarding criminal prosecution of personal, unsupported, and excessive purchases and take the necessary actions to obtain restitution. In addition, the Board should establish and maintain appropriate policies and procedures regarding meal expenses.

3.2 Continue to work with law enforcement officials regarding criminal prosecution of missing city assets. The Board should also establish controls and procedures to monitor and account for city assets, and ensure compliance with applicable surplus property regulations.

Auditee's Response

3.1 We will continue to work with law enforcement officials regarding criminal prosecution and take the necessary actions to obtain restitution. In the summer of 2018, after these concerns were identified, the Board passed an ordinance that addresses meal expenses.

3.2 We will continue to work with law enforcement officials regarding criminal prosecution and take the necessary actions to obtain restitution. We currently use a spreadsheet provided by the 1033/LESO Program to inventory items we receive. We will create a spreadsheet to track items previously received by each department. This will make it easier to add and delete inventory, and document a disposal date for inventory no longer in use. Each department head will conduct the inventory for his/her department, and present it to the Mayor. This is something the Mayor will oversee each year moving forward, with the inventory going to the Board for review. We have also implemented a spreadsheet to track "duty equipment" issued to Police Department employees that will document dates items are checked out and returned.

4. Donations and Seized Property

Cash donations received by the former Police Chief and seized property are missing. Controls and procedures over donations and seized property need improvement.

4.1 Donations

Cash donations collected by the former Police Chief totaling $1,445 are missing. A citizen indicated in a written statement provided to the MSHP that

he donated $2,000 (cash) for the purchase of body cameras and $2,400 (cash) for the purchase of tasers to the city, and he gave the donations to the former Police Chief.

However, city records show the former Police Chief only transmitted $1,800 to the city for deposit in December 2016, therefore it is likely $200 of that donation is missing. The former Police Chief purchased body cameras on November 26, 2016, for $1,820, the vendor billed the city $1,820 on April 7, 2017, and the city subsequently paid this bill on April 26, 2017.

City records show that the former Police Chief did not transmit any of the $2,400 cash donation to the city for deposit. The former Police Chief instead issued a personal check on March 10, 2017, for $1,155 to pay for 3 tasers. The city cannot account for the $2,400 donation or the 3 tasers. The invoice for the 3 tasers was addressed to the City of Miller.

In addition, receipt slips were not issued and other records of donations received were not maintained by the former Police Chief or the city. To ensure donated monies are handled in the manner intended by the donor, receipt slips should be issued, and a record of all donations received and how the monies are spent should be maintained.

4.2 Seized property

Various seized property items, including firearms and cash, are missing and the MSHP located some of these items at the former Police Chief's residence after his termination. The city lacks controls and procedures over seized property. The former Police Chief did not maintain a comprehensive listing of all seized property, did not conduct periodic inventories of seized property, and access to seized property was not adequately restricted.

The City of Miller police department seized 11 firearms in January 2007. During the inventory conducted by the new Police Chief, new evidence officer, and the MSHP shortly after the former Police Chief was placed on administrative leave these firearms could not be located. Two of the seized firearms, a Browning 2000 20-gauge shot gun and a Savage Model 99 rifle were located at the former Police Chief's residence by the MSHP. The former Police Chief sold one of the seized firearms, a Mossberg 12-gauge pump action shotgun, to an individual for $150 on January 19, 2012, and transmitted the monies to the city for deposit. However, a court order authorizing the disposal of this shotgun was not obtained as required. The former Police Chief traded one of the firearms, a Glock Model 30 pistol, to a local vendor for a $320 credit on the personal purchase of a Cold Defender 9 millimeter gun on December 4, 2011. On December 30, 2011, the former Police Chief bought that firearm back from the vendor. The remaining 7 firearms, including 2 Remington Model 700 rifles, a Ruger Model 10/22 rifle, a Husqvarna Vapenfabriks 22 rifle, a Ruger Mini 14 semi-automatic rifle, a Ruger MKII Pistol, and a Smith and Wesson Model 19 pistol are still missing. In addition,

$8,000 in cash seized during a traffic stop in July 2016 could not be accounted for during the inventory and has not been located.

Despite the problems identified, the city has not taken steps to improve controls and adopt policies and procedures for the handling of seized property items and cash. Such policies and procedures should require that complete and accurate logs of seized property are maintained, periodic physical inventories of seized property are conducted and results compared to records, and access to seized property is adequately restricted.

Considering the often sensitive nature of seized property, adequate internal controls are essential and would significantly reduce the risk of loss, theft, or misuse of the property.

Recommendations

The Board of Aldermen:

4.1 Continue to work with law enforcement officials regarding criminal prosecution of the missing donations and take necessary actions to obtain restitution. In addition, the Board should ensure receipt slips or other records of donations received are maintained.

4.2 Continue to work with law enforcement officials regarding criminal prosecution of the missing seized property and take necessary actions to obtain restitution. In addition, the Board should also ensure seized property records are accurate and complete, a periodic inventory is taken and reconciled to the property records, and access to all seized property is adequately restricted.

Auditee's Response

4.1 We will continue to work with law enforcement officials regarding criminal prosecution and take the necessary actions to obtain restitution. We have added an addendum to our employee handbook that no employee shall accept donations of any kind, on behalf of the city. The employee is to direct the donor to City Hall, where the City Clerk will give the donor a receipt that documents the purpose of the donation. The purpose of the donation will also be recorded in the city's accounting system.

4.2 We will continue to work with law enforcement officials regarding criminal prosecution and take the necessary actions to obtain restitution. Our previous Police Chief Neely implemented an evidence/property form to use when property/evidence is seized. We have also moved the police department to City Hall, which will help deter any future officers from misconduct. There was an evidence room built and in the room are lockers dedicated by "types of evidence." The room remains locked at all times, access is restricted, and proper chain of custody procedures are followed. We will consider adding inventory procedures for seized property/evidence currently on hand to the Police Department SOPs.

(1) These two timesheets were signed "R.B." in the former Police Chief Joshua Bruce's scripted handwriting. The remaining timesheets were not signed.

(2) These checks were deposited into the joint bank account of former Police Chief Joshua Bruce and former Lieutenant Randall Bruce during the period December 18, 2015, through April 4, 2017. Other checks may have been deposited into the joint account prior to December 18, 2015; however, bank records were not available for our review.

Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the City of Miller

Utilities	There are significant weaknesses in the city's utility operations. Despite a water and sewer rate increase in February 2016, water and sewer rates charged are still not sufficient to pay for the costs of services provided, and as a result, the city is using the General Fund to subsidize the Proprietary Fund to avoid a deficit cash balance in the Proprietary Fund. The city has repeatedly violated the Missouri Clean Water Law and city officials have not taken sufficient corrective action to correct the sewer treatment facility issues. City personnel do not prepare reconciliations related to utility services. The former City Clerk and the Board were not proactive in following up on utility accounts receivable.
Payroll Controls and Procedures	Timesheets are not always signed by the employee or his/her supervisor to document approval of time worked and leave used, some overtime hours are not reported on maintenance employees' timesheets, and leave records are not always maintained. Employees estimate hours to be worked for some days on their timesheets because some payroll payments occur prior to the end of the pay period, and documentation is not available to indicate a comparison is performed between actual hours worked to the reported estimated hours. City employees have not always followed established overtime policies, and the Board has not established personnel policies addressing the calculation of overtime and employment and supervision of related employees. There was no documented cost-benefit analysis or discussion by the Board concerning the cost-effectiveness of providing health insurance stipends to employees instead of continuing to provide health insurance coverage.
Accounting Controls and Procedures	The Board has not established adequate segregation of duties or supervisory reviews over some of the financial accounting functions performed by the City Clerk and/or Deputy City Clerk positions. The city's procedures for receipting and recording payments, and making deposits need improvement. The city does not maintain the change fund at a constant amount and uses it for petty cash expenses.
Restricted Funds and Disbursements	The city has not established adequate procedures to ensure restricted revenues are recorded into the appropriate fund or to ensure the funds are used only for intended purposes. The city has not established adequate procedures to ensure disbursements were properly allocated or expended only for intended purposes. The city's procurement procedures do not always comply with the city code, and professional services are obtained without benefit of a competitive selection process. Controls and procedures over credit cards need improvement. The city's procedures to account for fuel use are not adequate. City public works employees removed a tree stump from a citizen's private residence.
Budgets and Published Financial Statements	The city's budgets do not contain all statutorily required elements and were not accurate. The Board budgeted a deficit cash balance in the Proprietary Fund and does not adequately monitor budget-to-actual receipts and disbursements. The former City Clerk did not prepare and publish complete and accurate financial statements as required by state law.

Board Qualifications and Sunshine Law	The city does not have procedures in place to ensure information regarding a person who may be unqualified to run for or hold elected office is timely reported to the appropriate authority, such as the Department of Revenue for unpaid tax issues as provided in Section 115.306, RSMo. Some issues discussed in closed meetings held were not allowable under the Sunshine Law.
Electronic Data Security	The city has not established adequate password controls to reduce the risk of unauthorized access to computers and data. Security controls are not in place to lock computers after a certain period of inactivity. The city has not developed a formal, written contingency plan for resuming normal business operations and recovering computer systems and data in the event of a disaster or other extraordinary situations. The city does not periodically test backup data to ensure essential data can be restored.
Capital Assets	The city's capital asset records did not include land, buildings, some vehicles, and other personal property and are not updated timely when purchases and dispositions occur. City personnel do not always tag assets or perform annual physical inventories.

In the areas audited, the overall performance of this entity was **Poor**.*

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

NICOLE GALLOWAY, CPA
Missouri State Auditor

To the Honorable Mayor
and
Members of the Board of Aldermen
City of Miller, Missouri

The State Auditor was petitioned under Section 29.230, RSMo, to audit the City of Miller. We have audited certain operations of the city in fulfillment of our duties. The city engaged Decker & DeGood, Certified Public Accountants (CPAs), to audit the city's financial statements for the year ended June 30, 2017. To minimize duplication of effort, we reviewed the CPA firm's audit report. The scope of our audit included, but was not necessarily limited to, the year ended June 30, 2017. The objectives of our audit were to:

1. Evaluate the city's internal controls over significant management and financial functions.

2. Evaluate the city's compliance with certain legal provisions.

3. Evaluate the economy and efficiency of certain management practices and procedures, including certain financial transactions.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the city, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of applicable contract, grant agreement, or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the city's management and was not subjected to the procedures applied in our audit of the city.

For the areas audited, we identified (1) deficiencies in internal controls, (2) noncompliance with legal provisions, and (3) the need for improvements in managements practices and procedures. The accompanying Management Advisory Report presents our findings arising from our audit of the City of Miller.

We did additional work related to various police department transactions and procedures due to criminal charges filed against the former Police Chief and former Lieutenant. Findings and recommendations related to this additional work are addressed in a separate report, No. 2019-036, *City of Miller Police Department Disbursements and Seized Property*.

City of Miller
Management Advisory Report
State Auditor's Findings

1. Utilities

There are significant weaknesses in the city's utility operations. The city provides water, sewer, and trash services, and accounts for the financial activity of these services in separate categories in the city's accounting system. These categories are combined into one fund called the Proprietary Fund in the city's audited financial statements. The city collected approximately $285,000 for water and sewer services and $47,000 for trash services during the year ended June 30, 2017.

1.1 Financial condition

Despite a water and sewer rate increase in February 2016, water and sewer rates charged are still not sufficient to pay for the costs of services provided. As a result, the city is using the General Fund to subsidize the Proprietary Fund to avoid a deficit cash balance in the Proprietary Fund. The Proprietary Fund cash balance is not sufficient to refund customer utility deposits that are also maintained in the Proprietary Fund. The following table reflects the cash balances and current liabilities of the Proprietary Fund for the past 5 years per the city's audited financial statement reports.

	Year Ended June 30,				
	2017	2016	2015	2014	2013
Unrestricted Cash Balance	$ 0	0	0	0	0
Restricted Cash Balance[1]	96,761	85,986	51,330	62,875	53,025
Total Cash Balance	$ 96,761	85,986	51,330	62,875	53,025
Current Liabilities					
Customer deposits	$ 32,206	32,200	30,281	29,639	29,330
Due to General Fund[2]	82,338	96,246	43,052[3]	35,740	26,307
Sales tax and primacy fees payable	1,792	1,911	2,116	2,323	1,997
Current portion of long-term debt	26,000	26,000	24,000	24,000	23,000
Total Current Liabilities	$ 142,336	156,357	99,449	91,702	80,634

[1] Restricted cash balances can only be used to service outstanding debt.
[2] Amounts due to General Fund are written off each year and are not accumulated from one year to the next.
[3] During the year ended June 30, 2015, the audit report reflected this amount as a transfer in from the General Fund; however, for consistency it is being reported as due to General Fund similar to how it was reported in other years.

The Due to General Fund amounts noted in the table represent the negative cash balance of the Proprietary Fund at the end of each fiscal year. This amount was subsidized by the General Fund. Based on the city's rate structure, the city does not generate sufficient revenues to cover the costs of operating and maintaining the water and sewer system and the debt service requirements resulting in the negative cash balances at the end of each fiscal year requiring subsidies by the General Fund.

Despite a sewer rate study obtained in July 2017 recommending a significant rate increase, the Board did not approve an increase in the current rate structure. The Board subsequently approved a water and sewer rate increase to take effect in September 2018. However, the Board did not set the sewer

rates at the amounts recommended in the study, and did not obtain a water rate study.

Water and sewer fees are user charges that should cover the cost of providing the service. Section 67.042, RSMo, provides that fees may be increased if supported by a statement of costs that shows the increase is necessary to cover costs of providing the service. To ensure utility rates are set to cover the cost of providing the related services, the city should perform and document a periodic detailed cost study of each of its utility costs, including depreciation, and establish rates to cover the total cost of operations without generating excessive profits.

1.2 Compliance with Missouri Clean Water Law

The city has repeatedly violated the Missouri Clean Water Law and city officials have not taken sufficient corrective action to correct the sewer treatment facility issues. The Public Works Superintendent reported to the Board the city's E. coli discharge was twice the limit allowed by the Department of Natural Resources (DNR) permit every month from July 2016 through July 2017. The city's ammonia discharge also exceeded the limit allowed by the DNR permit in 7 of those months. However, the Board has not brought the sewer system into compliance.

On September 20, 2017, the DNR issued a violation notice to the city citing "significant non-compliance for the exceedances related to the E. coli limits" for the 12 month period of July 7, 2016, through July 7, 2017. This letter also requested city officials contact the DNR if they had any questions about the report and to schedule a meeting to discuss the city's plans for correcting the non-compliance. However, they did not contact the DNR, and on November 17, 2017, the DNR issued a failure to report notice that requested the city file the missing status/progress report, detail the city's progress made in attaining compliance, and provide a written response explaining the reasons for the violations and the steps the city has taken or will take to prevent further violations. On December 21, 2017, the DNR issued another violation notice to the city for "non-compliance" for the exceedances related to E. coli limits for the period of July 2017 through September 2017. This notice also indicated the DNR had not received the missing status/progress report requested in the November 17, 2017, letter, and indicated it was due on or before September 1, 2017.

The July 2018 Board meeting minutes indicated the Public Works Superintendent reported continued violations of sewer discharge permit limits, but the city was actively meeting and working with DNR to correct the non-compliance. The Board hired an engineering firm in September 2018 to recommend improvements to the sewer treatment facility.

In September 2013, the DNR issued the city an operating permit in accordance with the Missouri Clean Water Law, Chapter 644, RSMo, and the Federal Water Pollution Control Act, 33 U.S.C. Section 1251, et. seq.,

detailing the compliance requirements of the city's effluent limitations and monitoring practices.

1.3 Utility reconciliations

City personnel do not prepare reconciliations related to utility services.

- The Board did not investigate significant differences identified in the monthly reconciliation of gallons of water billed to customers to gallons of water pumped. In addition, water usage is not tracked for city buildings. Without this water usage information the city cannot properly perform the reconciliation. The April 2018 water usage report submitted to the Board indicated the city could not account for 24 percent of water pumped. This significant difference is indicative of water loss issues and/or possible unbilled usage, and indicates a need for follow up.

  Tracking city usage and timely investigation of unexpected or significant differences between water billed and water pumped is necessary to help detect significant water loss timely and ensure water usage is properly billed. According to the United States Environmental Protection Agency, most states have regulatory policies that set acceptable losses from public water systems at a maximum of between 10 to 15 percent or less.[1] The standard for Missouri established by the DNR is 10 percent.

- The City Clerk does not perform monthly reconciliations of amounts billed, payments received, and amounts unpaid for utility services.

  Monthly reconciliations are necessary to ensure accounting records balance, transactions are properly recorded, and errors or discrepancies are detected timely.

1.4 Delinquent utility accounts

The former City Clerk and the Board were not proactive in following up on utility accounts receivable. As of September 19, 2018, the city had 17 utility accounts receivable balances delinquent for over 90 days totaling $26,547.

Two of these accounts had balances of $12,304 and $11,130 and date back to June and November 2016, respectively. Also, the former City Clerk allowed these 2 customers to make partial payments on their accounts for 3 to 4 years without Board approval, and the city does not have a written policy authorizing partial payments. A former Board member indicated the Board did not approve the former City Clerk accepting partial payments on any accounts. In addition, the former City Clerk failed to follow the city code for disconnection for these 2 accounts. These 2 accounts had current monthly

[1]United States Environmental Protection Agency, "Control and Mitigation of Drinking Water Losses in Distribution Systems," Appendix A, Table A-2, Selected State Standards for Unaccounted-for Water, https://www.awwa.org/Portals/0/AWWA/Government/WaterLossControl508.pdf, accessed April 10, 2019.

charges averaging less than $80, penalties were accrued at 10 percent on the total unpaid balance, and these delinquent account balances continued to increase over several years.

The current City Clerk turned 13 of these 17 accounts over to a collection agency in August 2018, including a portion of one of the accounts with a significant balance. The current City Clerk only turned over $2,005 of the $12,304 accounts receivable balance to the collection agency. This amount represented unpaid charges while the remaining $10,299 represented penalties incurred on the account. However, the Board had not approved the penalties to be written off, and it is unclear why the current City Clerk did not turn over the full balance of the account to the collection agency. The Board is taking legal action on the full balance of the other significant accounts receivable balance.

City code Section 700.110 states failure to pay a bill by the 20th of the month following the month during which water and sewer services were provided shall result in disconnection of the service. Good business practices require adequate collection procedures be established to ensure accounts are collected timely and bad debts are kept to a minimum.

Recommendations

The Board of Aldermen:

1.1 Document formal reviews of utility rates periodically to support any rate increase and set the rates to ensure revenues are sufficient to cover all costs of providing these services, including debt service requirements and reserves for future capital improvements.

1.2 Bring the sewer treatment facility into compliance with the Missouri Clean Water Law.

1.3 Investigate significant differences between gallons of water pumped to gallons billed. The Board should also ensure monthly reconciliations of amounts billed to amounts collected and delinquent accounts are performed.

1.4 Ensure sufficient procedures are developed to collect accounts receivable, all past due accounts are submitted to the collection agency, and service is disconnected in accordance with city code.

Auditee's Response

1.1 Prior to any future rate increase, the city will conduct a formal review of the utility rates to ensure revenues are sufficient to cover all costs of providing these services, including debt service requirements and reserves for future capital improvements.

1.2 A bond issue for water/wastewater upgrades was passed in April 2019 that will allow the city to bring the sewer treatment facility into compliance with the Missouri Clean Water Law.

1.3 We are aware of the significant amount of water loss each month and hope to fix known leaks and improve our water system while upgrading the sewer with the new bond monies and future grant monies. The City Clerk provides the Board a monthly reconciliation of the amounts billed, total amounts collected, and delinquent accounts.

1.4 The city now enters into written payment agreements with customers with delinquent accounts and the City Clerk follows up to ensure payments are routinely made. With a few exceptions, delinquent accounts will be submitted to a collection agency. In reference to the 2 accounts with substantial accrued amounts, the Board subsequently discussed and approved only going after the amount that represented water usage, not the penalties for one of the accounts. The reason we are going for the full amount for the other account is because we have sought legal action and is due to a lack of cooperation by the former customer. The Board was willing to collect on usage only, but after repeated attempts from our attorney and no response, we are going after the full amount. The city passed an ordinance to change the shut-off date from the 20th of the month to the first of the following month, and a deposit amount of $200 to turn on utilities. If payment is not made on the first of the following month, or the customer hasn't made prior arrangements with the City Clerk, a work order is made and the water is disconnected, and a lock is placed on the meter. There is a late fee assessed if the bill is not paid by the 15th, and if service is disconnected, there is a $25 reconnection fee.

2. Payroll Controls and Procedures

Controls and procedures over payroll and related matters need improvement. The city paid approximately $218,000 in wages during the year ended June 30, 2017.

2.1 Timesheets and leave records

Timesheets are not always signed by the employee or his/her supervisor to document approval of time worked and leave used, and some overtime hours are not reported on the timesheets for maintenance employees. In addition, leave records are not always maintained to track the number of hours of vacation and sick leave earned, used, and any remaining balances.

The current City Clerk indicated a maintenance employee is typically paid 2 hours of overtime each nonworking day (Saturdays, Sundays, and holidays) to check the water and sewer system; however, this time is not reflected on the employee's timesheet. For example, a maintenance employee's timesheet for the pay period December 16 through December 31, 2016, reported 80

work hours and 8 holiday hours; however, the employee was paid for 88 regular work hours and 13.5 hours of overtime. None of the overtime hours were recorded on the employee's timesheet, and the 6 nonworking days totaled 12 hours of overtime instead of the 13.5 hours paid.

Without accurate timesheets or a record of leave taken, city officials cannot ensure hours worked and leave earned and taken by employees are properly documented. To ensure the accuracy of the hours worked and leave taken, timesheets should be signed by the employees and reviewed and approved by the supervisor. Leave records also aid in determining final compensation for employees leaving city employment. In addition, the Fair Labor Standards Act (FLSA) requires employers maintain accurate records of actual time worked by employees.

2.2 Salary payments

Employees estimate hours to be worked for some days on their timesheets because some payroll payments occur prior to the end of the pay period, and documentation is not available to indicate a comparison is performed between actual hours worked to the reported estimated hours. For example, payroll payments occurred on December 14, 2016, for the pay period December 1 through December 15, 2016. As a result, full-time employees are sometimes paid in advance for their services.

Paying city employees for estimated hours worked may lead to errors and the potential for employees to be over/under paid. Article III, Section 38(a) of the Missouri Constitution, prohibits the granting of public monies or property to any private person, association, or corporation.

2.3 Personnel policies

City employees have not always followed established overtime policies, and the Board has not established personnel policies addressing the calculation of overtime and employment and supervision of related employees.

Overtime

Some city employees were paid for overtime in violation of city policy. The employee handbook states employees do not receive overtime, but can use the hours as paid time off. However, during the year ended June 30, 2017, the city paid 7 employees a total of $11,632 in overtime.

In addition, nonworking time, (vacation and sick leave, compensatory time, and holidays), is included in total hours worked when determining the amount of overtime earned by employees, which is not required by the FLSA. For example, during the 2 week pay period ending December 31, 2017, the former City Clerk was paid for 82.5 regular hours and 4.75 hours of overtime per the payroll stub or a total of 87.25 hours, when her timesheet indicated she worked 62.25 regular hours, received 12 hours of holiday pay, took 8 hours of vacation time, and used 2.5 hours of compensatory time, for a total of 84.75 hours that should have been paid at her regular rate of pay. Thus, the hours on the payroll stub did not agree to the hours on the timesheet. In addition,

the city's personnel policy does not address the hours to include when determining the number of overtime hours.

Related employees

The city's personnel policy does not address employment of related individuals. The former Police Chief directly supervised his brother, a former Lieutenant. The supervision of related employees can compromise a supervisor's objectivity when assigning duties, tracking leave, approving payroll, or evaluating employee performance. Written personnel policies and strict compliance with those policies is necessary to ensure equitable treatment of employees, prevent misunderstandings, and ensure employees are properly compensated.

2.4 Health insurance stipends

There was no documented cost-benefit analysis or discussion by the Board concerning the cost-effectiveness of providing health insurance stipends to employees instead of continuing to provide health insurance coverage. In addition, as a result of not providing health insurance coverage, the Board has increased the costs to the city and employees.

Meeting minutes of a special closed session held on January 25, 2018, indicated "Special meeting held to discuss employee health insurance and whether or not to continue to pay directly or provide once a month bonus for funds to let employees purchase their own. After group debate, group decided to get yearly insurance rates to pay off of age group list and continue with the $200 allowance for either child/spouse." A Board member "made motion to pay rates based off of silver plan with $2,500 deductible and still include the $200 dependent reimbursement until employee reaches Medicare age then would reimburse for Medicare/supplement cost to employee. Also, employee would only be able to choose either or (meaning would either have City of Miller pay for insurance directly or be reimbursed based off of silver plan rate but not able to have both)." No documentation or Board discussion of the related costs of providing health insurance stipends instead of health insurance coverage was maintained.

Based on the total amount of stipends paid per month, the city and the employees will incur approximately $368 a month or $4,416 annually more in Federal Insurance Contributions Act (FICA) taxes. The FICA taxes by month impacting each employee are noted in the following table. The amount of the stipend provided to each employee also varies significantly because of age, tobacco use, and dependents.

Employee Identifier	Employee Monthly Stipend Amount	Dependent Monthly Stipend Amount	Total Monthly Stipend Amount	Monthly FICA Taxes per Employee
1	$ 1,013	200	1,213	93
2	576	200	776	59
3	400	0[1]	400	30
4	400	200	600	46
5	1,057	200	1,257	96
6	370	200	570	44
Total	$ 3,816	1,000	4,816	368

[1] This employee does not have any dependents.

An evaluation of the costs and benefit of either providing health insurance or health insurance stipends would provide a means to determine the most cost-effective method of providing these services. Without such a study, the costs of providing health insurance stipends may be higher than necessary.

Recommendations

The Board of Aldermen:

2.1 Ensure timesheets are accurate, properly signed and approved, and employee leave balances are properly tracked and monitored.

2.2 Discontinue compensating full-time employees in advance of receiving services.

2.3 Ensure compliance with personnel policies, and review and update the personnel policies, as necessary.

2.4 Prepare a cost-benefit analysis of providing health insurance versus health insurance stipends. The Board should ensure a cost-benefit analysis is prepared when making significant management decisions in the future.

Auditee's Response

2.1 We now have a time clock that stamps employee's time cards. Each week the City Clerk goes through and calculates the employee's time and ensures the timesheets are initialed by both the employee and the supervisor, then the Mayor reviews the time card and the paycheck for accuracy. We now have an "employee time-off request form" that is to be filled out by each employee when taking time-off. The employee must indicate if the time-off is sick, vacation, bereavement, or compensatory time. We have discontinued including nonworking time when determining compensatory time. We plan to update our personnel policy to address this. Compensatory time is calculated and there is a running total on each time card.

2.2 After this was brought to our attention, the Board passed an ordinance that changed the way pay periods/paychecks were done. Now, we pay a week behind and a pay period is defined as 12:00 a.m. on Sunday through 11:59 p.m. on Saturday.

2.3 A new employee handbook was approved in December 2018. No employees are paid overtime; however, they do accrue compensatory time. In the new handbook, a section regarding nepotism and related employees was added, so now we do have a policy that provides that no employees will be supervised by a relative.

2.4 In the future, the city will prepare a cost-benefit analysis of providing health insurance versus paying health insurance stipends.

3. Accounting Controls and Procedures

3.1 Segregation of duties

Accounting controls and procedures need improvement. During the year ended June 30, 2017, receipts totaled approximately $613,000. The city receives monies for utility payments, property taxes, merchant licenses, building permits, and other miscellaneous items.

The Board has not established adequate segregation of duties or supervisory reviews over some of the financial accounting functions performed by the City Clerk and/or Deputy City Clerk positions. The City Clerk and Deputy City Clerk are solely responsible for the financial accounting functions of the city, including receiving, recording, and depositing monies; preparing invoices for payment; maintaining payroll records; preparing and distributing payroll and accounts payable checks; preparing and distributing monthly utility billings; generating utility reports; preparing monthly bank reconciliations; making transfers between bank accounts; preparing financial reports for Board meetings; and preparing budgets and financial statements. The Mayor and the City Clerk are responsible for signing checks. While the City Clerk prepares various month-end reports along with an attached signature page that the Board members sign to document their review and approval of the reports, the Board does not document reviews made of timesheets and leave records or perform a review of receipt and deposit records.

Proper segregation of duties helps ensure all transactions are accounted for properly and assets are adequately safeguarded. If proper segregation of duties is not possible, timely supervisory or independent reviews of work performed and investigation into unusual items and variances is necessary. Good management practices require extensive and detailed oversight by the Board.

3.2 Receipting, recording, and depositing

The city's procedures for receipting and recording payments, and making deposits need improvement.

- The City Clerk does not account for the numerical sequence of electronic utility receipt numbers.

- Utility payments received are not recorded in the computerized utility system at the time of receipt. These payments are recorded when the deposit is prepared, which is typically once a week. As a result, it is difficult to determine if penalties for late payments are assessed in compliance with city codes. City code 700.100 states utility bills remaining unpaid after the 20th day of the month shall have a 10 percent delinquent charge added.

- Checks received are not restrictively endorsed immediately upon receipt. A cash count performed on March 1, 2018, identified 13 checks totaling $1,081 that had not been restrictively endorsed. The former City Clerk indicated checks are endorsed when the deposit is prepared.

- The former City Clerk did not deposit receipts timely or intact. Deposits are typically made once a week. In addition, a cash count performed on March 1, 2018, revealed an unidentified $86 cash receipt. The former City Clerk indicated the city received this payment on February 22, 2018, and she believed it was for a utility bill. The former City Clerk subsequently determined who made the payment and recorded the $86 in the utility system and deposited the cash on April 4, 2018.

Failure to implement adequate receipting, recording, and depositing procedures increases the risk that loss, theft, or misuse of monies will occur and go undetected. To reduce this risk, procedures should be established to ensure all monies are properly receipted, recorded, and deposited. Also, checks should be restrictively endorsed immediately upon receipt.

3.3 Change fund

The city does not maintain the change fund at a constant amount and uses it for petty cash expenses. In addition, periodic reconciliations to the authorized balance are not performed, and a petty cash ledger is not maintained to support petty cash transactions. At the time of our cash count, the change fund balance was $89 and there was one $7 invoice on hand for a car wash to support petty cash expenses from the fund. In addition, the former City Clerk replenished the change fund with cash receipts, causing receipts to not be deposited intact as indicated in section 3.2.

To safeguard against possible loss, theft, or misuse of funds, change funds should be maintained at a constant amount and the funds should be periodically counted and reconciled to the authorized balance. If needed, a separate petty cash fund should be established and maintained on an imprest basis. A petty cash ledger should also be maintained documenting receipts,

disbursements, and the balance of the petty cash fund. Petty cash funds should only be reimbursed through a city disbursement approved by the Board and not from daily receipts.

Recommendations

The Board of Aldermen:

3.1 Segregate accounting duties to the extent possible and implement appropriate reviews and monitoring procedures.

3.2 Ensure the numerical sequence of electronic receipt numbers is accounted for properly, timely record all payments received in the computerized utility system, restrictively endorse all checks upon receipt, and make deposits timely and intact.

3.3 Maintain the change fund at a constant amount, and reconcile the change fund to the authorized balance with each deposit. If needed, a petty cash fund should be established and maintained on an imprest basis. A petty cash ledger should also be maintained.

Auditee's Response

3.1 Currently, the Mayor reviews each invoice with the check for payment to ensure accuracy, and the Board is notified that checks are ready to be reviewed. The city will designate a Board member to periodically compare receipts to deposits and review bank reconciliations and document the review.

3.2 The City Clerk will account for the numerical sequence of receipt numbers at the time of the deposit, and ensure that monies received are entered into the computerized accounting system and utility system in a timely manner. We have made it a practice for the City Clerk to record receipts as she receives them into the accounting system. When a check is received, we immediately stamp the check with the "For Deposit Only" stamp. Due to the location of the nearest bank, we do not do a daily deposit. The City Clerk plans to typically make deposits twice per week and will make deposits intact.

3.3 A change fund has been established at $100 and is maintained at a constant amount. We have implemented a petty cash fund of $250, and a spreadsheet log to keep for accountability purposes. When money is taken from petty cash, the reason is recorded, and a receipt is attached to the log. We will begin to make sure our petty cash amount is brought back to the agreed amount by writing a check for cash and putting that cash into the petty cash bag on a weekly basis.

4. Restricted Funds and Disbursements

The city has not established adequate procedures to ensure restricted revenues are recorded into the appropriate fund or to ensure the funds are used only for

intended purposes. In addition, controls and procedures over disbursements need improvement.

4.1 Restricted revenues

The city has not established adequate procedures to properly track and record various statutorily restricted revenues.

- During the year ended June 30, 2017, the City Clerk recorded $30,841 of receipts from a 1/2-cent street sales tax in the police department category within the General Fund. This money was used to pay expenses of the police department. The ballot language when the public voted on approving this sales tax restricted its use to transportation purposes. In addition, Sections 94.700 to 94.755, RSMo, and city code Section 130.130 restrict use of this funding to transportation purposes. City officials had no documentation to justify the full allocation of these funds to the police department.

- During the year ended June 30, 2017, city employees recorded some payments for trash services in the trash category ($21,442) and some in the water category ($25,216), while paying all related disbursements ($43,094) from the water category. Section 250.150, RSMo, restricts the use of water and sewer funding for operating the systems, payments of bonds, establishment of a reserve, fulfillment of any agreements contained in ordinances, and payment of costs of improvements of such systems.

- City personnel do not track the receipts, disbursements, and the balance of Law Enforcement Training (LET) fees and Police Officer Standards Training (POST) fees. These fees are deposited into the General Fund and are comingled with general purpose receipts rather than being accounted for separately. Section 488.5336.2, RSMo, requires use of LET and POST fees only for the training of law enforcement officers. A separate accounting, with a current balance, would help ensure these restricted revenues are accounted for and expended properly.

4.2 Allocation

The city has not established adequate procedures to ensure disbursements were properly allocated or expended only for intended purposes.

Several employees perform tasks related to multiple city functions, but the city has no documentation to justify the allocation of salaries to the various categories in the General and Proprietary Funds. For example, city officials allocated $18,180 of the Deputy City Clerk's wages to the General Fund, and $29,534 of the City Clerk's wages, $79,272 of wages for the 3 maintenance employees, and $1,379 of the cost of uniforms for maintenance employees to the water category in the Proprietary Fund, when some of these costs could have been allocated to other categories in the General and Proprietary Funds. Only $1,931 of the wages for maintenance employees were allocated to the street category in the General Fund.

Some other disbursements and/or allocations were also not adequately supported and looked unreasonable. For example, the $5,066 cost of the city's financial statement audit and accounting services was allocated $140 to the fire category, $4,237 to the general category, and $655 to the police department category in the General Fund, and $34 to the water category in the Proprietary Fund; however, the majority of these costs pertained to the city's annual financial statement audit, which is required by the water and sewer system bond covenants. In addition, the $49,824 cost of utilities was allocated $7,765 to the fire category and $15,681 to the general category in the General Fund, and $26,378 to the water category in the Proprietary Fund, when utilities are used for other city services such as street, sewer, and police.

To ensure restricted funds are used for intended purposes, the allocation of expenditures to city funds should be based on specific criteria, such as the number of hours worked by each employee, if possible, or by determining a reasonable basis to allocate costs for employees. The proper allocation of expenses is necessary to accurately determine the results of operations of specific activities, thus enabling the city to establish the level of taxation and/or user charges necessary to meet all operating costs.

4.3 Procurement procedures

The city's procurement procedures do not always comply with the city code, and professional services are obtained without benefit of a competitive selection process.

During the year ended June 30, 2017, the city did not solicit bids for property and liability insurance ($11,164), health insurance ($46,765), drilling services ($5,644), and bulk fuel ($4,193). City code Section 135.090 requires the city to solicit competitive bids for purchases of supplies and contractual services over $1,000.

City code does not address the handling of professional services from other services. Professional services retained during the year ended June 30, 2017, without the benefit of competitive selection included attorney services ($12,389), and audit and accounting services ($5,066). In addition, the city did not competitively solicit banking services.

In addition to being required by city code, the routine use of a competitive procurement process for major purchases ensures the city has made every effort to receive the best and lowest price and all interested parties are given an equal opportunity to participate in city business. Complete documentation should be maintained of all bids received and justification for awarding the bid. Also, periodically soliciting proposals for professional services helps ensure all parties are given an equal opportunity to participate in city business, helps provide a range of possible choices, and allows the Board to make better informed decisions to ensure necessary services are obtained from the best qualified provider, taking expertise, experience, and/or cost into consideration.

4.4 Credit cards

Controls and procedures over credit cards need improvement. The city purchased items and services totaling approximately $10,000 through use of 2 credit cards during the year ended June 30, 2017; however, 59 purchases totaling $3,798 did not have supporting documentation. In addition, an independent review of purchases made on these cards is not performed.

Detailed supporting documentation, such as itemized receipts and vendor invoices, should be maintained for all credit card transactions and reconciled to the credit card statements by someone other than the cardholder. Without adequate supporting documentation and proper approval, city officials cannot ensure purchases are for appropriate goods or services.

4.5 Fuel usage

The city's procedures to account for fuel use are not adequate. The city maintains two 300 gallon bulk fuel tanks (unleaded and diesel) at the public works building. The city purchased bulk fuel totaling $4,193 during the year ended June 30, 2017, and $5,891 during the year ended June 30, 2016. City employees use 2 credit cards for out-of-town fuel purchases. Fuel purchased using these cards totaled $772 during the year ended June 30, 2017, and $2,204 during the year ended June 30, 2016. Use of the cards for fuel purchases was discontinued after the termination of the former Police Chief in May 2017.

Mileage and fuel logs are not maintained for city vehicles and equipment. While logs of fuel pumped from the bulk tanks are maintained by maintenance employees, logs of fuel pumped and used by the police department are not maintained. As a result, fuel use is not reconciled to fuel purchases.

Mileage and fuel logs are necessary to document the appropriate use of vehicles and equipment and to support fuel purchases. Without sufficient information, city officials cannot evaluate the propriety and reasonableness of fuel pumped/used or reconcile amounts used to fuel billings. Failure to account for fuel purchases and fuel usage could result in loss, theft, or misuse going undetected.

4.6 Private work

On March 20, 2018, 2 city public works employees removed a tree stump from a citizen's private residence. The removal of the tree stump required the use of 2 city backhoes, a city dump truck, and the time spent by the employees. The city did not retain any documentation of the cost of the equipment's use and time spent and did not seek reimbursement for the related costs.

Article VI, Section 23, Missouri Constitution, specifically prohibits counties, cities, or other political subdivisions of the state from granting public money or things of value to or in aid of any corporation, association, or individual.

Recommendations

The Board of Aldermen:

4.1 Ensure restricted monies are accounted for in the appropriate fund or category and establish separate funds or a separate accounting of LET and POST fees.

4.2 Ensure costs are allocated to the appropriate funds, and supported by adequate documentation, which is retained.

4.3 Perform a competitive procurement process for all major purchases in accordance with the city code and maintain documentation of decisions made. The Board should also solicit proposals for professional services and consider establishing a policy to address the procurement of professional services.

4.4 Require documentation be maintained and reconciled to credit card billing statements, and purchases be approved by someone other than the cardholder.

4.5 Require mileage and fuel logs be maintained and ensure fuel logs are reconciled to fuel purchases. Any significant discrepancies should be investigated.

4.6 Ensure work is performed only on public property and seek reimbursement of the costs incurred for the removal of the tree stump at a citizen's private residence.

Auditee's Response

4.1 Moving forward, we will deposit street sales tax in the street category, trash revenues in the trash category, and create separate categories to track the LET and POST fees.

4.2 The city will discuss and implement procedures to track employee time by city function and use that documentation to support future allocations. The City Clerk now appropriately allocates disbursements to the appropriate department and line item. One of the procedures the City Clerk now does is that she inputs the invoice number, or the "reason" under the memo section of each check written.

4.3 We currently seek bids for various services. We will seek bids for each and every service, including professional services, as the city code states, in the future. We will be sure to discuss bids, and awarding of bid in the appropriate Board meeting so there is a record kept in the minutes book. Also, when it comes to banking, the nearest bank to the city of Miller is in Mt. Vernon.

4.4 When the credit card statement comes in each month, the City Clerk goes through the bill and compares receipts to charges. Each purchase is assigned to a department, and charged to that department under the appropriate line item. Depending on the cost of the item, the Mayor or the Board must approve prior to charging. The Board also approves the credit card statements and invoices at monthly meetings.

4.5 Due to the inability to accurately account for the amount of bulk fuel used, the Board approved to only buy red (off-road) diesel from a local bulk fuel vendor. A log of fuel pumped is used for the off-road diesel and the City Clerk reconciles the fuel used to fuel purchased. When other city vehicles are used, a local gas station credit card is used by employees to buy fuel. The user must input the current mileage, and the mileage is printed on the fuel receipt. The City Clerk reconciles the fuel receipts to the fuel statement.

4.6 The city will ensure all work performed is only on public property. We do not plan to seek reimbursement of costs incurred for the removal of the tree stump at a citizen's private residence.

5. Budgets and Published Financial Statements

The city does not prepare complete and accurate annual budgets or publish accurate semiannual financial statements.

5.1 Budgets

The Board does not have adequate procedures to prepare or monitor budgets.

Preparation

The city's budgets do not contain all statutorily required elements and were not accurate. The 2018 budget did not include actual beginning available resources and estimated and actual ending available resources, which are needed to present a complete financial plan for city finances. In addition, budgeted and actual receipts and disbursements included on the budget summary page did not agree to the individual fund's budgets.

Section 67.010, RSMo, requires the budget to present a complete financial plan for the ensuing budget year and outlines the various information to be included in the budget. A complete budget should include the beginning available resources and a reasonable estimate of the ending available resources. A complete and well-planned budget, in addition to meeting statutory requirements, serves as a useful management tool by establishing specific financial expectations for each area of city operations. It also assists in providing information to the public about city operations and current finances.

Budget deficit

The Board budgeted a deficit cash balance of $211,210 in the Proprietary Fund in the 2017 budget. Missouri Constitution, Article VI, Section 26(a), and Section 67.010.2, RSMo, prohibit deficit budgeting.

Monitoring

The Board does not adequately monitor budget-to-actual receipts and disbursements. The Board does not receive financial statements that show a comparison of budget-to-actual amounts. In addition, the Board voted on June 8, 2017, to amend the budget to actual receipts and disbursements for the year ending June 30, 2017, even though those actual numbers were not known at that time, and an amended budget document was not prepared to support the amendment.

Failure to monitor and adhere to limits imposed by budgets weakens the Board's effectiveness in controlling the city's financial condition. In addition, the practice of amending the budgets to actual numbers at year-end disregards the purpose of the budget as a planning and monitoring tool. The Board should ensure monthly budget-to-actual comparisons are received and reviewed prior to approving disbursements.

Section 67.040, RSMo, requires political subdivisions to keep disbursements within amounts budgeted, but allows for budget increases if the governing body officially adopts a resolution setting forth the facts and reasons. In addition, Section 67.080, RSMo, provides that no disbursement of public monies should be made unless it is authorized in the budget. Proper budget monitoring and amending of them when applicable is necessary for budgets to be an effective management tool and comply with state law.

5.2 Published financial statements

The former City Clerk did not prepare and publish complete and accurate financial statements as required by state law. The former City Clerk did not include receipts totaling approximately $15,000 and disbursements totaling approximately $3,700 shown in the accounting system for the 2 semiannual settlements published for the year ended June 30, 2017.

Section 79.160, RSMo, requires the Board prepare and publish semiannual financial statements that include a full and detailed account of the receipts, disbursements, and indebtedness of the city. To ensure compliance with this statute, the Board should require timely preparation of financial statements and review the statements for accuracy prior to publication.

Recommendations

The Board of Aldermen:

5.1 Prepare accurate annual budgets that contain all information required by state law, discontinue deficit budgeting, ensure the budgets are adequately monitored and are properly amended.

5.2 Ensure accurate preparation and publication of the city's semiannual financial statements as required by state law.

Auditee's Response

5.1 We will prepare accurate annual budgets that contain all information required by state law, discontinue deficit budgeting, and ensure the budgets are adequately monitored and properly amended. Since the new Mayor was appointed, the City Clerk provides the Board: a year-to-date financial statement of income versus expenditures; a monthly financial statement of income versus expenditures; and a "budgeted versus actual" statement. In the future if spending should exceed the budget, the topic will go before the Board to approve a resolution for the increased amount.

5.2 Going forward, the Board will review and approve the city's semiannual financial statements prior to being submitted for publication.

6. Board Qualifications and Sunshine Law

Procedures over Board qualifications and closed meetings need improvement.

6.1 Board qualifications

The city does not have procedures in place to ensure information regarding a person who may be unqualified to run for or hold elected office is timely reported to the appropriate authority, such as the Department of Revenue (DOR) for unpaid tax issues as provided in Section 115.306, RSMo.

Alderman Johnson owed delinquent city and county real estate and personal property taxes at the time of election in April 2017 and when he signed DOR Form 5120 Candidate's Affidavit of Tax Payments and Bonding Requirements. Alderman Johnson signed Form 5120 on January 17, 2017, stating he did not owe any delinquent taxes. However, he did not pay his delinquent real estate property taxes for 2014 through 2016 until July 20, 2017. He also did not pay his 2016 personal property taxes until March 30, 2017, after the form had been signed and filed.

Alderman Campbell and Alderwoman Johnson both also owed delinquent city and county personal property taxes at the time of signing Form 5120 in 2018. Alderman Campbell signed Form 5120 on December 26, 2017, stating he did not owe any delinquent taxes. However, he did not pay his delinquent 2017 personal property taxes until March 15, 2018. Alderwoman Johnson signed Form 5120 on January 14, 2018, stating she did not owe any delinquent taxes. However, she paid her delinquent 2017 personal property taxes on March 21, 2018.

Section 79.250, RSMo, states "No person shall be elected or appointed to any office who shall at the time be in arrears for any unpaid city taxes, or forfeiture or defalcation in office. All officers, except appointed officers, shall be residents of the city." Section 115.306, RSMo, requires that no person may be a qualified candidate if they owe any state income taxes, personal property

taxes, municipal taxes, or real property taxes on the place of residence, and requires that the candidate file an affidavit declaring they do not currently owe any delinquent taxes with their declaration of candidacy. It also provides that the DOR shall investigate potential candidates upon receipt of complaints alleging such delinquencies.

Procedures to transmit information regarding persons potentially unqualified to run for or hold office to the appropriate authority are necessary to ensure the city and its officers comply with applicable laws.

6.2 Closed meetings

Some issues discussed in closed meetings held from July 1, 2016, through April 30, 2018, were not allowable under the Sunshine Law. For example, the Board discussed the hourly wages and fringe benefits offered to employees and employee raises during 11 of 18 closed meetings held. The majority of these meetings were closed to discuss personnel records/issues under Section 610.021(3), RSMo; however, hourly wages, fringe benefits provided, and raises are not personnel records/issues and should not have been discussed in closed session. Section 610.022, RSMo, provides that the discussion topics and actions in closed meetings should be limited to only those specifically allowed by law as announced publically as the justification for closing the meeting.

Recommendations

The Board of Aldermen:

6.1 Seek legal advice and resolve concerns regarding the current Board's qualifications to serve. The Board should establish procedures for handling future situations when the city receives information regarding a person potentially unqualified to run for or hold office, including transmitting this information to the appropriate authority.

6.2 Ensure only topics allowed by state law are discussed in closed Board meetings.

Auditee's Response

6.1 We will obtain a legal opinion to resolve concerns regarding the current Board's qualifications to serve. We will have our attorney advise us in adopting policies and procedures for the City Clerk to follow, to ensure those seeking to serve are qualified and able to legally do so.

6.2 The City Clerk no longer takes closed meeting minutes. We now have our attorney take minutes. During closed Board meetings, we will be sure to only discuss the topics allowed by state law.

7. Electronic Data Security

Controls over some city computers are not sufficient to prevent unauthorized access, and sufficient plans and processes are not in place for recovering systems and data. As a result, city records are not adequately protected and

are susceptible to unauthorized access, and the city faces an increased risk of not being able to resume normal business operations timely.

7.1 Passwords

The city has not established adequate password controls to reduce the risk of unauthorized access to computers and data. The City Clerk and the Deputy City Clerk share the same password to access both the accounting and utility systems, the password is not changed periodically for either system, and passwords for the utility system are not required to contain a minimum number of characters.

Passwords are required to authenticate access to computers. The security of computer passwords is dependent upon keeping them confidential. However, since employees share a password that is not periodically changed, and utility system passwords do not require a minimum number of characters, there is less assurance access to computers and data files is limited to only those individuals who need access to perform their job responsibilities. Passwords should be unique, confidential, contain a minimum number of characters, and be changed periodically to reduce the risk of a compromised password and unauthorized access to and use of computers and data.

7.2 Security controls

Security controls are not in place to lock computers after a certain period of inactivity. Inactivity controls are necessary to reduce the risk of unauthorized individuals accessing an unattended computer and having potentially unrestricted access to programs and data files. Without effective security controls, there is an increased risk of unauthorized access to computers and the unauthorized use, modification, or destruction of data.

7.3 Contingency plan and backup data

The city has not developed a formal, written contingency plan for resuming normal business operations and recovering computer systems and data in the event of a disaster or other extraordinary situations. In addition, the city does not periodically test backup data to ensure essential data can be restored.

A formal, written contingency plan should be prepared, and periodically tested and updated as needed to address actions for restoring computer systems should a disaster or other extraordinary situation occur. In addition, periodically testing the backup data helps ensure current data is available to be restored and is complete and reliable.

Recommendations

The Board of Aldermen:

7.1 Require confidential passwords for each employee that are periodically changed to prevent unauthorized access to the city's computers and data. Passwords should contain a minimum number of characters.

7.2 Require each computer to have a security control in place to lock it after a certain period of inactivity.

7.3 Develop a formal, written contingency plan that is periodically tested, evaluated, and updated as needed. The Board should also require city personnel test restoration of backup data on a periodic basis.

Auditee's Response

7.1 Each computer now has a confidential password for each employee. The City Clerk is still working with the utility system vendor to obtain access for multiple users, each with their own confidential password in order to access the system. The Board will determine a time frame the password must be changed (every 90 days). We will ensure passwords contain a minimum number of characters.

7.2 We will implement a policy to have all computers lock after a certain period of inactivity. The Mayor and City Clerk have now made changes to their computers so that they lock after a period of inactivity.

7.3 We will research and develop a formal, written contingency plan that is periodically tested, evaluated and updated as needed. We currently do save all information on a server, but will inquire where the data is kept, and how to access in the case of a catastrophe. Not less than once per year, we will test and restore the system.

8. Capital Assets

The city's capital asset records did not include land, buildings, some vehicles, and other personal property and are not updated timely when purchases and dispositions occur. In addition, city personnel do not always tag assets for specific identification or perform annual physical inventories.

Adequate capital asset records and procedures are necessary to provide controls over city property; safeguard city assets that are susceptible to loss, theft, or misuse; and provide a basis for proper financial reporting and insurance coverage.

Recommendation

The Board of Aldermen ensure complete and detailed capital asset records are maintained that include all pertinent information for each asset such as tag number, description, cost, acquisition date, location, and subsequent disposition. The Board should also ensure assets are properly tagged for identification, and annual physical inventories are performed and compared to detailed records.

Auditee's Response

On the spreadsheet we will be creating to track capital assets, we will include the tag number, description, cost, acquisition date, location, and subsequent disposition. We will ensure assets are properly tagged and annual physical inventories are completed.

City of Miller
Organization and Statistical Information

The City of Miller is located in Lawrence County. The city was incorporated in 1915 and is currently a fourth-class city. The city employed 8 full-time employees and 2 part-time employees on June 30, 2017.

City operations include utility services (water, sewer, and trash), fire, police, maintenance of streets, and parks and recreation.

Mayor and Board of Aldermen

The city government consists of a mayor and 4-member board of aldermen. The members are elected for 2-year terms. The mayor is elected for a 2-year term, presides over the board of aldermen, and votes only in the case of a tie. The Mayor and Board of Aldermen, at June 30, 2017, are identified below. The Mayor is paid $400 per year and the members of the Board of Aldermen are paid $325 per year. The compensation of these officials is established by ordinance.

Dennis Harris, Mayor[1]
Garry Baker, Alderman[1]
Amy McClain, Alderwoman[1]
Amy Johnson, Alderwoman
Robert Johnson, Alderman

[1] Stacey Daniels, Kerry Johnson, and Allen Campbell replaced Dennis Harris, Garry Baker, and Amy McClain in April 2018.

Other Principle Officials

The City Clerk and Police Chief are appointed positions. The City Attorney is a contracted position. The city's principal officials at June 30, 2017, are identified below:

Donna Beck, City Clerk[1]
Melvin Nay, Police Chief [2]
William Petrus, City Attorney[3]

[1] Candace Englind replaced Donna Beck in May 2018.
[2] Levi Neely replaced Melvin Nay in September 2018.
[3] Darlene Parrigon replaced William Petrus in May 2018.

Financial Activity

Appendixes A-D present a summary of the city's financial activity for the year ended June 30, 2017. We obtained this information from the city's audited financial statement report.

Nicole Galloway, CPA

Missouri State Auditor

Office of State Treasurer
Period July 1, 2018 through January 3, 2019

Report No. 2019-034

May 2019

auditor.mo.gov

Nicole Galloway, CPA
Missouri State Auditor

CITIZENS SUMMARY

Findings in the closeout audit of the Office of State Treasurer

Background

The Office of State Treasurer is an elective office as provided in the Missouri Constitution. The duties of the State Treasurer as defined by Article IV Section 15 are to be the custodian of all state funds; to determine the amount of state monies not needed for current operating expenses; and to invest such monies in interest-bearing time deposits at Missouri banking institutions selected by the State Treasurer and approved by the Governor and State Auditor, short-term U.S. government securities or certain allowable commercial paper and banker's acceptances.

The Office of State Treasurer operates in four major functional areas (1) accounting and banking services, (2) general and administrative services, (3) investments and deposit programs, and (4) unclaimed property.

On January 9, 2017, Eric Schmitt was inaugurated as the forty-sixth Treasurer of the state of Missouri. He served in this role until January 3, 2019, when he was sworn in as Missouri's forty-third Attorney General. His term as State Treasurer was to expire in January 2021. Governor Michael L. Parson appointed Scott Fitzpatrick as State Treasurer and he was sworn in on January 14, 2019. From January 3, 2019, until January 14, 2019, Jonathan M. Hensley served as Assistant State Treasurer.

Findings

The audit identified no significant deficiencies in internal controls, no significant noncompliance with legal provisions, and no significant deficiencies in management practices and procedures. No findings resulted from this audit.

In the areas audited, the overall performance of this entity was **Excellent**.*

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

Appendix

Statement of Appropriations and Expenditures
Period July 1, 2018 through January 3, 2019 6

Honorable Eric Schmitt, Attorney General
and
Honorable Scott Fitzpatrick, State Treasurer
Jefferson City, Missouri

We have audited certain operations of the Office of State Treasurer, in fulfillment of our duties under Chapter 29, RSMo. The scope of our audit included, but was not necessarily limited to, the period of July 1, 2018, through January 3, 2019. The objectives of our audit were to:

1. Evaluate the office's internal controls over significant management and financial functions.

2. Evaluate the office's compliance with certain legal provisions.

3. Evaluate the economy and efficiency of certain management practices and procedures, including certain financial transactions.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the office; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We tested certain of those controls to obtain evidence regarding the effectiveness of their design and operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of applicable contract, grant agreement, or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the office's management and was not subjected to the procedures applied in our audit of the office.

For the areas audited, we identified (1) no significant deficiencies in internal controls, (2) no significant noncompliance with legal provisions, and (3) no significant deficiencies in management practices and procedures. No findings resulted from our audit of the Office of State Treasurer.

Office of State Treasurer
Organization and Statistical Information

The Office of State Treasurer is an elective office as provided in the Missouri Constitution. The duties of the State Treasurer as defined by Article IV Section 15 are to be the custodian of all state funds; to determine the amount of state monies not needed for current operating expenses; and to invest such monies in interest-bearing time deposits at Missouri banking institutions selected by the State Treasurer and approved by the Governor and State Auditor, short-term U.S. government securities or certain allowable commercial paper and banker's acceptances.

The Office of State Treasurer operates in four major functional areas (1) accounting and banking services, (2) general and administrative services, (3) investments and deposit programs, and (4) unclaimed property.

The accounting and banking services area (1) maintains a fund accounting system to fulfill a statutory responsibility to keep separate accounts of the funds of the state and to allocate investment interest to funds, (2) maintains ledger controls on fund balances and appropriations to assure that no check is issued that exceeds the lawful appropriated balances, (3) controls receipt of state monies collected by state agencies and deposited in local banks throughout the state, (4) reconciles bank activity to receipt and disbursement activity reflected on the state books, (5) determines the amount of state monies not needed for current operating expenses, and (6) confirms daily disbursements with the bank as certified by the Office of Administration.

The general and administrative services area provides processing support to other areas of the office by (1) retrieving state checks, and (2) controlling and processing outlawed and replacement checks, and (3) processing invoices for office expenditures.

The investments area places state monies not needed for current operating expenses in interest-bearing time deposits, U.S. government and agency securities, commercial paper, banker's acceptances, and repurchase agreements. This area also administers the State Treasurer's statutory linked deposit program and monitors and accounts for the collateralization of state funds.

The Unclaimed Property Division administers Missouri's Unclaimed Property Act (Chapter 447, RSMo). The Unclaimed Property Division is responsible for (1) ensuring unclaimed property is reported, (2) receiving and recording reports of unclaimed property, (3) depositing unclaimed funds to the Abandoned Fund Account Fund, (4) maintaining custody and safekeeping of abandoned or unclaimed physical property, and (5) processing owner claims for abandoned funds or physical property.

On January 9, 2017, Eric Schmitt was inaugurated as the forty-sixth Treasurer of the state of Missouri. He served in this role until January 3, 2019, when he was sworn in as Missouri's forty-third Attorney General. His term as State

Treasurer was to expire in January 2021. Governor Michael L. Parson appointed Scott Fitzpatrick as State Treasurer and he was sworn in on January 14, 2019. From January 3, 2019, until January 14, 2019, Jonathan M. Hensley served as Assistant State Treasurer.

Financial Activity

A summary of the office's operating financial activity is presented in the following Appendix.

CITIZENS SUMMARY

Findings in the audit of the Office of State Treasurer

Background

The Office of State Treasurer is an elective office as provided in the Missouri Constitution. The duties of the State Treasurer as defined by Article IV Section 15 are to be the custodian of all state funds; to determine the amount of state monies not needed for current operating expenses; and to invest such monies in interest-bearing time deposits at Missouri banking institutions selected by the State Treasurer and approved by the Governor and State Auditor, short-term U.S. government securities, or certain allowable commercial paper and banker's acceptances.

The Office of State Treasurer operates in four major functional areas (1) accounting and banking services, (2) general and administrative services, (3) investments and deposit programs, and (4) unclaimed property.

On January 9, 2017, Eric Schmitt was inaugurated as the forty-sixth Treasurer of the state of Missouri. He served in this role until January 3, 2019, when he was sworn in as Missouri's forty-third Attorney General. His term as State Treasurer was to expire in January 2021. Governor Michael L. Parson appointed Scott Fitzpatrick as State Treasurer and he was sworn in on January 14, 2019. From January 3, 2019, until January 14, 2019. Jonathan M. Hensley served as Assistant State Treasurer.

Findings

The audit identified no significant deficiencies in internal controls, no significant noncompliance with legal provisions, and no significant deficiencies in management practices and procedures. No findings resulted from this audit.

In the areas audited, the overall performance of this entity was **Excellent**.*

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

NICOLE GALLOWAY, CPA
Missouri State Auditor

Honorable Eric Schmitt, Attorney General
and
Honorable Scott Fitzpatrick, State Treasurer
Jefferson City, Missouri

We have audited certain operations of the Office of State Treasurer, in fulfillment of our duties under Chapter 29, RSMo. The scope of our audit included, but was not necessarily limited to, the year ended June 30, 2018. The objectives of our audit were to:

1. Evaluate the office's internal controls over significant management and financial functions.

2. Evaluate the office's compliance with certain legal provisions.

3. Evaluate the economy and efficiency of certain management practices and procedures, including certain financial transactions.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the office, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We tested certain of those controls to obtain evidence regarding the effectiveness of their design and operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of applicable contract, grant agreement, or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the office's management and was not subjected to the procedures applied in our audit of the office.

For the areas audited, we identified (1) no significant deficiencies in internal controls, (2) no significant noncompliance with legal provisions, and (3) no significant deficiencies in management practices and procedures. No findings resulted from our audit of the Office of State Treasurer.

Office of State Treasurer
Organization and Statistical Information

The Office of State Treasurer is an elective office as provided in the Missouri Constitution. The duties of the State Treasurer as defined by Article IV Section 15 are to be the custodian of all state funds; to determine the amount of state monies not needed for current operating expenses; and to invest such monies in interest-bearing time deposits at Missouri banking institutions selected by the State Treasurer and approved by the Governor and State Auditor, short-term U.S. government securities, or certain allowable commercial paper and banker's acceptances.

The Office of State Treasurer operates in four major functional areas (1) accounting and banking services, (2) general and administrative services, (3) investments and deposit programs, and (4) unclaimed property.

The accounting and banking services area (1) maintains a fund accounting system to fulfill a statutory responsibility to keep separate accounts of the funds of the state and to allocate investment interest to funds, (2) maintains ledger controls on fund balances and appropriations to assure that no check is issued that exceeds the lawful appropriated balances, (3) controls receipt of state monies collected by state agencies and deposited in local banks throughout the state, (4) reconciles bank activity to receipt and disbursement activity reflected on the state books, (5) determines the amount of state monies not needed for current operating expenses, and (6) confirms daily disbursements with the bank as certified by the Office of Administration.

The general and administrative services area provides processing support to other areas of the office by (1) retrieving state checks, and (2) controlling and processing outlawed and replacement checks, and (3) processing invoices for office expenditures.

The investments area places state monies not needed for current operating expenses in interest-bearing time deposits, U.S. government and agency securities, commercial paper, banker's acceptances, and repurchase agreements. This area also administers the State Treasurer's statutory linked deposit program and monitors and accounts for the collateralization of state funds.

The Unclaimed Property Division administers Missouri's Unclaimed Property Act (Chapter 447, RSMo). The Unclaimed Property Division is responsible for (1) ensuring unclaimed property is reported, (2) receiving and recording reports of unclaimed property, (3) depositing unclaimed funds to the Abandoned Fund Account Fund, (4) maintaining custody and safekeeping of abandoned or unclaimed physical property, and (5) processing owner claims for abandoned funds or physical property.

On January 9, 2017, Eric Schmitt was inaugurated as the forty-sixth Treasurer of the state of Missouri. He served in this role until January 3, 2019, when he was sworn in as Missouri's forty-third Attorney General. His term as State Treasurer was to expire in January 2021. Governor Michael L. Parson

appointed Scott Fitzpatrick as State Treasurer and he was sworn in on January 14, 2019. From January 3, 2019, until January 14, 2019, Jonathan M. Hensley served as Assistant State Treasurer.

As of June 30, 2018, the office had 45 full-time positions and 2 part-time positions to assist in the accomplishment of its mission.

Financial Activity

A summary of the office's operating financial activity, cash and investment balances, and investment income is presented in the following Appendixes and in the Notes to the Appendixes.

Appendix A

The accompanying Notes to the Appendixes are an integral part of this statement.

Appendix E

Office of State Treasurer
Comparative Statement of Interest Received on Pooled Investments

	Year Ended June 30,				
	2018	2017	2016	2015	2014
INTEREST RECEIPTS					
Appropriated funds	$ 47,231,264	27,978,208	23,254,495	21,614,688	23,995,693
Non-appropriated funds	0	0	0	1,555	808
Total Interest Receipts	$ 47,231,264	27,978,208	23,254,495	21,616,243	23,996,501

The accompanying Notes to the Appendixes are an integral part of this statement.

Notes to the Appendixes

1. Basis of Presentation

Amounts presented in Appendixes A through E are reported on the budgetary or cash basis of accounting. The budgetary basis recognizes revenues as cash is received and expenditures as cash is disbursed. Missouri issued a Comprehensive Annual Financial Report (CAFR) for the fiscal year ended June 30, 2018, in conformity with generally accepted accounting principles as prescribed by the Governmental Accounting Standards Board. The financial activity of the Office of State Treasurer is included in the CAFR.

The amounts presented in Appendix A represent receipts, disbursements, transfers, and cash and investment balances of funds that are dedicated to the activities and programs of the office.

The amounts presented in Appendixes B and C represent funds appropriated to the office by the Missouri General Assembly and expended by the office.

The amounts presented in Appendixes D and E represent all funds in the state treasury and all trust funds in the custody of the State Treasurer.

State treasury funds are subject to appropriation; trust funds are not. The appendixes do not include any funds or investments that are not in the custody of the State Treasurer.

2. Cash and Investments

Article IV, Section 15 of the Missouri Constitution establishes the State Treasurer as custodian of all state funds and funds received from the U.S. government. This section further authorizes the State Treasurer to place all such monies on time deposit, bearing interest, in Missouri banking institutions selected by the State Treasurer and approved by the Governor and the State Auditor, or in obligations of the U.S. government or any agency or instrumentality thereof maturing or becoming payable not more than 5 years from the date of purchase. In addition, the State Treasurer may enter into repurchase agreements maturing and becoming payable within 90 days secured by U.S. Treasury obligations or obligations of U.S. government agencies or instrumentalities of any maturity, as provided by law. The State Treasurer may also invest in banker's acceptances issued by domestic commercial banks possessing the highest rating issued by at least 2 nationally recognized statistical rating organizations and in commercial paper, issued by domestic corporations receiving the highest rating issued by at least 2 nationally recognized statistical rating organizations. Investments in bankers acceptances and commercial paper shall mature and become payable not more than 180 days from the date of purchase, maintain the highest rating throughout the duration of the investment and meet any other requirements provided by law. The State Treasurer shall prepare, maintain, and adhere to a written investment policy that shall include an asset allocation plan limiting

the total amount of state money that may be invested in each investment category authorized by law.

Deposits

The State Treasurer maintains approximately 43 demand deposit bank accounts that serve as the state's primary operating accounts, and 101 additional demand deposit bank accounts throughout the state, some with multiple depositing locations, that serve as collection accounts for various state agencies. Cash balances in the state's accounts that are not needed for immediate use are invested.

The demand deposit accounts on Appendix D are used to manage the state's daily receipt, disbursement, and transfer activities and to segregate funds available for investing. The demand deposit accounts consist of the following:

Demand Deposit Accounts

	June 30, 2018		June 30, 2017		June 30, 2016	
	Bank Balance ($)	Number of Accounts	Bank Balance ($)	Number of Accounts	Bank Balance ($)	Number of Accounts
US Bank	190,783	1	1,006,127	1	2,718,966	1
Central Bank	53,972,648	32	88,675,672	32	156,046,811	32
Commerce Bank	1,293,481	8	4,160,519	8	10,950,216	8
Wells Fargo	10,100,000	1	34,374	2	75,048,536	2
UMB Bank	107,057	1	93,945	1	16,425	1
Collection bank accounts	2,891,959	101	3,176,418	104	3,181,451	102

Banking service agreements on the operating demand accounts allow the State Treasurer to invest outstanding checks up until the checks clear the bank, thereby investing an amount in excess of book balances. Negative balances at June 30 (Appendix D) for any bank's appropriated funds demand deposits represent the book balance net of amounts invested.

The State Treasurer's deposits at June 30, 2018, were entirely covered by federal depositary insurance or by collateral securities held by the custodial banks in the State Treasurer's name.

To protect the safety of state deposits, Sections 30.270 and 110.020, RSMo, require depositaries to pledge collateral securities to secure deposits not insured by the Federal Deposit Insurance Corporation.

Investments

The State Treasurer's investments at June 30, 2018, are listed by type below to give an indication of the level of risk assumed by the state at year end. All investments are insured or registered, or have collateral held by the State Treasurer or a custodial bank in the state's name.

Investments in Custody of State Treasurer - June 30, 2018

		Reported Amount	Fair Value
Time deposits	$	498,249,439	498,249,439
U.S. government securities		2,350,153,625	2,330,705,178
Repurchase agreements		1,166,852,000	1,166,852,000
Other investments		5,130	73,064
Total investments	$	4,015,260,194	3,995,879,681

Investments are recorded at acquisition cost except "other" investments, which are recorded at par. Investments in time deposits and repurchase agreements are acquired at face value and earn a stated interest rate. Investments in U.S. government securities are acquired at fair value and mature at face value.

3. Special Fund Dedicated Investments

The State Treasurer is assigned the authority for recording direct investments of special funds in the accounting system. The amounts presented as special fund dedicated investments in the appropriated funds on Appendix D represent specific investments made or held by the State Treasurer on behalf of the Pansy Johnson-Travis Memorial State Gardens Trust Fund and the State Public School Fund. The State Treasurer is responsible for purchasing, custodial, income collection, distribution, and record-keeping duties related to the investments of these funds.

The investments of the Pansy Johnson-Travis Memorial State Gardens Trust Fund are maintained in the instruments transferred to the State Treasurer from the previous trustee of the fund. The investment purchases for the State Public School Fund are made in accordance with the instructions of the State Public School Fund investment committee.

*Includes selected findings

NICOLE GALLOWAY, CPA
Missouri State Auditor

To the Honorable Mayor
and
Members of the Board of Aldermen
City of Winona, Missouri

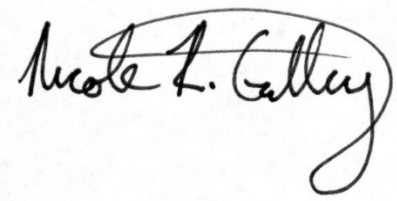
We have conducted follow-up work on certain audit report findings contained in Report No. 2018-069, *City of Winona* (rated as Poor), issued in September 2018, pursuant to the Auditor's Follow-Up Team to Effect Recommendations (AFTER) program. The objectives of the AFTER program are to:

1. Identify audit report findings for which follow up is considered necessary, and inform the city about the follow-up review on those findings.

2. Identify and provide status information for each recommendation reviewed. The status of each recommendation reviewed will be one of the following:

    - Implemented: Auditee fully implemented the recommendation, either as described in the report or in a manner that resolved the underlying issue.
    - In Progress: Auditee has specific plans to begin, or has begun, to implement and intends to fully implement the recommendation.
    - Partially Implemented: Auditee implemented the recommendation in part, but is not making efforts to fully implement it.
    - Not Implemented: Auditee has not implemented the recommendation and has no specific plans to implement the recommendation.

As part of the AFTER work conducted, we reviewed documentation provided by city officials and held discussion with city officials to verify the status of implementation for the recommendations. Documentation provided by the city included minutes of meetings, financials records, and other pertinent documents. This report is a summary of the results of this follow-up work, which was substantially completed during March 2019.



Nicole R. Galloway, CPA
State Auditor

City of Winona
Follow-Up Report on Audit Findings
Status of Findings

1. Missing Monies

The audit identified at least $42,546 of recorded utility and miscellaneous receipts that were not deposited between January 1, 2015, and March 29, 2017.

Undeposited cash receipts

Recorded cash receipts totaling at least $34,689 were not deposited between January 1, 2015, and March 21, 2017. Unrecorded checks totaling $31,601 were substituted into deposits for the recorded cash receipts not deposited. Most of the unrecorded checks were city checks issued by the City Clerk for the transfer of monies from one bank account to another. In addition, manual receipt slips were issued for some monies received that were not included in the deposit reports and were not deposited totaling $3,088.

Undeposited check payments

Utility receipts totaling at least $7,245 were recorded as check payments from January 1, 2015, through March 21, 2017, but these checks could not be traced to a deposit.

Cash count and subsequent deposit

Our March 28, 2017, cash count and review of the subsequent deposits identified cash shortages of $612.

Questionable utility transactions

A review of April 2017 deposits identified questionable cash deposits and utility account postings that occurred 10 days after the cash count. The cash payments were recorded on April 5 and 6, 2017, to 17 old inactive utility accounts with balances due. This cash was not on hand at the time of our cash count and it is unlikely these customers all paid on the same days.

Recommendation

The Board of Aldermen continue to work with law enforcement officials regarding prosecution of the missing monies and take the necessary actions to seek restitution for amounts missing.

Status

Implemented

The Board of Aldermen indicated they are continuing to work with law enforcement officials regarding prosecution of the former City Clerk and will take the necessary action to obtain restitution. A criminal charge of stealing was filed against the former City Clerk and the case is ongoing as of April 2019.

2. Oversight, Segregation of Duties, and Annual Audits

The Board of Aldermen did not provide adequate oversight of the City Clerk and the Utility Clerk positions or obtained annual audits as required by state law.

2.1 Oversight and segregation of duties

The Board had not established adequate segregation of duties or supervisory reviews over the various financial accounting functions performed by the City Clerk and the Utility Clerk.

Recommendation

The Board of Aldermen segregate accounting duties to the extent possible and implement appropriate reviews and monitoring procedures.

Status

Implemented

The City Clerk indicated deposits are currently reviewed by city personnel independent of the personnel collecting monies and preparing the deposits. Each month, the City Clerk reconciles utility system receipts to the amounts recorded by the Utility Clerk in the city's accounting system. The Utility Clerk prepares reports of utility billings, collections, and delinquent accounts monthly that are presented to the Board for review. The Mayor reviews bank statements and bank reconciliations monthly. During our review of accounting records for December 2018, we noted documentation of these various reviews.

2.2 Annual audits

The city did not obtain annual audits as required.

Recommendation

The Board of Aldermen obtain annual audits of the waterworks and sewerage system as required by state law.

Status

In Progress

The city entered into an engagement letter dated March 8, 2019, with an accounting firm to perform an audit of the city for the year ended December 31, 2017. This audit had not yet been completed as of the end of March. The City Clerk indicated the same accounting firm will also perform an audit for the year ended December 31, 2018, after the year ended December 31, 2017, audit is completed.

3.1 Cash Handling Procedures and Bank Accounts - Receipting, recording, and depositing

The city's procedures for receipting, recording, and depositing monies were poor.

Receipting

The Utility Clerk did not issue official prenumbered receipt slips for some monies received, account for the numerical sequence of manual receipt slips or electronic receipt numbers, and reconcile manual receipt slips issued to the utility system or monies deposited. Also, the top copy of 12 receipt slips voided during the period January 1, 2015, through March 21, 2017, were not retained.

Recording

The City Clerk and Utility Clerk improperly recorded vendor payments and third-party checks to customer utility accounts. Rather than paying a local tire vendor directly for services rendered, the City Clerk issued checks made

payable to the city for amounts owed to the vendor and used those checks to pay the vendor's utility balance. The Utility Clerk sometimes accepted third-party checks from customers as payments for utility bills. The Utility Clerk often recorded these receipts as cash payments instead of checks, creating differences in composition.

Depositing

The Utility Clerk did not deposit receipts intact or timely or reconcile the composition of receipts to the composition of deposits. The Utility Clerk sometimes held checks at the request of customers. The City Clerk and Utility Clerk cashed checks for city employees, family members, and utility customers. The Utility Clerk improperly recorded utility payments for the Mayor and Board of Aldermen, resulting in records not reflecting actual transactions as they occurred and causing discrepancies in deposits. The clerks indicated they used cash on hand to reimburse the bank for non-sufficient funds (NSF) checks received. The Utility Clerk did not deposit receipts timely.

Recommendation

The Board of Aldermen ensure receipt slips are issued for all monies received; all copies of voided receipt slips are retained; the numerical sequence of receipt slips and electronic receipt numbers is accounted for; the composition of receipts is reconciled to the composition of deposits; and monies are deposited timely and intact. The Board should also ensure payments are properly recorded for vendors and the Mayor and Aldermen's compensation. In addition, the Board should discontinue the practice of accepting third-party checks, cashing personal checks, and using cash receipts to reimburse the bank for NSF checks.

Status

In Progress

We reviewed financial activity for December 2018, and noted receipt slips were not issued for monies received for some recycle bags, or for checks received for property taxes, merchant licenses, and other miscellaneous fees. The City Clerk indicated the city has purchased a new computer system that will issue receipt slips for all transactions in the future. The City Clerk indicated voided receipt slips are now retained. No manual receipt slips were voided during the financial activity reviewed for December 2018. The City Clerk indicated city personnel account for the numerical sequence of manual receipt slips by reviewing the prior receipt slip issued to ensure no receipt slips have been skipped. She also indicated she accounts for the numerical sequence of manual and electronic utility receipts as she records them in the electronic accounting system. During our review of December 2018 records, we were able to account for the numerical sequence of manual and electronic receipts. In addition, the composition of receipts was reconciled to the composition of deposits, and monies were deposited timely and intact.

The City Clerk indicated payments to vendors and the Mayor and Aldermen for compensation are properly recorded and that the Mayor and Aldermen's utility bills are no longer reduced as a form of compensation. The City Clerk indicated the practice of accepting third-party checks, cashing personal checks, and using cash receipts to reimburse the bank for NSF checks was discontinued. During our review of December 2018 records, we noted the city did not accept any third-party checks, cash personal checks, or use cash receipts to reimburse the bank for NSF checks.

3.2 Cash Handling Procedures and Bank Accounts - Bank accounts

The city maintained an excessive number of bank accounts, resulting in cumbersome record keeping, and it was unclear whether the city had the legal authority to maintain an annuity. The Board subsequently closed the annuity in 2018 and deposited the monies into a checking account.

Recommendation

The Board of Aldermen consider reducing the number of bank accounts.

Status

Implemented

In November 2018, the Board approved consolidating the city's bank accounts into 4 primary bank accounts. The City Clerk is in the process of changing electronic deposits and payment information and waiting for all outstanding checks to clear the bank, and plans to close the various bank accounts no longer being used.

4. Restricted Funds, Allocations, and Excess Sales Tax

The city had not established adequate procedures to ensure restricted revenues were credited to the appropriate fund or to ensure these monies were used only for intended purposes. In addition, the city had imposed general sales taxes that exceed the statutory maximum allowed.

4.1 Restricted revenues

The city had not established procedures to properly track and record various statutorily restricted monies.

- Monies collected for trash services were deposited into the city's General Fund bank account, while disbursements related to these services were paid out of the Solid Waste Fund bank account. Revenues received from a general sales tax were incorrectly deposited into the Solid Waste Fund and used to pay the cost of trash services.

- Utility reconnection fees were incorrectly deposited and recorded in the General Fund rather than the Water or Sewer Funds bank account.

- State motor vehicle-related tax revenues were incorrectly deposited into the Capital Improvement Fund bank account rather than the Street Fund bank account. The Board inappropriately purchased a police vehicle in 2016 with monies from the Capital Improvement Fund bank account.

- During the year ended December 31, 2016, the City Clerk allocated all fuel, oil, parts, and repairs/maintenance costs associated with city maintenance vehicles to the Street Fund bank account. Employees use city vehicles and equipment for all city utility and street maintenance services, so costs should be allocated between various funds.

Recommendation

The Board of Aldermen deposit restricted monies in the appropriate fund, establish procedures to ensure restricted monies are used only for allowable purposes, and ensure shared costs are properly allocated to the applicable city funds and allocations are supported by adequate documentation.

Status

In Progress

During our review of financial activity for December 2018, we noted that monies collected for trash services were properly deposited into the Solid Waste Fund bank account and utility reconnection fees were properly deposited into Water and Sewer Funds bank account. General sales taxes were direct deposited into the Solid Waste Fund bank account; however, most of these monies were transferred to the General Fund bank account and properly recorded in the General Fund during 2018. State motor vehicle-related tax revenues were direct deposited into the Capital Improvement Fund bank account; however, these monies were transferred to the Street Fund bank account and properly recorded in the Street Fund. The City Clerk indicated she is working with the Department of Revenue to have these sales tax monies direct deposited into the proper bank account in the future. Our review of 2 invoices paid in December 2018, (fuel and supplies), showed these costs were allocated to various city funds based on documented usage.

4.2 Allocation of salaries and fringe benefits

Several city employees performed tasks related to multiple city functions, but the city had no documentation to justify the allocation of salaries and fringe benefit expenses to various funds. City officials had not established allocation percentages and did not maintain documentation to support how allocations were determined.

Recommendation

The Board of Aldermen allocate salary and fringe benefit expenses to city funds based on specific criteria and retain documentation to support the allocation.

Status

Implemented

The city developed forms to track the employee time spent on multiple city functions each month. These forms are used to prepare a spreadsheet that allocates employee salaries and fringe benefits to various funds based on the time worked on functions within each fund. Documentation to support the allocation of salaries and fringe benefits was retained.

4.3 Excess general sales tax

The city had imposed 2 sales taxes, totaling 1.5 percent, which exceeded the statutory maximum allowed for general sales taxes per Section 94.510, RSMo, by 1/2 percent.

Recommendation

The Board of Aldermen consult with legal counsel to review the sales taxes levied and determine the disposition of any invalid sales taxes collected. In addition, prior to submitting any future sales taxes to voters for approval, the Board should ensure an adequate legal analysis is conducted.

Status

In Progress

In December 2018, the Board voted to repeal the 1/2 percent city sales tax for law enforcement purposes that was passed in April 2016 under Section 94.510, RSMo. However, the repeal will not be effective until December 2019. Based upon a verbal legal opinion, the Board placed a 1/2 percent city sales tax for general purposes under Sections 94.500 to 94.550, RSMo, on the April 2019 ballot. However, this sales tax was not approved by the voters.

5.1 Utility System Controls and Procedures - Utility rates

Water, sewer, electric, and trash rates were not supported by a cost study or other documentation showing how the rates were determined.

Recommendation

The Board of Aldermen ensure a statement of costs is prepared to support utility rate increases and document formal reviews of utility rates periodically to ensure revenues are sufficient to cover all costs of providing these services.

Status

In Progress

A rate study of the water and sewer system was completed in November 2018. As a result of the rate study, water and sewer rates were adjusted in February 2019. The City Clerk indicated the city is in the process of obtaining a rate study for electric services. The city does not plan to obtain a rate study for solid waste services because the city charges the amount charged by the trash vendor.

5.2 Utility System Controls and Procedures - Utility reconciliations

City personnel did not prepare proper reconciliations related to utility services. The Maintenance Supervisor did not perform monthly reconciliations of total gallons of water billed to gallons of water pumped. The Utility Clerk did not perform monthly reconciliations of amounts billed, payments received, and amounts unpaid for utility services.

Recommendation

The Board of Aldermen ensure monthly reconciliations of water usage and amounts billed to amounts collected and delinquent accounts are performed.

Status	**Implemented** The Maintenance Supervisor prepares a reconciliation of total gallons of water billed to gallons of water pumped. Our review of the December 2018 reconciliation showed a difference of 1,679,910 gallons of water or a 46 percent water loss. The City Clerk indicated several leaks were corrected and the water loss decreased to 29 percent in January 2019. The Utility Clerk prepares monthly reconciliations of amounts billed, payments received, and amounts unpaid for utility services. We reviewed the December 2018 reconciliation and no differences were noted. The City Clerk indicated these reports are presented to the Board at each monthly meeting.
5.3 Utility System Controls and Procedures - Adjustments	The Utility Clerk posted adjustments to customer accounts, including writing off charges caused by water leaks or incorrect meter readings, without obtaining independent approval or maintaining adequate documentation to support the reason for many adjustments.
Recommendation	The Board of Aldermen ensure all adjustments are independently approved and supporting documentation is retained.
Status	**Implemented** Our review of 3 utility adjustments made in January 2019, totaling $426, showed the Mayor independently approved the utility adjustments made by the Utility Clerk, and supporting documentation of the adjustments was retained.
5.6 Utility System Controls and Procedures - Penalties, shut off procedures, and usage calculations	City procedures did not comply with city ordinances when assessing penalties, discontinuing services, and calculating usage. Penalties for late payments were assessed on the 15th of each month instead of the 10th of each month as required, and the 5 percent penalty was assessed on the amount of current utility charges rather than the full amount due. The Utility Clerk granted shut off extensions at the request of the utility customers and these requests were not documented or approved by the Board. Penalties and shut off procedures were not followed for utility check payments held at the customers' requests. Sewer usage charges were not calculated on actual monthly usage, but were instead calculated on the average water usage for the months of November, December, and January of each year.
Recommendation	The Board of Aldermen ensure compliance with utility ordinances.
Status	**Partially Implemented** The City Clerk indicated all late charges are now assessed on the 11th of each month. However, city ordinance requires late fees to be assessed on the 11th for residential customers and on the 16th for commercial customers. The

Utility Clerk indicated the utility system can only assess late fees on one day of the month; therefore all late charges are assessed on the 11th. Penalties are assessed on the amount of current utility charges and not the full amount due. Utilities are shut off on the 15th of the month for residential and the 20th for commercial. However, city ordinance requires shut offs to be completed on the day after the 15th for residential customers, and the day after the 20th for commercial customers. No requests for shut off extensions were made during our review of utility records for December 2018. Sewer usage charges are calculated on actual monthly water usage; however, charges are still not calculated in compliance with city ordinance.

5.7 Utility System Controls and Procedures - Inactive accounts

City personnel were not proactive in following up on inactive utility account balances. The inactive account listing included some balances dating back to 1994 and showed 46 account holders were deceased. Some delinquent accounts were not submitted to the collection agency.

Recommendation

The Board of Aldermen ensure sufficient procedures are developed to collect accounts receivable and all past due accounts are submitted to the collection agency.

Status

Implemented

In December 2018, the Board approved writing off 117 inactive utility account balances totaling $9,203 that dated back more than 10 years, belonged to deceased account holders, or involved a bankruptcy. The City Clerk indicated the Board reviews a report of utility accounts that have been turned over to the collection agency each month.

6.1 Payroll and Related Matters - Timesheets, leave records, and questionable payments

Significant improvement was needed with timesheets and leave records, and some employees may have been overpaid.

Timesheets

Timesheets were not always signed by the employee or his/her supervisor to document approval of time worked and leave used. In addition, overtime hours worked were not consistently documented on timesheets and punch cards for some employees.

Leave records

Leave records maintained were inaccurate and did not adequately track the number of hours of vacation and sick leave earned, used, and any remaining balances.

Questionable payments

The city compensated full-time police officers for 40 hour work weeks (weekly salary) even when they did not work 40 hours or take leave for unworked hours. Also, some overtime appeared questionable. Timesheets for

some city maintenance employees indicated overtime hours were paid for "turn-ons." Turning on and shutting off utilities was part of the maintenance employees' normal daily job duties, and it was not clear from the timesheets that any additional hours were worked.

Recommendation

The Board of Aldermen ensure timesheets are adequately prepared, and properly signed and approved; employee leave balances are properly tracked and monitored; and reviews of timesheets are performed to ensure the propriety of payroll payments.

Status

Implemented

During our review of December 2018 employee timesheets, we noted timesheets were adequately prepared and signed by the employees and reviewed and signed by the employees' supervisors. Our review of leave records for December 2018 indicated employee leave balances were properly tracked; only one employee's leave record was not accurate. Our review of timesheets and payroll records for the month of December 2018 showed police officers are only paid compensation for the actual number of hours worked and maintenance employees are no longer paid for "turn-ons."

6.2 Payroll and Related Matters - Personnel policies

The city's personnel policy did not adequately address compensatory time, holiday pay, overtime, or the employment and supervision of related employees, and city employees did not always followed established policies.

Compensatory time

City hall and city maintenance employees accrued and used compensatory time without Board review and approval.

Holidays

The city's personnel policy did not adequately address holiday pay, and there were inconsistencies in the number of hours employees received for holidays. Some employees inappropriately received double-pay for working on a holiday and also the weekday designated for observance of a weekend holiday.

Vacation

Vacation leave was not accrued in compliance with city policy, and vacation leave was not accurately and timely paid out at the end of employment for one employee.

Overtime

Nonworking time (vacation, sick leave, and holidays) was included in total hours worked when determining the amount of overtime earned by employees.

Related employees

The Maintenance Supervisor directly supervised his nephew.

Recommendation

The Board of Aldermen review and update the personnel policy, as necessary, and ensure compliance with the policy.

Status

Implemented

The Board updated the city's personnel policy in January 2018. While the policy does not address compensatory time, the City Clerk indicated compensatory time is no longer accrued or used by city employees and all overtime worked is paid to employees with their regular paychecks. City policy provides for employees to receive holiday pay based on work shift hours. General and maintenance employees are provided 8 hours of holiday pay, while police department personnel are provided 10 to 12 hours of holiday pay based on work shifts. The policy only provides for an employee to receive double-pay if scheduled to work on a holiday. The City Clerk indicated vacation leave is not allowed to be used until the employee has accrued the vacation leave, and employees accrue vacation leave upon the anniversary of their employment date. The personnel policy states employees must work in excess of 40 hours per week to earn overtime, and holidays and paid time off do not count as work time. The personnel policy also states that related employees are not allowed to supervise relatives, and the Mayor now supervises all employees related to each other.

6.5 Payroll and Related Matters - Additional compensation and withholding and reporting of compensation

Improvement was needed in the city's handling of additional compensation and the withholding and reporting of compensation. Additional compensation totaling $4,800 and $2,400 was paid to the City Clerk and Utility Clerk, respectively, during the year ended December 31, 2016. However, timesheets or other supporting documentation was not retained to support the compensation, and these payments were not included on the employees' W-2 forms and were not subjected to payroll tax withholdings. The Mayor and Aldermen received a $100 reduction in their monthly utility bills as compensation; however, these amounts were not reported on their W-2 forms and were not subjected to payroll tax withholdings.

Recommendation

The Board of Aldermen review the additional compensation, and ensure additional time worked, if any, is reported on employee timesheets and compensated properly. In addition, the Board should ensure previous years' W-2 forms are amended, as appropriate, and compensation is properly reported and subjected to proper withholdings.

Status

Partially Implemented

The city no longer pays the City Clerk and Utility Clerk additional compensation. City employees are only compensated for the time worked and documented on timesheets. The City Clerk indicated amended W-2 forms were not issued to the City Clerk, Utility Clerk, Mayor, or the Aldermen for the compensation paid in previous years.

7.1 Disbursements - Disbursement review and documentation

The city's disbursement review and documentation procedures needed improvement.

List of bills

The list of bills provided to the Board for review and approval were not compared to invoices and actual checks written and did not include payroll disbursements.

Approval of invoices

The City Clerk did not require department heads to document their review and approval of invoices and did not require documentation acknowledging receipt of goods or services.

Supporting documentation

The City Clerk did not maintain adequately detailed supporting documentation for several disbursements.

Recommendation

The Board of Aldermen ensure all payments made are included in the listing of bills presented for approval, approval of the list of bills is documented, and the approved list of bills is compared to invoices and checks written. In addition, the Board should ensure invoices are adequately reviewed and require documentation of receipt of goods and/or services prior to payment of invoices. The Board should also maintain adequate supporting documentation for all disbursements.

Status

Partially Implemented

Our review of the list of bills for the Electric Fund for December 2018 showed all payments were included on the list. Meeting minutes documented the Board's approval of the list of bills, and the list was retained with the meeting minutes. The City Clerk indicated that the Board does not compare the approved list of bills to invoices and checks written. The City Clerk indicated invoices are attached to checks for the Mayor or Mayor Pro-Tem to review when signing checks, and supporting documentation is retained for all disbursements. However, the Mayor or Mayor Pro-Tem do not document the review of the invoices. The City Clerk indicated she obtains verbal approval from department heads for the payment of invoices and receipt of goods and/or services; however, this approval is not documented.

7.3 Disbursements - Procurement procedures and contracts

The city did not have a formal bidding policy and had not established policies for the selection of vendors providing professional services. The city did not obtain a contract for engineering services; and the wastewater treatment contract did not clearly document each party's duties and responsibilities, and did not cover services performed during some periods of time.

Recommendation

The Board of Aldermen establish formal bidding policies and procedures, periodically solicit proposals for professional services, and enter into clearly written agreements for those services.

Status

Partially Implemented

The city has not developed formal bidding procedures, but the City Clerk indicated that the Board recently solicited proposals for wastewater treatment and engineering services. However, the wastewater treatment contract did not clearly document each party's duties and responsibilities. The City Clerk indicated the city plans to enter into a written contract with the engineer after grant funds are approved and the project is started.

8.1 Budgets and Financial Reporting - Budgets

The Board did not have adequate procedures to prepare or monitor budgets.

Preparation

The city's budgets did not contain all statutorily required elements, such as a budget message or budget summary, actual beginning available resources, and estimated ending available resources. Also, city officials did not prepare budgets for the Park Board or Sewer Rehabilitation Funds, and the financial activity and balances of the certificates of deposit and annuity were not reflected in the budgets.

Monitoring

The Board did not adequately monitor budget-to-actual receipts and disbursements.

Recommendation

The Board of Aldermen prepare accurate annual budgets that contain all information required by state law, and ensure the budgets are adequately monitored.

Status

Partially Implemented

In 2019, the city combined the Park Board Fund with the General Fund and budgeted for those monies in the General Fund. However, the city's 2019 budgets do not contain all statutorily required elements. The budgets do not include a budget message or budget summary, actual beginning available resources, estimated ending available resources, and the 2 preceding years of receipts and disbursements. Budgets for the Sewer Rehabilitation Fund and the Heritage Fund were not prepared, and the financial activity of the certificates of deposit and annuity were not reflected in the budgets. During 2018, the Board monitored budget-to-actual receipts and disbursements, and we noted budget amendments were approved through resolutions.

9.1 Park Board - Board meetings

Park Board members indicated Board meetings had not been held for a considerable period of time. The Board had not adopted a policy on the frequency of Board meetings. Periodic or at a minimum, annual Board

meetings are necessary for the Board to properly fulfill its duties as required by state law and Board bylaws.

Recommendation

The Board of Aldermen in conjunction with the Park Board ensure periodic Park Board meetings are held to properly fulfill the Board's duties, including approving disbursements and adopting budgets annually as required by the Board's bylaws and state law.

Status

Partially Implemented

The Park Board held a meeting in December 2018, and a new President was appointed. However, the Park Board has not adopted a policy on the frequency of Board meetings. Park Board monies are now handled in the city's General Fund and were included in the 2019 General Fund budget. Disbursements from park monies are approved by the Board of Aldermen, but are not approved by the Park Board.

9.2 Park Board - Bylaws and agreements

The Park Board did not have current bylaws and did not operate in accordance with bylaws, city ordinance, or the operating agreement between the Board and the city. The Park Board did not update its bylaws to reflect changes made by city ordinance in 1983 and 1986, or a 1990 operating agreement with the city. The Park Board did not operate with the required number of board members and did not appoint new members in compliance with city ordinance. The Park Board did not prepare and file an annual report with the Board of Aldermen, obtain a written report from the City Clerk regarding activity and status of the Park Board Fund, or maintain a record of all business transactions. In addition the Board President did not sign all checks in accordance with the Board's bylaws. The Park Board did not review and approve disbursements in excess of $25 by a 2/3 majority, and incorrectly reimbursed the city for utilities.

Recommendation

The Board of Aldermen in conjunction with the Park Board review and update Park Board bylaws, city ordinances, and agreements periodically, and ensure compliance with the terms of the bylaws, ordinances, and agreements.

Status

Partially Implemented

The Board of Aldermen and Park Board have not updated the Park Board bylaws, and the Board of Aldermen have not updated city ordinances or agreements related to the Park Board.

Currently, the Park Board only has 3 of the required 7 members and is unable to appoint new members due to a lack of interest. The Park Board has not prepared and filed an annual report with the Board of Aldermen or maintained a record of all business transactions. The Park Board bank account was closed and the remaining monies were transferred to the General Fund bank account.

Disbursements are now handled through the city's General Fund bank account, and therefore, the Park Board President does not sign checks. The Park Board does not review and approve disbursements in excess of $25. The Park Board no longer reimburses the city for utilities.

10. Sunshine Law and Ordinances

City officials did not always ensure compliance with the Sunshine Law and city ordinances needed improvement.

10.1 Sunshine law

The Board did not always comply with the Sunshine Law regarding closed sessions.

Reasons for closed meetings — Open meeting minutes did not document the specific reasons or section of law allowing the meeting to be closed for 11 of 32 closed sessions held between January 1, 2016, and March 8, 2018.

Allowable topics — Some topics discussed and voted on in 27 of 32 closed sessions held between January 1, 2016, and March 8, 2018, were not allowable under the Sunshine Law.

Recommendation

The Board of Aldermen ensure specific reasons for closing a meeting are documented in the open minutes, and ensure only topics allowed by state law are discussed in closed Board meetings.

Status

Partially Implemented

We reviewed the open and closed meeting minutes for the December 11, 2018, meeting. While the open meeting minutes documented the section of law allowing the meeting to be closed, some of the topics discussed (e.g., a volunteer position) were not allowable under the Sunshine Law or under the specific section cited in the open meeting minutes.

10.2 Ordinances

Ordinances were not comprehensive or maintained in an organized manner; one ordinance could not be located; and the city had not always established ordinances as appropriate.

Recommendation

The Board of Aldermen ensure ordinances are maintained in a complete and well-organized manner, establish an index of all ordinances passed and rescinded, retain copies of ballots or signed ordinances for all sales taxes, and establish trash rates and the compensation of city officials and employees by ordinance.

Status

Partially Implemented

The City Clerk indicated city personnel have organized the city ordinances into 2 books, have indexed approximately 95 percent of the ordinances, and are documenting the dates ordinances are passed and rescinded. The City

Clerk indicated copies of ordinances and ballots are retained. The city adopted an ordinance for trash rates in November 2018, and an ordinance for the compensation of officials in April 2018. The city has not established the compensation of city employees by ordinance.

11. Electronic Data Security

Controls over some city computers were not sufficient to prevent unauthorized access, and sufficient plans and processes were not in place for recovering systems and data.

11.1 Passwords

The city had not established adequate password controls to reduce the risk of unauthorized access to computers and data. Some employees are not required to change passwords periodically. The City Clerk and the Utility Clerk share the same user identification and password to access the utility system, and passwords for the utility system are not required to contain a minimum number of characters.

Recommendation

The Board of Aldermen require confidential passwords for each employee that are periodically changed to prevent unauthorized access to the city's computers and data. Passwords should contain a minimum number of characters.

Status

Implemented

The City Clerk indicated passwords are required to be changed every two months, employees no longer share the same user identification and password to access the utility system, and passwords are required to have a minimum number of characters.

11.2 Security controls

Security controls were not in place to lock computers after a specified number of incorrect logon attempts or after a certain period of inactivity.

Recommendation

The Board of Aldermen require each city computer to have security controls in place to lock it after a specified number of incorrect logon attempts and after a certain period of inactivity.

Status

Partially Implemented

The City Clerk indicated city computers do not have security controls in place to lock computers after a specific number of incorrect logon attempts; however, city computers do lock after a certain period of inactivity.

11.3 Contingency plan and backup data

The city had not developed a formal, written contingency plan for resuming normal business operations and recovering computer systems and data in the event of a disaster or other extraordinary situations. In addition, the city did not periodically test backup data to ensure essential data could be restored, and did not always store backup files at a secure off-site location.

Recommendation

The Board of Aldermen develop a formal, written contingency plan that is periodically tested, evaluated, and updated as needed. The Board should also require city personnel test restoration of backup data on a periodic basis and store backup files in a secure off-site location.

Status

Not Implemented

The City Clerk indicated a formal, written contingency plan has not been developed. City personnel do not test the restoration of backup data on a periodic basis and do not store backup files at a secure off-site location.

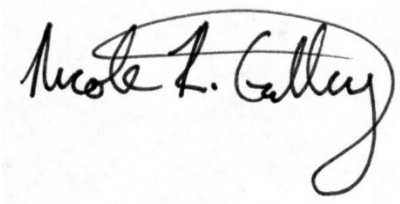
NICOLE GALLOWAY, CPA
Missouri State Auditor

Honorable Michael L. Parson, Governor
and
Members of the General Assembly
Jefferson City, Missouri

The primary objective of this compilation is to report the filing status for political subdivisions other than cities, towns, and villages, required to file a financial report, under Section 105.145, RSMo, and 15 CSR 40-3.030. Section 105.145, RSMo, provides that the State Auditor's Office notify the Department of Revenue if any political subdivision fails to timely submit a copy of its annual financial report. Because of different filing requirements, a separate report is issued for cities, towns, and villages.

The filing status for the 82 political subdivisions required to file a financial report by March 31, 2019, is presented in summary on page 3 and by individual entity in Appendix A. We have not audited the reports submitted and, accordingly, do not express an opinion or any other assurance on them.

This report also includes the updated filing status for political subdivisions, other than cities, towns, and villages, that filed a financial report in March 2019, after their filing deadline. The filing status for these 9 entities is presented in summary on page 3 and by individual entity in Appendix B-D.



Nicole R. Galloway, CPA
State Auditor

Senior Analyst:	Jill Wilson, MBA

Executive Summary

Section 105.145, RSMo, requires the governing body of each political subdivision in the state, except counties and school districts, to prepare and remit to the state auditor an annual report of financial transactions.

15 CSR 40-3.030 requires the financial report to be remitted to the state auditor within 6 months of the end of the political subdivision's fiscal year. The State Auditor's Office posts individual annual financial reports to its website. A searchable link is available at http://auditor.mo.gov.

Section 105.145, RSMo, requires the state auditor to notify the Department of Revenue if any political subdivision fails to timely submit a copy of its annual financial report. Any political subdivision that fails to timely submit the annual financial report shall be subject to a fine of $500 per day upon notice by the Department of Revenue, except transportation development districts with a gross revenues less than $5,000 in the fiscal year of the annual financial report.

This report includes the filing status for the 82 political subdivisions, other than cities, towns, and villages, with a fiscal year end of September 30, 2018. Cities, towns, and villages have additional filing requirements and their reporting status is included in a separate report. Of the 82 political subdivisions, 70 filed an annual financial report timely, and 1 filed a financial report for a partial fiscal year.

This report also includes the filing status for 9 political subdivisions, other than cities, towns, and villages, that filed their financial report in March 2019, after their filing deadline.

Appendix A
Status of Political Subdivisions Required to File Annual Financial Reports

NICOLE GALLOWAY, CPA
Missouri State Auditor

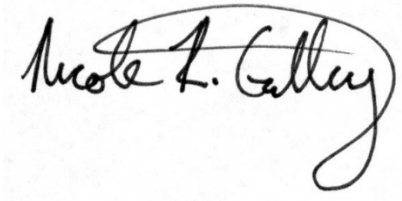
Honorable Michael L. Parson, Governor
and
Members of the General Assembly
Jefferson City, Missouri

The primary objective of this compilation is to report the filing status for the municipalities required to file a financial report by March 31, 2019, under Section 105.145, RSMo, and 15 CSR 40-3.030, and, when applicable, an addendum under Section 479.359, RSMo, and 15 CSR 40-3.170 and a municipal court certification under Section 479.360, RSMo, and 15 CSR 40-3.180.

Section 105.145, RSMo, provides that the State Auditor's Office (SAO) notify the Department of Revenue if any city, town, or village fails to timely submit a copy of its annual financial report. Additionally, Section 479.362, RSMo, provides that the SAO notify the Department of Revenue whether counties, cities, towns, and villages have timely filed under Sections 479.359 and 479.360, RSMo. Because of different filing requirements, a separate report is issued for all other political subdivisions required to file a financial report.

The filing status for 63 cities and 2 villages is presented in summary on page 3 and by individual entity in Appendix A. This compilation is limited to presenting information submitted to our office. We have not audited the information submitted and, accordingly, do not express an opinion or any other form of assurance on it.

This report includes the updated filing status for municipalities that filed at least one of the items (financial report, addendum, or certification) in March 2019, after their filing deadline. The filing status for these 23 cities and 3 villages is presented in summary on pages 4 and by individual entity in Appendixes B to F.



Nicole R. Galloway, CPA
State Auditor

The following staff participated in the preparation of this report:

Director of Audits:	Jon Halwes, CPA, CGFM
General Counsel:	Paul Harper, JD
Senior Analyst:	Jill Wilson, MBA

Executive Summary

Section 105.145, RSMo, requires the governing body of each political subdivision, except counties and school districts, in the state to prepare and remit to the state auditor an annual report of financial transactions. 15 CSR 40-3.030 requires the financial report to be remitted to the state auditor within 6 months of the end of the political subdivision's fiscal year. The State Auditor's Office (SAO) posts individual annual financial reports to its website. A searchable link is available at http://auditor.mo.gov.

Section 105.145, RSMo, requires the state auditor to notify the Department of Revenue if any political subdivision fails to timely submit a copy of its annual financial report. Any political subdivision that fails to timely submit the annual financial report shall be subject to a fine of $500 per day upon notice by the Department of Revenue, except transportation development districts with a gross revenues less than $5,000 in the fiscal year of the annual financial report.

Section 479.359.1, RSMo, requires every county, city, town, and village to annually calculate the percentage of its annual general operating revenue received from fines, bond forfeitures, and court costs for minor traffic violations.

Section 479.359.3, RSMo, provides that all entities having a municipal court file an addendum to the annual financial report containing items listed in 15 CSR 40-3.170, which also provides the procedures to file an addendum.

Section 479.360, RSMo, requires every county, city, town, and village that has a municipal court to file, with its annual financial report, a certification of substantial compliance with 10 municipal court procedures. This certification must be signed by the municipal court judge. 15 CSR 40-3.180 provides the procedure to file the municipal court certification. Any county, city, town, or village that does not have a municipal court judge is not required to file a certification.

Section 479.362, RSMo, requires that the SAO notify the Department of Revenue whether counties, cities, towns, or villages have timely filed their addendums under Section 479.359 and certificates of substantial compliance under Section 479.360, RSMo. Section 479.368, RSMo, provides penalties for counties, cities, towns, and villages that fail to file, including loss of revenue and mandatory ballot measure to dissolve the political subdivision.

This report includes the filing status for the 63 cities and 2 villages with a fiscal year end of September 30, 2018, whose financial reports, addendums, or certifications were due by March 31, 2019. Of the 65 municipalities required to file an annual financial report, 49 filed the report timely and 1 filed a financial report for a partial fiscal year. Of the 61 municipalities required to file an addendum, 32 filed an addendum timely. Of the 44 municipalities required to file a certification, 30 filed a certification timely.

This report includes the filing status for 23 cities and 3 villages that filed at least one of the items (financial report, addendum, or certification) in March 2019, after their filing deadline. Of these entities, 9 filed an annual financial report, 17 filed an addendum, and 6 filed a certification.

Nicole Galloway, CPA

Missouri State Auditor

City of St. Louis

Information Technology Services Agency

Report No. 2019-029

April 2019

auditor.mo.gov

Nicole Galloway, CPA
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the City of St. Louis - Information Technology Services Agency

Security Controls	The ITSA has not implemented all necessary security controls, leaving ITSA technology assets at risk of inappropriate access, use, and disclosure. The ITSA has not fully established or documented the physical security policies and procedures necessary to ensure areas housing information technology resources are properly controlled, monitored, and restricted to only authorized individuals. The ITSA has not established internal policies and procedures to inventory certain ITSA-owned technology assets.
Vendor Security	The ITSA has not consistently ensured contracts for software acquired or outsourced from information technology vendors contain security requirements, or reviewed the security practices used by vendors.
Information System Control Activities	The ITSA needs to improve certain information system control activities.

No rating will be given.

NICOLE GALLOWAY, CPA
Missouri State Auditor

To the Honorable Mayor
and
Chief Information Officer
City of St. Louis, Missouri

We have audited certain operations of the City of St. Louis Information Technology Services Agency (ITSA) in fulfillment of our duties under Section 29.200.3, RSMo. The State Auditor initiated audits of the City of St. Louis in response to a formal request from the Board of Aldermen. The city engaged KPMG LLP, Certified Public Accountants (CPAs), to audit the city's financial statements for the year ended June 30, 2018. To minimize duplication of effort, we reviewed the CPA firm's report. The scope of our audit included, but was not necessarily limited to, the year ended June 30, 2018. The objectives of our audit were to:

1. Evaluate the agency's internal controls over significant management operations and financial functions.

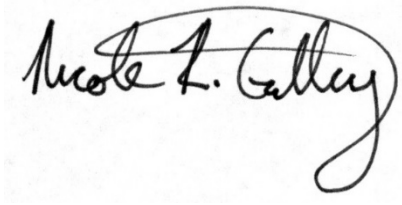
2. Evaluate the agency's compliance with certain legal provisions.

3. Evaluate the economy and efficiency of certain management practices and information system control activities.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

For the areas audited, we identified (1) deficiencies in internal controls, (2) no significant noncompliance with legal provisions, and (3) the need for improvement in management practices. The accompanying Management Advisory Report presents our findings arising from our audit of the City of St. Louis ITSA. Our audit also found the ITSA needs to improve certain information system control activities. We are not disclosing details of these issues in this report because of the sensitivity of the activities and to avoid compromising the confidentiality of the ITSA's resources. Instead, we communicated the issues confidentially to City of St. Louis and ITSA officials so they could take corrective action.

Additional audits of various officials and departments of the City of St. Louis are still in process, and any additional findings and recommendations will be included in subsequent reports.



Nicole R. Galloway, CPA
State Auditor

The following auditors participated in the preparation of this report:

Director of Audits:	Jon Halwes, CPA, CGFM
Audit Manager:	Jeffrey Thelen, CPA, CISA
In-Charge Auditor:	Alex R. Prenger, M.S.Acct., CPA, CISA, CGAP
Audit Staff:	Kent Aaron Dauderman, M.Acct., CPA, CGAP

City of St. Louis - Information Technology Services Agency Introduction

Background

The Information Technology Services Agency (ITSA) was established in 2003 under ordinance 65798, and is responsible for the planning, development, coordination and implementation of timely, reliable, cost-effective technology and information services for use by city government and city employees, citizens, and businesses. Duties include hardware, software and web support; network and server maintenance and security; and user account management for the network and certain information systems and applications.

The ITSA's role within the city's governance structure, and its overall service to all city employees, place the agency in the most direct position to guide citywide information security efforts. Weaknesses in those efforts are due in part to long-term challenges the ITSA has faced, and/or continues to face.

Director oversight

The ITSA's current director, who also serves as the city's Chief Information Officer, was appointed in December 2017. Prior to this appointment, the director position was vacant for 9 years. During this period, other city personnel were partially assigned to guide the ITSA, including one part-time director. However, their guidance was limited due to pre-existing duties and responsibilities. As a result, the ITSA lacked clear, dedicated direction in matters of information security policies and procedures.

The prolonged vacancy of a dedicated ITSA director also generally weakened communication between the ITSA and city departments. This issue resulted in situations when departments did not preemptively communicate with the ITSA before making major technology-related decisions and purchases.

Competing priorities

Prior to and following the current director's appointment, the ITSA faced other priorities requiring substantial attention and resources. These priorities included improving the city network resiliency, implementing information systems and applications for departments' use, creating and administering requests for proposal related to major technology projects, and designing other general security enhancements and controls. Certain tasks remained in progress as of January 2019.

Administrative relationship with departments

The city's organizational structure, and related factors presented below, cause the ITSA's administrative role to vary significantly by individual department.

- The ITSA and many departments are structured under and report to the Mayor's office. The ITSA's administration over such departments is often strong. Other departments are organized under standalone elected officials. The ITSA's administration over such departments is often weaker and less defined.

- The ITSA and certain departments operate under civil service rules administered by the Civil Service Commission and Department of

Personnel. Other departments, typically those under standalone elected officials, are considered patronage departments. This affects certain aspects regarding broad ITSA policy distribution, enforcement, and discipline.

- Certain departments feature dedicated information technology personnel. While the ITSA communicates with these personnel, the departments often have greater autonomy to fulfill their unique technology needs.

- The ITSA does not directly administrate all forms of access to city networks, information systems, and applications. Certain instances are directly administrated by departmental personnel.

Of these challenges, the city's organizational structure will remain the most significant in the long term. A restructure of all departments' general information technology needs under the ITSA is beyond the scope of this audit. However, promoting communication and collaboration between the ITSA and departments, to the maximum degree feasible, will be critical towards the ITSA's efforts to establish information security policies and procedures in an increasingly consistent and effective manner.

Cyber threats continue to emerge and evolve

As connectivity of business activity increases and organizations become increasingly dependent on technology, including computerized systems and electronic data, no organization is exempt from cyber threats, vulnerabilities, and privacy exposures. As a result, it is important to view information security and privacy as a business issue rather than strictly an information technology issue. Security threats, vulnerabilities, and privacy exposures challenge every organization, creating data protection and privacy risks that must be understood, addressed, and managed.

The National Institute of Standards and Technology (NIST) defines cybersecurity as the process of protecting information by preventing, detecting, and responding to attacks[1] while ISACA states cybersecurity encompasses all that protects enterprises and individuals from intentional attacks, breaches, and incidents as well as the consequences.[2] Cybersecurity should be aligned with all other aspects of information security, including governance, management, and assurance. The state of being secure requires maintenance and continuous improvement to meet the needs of stakeholders and the demands of emerging cyber threats.

[1] National Institute of Standards and Technology, *Framework for Improving Critical Infrastructure Cybersecurity*, Version 1.1, April 2018, is available at <https://nvlpubs.nist.gov/nistpubs/CSWP/NIST.CSWP.04162018.pdf>, page 45, accessed February 11, 2019.

[2] ISACA, *Transforming Cybersecurity*, 2013, page 11.

The Government Accountability Office (GAO) has included the security of information systems since 1997, specifically adding the protection of Personally Identifiable Information (PII) in its 2015 update.[3] Technological advances, such as lower data storage costs and increasing interconnectivity, have allowed both government and private sector agencies to collect and process extensive amounts of PII more effectively. Risks to PII can originate from unintentional and intentional threats. These risks include insider threats from careless, disgruntled, or improperly trained employees and contractors; the ease of obtaining and using hacking tools; and the emergence of more destructive attacks and data thefts.

Technology advances, combined with the increasing sophistication of individuals or groups with malicious intent, have increased the risk of PII being compromised and exposed. Correspondingly, the number of reported security incidents involving PII in both the private and public sectors has increased dramatically in recent years. At the same time, city governments are increasingly reliant on technology and information sharing to interact with citizens and to deliver essential services. As a result, the need to protect information, including PII, against cybersecurity attacks is increasingly important.

Security and privacy controls

According to accepted standards, security controls are the management, operational, and technical safeguards or countermeasures prescribed for an information system to protect the confidentiality, integrity, and availability of the system and its information. Confidentiality refers to preserving authorized restrictions on information access and disclosure, including the means for protecting personal privacy and proprietary information. Integrity relates to guarding against improper information modification or destruction, and availability ensures timely and reliable access to and use of information. Effective privacy controls depend on the safeguards employed within the information system that is processing, storing, and transmitting PII and the environment in which the system operates. Organizations cannot have effective privacy without a basic foundation of information security. Without proper safeguards and controls, information systems and confidential data are vulnerable to individuals with malicious intentions who can use access to obtain sensitive data or disrupt operations.

Scope and Methodology

The scope of our audit included evaluating (1) information security and other relevant controls, (2) policies and procedures, and (3) other management functions and compliance requirements in place during the year ended June 30, 2018.

[3] Report GAO-17-157SP *Report to Congressional Committees, High Risk Series: Substantial Efforts Needed to Achieve Greater Progress on High-Risk Areas*, March 2019, is available at <http://www.gao.gov/assets/700/697245.pdf>, accessed March 12, 2019

Our methodology included reviewing written policies and procedures, and interviewing various ITSA personnel. We obtained an understanding of the applicable controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We tested certain of those controls to obtain evidence regarding the effectiveness of their design and operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violation of contract or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to these provisions.

We based our evaluation on accepted state, federal, and international standards and best practices related to information security controls from the following sources:

- National Institute of Standards and Technology (NIST)
- U. S. Government Accountability Office (GAO)
- ISACA

1. Security Controls

The ITSA has not implemented all necessary security controls, leaving ITSA technology assets at risk of inappropriate access, use, and disclosure.

1.1 Physical security

The ITSA has not fully established or documented the physical security policies and procedures necessary to ensure areas housing information technology resources are properly controlled, monitored, and restricted to only authorized individuals.

Physical security is the protection of technology resources, including computers and network servers, from theft or damage. Physical security makes technology resources physically unavailable to unauthorized users and can include locked rooms and cabinets, periodic inventories of technology assets, and other measures to protect assets from unauthorized access.

Physical security controls should be designed to prevent vandalism and sabotage, theft, accidental or deliberate alteration or destruction of information or property, attacks on personnel, and unauthorized access to computing resources, according to the GAO. Inadequate physical security could lead to the loss of property, the disruption of service and functions, and the unauthorized disclosure of data and information.

User access policies and procedures

The ITSA has not established policies and procedures for requesting, granting, and removing physical access to areas housing sensitive information technology resources.

Management should define and implement procedures to grant, limit and revoke access to premises, buildings, and areas according to business needs, including emergencies, according to accepted standards. Without appropriate procedures to grant and remove access to sensitive areas, individuals may receive inappropriate or unauthorized access.

Review of user access

The ITSA has not established procedures for independently reviewing physical access to sensitive information technology resources to ensure access rights are necessary to perform job responsibilities.

We reviewed system-generated reports of users with access to an area housing sensitive information technology resources. ITSA officials had not formally reviewed this area's access because they did not consider it high risk, access was limited to ITSA personnel, and no previous incidents of unauthorized access had occurred. However, our review found access was unnecessarily enabled for several current ITSA employees with incompatible duties, three previous ITSA employees who retired or resigned during 2017 and 2018, and one current city employee who was affiliated with the ITSA until early 2017. Following our review, ITSA officials indicated access would be appropriately restricted.

Agencies should periodically review the physical access granted to computer facilities and resources to ensure the access continues to be appropriate, according to the GAO. Without a formal documented review, physical access may be granted to or maintained for individuals who should not have access.

During our review, we also observed that one individual is responsible for activating and deactivating access, as well as handling blank, damaged, and returned access cards. To ensure integrity, periodic reviews should be independently completed by a separate individual.

1.2 Inventory

The ITSA has not established internal policies and procedures to inventory certain ITSA-owned technology assets. As a result, there is increased risk that the loss, theft, or misuse of such assets may go undetected.

All city departments are required to inventory assets costing at least $5,000 to comply with Fixed Asset Management System (FAMS) policies and procedures established by the Comptroller's office. However, additional ITSA internal policies and procedures are needed to protect assets not covered by FAMS policies. Certain ITSA technology assets below the threshold, such as computers, laptops, and storage media, should be inventoried due to their portability, and potential misuse or data loss. Inventory records should be maintained on a perpetual basis, and include sufficient asset descriptions. Assets should be tagged to improve ITSA ownership identification and tracking. The ITSA should conduct periodic reconciliations and physical inventories.

Internal inventorying of certain ITSA assets costing $5,000 or more may also be beneficial if more stringent or longer-term control is desired than existing FAMS requirements. A Comptroller's office internal audit report issued in October 2018, found that ITSA assets costing $5,000 or greater were not always included in FAMS asset listings.

Recommendations

The ITSA:

1.1 Establish and document physical access policies and procedures, ensure access to sensitive technology assets is necessary with job responsibilities, implement independent periodic reviews of access, and timely remove unnecessary access.

1.2 Determine, through a risk assessment, which owned technology assets require protection; establish internal policies and procedures to inventory such assets; and conduct periodic reconciliations and physical inventories.

Auditee's Response

1.1 The ITSA concurs our physical access policy was not fully documented. We now have a complete written policy in place that

addresses both who should have access and how that access will be managed to ensure passes are deactivated promptly when necessary. The ITSA recently relocated some of the infrastructure that was located in the data center. We have now removed access from all personnel who no longer have reason to access the data center. Badges turned in by former employees have also been removed from the list of persons with access (Note: badges had been retrieved, but the roster did not reflect that fact).

1.2 The ITSA concurs that we own assets (i.e., assets purchased by and issued to ITSA staff) that warrant better inventory control. The ITSA is now putting in place, through use of the asset management tool within our service ticketing system, procedures for tracking all items deemed to require stringent controls (regardless of the dollar value of the item). Procedures for tracking these assets are expected to be in place within the next 6 months.

2. Vendor Security

The ITSA has not consistently ensured contracts for software acquired or outsourced from information technology vendors contain security requirements, or reviewed the security practices used by vendors.

The ITSA utilizes software products from a number of vendors to manage various city functions, including data backup and support services. Generally, the ITSA pays an annual licensing/maintenance fee for these products. Depending on the arrangement, some products are installed on city-owned equipment and maintained by ITSA personnel (with additional support from the vendor), while others are hosted and maintained directly by the vendor. In this case, city personnel access the system remotely, typically via a secure website.

We reviewed contracts for three systems or software products used by the city. Only one contract had a clause stating the vendor would provide appropriate security functionality for the city, as well as general descriptions of its security practices. In addition, the ITSA had not asked any vendors to provide documentation that their product's security functionality met generally accepted industry standards.

Accepted standards require organizations to identify and manage risk relating to a vendor's ability to securely deliver services; and when preparing contracts, to clearly define service requirements, including security and protection of intellectual property. Further security insight can be obtained by requesting independent reviews of vendor internal practices and controls, and/or reviewing vendor-supplied descriptions of security practices. Without consistently defining security requirements or assessing vendor security practices, the ITSA has less assurance in a vendor's ability to ensure services meet current and future data privacy and security needs.

Recommendation

The ITSA consistently ensure that vendor contracts contain security requirements, and review vendor security practices.

Auditee's Response

The ITSA agrees to the importance of ensuring vendor contracts contain security requirements and the need to review vendor security practices. We do wish to point out the ITSA oversees very few contracts that involve vendors having access to our data. Vendors who do have access to our data are well-known for meeting, if not setting, industry standards. Terms and conditions provided by these vendors, while not part of a specific agreement with the city, do attest to the vendors' security protocols. The ITSA in consult with our City Counselor's office, will immediately begin putting language into vendor contracts that more explicitly states what security requirements the vendor must meet and maintain, as well as explicitly states the city's right to review vendor security practices.

3. Information System Control Activities

The audit found the ITSA needs to improve certain information system control activities.

We are not disclosing details of these issues in this report because of the sensitivity of the activities and to avoid compromising the confidentiality of the ITSA's resources. Under Section 610.021.21, RSMo, a governmental body is authorized to close records to the extent the records identify and would allow unauthorized access or unlawful disruption of its computer, computer system, computer network, or telecommunications network.

During the audit, we communicated the issues and recommendations confidentially to City of St. Louis and ITSA officials so they could take corrective action.

Recommendation

The ITSA should implement the confidentially communicated recommendations for improving information system control activities.

Auditee's Response

The ITSA has already begun implementing and documenting the confidentially communicated recommendations.

NICOLE GALLOWAY, CPA
Missouri State Auditor

April 16, 2019

William Baird, Chairman and Executive Director
and
Board of Directors
Southwest I-470 Transportation Development District
Lee's Summit, Missouri

The State Auditor is required under Section 238.275, RSMo, to audit a transportation development district (TDD) prior to the question of abolishment being submitted to a vote. On January 7, 2019, the Board of Directors of the Southwest I-470 TDD notified the State Auditor of the intent to dissolve the district and requested an audit as required by statute. Because the TDD had no financial activity, an audit was not performed.

The scope of our review included, but was not necessarily limited to, the year ended June 30, 2018, and the period from July 1, 2018, through January 31, 2019. The objectives of our review were to evaluate the financial status of the district and determine whether it may be abolished pursuant to law.

Our methodology included reviewing a financial disclosure filed with the State Auditor's office indicating no financial activity had occurred and other pertinent documents, interviewing legal counsel of the TDD, and obtaining a signed statement from the Board Chairman indicating no financial activity occurred.

The TDD is located in the City of Lee's Summit. The TDD was organized in December 2016 by petition of the City of Lee's Summit, pursuant to Section 238.207.5, RSMo. The Board of Directors and officers include the presiding officer of each affected local transportation authority and a representative designated by the governing body of each affected local transportation authority. The TDD was formed for the purpose of constructing transportation projects and adopted a fiscal year end of June 30. Our review determined the TDD (1) Board of Directors never imposed a TDD sales tax, (2) did not establish a bank account, (3) did not receive any monies or incur any expenditures, and (4) has no outstanding liabilities.

Based on our review, we determined the Board of Directors may proceed with abolishment of the district in accordance with Section 238.275, RSMo.

Sincerely,

Nicole Galloway, CPA
State Auditor

*Includes selected findings

NICOLE GALLOWAY, CPA
Missouri State Auditor

Presiding Judge
Thirty-Seventh Judicial Circuit
and
Municipal Judge
and
Honorable Mayor
and
Members of the Board of Aldermen
Winona, Missouri

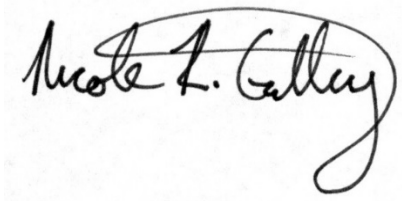
We have conducted follow-up work on certain audit report findings contained in Report No. 2018-028, *Thirty-Seventh Judicial Circuit, City of Winona Municipal Division* (rated as Poor), issued in May 2018, pursuant to the Auditor's Follow-Up Team to Effect Recommendations (AFTER) program. The objectives of the AFTER program are to:

1. Identify audit report findings for which follow up is considered necessary, and inform the municipal division about the follow-up review on those findings.

2. Identify and provide status information for each recommendation reviewed. The status of each recommendation reviewed will be one of the following:

    - Implemented: Auditee fully implemented the recommendation, either as described in the report or in a manner that resolved the underlying issue.
    - In Progress: Auditee has specific plans to begin, or has begun, to implement and intends to fully implement the recommendation.
    - Partially Implemented: Auditee implemented the recommendation in part, but is not making efforts to fully implement it.
    - Not Implemented: Auditee has not implemented the recommendation and has no specific plans to implement the recommendation.

As part of the AFTER work conducted, we reviewed documentation provided by municipal division and city officials and held discussions with officials to verify the status of implementation for the recommendations. Documentation provided by the officials included receipt and disbursement records, electronic case files, monthly reports, and various other financial records. This report is a summary of the results of this follow-up work, which was substantially completed during February and March 2019.



Nicole R. Galloway, CPA
State Auditor

Thirty-Seventh Judicial Circuit
City of Winona Municipal Division
Follow-Up Report on Audit Findings - Status of Findings

1.1 Accounting Controls and Procedures - Segregation of duties and oversight

The municipal division had not adequately segregated accounting and record-keeping duties, and neither the Municipal Judge nor city personnel performed supervisory or independent reviews of accounting and bank records.

Recommendation

The City of Winona Municipal Division segregate accounting duties or ensure documented independent or supervisory reviews of municipal division accounting and bank records are periodically performed.

Status

In Progress

The Court Clerk indicated she now prepares monthly bank reconciliations. The City Clerk indicated she compares receipts to deposits at the time she records court activity in the city's accounting system. However, she does not document this review, but indicated she would immediately start documenting her review. The Mayor reviews the bank statements and bank reconciliation reports and documents his review. We reviewed the December 2018 bank statements and bank reconciliation reports and saw documentation of the Mayor's review on these documents. The Mayor also indicated the city plans to close the municipal division in the near future.

1.2 Accounting Controls and Procedures - Receipting, recording, depositing, and transmitting

The municipal division did not have adequate receipting, recording, and depositing procedures in place. In addition, the police department had not established adequate transmitting procedures.

- The Court Clerk and Assistant Court Clerk did not issue manual receipt slips for all monies received, and as a result, a complete record of monies received was not maintained. Some monies were also not recorded in the case management system that related to case activity and should have been recorded.
- The Court Clerk did not account for the numerical sequence of manual receipt slips and did not reconcile manual receipt slips issued to receipts recorded in the case management system to ensure all monies were accounted for properly.
- The Court Clerk did not deposit receipts timely.
- Transmittals from the police department to the municipal division were not documented, and a reconciliation of receipt slips issued by the police department to monies transmitted to the municipal division was not performed.

Recommendation

The City of Winona Municipal Division ensure receipt slips are issued for all monies received, account for the numerical sequence of receipt slips,

reconcile manual receipt slips issued to the case management system, and deposit receipts timely. The Municipal Division should also work with the police department to document the transmittal of receipts to the municipal division and reconcile police department receipt slips to the transmittals.

Status

Implemented

Our review of December 2018 financial activity showed manual receipt slips were issued for all monies received, the numerical sequence of receipt slips was accounted for, and manual receipt slips were reconciled to the case management system. Monies received were deposited timely. Monies are no longer collected at the police department.

1.3 Accounting Controls and Procedures - Bank reconciliations and liabilities

The city and municipal division's procedures regarding bank reconciliations and liabilities needed improvement.

New bank account

The City Clerk did not prepare accurate bank reconciliations and did not work with the Court Clerk to prepare a list of liabilities for comparison to the reconciled bank balance. Deposits in transit were not included in the bank reconciliations, and as a result, the reconciled bank balances were inaccurate. In addition, we prepared a list of liabilities for this account which differed from the reconciled bank balance by $2,806. The difference was caused by various accounting errors and disbursements made from this account when the corresponding receipts were deposited into the old bank account and not transferred to the new account.

Old bank account

The City Clerk discontinued depositing court collections into the old municipal division bank account in October 2017. However, the old account remained open and had a reconciled bank balance at December 31, 2017, of $5,249. We prepared a list of liabilities as of December 31, 2017, and the list totaled $2,622 (amount owed to the new municipal division bank account), which resulted in $2,627 in the account that remained unidentified.

Recommendation

The City of Winona Municipal Division work with the city to prepare complete and accurate bank reconciliations, prepare and reconcile lists of liabilities monthly to the reconciled bank balances, and promptly investigate any differences. The Municipal Division should also work with the city to investigate unidentified balances in the old bank account, dispose of unclaimed and unidentified monies in accordance with state law, and close the account.

Status

In Progress

The City Clerk indicated bank reconciliations are prepared timely, the only amounts left in the bank accounts are unidentified, and therefore, a list of liabilities is not necessary. Our review of the December 2018 bank reconciliations indicated the new bank account had an unidentified balance of $52 and the old bank account had an unidentified balance of $728. The City Clerk indicated she is working with the Municipal Judge and City Attorney to determine the disposition of the remaining $780.

1.4 Accounting Controls and Procedures - Bonds

Police department personnel issued generic unnumbered bond forms, did not maintain a log of bonds received, and did not always issue prenumbered receipt slips for bonds received.

Recommendation

The City of Winona Municipal Division work with the police department to ensure official prenumbered bond forms are issued, the numerical sequence of all bond forms is accounted for, a bond log is maintained to record all bonds received, and bond receipts are recorded and transmitted timely to the municipal division.

Status

Implemented

The police department no longer collects bond monies.

2.1 Municipal Division Procedures - Case dispositions

The Municipal Judge did not always approve the final disposition of cases brought before the court or the fines handled through the Violation Bureau. Additionally, the Municipal Judge's approval of amended and dismissed tickets was not always properly documented.

Completed manual case docket sheets were not always signed by the Municipal Judge, and the Court Clerk did not print the final docket that documented the case activity recorded in the system for the Municipal Judge's review and approval. In addition, some amended tickets were approved using the Municipal Judge's signature stamp without subsequent approval.

Recommendation

The City of Winona Municipal Division ensure the Municipal Judge signs all court dockets and reviews and approves all amended and dismissed tickets.

Status

Not Implemented

The Municipal Judge did not document his review and approval on court dockets of the final disposition for 3 of 5 cases reviewed that were disposed of in December 2018. In addition, one of these 3 cases involved an amended ticket that was approved using the Municipal Judge's signature stamp without subsequent approval. The Court Clerk does not print the final docket that documents the case activity recorded in the system for the Municipal Judge's review and approval. Also, our review of another ticket that was dismissed

showed the use of the Municipal Judge's signature stamp without subsequent approval.

2.2 Municipal Division Procedures - Signature stamp

Court clerks authorized to use the signature stamp did not initial to indicate use and there was no independent review of the documents stamped.

Recommendation

The City of Winona Municipal Division establish procedures to adequately secure and control the use of the Municipal Judge's signature stamp, including requiring the user to initial the stamp and a subsequent review and approval of stamped documents.

Status

Partially Implemented

The Court Clerk indicated the Municipal Judge's signature stamp is rarely used. Our review of 2 case files for which the Municipal Judge's signature stamp was used on documents showed the Court Clerk initialed next to the use of the stamp. However, a subsequent review and approval of the stamped documents was not documented by the Municipal Judge.

2.3 Municipal Division Procedures - Municipal division records

Municipal division case records were not maintained in an accurate and complete manner. We noted instances in which the information between the manual and electronic records did not always agree. In addition, the sentencing for each case was not always documented on the manual case docket sheet when multiple cases for a single defendant were brought before the court at the same time.

Recommendation

The City of Winona Municipal Division ensure the proper disposition of cases is documented in manual and electronic records and sufficient documentation is maintained to support all case actions.

Status

Implemented

During our review of 5 cases disposed of in December 2018, we noted the information between the manual and electronic reports agreed. In addition, during our review of manual case docket sheets associated with multiple cases for a single defendant, we noted the sentencing for each case was accurately documented.

2.4 Municipal Division Procedures - Ticket accountability

The police department and the municipal division did not work together to ensure the numerical sequence and ultimate disposition of all tickets issued were accounted for properly. There were no procedures to account for the numerical sequence of all tickets issued, ensure the transmittal of all issued tickets to the municipal division, or document each ticket's disposition. In addition, no formal listing of voided tickets was retained. Also, a ticket was issued to a member of the Court Clerk's family; however, this ticket could not

be located at the municipal division and there was no documentation showing the Court Clerk entered the ticket into the municipal division's case management system for processing.

Recommendation

The City of Winona Municipal Division work with the police department to ensure the numerical sequence and ultimate disposition of all tickets (including voided tickets) are accounted for properly.

Status

Not Implemented

The police department and the municipal division have not implemented procedures to account for the numerical sequence of tickets issued, ensured the transmittal of all issued tickets to the municipal division, or documented the disposition of each ticket.

3. Excess Revenues

The city did not have adequate support for its 2016 excess revenues calculation. The amounts reported by the city as general operating revenues were significantly overstated, which resulted in no excess revenues owed to the Department of Revenue (DOR). However, our calculations resulted in excess revenues of at least $21,987 owed to the DOR.

Our review of the minor traffic violation report used in the excess revenue calculation identified a large difference between total court revenues and court revenues from minor traffic violations. A significant amount of the difference could not readily be explained and some municipal ordinance violations were not included in the minor traffic violation report; therefore, the minor traffic violation report generated might not have been accurate and complete.

Recommendation

The City of Winona Municipal Division ensure the minor traffic violation report included municipal ordinance violations, work with the City of Winona Board of Aldermen to recalculate excess revenues for the year ended December 31, 2016, and make payment to the DOR. Adequate documentation of all calculations should be maintained.

Status

Partially Implemented

The City Clerk indicated minor traffic violations are now coded properly into the case management system, and a report of minor traffic violations is generated and reviewed for accuracy. The City Clerk recalculated excess revenues for the year ended December 31, 2016, which indicated $21,995 was due to the DOR. However, the city has not made any payments to the DOR. The Board indicated it has no plans to make payment until after the criminal proceedings involving the former City Clerk are finalized.

The City Clerk also calculated $26,049 in excess revenues was due to the DOR for the year ended December 31, 2017. The city paid this amount to the

DOR on August 9, 2018. In addition, the City Clerk calculated $10,394 in excess revenues was due to the DOR for the year ended December 31, 2018. The Board indicated it plans to pay this to the DOR in April 2019. Documentation of the excess revenue calculations was maintained by the city.

Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of City of St. Louis - Board of Public Service

Invoicing and Fuel Reconciliation	The Board of Public Service's Equipment Services Division's (ESD) lack of review procedures for fuel invoices allowed system errors to go undetected and, as a result, some ESD fuel costs did not get invoiced. In addition, the ESD has not established procedures to ensure payments for amounts billed are collected. Improvement is needed in the monitoring and preparation of fuel reconciliations.
Inventory Procedures	The ESD has not adequately segregated inventory duties or ensured there is a documented supervisory or independent review of daily inventory counts performed by parts room personnel. The ESD has not established formal controls and procedures to reconcile and document the daily and semi-annual parts inventory counts performed or to monitor and investigate inventory variances at each garage.
Vehicle Assignment Report	The ESD did not attempt to prepare the annual vehicle assignment report for fiscal year ended June 30, 2018, and the fiscal year ended June 30, 2017, report was incomplete.

In the areas audited, the overall performance of this entity was **Good**.*

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

Organization and Statistical Information 11

NICOLE GALLOWAY, CPA
Missouri State Auditor

To the Honorable Mayor
and
President of the Board of Public Service
City of St. Louis, Missouri

We have audited certain operations of the City of St. Louis Board of Public Service in fulfillment of our duties under Section 29.200.3, RSMo. The State Auditor initiated audits of the City of St. Louis in response to a formal request from the Board of Aldermen. The city engaged KPMG LLP, Certified Public Accountants (CPAs), to audit the city's financial statements for the year ended June 30, 2018. To minimize duplication of effort, we reviewed the CPA firm's report. The scope of our audit included, but was not limited to the year ended June 30, 2018. The objectives of our audit were to:

1. Evaluate the Board's internal controls over significant management and financial functions.

2. Evaluate the Board's compliance with certain legal provisions.

3. Evaluate the economy and efficiency of certain management practices and procedures, including certain financial transactions.

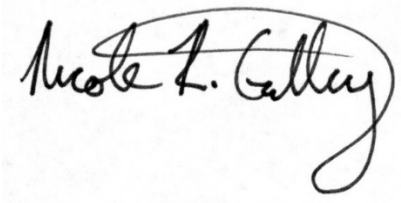
Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the Board, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of applicable contract, grant agreement, or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the division's management and was not subjected to the procedures applied in our audit of the division.

For the areas audited, we identified (1) deficiencies in internal controls, (2) no significant noncompliance with legal provisions, and (3) the need for improvement in management practices and procedures. The accompanying Management Advisory Report presents our findings arising from our audit of the City of St. Louis Board of Public Service.

Additional audits of various officials and departments of the City of St. Louis are in process, and any additional findings and recommendations will be included in subsequent reports.



Nicole R. Galloway, CPA
State Auditor

The following auditors participated in the preparation of this report:

Director of Audits:	Kelly Davis, M.Acct., CPA, CFE
Audit Manager:	Chris Vetter, CPA, CGAP
In-Charge Auditor:	Steven Re', CPA
Audit Staff:	Morgan Alexander
	Rachel Cline, M.S. Acct.
	Matt Brown

1. Invoicing and Fuel Reconciliation

Controls and procedures over fuel and maintenance invoicing and reconciliation need improvement.

1.1 Fuel and maintenance invoicing

The Board of Public Service's Equipment Services Division's (ESD) lack of review procedures for fuel invoices allowed system errors to go undetected and, as a result, some ESD fuel costs did not get invoiced. In addition, the ESD has not established procedures to ensure payments for amounts billed are collected. Each month, ESD personnel prepare a spreadsheet that is forwarded to the Comptroller's office to create a journal entry to credit the ESD's internal service fund for the fuel and maintenance costs for city departments. Also, the ESD prepares and sends invoices to the United States Marshal's Office, 2 not-for-profit organizations, and the city Water Division and License Collector's office for fuel used and maintenance services performed.

System errors

ESD personnel were unaware of a system error within the fleet information database that prevented commercial vendor fuel purchases from being invoiced to city offices and other entities until we made a request for information from the database. As a result, ESD personnel did not know fuel purchased from commercial service stations totaling $380,229[1] was not invoiced between February and September 2018. In addition, ESD personnel were unaware of additional system errors that caused some city departments to be overcharged and/or undercharged.

Collection efforts

Our review of monthly fuel and maintenance invoices for fiscal years 2017 and 2018 determined the ESD does not ensure entities invoiced for fuel and maintenance submit payment. Comptroller's office receipt records indicate some organizations and city divisions have not paid amounts invoiced by the ESD or the amounts paid do not agree to amounts invoiced. The ESD does not request information from the Comptroller's office regarding the amounts paid and does not have any procedures to follow up with entities that do not pay. The amounts outstanding for fiscal years 2017 and 2018 are listed in the following table.

[1] $167,028 of the $380,229 in fuel purchased from commercial service stations occurred after June 30, 2018.

Billed Entity	Fiscal Year 2017	2018	Total	Last Invoice Paid Date[1]
Not-for-profit #1	$ 3,629	32,911	36,540	August 2017
St. Louis City Water Division	22,844	9,204	32,048	May 2018
U.S. Marshal's Office	0	24,771	24,771	September 2017
St. Louis City License Collector	1,564	2,988	4,552	March 2017
Not-for-profit #2	219	122	341	No Payments Received
Total	$ 28,256	69,996	98,252	

[1] As of October 2018.
Source: St. Louis City Comptroller's Office accounting records.

Procedures such as performing independent reconciliations of ESD costs to amounts invoiced should be established to ensure all amounts are properly invoiced. In addition, proper and timely monitoring of amounts due is necessary to help ensure unpaid amounts are collected and proper follow-up action is taken for nonpayment.

1.2 Fuel reconciliation

Improvement is needed in the monitoring and preparation of fuel reconciliations. The ESD reconciliation of fuel use to fuel purchased for large bulk tanks is not consistent with the standard operating procedure (SOP) and no reconciliation is performed for several small bulk fuel tanks and tanker trucks. The ESD spent approximately $3.8 million on fuel for the year ended June 30, 2018.

The division maintains 3 large bulk gasoline tanks, 4 large bulk diesel tanks, 12 small bulk diesel tanks, 1 small bulk gasoline tank, and 2 tankers at 4 garages (Hampton, Central, Laclede, and Forest Park). We noted the following concerns:

- ESD personnel are not performing the fuel reconciliation for large bulk tanks as defined in SOP 2.1. The SOP requires the parts supervisor at each garage prepare a monthly fuel reconciliation. In addition, the ESD Commissioner indicated an Inventory Control Technician is supposed to perform an independent fuel reconciliation. Our review of the fuel reconciliations performed by the Inventory Control Technician and by the parts supervisors at the Hampton and Central garages for the large bulk fuel tanks, noted procedures used are not consistent and do not follow the reconciliation method outlined in the SOP. In addition, supporting documentation is not maintained and each reconciliation is not reviewed and approved by a supervisor. As a result, there is no assurance the reconciliations performed are complete and accurate. Also, personnel at the Laclede and Forest Park garages do not prepare large bulk tank fuel reconciliations as required.

- The ESD does not monitor and reconcile fuel use to fuel purchased for 11 of the 13 smaller bulk fuel tanks. In addition, although fuel use is

tracked for the other 2 smaller bulk fuel tanks and 2 fuel tankers, no reconciliation is performed between fuel use and fuel purchased. These smaller tanks and tankers are not addressed in the SOP.

To ensure the reasonableness of fuel costs, the ESD should follow the existing SOP to reconcile fuel use to fuel purchased. Fuel reconciliations are necessary to ensure vehicles and equipment are properly utilized, prevent paying vendors for improper amounts invoiced, and decrease the risk of theft or misuse of fuel occurring without detection.

A similar condition was noted in our prior audit report. In the *Follow-Up Report on Audit Findings City of St. Louis Board of Public Service*, Report No. 2018-062, released in August 2018, the division reported these previous recommendations had been implemented; however, we found that corrective action taken was not always effective and problems continue to exist.

Recommendations

The Board of Public Service:

1.1 Develop procedures to ensure complete and accurate amounts are invoiced for fuel and vehicle maintenance performed. In addition, the Board of Public Service should develop procedures to ensure the collection of amounts invoiced.

1.2 Ensure fuel reconciliations are performed as required and reconciliations are documented and reviewed. In addition, the Board of Public Service should update fuel SOPs to include small bulk fuel tanks and tanker trucks to ensure reconciliations are performed.

Auditee's Response

1.1 We concur with these findings and the need for a SOP jointly developed by the Comptroller's office and BPS accounting to confirm that monthly fuel billings are paid by both internal city and external customers. The Comptroller does monitor internal city customers well. It is the billing of and collection from non-General Fund city customers and non-city entities that has been the problem.

1.2 We concur with these findings. Small bulk fuel tanks without electronic transaction equipment are located in major city parks for the convenience of refueling off-road equipment used in those parks. The ESD will develop a SOP to be executed by Parks Division employees to reconcile deliveries requested.

2. Inventory Procedures

Inventory controls and procedures need improvement.

The ESD purchases parts and supplies needed to repair and maintain city fleet vehicles and equipment. The ESD purchased approximately $2.7 million in vehicle and equipment parts for the year ended June 30, 2018. The value of

the inventory on hand for all 4 garages was approximately $2.9 million at June 30, 2018.

2.1 Segregation of duties

The ESD has not adequately segregated inventory duties or ensured there is a documented supervisory or independent review of daily inventory counts performed by parts room personnel. The fleet parts supervisor and maintenance foreman at each of the 4 garages are responsible for ordering, receiving, distributing, and maintaining the parts and supplies inventory. The same personnel reconcile and make daily adjustments to inventory levels recorded in the inventory database.

The ESD Commissioner said he was unaware the parts supervisors and foremen were performing a daily inventory count when receiving and issuing parts and making adjustments as needed for discrepancies in the inventory totals. As a result, although changes to the inventory were tracked in the inventory database, the ESD Commissioner had not performed a supervisory or independent review of the adjustments made.

Proper segregation of duties helps ensure inventories of maintenance parts are accounted for properly and assets are adequately safeguarded. If proper segregation of duties cannot be achieved, documented independent or supervisory reviews of daily inventories should be performed.

2.2 Inventory procedures

The ESD has not established formal controls and procedures to reconcile and document the daily and semi-annual parts inventory counts performed or to monitor and investigate inventory variances at each garage. As a result, there is no assurance parts inventory quantities and variances are accurate or complete. During our review, we identified the following concerns:

- Semi-annual inventory counts are not always prepared timely. For example, the Hampton and Central garages semi-annual inventories for June 2018, had not been completed as of October 2018.

- The ESD does not maintain complete and accurate supporting documentation of daily or semi-annual inventory counts. For example, several of the semi-annual inventory variance reports prepared during 2018 included vehicle and equipment parts that had been counted multiple times.

- The ESD Commissioner was unaware multiple variance reports for each garage were prepared for the semi-annual inventory count and each needed to be reviewed and approved. For example, the ESD Commissioner determined he had reviewed and approved one of four inventory variance reports prepared for the Laclede garage for fiscal year 2018. As a result, no supervisory review was performed for the other variance reports.

- Some automotive lubricants and liquids may not be recorded and are not inventoried or reconciled. Each maintenance garage has 2 to 4 bulk tanks which contain the most commonly used lubricants and liquids for each location. Authorized use of lubricants and liquids may not be recorded in the inventory database. For example, the ESD Commissioner said drivers of refuse trucks obtain hydraulic fluid without informing garage personnel. In addition, these bulk liquids are not part of the semi-annual inventory. The ESD Commissioner indicated he has implemented physical controls to the maximum extent possible but the division cannot accurately control the dispensing and use of bulk oil and other fluids. In addition, he said employees at one of the four garages are in the process of installing electronic monitoring on that garage's bulk liquid tanks, however, this monitoring was not operational at the time of our review.

Loss, theft, or misuse of inventory may go undetected if inventory records and counts are not sufficient. Effective internal controls and procedures require maintaining complete and accurate records of all inventory items and performing reconciliations of these records to the balances of items on hand that are reviewed by someone independent of the process.

A similar condition was noted in our prior audit report. In the *Follow-Up Report on Audit Findings City of St. Louis Board of Public Service*, Report No. 2018-062, released in August 2018, the division reported the status of the previous recommendation was in progress.

Recommendations

The Board of Public Service:

2.1 Segregate the inventory duties of ESD parts room personnel. If proper segregation cannot be achieved, ensure a documented independent or supervisory review is performed.

2.2 Establish effective controls and procedures to ensure accurate inventory counts are conducted timely, reviewed, and variances are monitored and investigated. In addition, the Board of Public Service should ensure bulk lubricant and liquid usage is recorded.

Auditee's Response

2.1 We concur with this finding and recommendation. ESD Fleet Maintenance Parts Supervisors nor their subordinate Fleet Maintenance Parts Specialists have permissions within the software used to alter inventory levels. That procedure has now been reserved for the independent Inventory Control Technician II or the manager of that section for auditable changes following the 100 percent inventory of each garage parts room and review of the full variance report by Fleet Maintenance Managers and Commissioner of Equipment Services.

2.2 We concur with this finding and recommendation. However, with regard to bulk shop fluids, anything short of 100 percent electronic dispensing controls consistently results in manual efforts falling far short of recording all use. The ESD is currently attempting to implement electronic controls for this inventory problem in the newest Central Garage. If that solution proves successful, the ESD will request budget funds to duplicate the system costing about $30,000 in each of the other three maintenance and repair facilities.

3. Vehicle Assignment Report

The ESD did not attempt to prepare the annual vehicle assignment report for fiscal year ended June 30, 2018, and the fiscal year ended June 30, 2017, report was incomplete. ESD personnel indicated they have been unable to complete annual vehicle assignment reports because most city departments are not providing the required information. The ESD commissioner stated the last annual vehicle report was completed for the fiscal year ended June 30, 2016.

Section 3.1.1 of the Vehicle Policy Manual, states the Commissioner of the ESD shall provide an annual vehicle assignment report to the Board of Estimate and Apportionment by October 1. This report is to include information on all city vehicles by department, as well as cost, mileage, vehicle assignments, commuting justification, and verification of valid operators' licenses. In addition, Section 3.1.2 of the manual states each year, in August, every elected official and appointing authority with vehicles maintained and refueled by the ESD will provide the ESD Commissioner with updated information about vehicle assignments.

The vehicle assignment report, when properly and accurately prepared, is a valuable tool for planning for and monitoring the city's vehicle fleet including identifying who is to be assigned a city vehicle for commuting purposes. To ensure the vehicle assignment report is completed annually as required, the BPS should work with the Board of Estimate and Apportionment to ensure city departments and elected officials provide the necessary information.

A similar condition was noted in our prior audit report. In the *Follow-Up Report on Audit Findings City of St. Louis Board of Public Service*, Report No. 2018-062, released in August 2018, the division reported the status of the recommendation as partially implemented.

Recommendation

The Board of Public Service ensure the vehicle assignment report is completed annually as required by the Vehicle Policy Manual.

Auditee's Response

We concur with the finding and will continue to attempt to implement the recommendation.

The 2018 Vehicle Assignment Survey was distributed to all fleet customers in August 2018 with a suspense date of late September 2018 which if complied with would have resulted in the report being submitted as required to the Board of Estimate and Apportionment in October 2018. The last response to the survey from a major fleet component was not returned until February 2019. The report is currently being compiled and will be provided in March 2019.

The crux of the problem is that while the Commissioner of Equipment Services bears the responsibility of coordinating and compiling this report, he lacks the authority to compel the cooperation of elected officials and appointing authorities to meet the established timeframe.

City of St. Louis - Board of Public Service
Organization and Statistical Information

The Board of Public Service (BPS) was established under the provisions of Article XIII of the St. Louis City Charter. The BPS is made up of the Board President, as well as the Directors of the Departments of Public Utilities, Streets, Human Services, Parks, Health, and Public Safety. The Charter specifies that the Board meet once a week. The Board's duties include approving permits for use of public places, approving permits for private businesses, and accepting or rejecting grants or dedications of highways, streets, and subdivisions. If an ordinance is for a public work it must be first proposed by the Board.

The Office of the President of the BPS is to control and conduct any and all engineering, construction, and reconstruction work undertaken by the city and to supervise all such work in which the city is interested. All plans and specifications for such work shall be prepared under the direction of the BPS and be subject to its approval. To carry out these assignments, the department is divided into planning and programming, design services, construction, and administration.

The Office of the President is also responsible for the following divisions:

1. The Equipment Services Division, responsible for the repair and maintenance of city vehicles and equipment, was formed in 1983. There are 4 garages, 20 refueling sites, and 2 tankers under the direct control of this division.

2. The Facilities Management Division, which maintains approximately 160 buildings citywide, was formed in 1984. There are five trades which function in this division: painters, plumbers, electricians, carpenters, and heating ventilation air conditioning technicians. Custodians for the city hall building are also part of this division.

3. The Soldier's Memorial Military Museum was dedicated as a memorial for veterans and as a museum for preserving a historic collection of military artifacts.

At June 30, 2018, the BPS employed 239 full-time employees. The Board President is appointed by the Mayor of St. Louis. The current Board President, Richard Bradley, was appointed on June 1, 2009.

Timeliness of Income Tax Refund Issuance

Report No. 2019-025
April 2019

auditor.mo.gov

Nicole Galloway, CPA
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of Timeliness of Income Tax Refund Issuance

Improvements Made in the Timeliness of Individual Income Tax Refunds	The state made improvements in the timely payment of individual income tax refunds during fiscal year 2018 compared to the previous 2 fiscal years. In addition to the total amount refunded being paid more timely during fiscal year 2018, improvements have also been made in decreasing the number of refunds being delayed.
Improved Cash Flow Allowed for More Timely Refunds	Improvements in the timeliness of income tax refunds resulted from improved cash flow to the General Revenue (GR) Fund in fiscal year 2018. According to monthly general revenue reports generated by the Office of Administration, the state collected significantly higher (32 percent) personal income tax revenue in January 2018 than in January 2017. While borrowings from the Budget Reserve Fund allowed the state to continue to meet its obligations and were replenished before May 16 every year, as required by the Missouri Constitution, this trend indicates the state has not replenished its overall cash reserves following the 2008 recession. Due to the decrease in cash available since 2008, the state has had to use money borrowed from the Budget Reserve Fund for other operating obligations, making less reserve funding available for paying individual income tax refunds.
Refunds Are Not Paid in the Order Processed	State law does not specify that income tax refunds must be paid in the order in which they are received or processed. As a result, the Department of Revenue has established a priority system for paying individual income tax refunds.
Changes to State Withholding Tables	Changes made in 2018 to the state's individual income tax withholding tables to adjust for changes to the federal tax law and a reduction in state income tax rates have resulted in a significant reduction in revenues for individual income tax withholdings to the GR Fund during fiscal year 2019. The impact of these changes in cash flow on the timeliness of income tax refund issuance is uncertain. In addition, changes to the withholding table in January 2019 are expected to result in over withholding from a majority of taxpayers.

Due to the limited objectives of this audit, no overall rating is provided.

NICOLE GALLOWAY, CPA
Missouri State Auditor

Honorable Michael L. Parson, Governor
and
Members of the General Assembly
and
Kenneth J. Zellers, Acting Director
Department of Revenue

We have audited certain operations of the Department of Revenue related to the timeliness of income tax refund issuance in fulfillment of our duties under Chapter 29, RSMo. The scope of the audit included, but was not necessarily limited to, the years ended June 30, 2018 and 2017. The objectives of our audit were to:

1. Evaluate the internal controls over significant management and financial functions related to the timeliness of income tax refund issuance.

2. Evaluate compliance with certain legal provisions related to the timeliness of income tax refund issuance.

3. Evaluate the economy and efficiency of certain management practices and procedures related to the timeliness of income tax refund issuance.

Except as discussed in the following paragraph, we conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

Government Auditing Standards require us to obtain and report the views of responsible officials of the audited entity concerning the findings, conclusions, and recommendations included in the audit report. Due to the nature of this report, and due to the majority of the findings being legislative in nature, we were unable to obtain views of responsible officials for the findings, conclusions, and recommendations outlined in findings 1 through 3 of the Management Advisory Report. The views of responsible Department of Revenue officials were obtained and included where appropriate.

For the areas audited, we identified (1) no significant deficiencies in internal controls, (2) noncompliance with legal provisions, and (3) the need for improvement in management practices and procedures. The accompanying Management Advisory Report presents our findings arising from our audit of the timeliness of income tax refund issuance.

Timeliness of Income Tax Refund Issuance
Introduction

Background

The Department of Revenue (DOR) was created by Article IV, Section 12, Missouri Constitution as the central collection agency for state revenues. The DOR Taxation Division administers and collects personal and business taxes, including individual and corporate income taxes, and initiates refunds for overpayments. DOR records indicate during the fiscal years ended June 30, 2017 and 2018, the department collected approximately $7.3 billion and $7.7 billion in individual income tax receipts, and paid related refunds of approximately $1.0 billion and $1.1 billion, respectively. During those fiscal years, the records also indicate the department collected approximately $435 million and $462 million in corporate tax receipts, and paid corporate income tax refunds totaling approximately $159 million and $161 million, respectively. DOR records indicate the state paid interest to taxpayers on approximately 79,000 individual income tax refunds totaling approximately $334,000 in fiscal year 2018. In contrast, the state paid interest on approximately 155,000 refunds totaling approximately $423,000 in fiscal year 2017. During those fiscal years, records also indicate the state paid interest on approximately 100 and 20 corporate income tax refunds totaling approximately $40,000 and $4,000, respectively.

Statutes establishing interest requirements

Prior to 2002, Section 143.811.4, RSMo, required the state to pay interest to taxpayers if the state did not pay income tax refunds within 4 months after the last day prescribed for filing a tax return or within 4 months after the return was filed, whichever was later. As required by Section 32.065, RSMo, the interest rate was the adjusted prime rate charged by banks, as determined by the Board of Governors of the Federal Reserve System. During the 2002 legislative session, the General Assembly passed legislation establishing Sections 32.068 and 32.069, RSMo, which, among other things, changed interest provisions to reduce interest rates the state had to pay. According to DOR officials, 2001 was the first year the state had difficulty issuing income tax refunds timely due to cash flow problems. Section 32.068, RSMo, established the interest rate for refunds to be equal to the previous 12-month annualized average rate of return on all funds invested by the State Treasurer, rounded to the nearest 1/10 of 1 percent. Section 32.069, RSMo, specified the date interest would begin accruing by requiring interest to be paid on any refund or overpayment if it was not refunded within 120 days from the latest of the following dates (1) the last day prescribed for filing a tax return or refund claim, without regard to any extension of time granted; (2) the date the return, payment, or claim was filed; or (3) the date the taxpayer filed for a credit or refund and provided accurate and complete documentation to support such claim.

Section 32.069, RSMo, was amended in 2010 to decrease the number of days the state had to pay refunds before interest would be owed on an individual income tax refund from 120 to 90 days. The corporate income tax interest provision remained at 120 days.

Effective August 28, 2015, Section 32.069, RSMo, was again amended to decrease the number of days the state has to pay refunds before interest would be owed on an individual income tax refund from 90 to 45 days and established the date the return is filed as the date from which interest would begin accruing if the refund was not paid within the 45 days. The corporate income tax interest provision remained at 120 days.

In response to a recommendation made in our prior audit report,[1] the General Assembly passed legislation to increase the interest rate the state has to pay on delayed refunds to the same level as the interest rate taxpayers must pay when making late tax payments. Effective August 28, 2018, Section 32.069, RSMo, was changed so that on and after July 1, 2019, the interest rate the state has to pay on delayed refunds will be determined by Section 32.065, RSMo, which sets the interest rate as the adjusted prime rate charged by banks, as determined by the Board of Governors of the Federal Reserve System. This statute also sets the interest rate paid by taxpayers. During calendar year 2018, this interest rate averaged 4 percent. Prior to July 1, 2019, the interest rate the state has to pay is determined by Section 32.068, RSMo, as previously discussed. During calendar year 2018, this interest rate averaged 1.1 percent.

Payment process

When processing and making refund payments, the DOR is contacted regularly by the Office of Administration (OA) during February through June about the dollar amount allocated to the department to make refund payments that day or week. These allocations are based on the OA's continuous monitoring of the cash flow of the General Revenue (GR) Fund, as explained in Management Advisory Report (MAR) finding number 2.

The DOR assigns each individual income tax refund a priority category, which allows department personnel to put an emphasis on certain types of refunds. Corporate income tax refunds are processed in the order they are received.

Reasons for delays

Most refunds will accrue interest if they are not paid by the time frames established in Section 32.069, RSMo. However, if a taxpayer does not include all relevant information and documentation when filing a return or a notice of adjustment suggesting a financial change to the return is sent to the taxpayer by the DOR, interest will normally begin accruing at a later date (e.g., the date the taxpayer provides all relevant documents).

DOR officials stated the main reasons for delays in issuing refunds include the following:

[1] Report No. 2018-001, *Timeliness of Income Tax Refund Issuance*, issued January 2018.

- lack of cash allocated to the DOR by the OA for issuing refunds from the GR Fund.
- submission errors by taxpayers requiring DOR personnel to manually review the returns.
- apportioned tax credits.[2]
- amended returns filed by taxpayers.[3]
- audited returns.[4]
- legal settlements.[5]
- protested returns.[6]

Scope and Methodology

To gain an understanding of the timeliness of income tax refund issuance, we reviewed written policies and procedures, redacted income tax records,[7] and other pertinent documents; interviewed various personnel of the DOR, the OA, and the State Treasurer's Office; and tested select income tax returns to ensure interest was paid to taxpayers when required, and the correct interest rate was properly applied.

We obtained an understanding of the internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of applicable contract, grant agreement, or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

[2] Apportioned tax credits are tax credits held until June each year to determine if taxpayers, in total, are claiming more than the maximum limit allowed by statute. If the limit has been exceeded, the DOR must apportion the tax credit between all returns claiming the tax credit.

[3] The DOR must receive a transcript from the Internal Revenue Service (IRS) to verify acceptance of a taxpayer's amended federal return, if applicable, which usually exceeds 45 days.

[4] Each year the DOR chooses returns to audit based on various factors.

[5] If a return is involved in a lawsuit, the refund is held until the lawsuit has been resolved.

[6] If the taxpayer's refund is denied by the DOR or the DOR determines the taxpayer owes additional taxes, the taxpayer may file an official protest with the department.

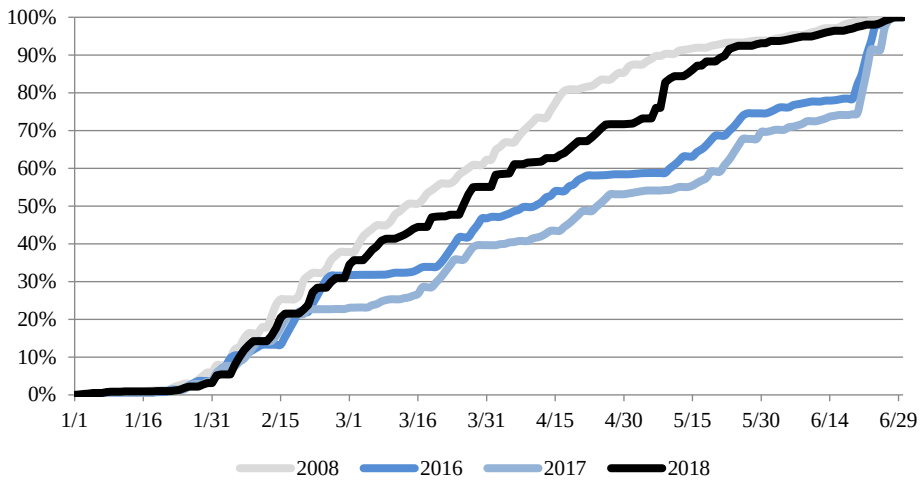
[7] The DOR redacted all personally identifiable taxpayer information from the records we received during the audit based on the department's interpretation of the Missouri Supreme Court decision in the case of *Director of Revenue v. State Auditor* 511 S.W.2d 779 (Mo. 1974). The redactions by the DOR did not prevent us from obtaining sufficient evidence to meet our audit objectives.

Timeliness of Income Tax Refund Issuance
Management Advisory Report
State Auditor's Findings

1. Improvements Made in the Timeliness of Individual Income Tax Refunds

The state made improvements in the timely payment of individual income tax refunds during fiscal year 2018 compared to the previous 2 fiscal years. Based on state income tax refund data, in fiscal year 2018 the state paid 80 percent of total refunds by May 9. In contrast, for fiscal years 2016 and 2017 the state did not reach that payout level until June 20 and June 22, respectively. However, fiscal year 2018 still lags behind historical timeliness trends. For example, in fiscal year 2008 the state paid 80 percent of total refunds by April 17. Figure 1.1 shows the comparative timing of income tax refund payments for these years.

Figure 1.1: Percent of total refunds paid from January 1 to June 30, by fiscal year, for Fiscal Year 2008, 2016-2018



Source: Data from the state's accounting system (SAM II)

Decreases in delayed refunds

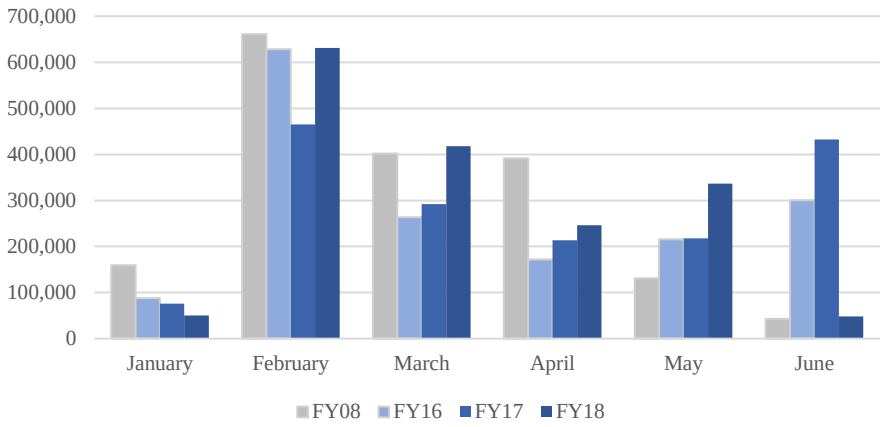
In addition to the total amount refunded being paid more timely during fiscal year 2018, improvements have also been made in decreasing the number of refunds being delayed. The number of June refunds paid in fiscal year 2017 was approximately 433,000 (24 percent of total refunds), but declined significantly in fiscal year 2018 to approximately 48,000 (3 percent of total refunds). For historical perspective, in fiscal year 2008 the number of June refunds was approximately 42,000 (2 percent of total refunds). Figure 1.2 shows the trends in number of refunds issued, by month, from January to June.

In fiscal year 2017, an estimated 672,000 of the approximate 1.8 million individual income tax refunds were paid more than 45 days[8] after being received (37 percent). In fiscal year 2018, an estimated 105,000 of the approximate 1.9 million individual income tax refunds were paid more than

[8] This number includes refunds with interest paid to taxpayers and refunds with interest under $1 not paid to taxpayers.

45 days[9] after being received (6 percent); an improvement of 567,000 returns. As a result of these improvements, the state has paid less in interest on late refunds. Interest paid on refunds decreased from approximately $423,000 paid on approximately 155,000 refunds in fiscal year 2017, to approximately $334,000 paid on approximately 79,000 refunds in fiscal year 2018.

Figure 1.2: Number of individual income tax refunds issued from January to June, 2008 and 2016-2018, by fiscal year



Source: DOR records

Conclusion

State laws reducing the timeframe the DOR has to pay refunds before interest accrues were presumably intended to improve the timeliness of refund payments. While the number and amount of individual income tax refunds being paid later in the year increased from fiscal year 2016 to fiscal year 2017, significant improvements occurred in fiscal year 2018, with refunds being paid more timely. This report discusses the significant causes of the identified trends, as well as other issues related to the timeliness of income tax refund issuance and the impact on taxpayers.

2. Improved Cash Flow Allowed for More Timely Refunds

Improvements in the timeliness of income tax refunds resulted from improved cash flow to the General Revenue (GR) Fund in fiscal year 2018. Our prior audit report discussed the downward trend in the amount of cash reserves available in the GR Fund from 2008 through 2017. During 2018, the cash reserves improved slightly compared to 2017 but still remained low by historical standards.

Improved cash flow

According to monthly general revenue reports generated by the Office of Administration (OA), the state collected significantly higher (32 percent) personal income tax revenue in January 2018 than in January 2017. The January 2018 collections were also significantly higher (32 percent) than the amount collected in January 2019. This fluctuation resulted in increased cash

[9] This number includes refunds with interest paid to taxpayers and refunds with interest under $1 which was paid to taxpayers beginning March 2018.

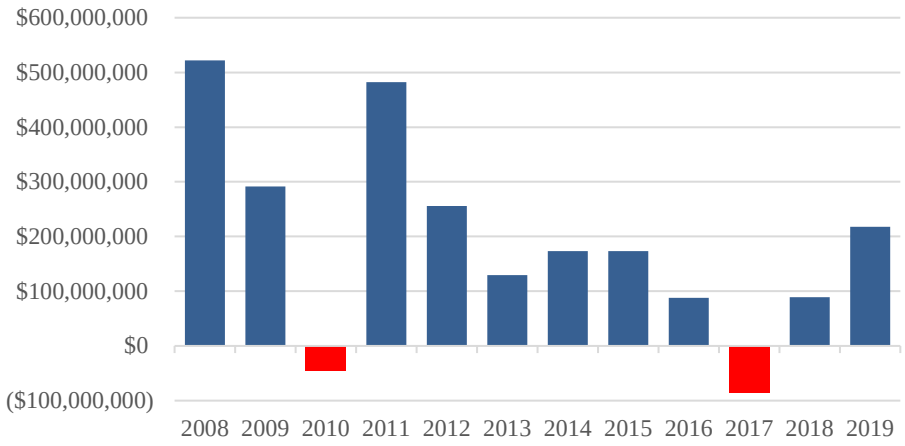
flow of approximately $223 million in January 2018, allowing the DOR to pay refunds more timely.

According to DOR records, throughout the majority of June 2017, the DOR had tax refunds totaling over $200 million processed and ready to be paid, but could not proceed with payment due to the lack of cash available in the GR Fund. In comparison, during June 2018, the most refunds processed and ready to be paid at any point during the month was approximately $6 million on June 28, 2018, with payment of the majority of these refunds occurring within the following week.

Historical cash flow issues continue

Figure 2.1 shows the state's GR Fund cash balance at January 1, less any loans from the Budget Reserve Fund. The balance at January 1, 2018, was $89 million, which is an increase of $175 million from the January 1, 2017 negative balance of $86 million. However, the January 2018 balance was still approximately $433 million less than the pre-recession January 2008 balance. While borrowings from the Budget Reserve Fund allowed the state to continue to meet its obligations and were replenished before May 16 every year, as required by the Missouri Constitution, this trend indicates the state has not replenished its overall cash reserves following the 2008 recession. The state's GR Fund cash balance, less any loans from the Budget Reserve Fund, has continued to increase into fiscal year 2019. The balance at January 1, 2019, was $218 million, an increase of $129 million from the January 1, 2018, balance of $89 million.

Figure 2.1: General Revenue Fund cash balance, net of budget reserve borrowing, at January 1, by year



Source: Office of Administration records

Due to the decrease in cash available since 2008 as shown in Figure 2.1, the OA has had to use money borrowed from the Budget Reserve Fund for other operating obligations, making less reserve funding available for paying individual income tax refunds.

Cash management and the use of the Budget Reserve Fund

The OA is responsible for monitoring revenues and expenditures in the GR Fund. Based on estimates of revenues, historical spending data, and appropriations for expenditures, each day the OA projects the amount available for spending for the day, month, and fiscal year. To ensure the state has enough available cash to make any planned or unplanned payments, the OA looks at long-term obligations to make strategic decisions about the use of available GR cash. If the GR Fund is not projected to have sufficient cash to cover all known and potential expenditures anticipated in the coming days and months, the OA must allocate the cash available among the different expenditure types, including tax refunds, bond obligations, public education payments, public assistance payments, and state payroll, among other obligations.

To ensure adequate cash is on hand to pay these obligations, the OA is allowed to borrow from the Budget Reserve Fund on a short term basis when necessary. Under the Missouri Constitution, Article IV, Section 27(a), the Commissioner of Administration is allowed to transfer monies each year, as set by appropriations,[10] from the Budget Reserve Fund to the GR Fund, if necessary, to meet the cash requirements of the state, and must repay these transfers before May 16 of the same fiscal year. The Budget Reserve Fund is not allowed to exceed 7.5 percent of net general revenue collections[11] for the previous fiscal year.[12]

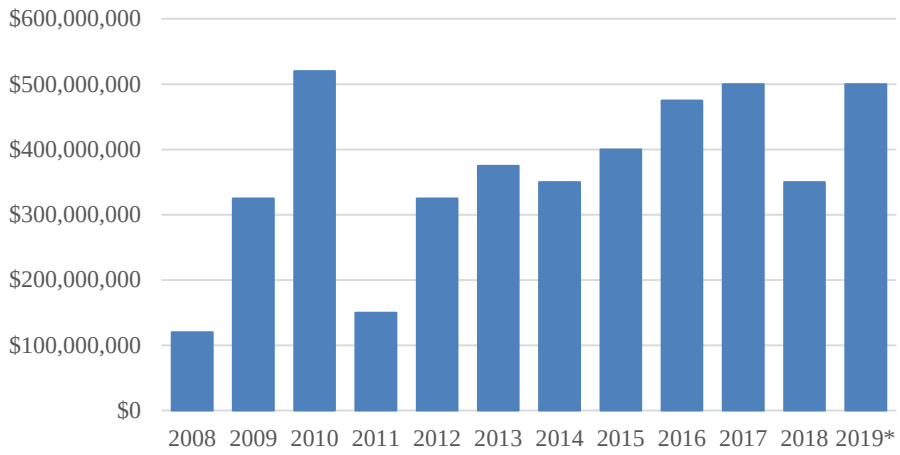
Borrowing from the Budget Reserve Fund has increased since the 2008 recession through fiscal year 2017. However, during fiscal year 2018, $350 million was borrowed compared to $500 million borrowed during fiscal year 2017. For fiscal year 2019, $500 million has been borrowed from the Budget Reserve Fund through March. Figure 2.2 shows the amounts borrowed from budget reserve, by fiscal year.

[10] For fiscal year 2018, the General Assembly appropriated $500 million for Budget Reserve Fund expenditures.

[11] Net general revenue collections are all revenues deposited into the GR Fund less refunds and revenues designated by law for a specific distribution or transfer to another state fund.

[12] At the end of any fiscal year any Budget Reserve Fund balance exceeding 7.5 percent of the general revenue collections must be transferred to the GR Fund as required by the Missouri Constitution, unless the legislature directly appropriates a higher amount in the Budget Reserve Fund (except the balance in the fund at year-end cannot exceed 10 percent of general revenue collections). Such appropriation was not made; therefore, the maximum amount the Budget Reserve Fund could have been at June 30, 2018, was approximately $677 million (7.5 percent of the $9.02 billion net general revenue collections in fiscal year 2017). The actual fund balance was approximately $616 million.

Figure 2.2: Amounts borrowed from Budget Reserve Fund, 2008-2019, by fiscal year



* Fiscal year 2019 includes activity from July through March.

Source: Office of Administration records

The reasons for the fluctuations in fund balance of the GR Fund and causes of the cash flow shortage are beyond the scope of this report. However, previous audit reports[13] address various issues related to reductions to the state's tax base and reductions to tax revenues, and growth in spending in certain areas.

Conclusion

Improved availability of cash reserves in the GR Fund during fiscal year 2018 allowed the state to improve the timeliness of individual income tax refunds and reduce borrowing from the Budget Reserve Fund as compared to 2017. While cash flow improved for 2018, available cash levels still remain low by historical standards and have necessitated borrowing from the Budget Reserve Fund for operational purposes. The cash available to pay state obligations, including income tax refunds, is reliant upon the budget process. State policymakers must continue to address this issue to ensure all state obligations, including tax refunds, are being paid timely.

Recommendation

The General Assembly take action to continue to improve the cash reserves available in the GR Fund.

Auditee's Response

Due to this recommendation being legislative in nature, no management response can be obtained.

[13] Report No. 2017-113, *Cost of Tax Incentives and Exemptions*, issued in October 2017; Report No. 2017-051, *Tax Credit Programs*, issued in June 2017; Report No. 2017-018, *Statewide Single Audit*, issued in March 2017; Report No. 2017-098, State Legal Expense Fund, issue September 2017; and Report No. 2017-099, Legal Expense Fund Letter, issued September 2017.

3. Refunds Are Not Paid in the Order Processed

State law does not specify that income tax refunds must be paid in the order in which they are received or processed. As a result, the DOR has established a priority system for paying individual income tax refunds. The same priority system in place in 2017 was still in use in 2018; however, DOR officials stated they made changes to the Priority 1 designation to help improve the timeliness of refunds.

The DOR's tax system groups individual income tax refunds by return type and assigns each a priority category in the DOR's tax system. Refunds are typically paid based on the following priorities:

- Priority 1: Expedited Refunds - These are refunds the DOR has moved to this priority from a lower priority to expedite payment. Based on DOR's interpretation of case law,[14] department officials did not grant us access to personally identifiable taxpayer information; therefore, we could not determine which taxpayers had their refunds moved to Priority 1 to expedite payment.

  Our prior audit report noted the DOR's practice had been to move large dollar refunds to Priority 1 in an effort to reduce the amount of interest the state would have to pay. However, according to department officials, during fiscal year 2018 this practice ended. During fiscal year 2017, approximately 16,700 refunds were issued as Priority 1; however, in fiscal year 2018, the department issued only 550 refunds as Priority 1.

- Priority 2: Debt Offset Refunds - These are refunds for debt owed by taxpayers to the DOR, Internal Revenue Service, other Missouri state agencies, and other states with reciprocal offset agreements.

- Priority 3: Property Tax Credit Refunds - Individuals over age 65 and individuals who are disabled, if they are under certain income thresholds, can receive a property tax credit on their state income tax returns.

- Priority 4: Electronically-filed and 2D Barcode Returns with Refunds - The 2D barcode returns are paper returns printed from an electronic tax return file. They contain barcodes that can be scanned into the DOR computerized system and do not have to be manually processed. In fiscal year 2018 and 2017, electronically-filed and 2D barcode returns accounted for approximately 95 percent and 94 percent,[15] respectively, of all the individual income tax returns filed.

- Priority 5: Current Year Paper Returns with Refunds - These returns must be manually processed by the DOR.

[14] Missouri Supreme Court decision in the case of *Director of Revenue v. State Auditor* 511 S.W.2d 779 (Mo. 1974).

[15] The fiscal year 2017 percentage has been restated from our prior audit report.

- Priority 6: Miscellaneous Refunds - Miscellaneous refunds include refunds from prior year returns, amended returns, and current returns that require adjustments to be made in the tax system by DOR personnel. These refunds must be manually reviewed and then moved to a higher priority.

- Priority 7: Temporary Hold to Check for First-time Filers - These are returns in which the taxpayer has requested the refund be direct deposited. These refunds are held here for one day to determine if the taxpayer is a first-time filer. If the taxpayer is a first-time filer, the system changes the refund from direct deposit to a paper check. This process was put into place by the DOR at the beginning of the 2016 filing season to help prevent refund fraud. If the taxpayer is not a first-time filer, the return is automatically moved back to the priority where it normally would have been placed.

- Priority 8: Fraud Refunds Not Issued - These are refunds that have been flagged as possible fraud based on various information received or not received from the taxpayer. They are held until DOR personnel can manually review the refunds. If they are determined to not be fraudulent, the refunds are assigned a higher priority.

- Priority 9: Amnesty Accounts - These refunds must be manually reviewed and then moved to a higher priority. Amnesty accounts are for taxpayers with delinquent tax balances that will have the interest and penalties waived if the delinquent taxes are paid by an established date determined by the DOR.

Refunds are paid in the order they are received within each priority. Each day refunds are typically paid starting with the highest priority category and continuing until the amount allocated by the OA for tax refunds have been expended that day (see MAR finding number 2 for more information about how the OA determines how much money to allocate each day). During periods with cash flow restrictions, there is not enough money allocated each day to pay out all the priority categories.

The tax system prevents DOR personnel from paying only select refunds within a priority; therefore, with management approval, select returns can be moved to the highest priority to expedite a refund. In November 2018, the DOR implemented a new tax system with the capability to pay select refunds within a priority; however, according to DOR officials, they will continue to use the same priority system to pay refunds and will continue, with management approval, to move select returns to the highest priority to expedite a refund.

Conclusion

With the DOR no longer moving large dollar refunds to Priority 1, this will result in smaller dollar refunds being paid more timely. However, the amount of interest due on large dollar refunds may increase if those refunds are

delayed. In addition, as a result of changes to Section 32.069, RSMo, beginning July 1, 2019, the interest rate the state has to pay on delayed refunds will increase. Therefore, the longer the large dollar refunds are delayed, the more interest the state will be required to pay. While requiring refunds to be paid in the order they are processed and approved for payment will likely result in increased interest costs to the state, doing so would also result in more equitable treatment of all taxpayers owed an income tax refund.

Recommendation

The General Assembly evaluate the DOR's refund priority levels for appropriateness.

Auditee's Response

Due to this recommendation being legislative in nature, no management response can be obtained.

4. Changes to State Withholding Tables

Changes made in 2018 to the state's individual income tax withholding tables to adjust for changes to the federal tax law and a reduction in state income tax rates have resulted in a significant reduction in revenues for individual income tax withholdings to the GR Fund during fiscal year 2019 (through January). Not only will the GR Fund experience a reduction in total individual income tax revenue, but the timing of the revenue to the fund has also been altered with increases in tax remittances and reductions in withholdings. The impact of these changes in cash flow on the timeliness of income tax refund issuance is uncertain.

With the 2018 changes to the withholding tables, along with the federal tax law and state income tax rate changes, taxpayers are likely to receive smaller tax refunds or have larger amounts owed for tax year 2018 than in previous years. However, due to a lack of communication by the DOR, taxpayers have not been well informed about the potential impact of these changes. Also, some decisions made by the former Director of the Department of Revenue when developing the withholding tables have led to confusion and a lack of confidence regarding the accuracy of the withholding tables and the impact of the tables on future withholdings. In addition, the current withholding formula has not been updated in state regulations as required by state law.

Changing of 2018 withholding tables

The state's individual income tax withholding tables for tax year 2018 were initially delayed due to the changes to the federal tax law that occurred in December 2017. The DOR adjusted the state's withholding tables for changes in the federal tax law and the updated tables were published in March 2018. In October 2018, at the direction of the former Director, the DOR issued new withholding tables to help increase withholdings in response to concerns about reduced withholding levels during 2018. These changes have led to confusion and a lack of confidence regarding the accuracy of the withholding tables and the impact those withholding tables may have on taxpayers as they file their 2018 tax returns. In addition, when additional revisions were made to the withholding tables in January 2019, the DOR chose to exclude an

adjustment to Missouri taxable income[16] that will impact a significant number of taxpayers, resulting in an over withholding for certain taxpayers with a federal income tax liability and Missouri adjusted gross income under $125,000. DOR officials stated the exclusion of this adjustment from the 2019 withholding calculation was made in an effort to simplify the calculation, and because including the adjustment did not significantly impact individual taxpayer withholdings. Based on our analysis of 2017 individual income tax return data from the DOR, an estimated 53 percent of the returns will be impacted by this adjustment, and will result in an estimated $62.9 million (1.2 percent[17]) increase in total withholdings for calendar year 2019. Since these changes were implemented in January 2019 they should offset some portion of the reduced withholdings from the first half of fiscal year 2019.

The director of the Department of Revenue, through the department, is responsible for providing guidance to taxpayers regarding withholdings, including updating the tax tables. Although the DOR is not required to publish regulations for most tax policy guidance, state law requires the withholding calculation be published in the Code of State Regulations (CSR). See page 17 for additional discussion. The director and the administration are responsible for providing this guidance and informing taxpayers of any changes.

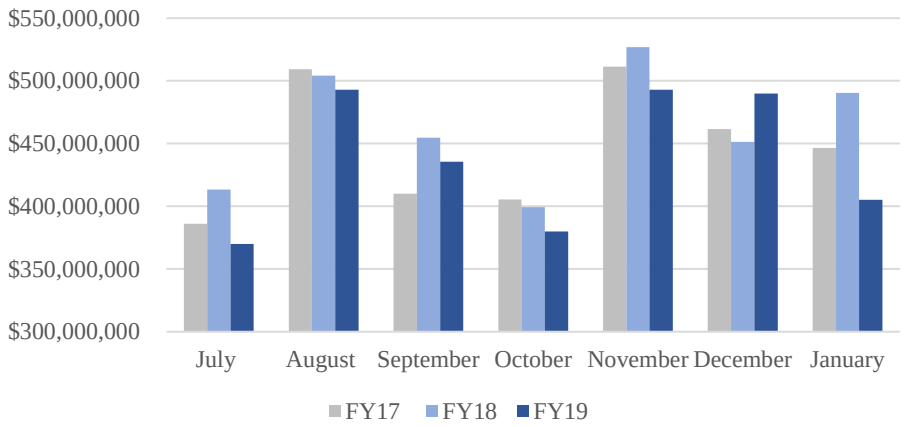
Impact on timeliness of income tax refunds

The impact of the changes to the withholding tables on the timeliness of income tax refunds is uncertain. Current consensus revenue estimates from the OA Division of Budget and Planning are projecting a reduction in state withholdings of approximately $275 million (4.8 percent) for fiscal year 2019 compared to fiscal year 2018. See Figure 4.1 for the comparison of actual income tax withholding revenues between July and January, for fiscal years 2017, 2018, and 2019.

[16] Section 143.171.2, RSMo, provides for a deduction equal to a percentage of a taxpayer's federal income tax liability on the Missouri individual income tax return. The maximum deduction percentage is 35 percent for individuals with Missouri adjusted gross income under $25,000. The deductible percentage declines as the Missouri adjusted gross income increases, and is fully phased out for individuals with Missouri adjusted gross income exceeding $125,000.

[17] This estimated percentage was calculated using the estimated total withholding revenue for fiscal year 2019 of $5.46 billion projected by the OA Division of Budget and Planning.

Figure 4.1: Individual income tax withholding amounts collected from July to January, for fiscal year 2017-2019



Source: Office of Administration records

However, the OA Division of Budget and Planning projects an increase in individual income tax remittances[18] that will help offset the significant reduction in withholding revenue. The combined decrease in withholdings and the increase in remittances is still estimated to result in a decrease in overall individual income tax revenue of approximately $109 million (1.4 percent) in fiscal year 2019 compared to fiscal year 2018 if the state meets its consensus revenue estimate. Because income tax withholdings occur on an even basis throughout the year, and remittances occur later in the fiscal year, the withholding table changes will have a negative impact on state cash flow.

According to OA Division of Budget and Planning estimates, the amount of individual income tax refunds the state will need to pay is projected to decrease $232 million (20.5 percent) in fiscal year 2019. The reduced amount of refunds to be paid will reduce necessary expenses, however, the changes in cash flow to the state still result in uncertainty about the state's ability to timely pay 2019 income tax refunds, and other obligations. Any level of revenue short of the current revenue estimates will likely necessitate additional borrowing from the Budget Reserve Fund or negatively impact the timeliness of income tax refunds in 2019.

Impact to taxpayers

Changes to the federal tax law, reduction in the state income tax rates, and changes to the state's withholding tables are expected to result in changes for many taxpayers in either smaller tax refunds or larger amounts owed for tax year 2018 compared to previous years. The DOR and the administration did not make sufficient efforts to inform individual taxpayers of the potential impact these changes may have on their 2018 tax returns. DOR officials stated they mailed flyers and sent emails to employers and contacted payroll

[18] Tax remittances, which are payments of taxes that are not withholdings and are not estimated quarterly payments, are expected to increase $134 million (15.4 percent) in fiscal year 2019.

agencies by telephone. However, notifications to individual taxpayers consisted only of social media posts that reached minimal taxpayers.

Timely notification to taxpayers of the potential impacts of the changes to the withholding tables would have allowed taxpayers to make adjustments to their withholding preferences prior to the end of the tax year and would have potentially alleviated concerns currently being faced by some taxpayers.

State regulation for withholdings not updated

The January 2019 withholding table calculation is not consistent with the state regulations, as required by state law. Section 143.191.3(1), RSMo, states, in part, "the method of determining the amount to be withheld shall be prescribed by regulations of the director of revenue." Currently, 12 CSR 10-2.015(20) states regarding the withholding formula: "The formula is mathematically stated as gross income minus standard deduction, minus personal and dependent exemptions, minus federal income tax withheld equals taxable income. Taxable income multiplied by the rate equals Missouri withholding." Based on our review of the January 2019 withholding table and related calculations, the current withholding tables and formula are inconsistent with the current regulation.

Amending the withholding formula regulation through the rulemaking process mandated by Chapter 536, RSMo, is necessary to inform the General Assembly of any changes in the rules through notice to the Joint Committee on Rules. This process also allows for notice and comment to the general public for input on the rules. In the event the rulemaking process could not be timely completed, the department has the ability to publish a temporary emergency rule as provided by Section 536.025, RSMo.

Conclusion

Changes to the state's withholding tables in 2018, along with a reduction in state income tax rates, have significantly decreased revenues from individual income tax withholdings during fiscal year 2019. In addition to negatively impacting taxpayers' 2018 tax return, the changes to the withholding tables are expected to have a negative impact on cash flow to the state, and could potentially have a negative impact on the timeliness of income tax refund issuance in 2019. In addition, the multiple changes to the withholding tables, and the lack of communication by the DOR to taxpayers regarding the potential impact of those changes, have led to confusion and a lack of confidence regarding the accuracy of the withholding tables.

Recommendation

The DOR continue to monitor the impact of the withholding table changes on the timeliness of income tax refunds, and take steps to inform taxpayers of the potential impact of changes made to the state's withholding tables and inform taxpayers of the steps necessary to make any changes to their withholding preferences going forward. The DOR should also update the state regulation to ensure consistency with any changes to the withholding tax calculation.

Auditee's Response

The DOR's written response is included in the Appendix.

Robyn Vogt, CPA
Audit Manager
Missouri State Auditor's Office
HSTOB, Room 880
Jefferson City, MO 65101

Dear Ms. Vogt:

Below please find the Missouri Department of Revenue's response to the Missouri State Auditor's report on Timeliness of Tax Refund Issuance.

Changes to State Withholding Tables

Recommendation – The DOR continue to monitor the impact of the withholding table changes on the timeliness of income tax refunds, and take steps to inform taxpayers of the potential impact of changes made to the state's withholding tables and inform taxpayers of the steps necessary to make any changes to their withholding preferences going forward. The DOR should also update the state regulation to ensure consistency with any changes to the withholding tax calculation.

DOR Response –The DOR will continue to monitor the impact of the withholding table changes and will take steps to communicate with taxpayers. The DOR will begin work to update the state regulation.

If you have any questions, please contact Lynn Bexten at 751-7429, or Lynn.Bexten@dor.mo.gov.

Sincerely,

Joel Walters

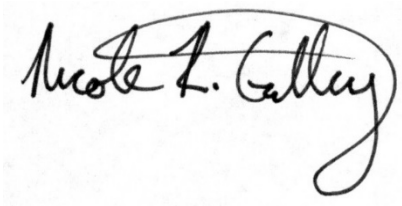
NICOLE GALLOWAY, CPA
Missouri State Auditor

Honorable Michael L. Parson, Governor
and
Members of the General Assembly
Jefferson City, Missouri

The primary objective of this compilation is to report the filing status for political subdivisions other than cities, towns, and villages, required to file a financial report, under Section 105.145, RSMo, and 15 CSR 40-3.030. Section 105.145, RSMo, provides that the State Auditor's Office notify the Department of Revenue if any political subdivision fails to timely submit a copy of its annual financial report. Because of different filing requirements, a separate report is issued for cities, towns, and villages.

The filing status for the 21 political subdivisions required to file a financial report by February 28, 2019, is presented in summary on page 3 and by individual entity in Appendix A. We have not audited the reports submitted and, accordingly, do not express an opinion or any other assurance on them.

This report also includes the updated filing status for political subdivisions, other than cities, towns, and villages, that filed a financial report in February 2019, after their filing deadline. The filing status for these 20 entities is presented in summary on page 3 and by individual entity in Appendix B-D.



Nicole R. Galloway, CPA
State Auditor

The following staff participated in the preparation of this report:

Director of Audits:	Jon Halwes, CPA, CGFM
General Counsel:	Paul Harper, JD
Senior Analyst:	Jill Wilson, MBA

Executive Summary

Section 105.145, RSMo, requires the governing body of each political subdivision in the state, except counties and school districts, to prepare and remit to the state auditor an annual report of financial transactions.

15 CSR 40-3.030 requires the financial report to be remitted to the state auditor within 6 months of the end of the political subdivision's fiscal year. The State Auditor's Office posts individual annual financial reports to its website. A searchable link is available at http://auditor.mo.gov.

Section 105.145, RSMo, requires the state auditor to notify the Department of Revenue if any political subdivision fails to timely submit a copy of its annual financial report. Any political subdivision that fails to timely submit the annual financial report shall be subject to a fine of $500 per day upon notice by the Department of Revenue, except transportation development districts with a gross revenues less than $5,000 in the fiscal year of the annual financial report.

This report includes the filing status for the 21 political subdivisions, other than cities, towns, and villages, with a fiscal year end of August 31, 2018. Cities, towns, and villages have additional filing requirements and their reporting status is included in a separate report. Of the 21 political subdivisions, 12 filed an annual financial report by February 28, 2019.

This report also includes the filing status for 20 political subdivisions, other than cities, towns, and villages, that filed their financial report in February 2019, after their filing deadline.

NICOLE GALLOWAY, CPA
Missouri State Auditor

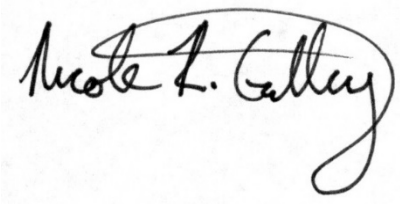
Honorable Michael L. Parson, Governor
and
Members of the General Assembly
Jefferson City, Missouri

The primary objective of this compilation is to report the filing status for the municipalities required to file a financial report by February 28, 2019, under Section 105.145, RSMo, and 15 CSR 40-3.030, and, when applicable, an addendum under Section 479.359, RSMo, and 15 CSR 40-3.170 and a municipal court certification under Section 479.360, RSMo, and 15 CSR 40-3.180.

Section 105.145, RSMo, provides that the State Auditor's Office (SAO) notify the Department of Revenue if any city, town, or village fails to timely submit a copy of its annual financial report. Additionally, Section 479.362, RSMo, provides that the SAO notify the Department of Revenue whether counties, cities, towns, and villages have timely filed under Sections 479.359 and 479.360, RSMo. Because of different filing requirements, a separate report is issued for all other political subdivisions required to file a financial report.

The filing status for 6 cities, 1 town, and 4 villages is presented in summary on page 3 and by individual entity in Appendix A. This compilation is limited to presenting information submitted to our office. We have not audited the information submitted and, accordingly, do not express an opinion or any other form of assurance on it.

This report includes the updated filing status for municipalities that filed at least one of the items (financial report, addendum, or certification) in February 2019, after their filing deadline. The filing status for these 107 cities, 2 towns, and 12 villages is presented in summary on pages 4 and by individual entity in Appendixes B to F.



Nicole R. Galloway, CPA
State Auditor

The following staff participated in the preparation of this report:

Director of Audits:	Jon Halwes, CPA, CGFM
General Counsel:	Paul Harper, JD
Senior Analyst:	Jill Wilson, MBA

Executive Summary

Section 105.145, RSMo, requires the governing body of each political subdivision, except counties and school districts, in the state to prepare and remit to the state auditor an annual report of financial transactions. 15 CSR 40-3.030 requires the financial report to be remitted to the state auditor within 6 months of the end of the political subdivision's fiscal year. The State Auditor's Office (SAO) posts individual annual financial reports to its website. A searchable link is available at http://auditor.mo.gov.

Section 105.145, RSMo, requires the state auditor to notify the Department of Revenue if any political subdivision fails to timely submit a copy of its annual financial report. Any political subdivision that fails to timely submit the annual financial report shall be subject to a fine of $500 per day upon notice by the Department of Revenue, except transportation development districts with a gross revenues less than $5,000 in the fiscal year of the annual financial report.

Section 479.359.1, RSMo, requires every county, city, town, and village to annually calculate the percentage of its annual general operating revenue received from fines, bond forfeitures, and court costs for minor traffic violations.

Section 479.359.3, RSMo, provides that all entities having a municipal court file an addendum to the annual financial report containing items listed in 15 CSR 40-3.170, which also provides the procedures to file an addendum.

Section 479.360, RSMo, requires every county, city, town, and village that has a municipal court to file, with its annual financial report, a certification of substantial compliance with 10 municipal court procedures. This certification must be signed by the municipal court judge. 15 CSR 40-3.180 provides the procedure to file the municipal court certification. Any county, city, town, or village that does not have a municipal court judge is not required to file a certification.

Section 479.362, RSMo, requires that the SAO notify the Department of Revenue whether counties, cities, towns, or villages have timely filed their addendums under Section 479.359 and certificates of substantial compliance under Section 479.360, RSMo. Section 479.368, RSMo, provides penalties for counties, cities, towns, and villages that fail to file, including loss of revenue and mandatory ballot measure to dissolve the political subdivision.

This report includes the filing status for the 6 cities, 1 town, and 4 villages with a fiscal year end of August 31, 2018, whose financial reports, addendums, or certifications were due by February 28, 2019. Of the 11 municipalities required to file an annual financial report, 5 filed the report timely. Of the 8 municipalities required to file an addendum, 2 filed an addendum timely. Of the 4 municipalities required to file a certification, 2 filed a certification timely.

This report includes the filing status for 107 cities, 2 towns, and 12 villages that filed at least one of the items (financial report, addendum, or certification) in February 2019, after their filing deadline. Of these entities, 32 filed an annual financial report, 79 filed an addendum, and 38 filed a certification.

C Law Enforcement Agencies Not Filing a 2018 ACA Form - Equitable Sharing Agreement and Certification 13

NICOLE GALLOWAY, CPA
Missouri State Auditor

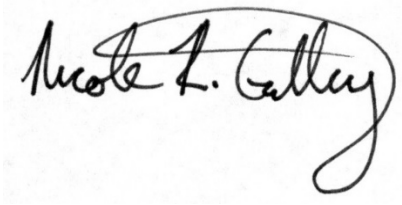
Honorable Michael L. Parson, Governor
and
Members of the General Assembly
Jefferson City, Missouri

Section 513.653.1, RSMo, requires law enforcement agencies involved in using the federal forfeiture system under federal law to file a copy of the federal form entitled "ACA Form - Equitable Sharing Agreement and Certification" regarding federal seizures and the proceeds therefrom to the State Auditor's Office. Although Section 513.653.1, RSMo, only requires my office to receive these reports, we compiled the information the law enforcement agencies filed with us. We have not audited the forms submitted and, accordingly, do not express an opinion or any other form of assurance on them, including whether or not an agency is in compliance with the statute. The primary objectives of this compilation were to:

1. Identify the reporting status of law enforcement agencies.

2. Summarize the information reported.

Conclusions regarding compliance cannot be made for law enforcement agencies that did not submit a form.



Nicole R. Galloway, CPA
State Auditor

The following auditors participated in the preparation of this report:

Director of Audits: Kelly Davis, M.Acct., CPA, CFE
Senior Analyst: Jill Wilson, MBA

Compilation of 2018 Federal Forfeiture Reports
Executive Summary

Executive Summary

Section 513.653, RSMo, requires law enforcement agencies involved in using the federal forfeiture system under federal law to annually file a copy of the federal form entitled "ACA Form - Equitable Sharing Agreement and Certification" regarding federal seizures and the proceeds received therefrom with the State Auditor's Office (SAO) by February 15th for the previous calendar year. The law provides that the any law enforcement agency that intentionally or knowingly fails to comply with the reporting requirement shall be ineligible to receive state or federal funds that would otherwise be paid to such agency for law enforcement, safety, or criminal justice purposes.

The U.S. Departments of Justice and Treasury publication, *Guide to Equitable Sharing for State, Local, and Tribal Law Enforcement Agencies*, states "the Department of Justice and Department of Treasury Asset Forfeiture Programs are, first and foremost, law enforcement programs. They remove the tools of crime from criminal organizations, deprive wrongdoers of the proceeds of their crimes, recover property that may be used to compensate victims, and deter crime." Any state or local law enforcement agency that directly participates in an investigation or prosecution resulting in a federal forfeiture may request an equitable share of the net proceeds of the forfeiture. Equitably shared funds must be used for law enforcement purposes, except as noted in the publication, and must increase or supplement the resources of the receiving law enforcement agency. In addition to reporting requirements under state law, there are also various program mandated accounting, reporting, and audit requirements.

To determine the law enforcement agencies to notify of the required filing with the SAO, we requested information from the Missouri Department of Public Safety (DPS). The DPS compiled a list of law enforcement agencies using information from the Peace Officer Standards and Training (POST) program and the Justice Assistance Grants (JAG) distribution lists. The SAO notified the listed agencies of the requirement to submit a copy of the required form if the agencies participated in the federal forfeiture system. According to DPS personnel, the list does not represent a complete list of all agencies, but includes all agencies with commissioned officers or drug task forces receiving funding from the DPS.

There were 674 agencies on the DPS list provided to our office. An additional 2 agencies, not included on the list provided by DPS, filed reports with the SAO. Officials from 7 political subdivisions associated with agencies on the DPS list indicated those agencies were not in operation during 2018. Those agencies are identified on Appendix C. This report indicates agencies that filed copies of the form by February 28, 2019.

The following table summarizes these reports.

Reporting Status	Number	Percentage
Number of agencies reporting (Appendix A and B)	125	18.49
Number of agencies not reporting (Appendix C)	551	81.51
Total Possible Reports	676	100.00

A total of 125 agencies filed a copy of the federal form with the SAO. These agencies are identified on Appendixes A and B.

Of the 674 agencies included in the list provided by DPS, 551 did not provide a copy of the form. Agencies were not required to provide a copy of the form if they did not participate in the federal forfeiture system. These agencies are identified on Appendix C.

Conclusions regarding compliance cannot be made for non-reporting agencies. This compilation work is not an audit and, as such, no verification was performed as to whether these agencies did or did not participate in the federal forfeiture system.

A Officials from the political subdivision reported this law enforcement agency did not operate in 2018.

* The law requires filing if an agency participates in the federal forfeiture system. If these agencies did not participate, the lack of filing a report does not constitute noncompliance.

Office of Missouri State Auditor

Nicole Galloway, CPA

State of Missouri
Single Audit
Year Ended June 30, 2018

Report No. 2019-021
March 2019

auditor.mo.gov

Nicole Galloway, CPA
Missouri State Auditor

CITIZENS SUMMARY

Findings in the Fiscal Year 2018 Statewide Single Audit

Background

A single audit requires an audit of the state's financial statements and expenditures of federal awards. The state spent approximately $12.5 billion in federal awards through 302 different federal programs during the fiscal year ended June 30, 2018. Our Single Audit involved audit work on 15 major federal programs administered by 8 state agencies, with expenditures totaling approximately $9.8 billion. The audit reported 3 financial statement findings and 15 federal award findings, and related recommendations. The federal award findings related to 9 major federal programs at 4 state agencies. Of these audit findings, 6 have been repeated from prior Single Audits for 2 to 8 years. Several of these findings are summarized below.

Department of Revenue Financial Reporting Controls

The Department of Revenue did not have adequate controls and procedures over financial reporting of sales and use tax accounts receivables following the implementation of a new computerized system in September 2017. As a result, sales and use tax accounts receivable data submitted to the Office of Administration - Division of Accounting (DOA) for inclusion in the state's financial statements for the year ended June 30, 2018, was misstated. In addition, the data was not submitted to the DOA timely.

Adoption Assistance Eligibility

As noted in the four previous audits of the Adoption Assistance program, the Department of Social Services (DSS) controls over eligibility are not sufficient to prevent and/or detect payments made on behalf of ineligible children. The DSS - Children's Division made payments on behalf of 8 ineligible children and could not provide documentation to demonstrate that another child met the various program eligibility requirements. Total known questioned costs for these errors represent approximately 18 percent of payments reviewed.

Department of Social Services Public Assistance Cost Allocation Plan

DSS - Division of Finance and Administrative Services (DFAS) controls over cost allocation are not sufficient to ensure administrative costs are accurately allocated to various federal programs in accordance with the proposed public assistance cost allocation plan (PACAP), and the proposed PACAP did not include an estimated cost impact analysis as required by federal regulations.

Child Care Eligibility Case Reviews

The DSS did not ensure monthly supervisory case reviews were completed as required for Family Support Division (FSD) eligibility specialists who perform eligibility determinations of households participating in the Child Care Development Fund (Child Care) subsidy program.

Child Care Payments

As noted in our prior eight audit reports, DSS controls over Child Care subsidy provider payments are not sufficient to prevent and/or detect improper payments to child care providers. Documentation was not adequate to support payments for 9 of 60 cases reviewed (15 percent).

Child Care Provider Monitoring

As noted in our prior two audit reports, the DSS's procedures to follow up on provider noncompliance identified during Child Care Review Team reviews were not sufficient.

Foster Care Case Management Contract Payment Reviews	The DSS - DFAS has not established adequate internal controls to ensure certain Foster Care assistance payments to contractors are allowable and adequately supported.
TANF Work Participation Sanctions	As noted in our five prior audits of the Temporary Assistance for Needy Families (TANF) program, the DSS-FSD did not have adequate controls to ensure TANF program recipients who failed to meet work participation requirements were sanctioned.
VOCA Subrecipient Monitoring	The DSS - DFAS did not perform monitoring reviews in accordance with its monitoring policy for the Crime Victims Assistance program, also known as the Victims of Crime Act (VOCA) program.
MO HealthNet Division Provider Eligibility	As noted in our prior two audit reports, the DSS did not establish effective internal controls over and did not fully implement federal revalidation requirements for providers participating in the Medical Assistance Program (Medicaid) and the Children's Health Insurance Program (CHIP). As of June 30, 2018, the DSS had not performed required revalidations for 48 percent of Medicaid and CHIP providers requiring revalidation.
Medicaid Developmental Disabilities Comprehensive Waiver Per Diem Rates	As noted in our prior three audit reports, the Department of Mental Health - Division of Developmental Disabilities (DD) continued to pay historical per diem rates to providers for residential habilitation services provided to participants of the Home and Community Based Services, Developmental Disabilities Comprehensive Waiver program. The DD did not retain documentation to support per diem rates, paid at historical rates, for 8 of the 37 individualized supported living habilitation service payments tested and 5 of the 15 group home habilitation service payments tested. The federal share of payments to providers for habilitation services provided to these 13 participants totaled $732,022 during state fiscal year 2018.
State Emergency Management Agency Subrecipient Monitoring, Audits and Awards	The State Emergency Management Agency (SEMA) did not perform all required subrecipient risk assessments, perform monitoring reviews in accordance with its monitoring policy, or monitor subrecipient compliance with cash management requirements for the Public Assistance (PA) program. In addition, the SEMA has not established adequate controls to follow up on subrecipient audit findings of the PA program or to ensure all required award information is communicated to the subrecipients.
MoDOT Project Closeouts and Final Vouchers	The Missouri Department of Transportation (MoDOT)'s procedures related to preparation and review of Highway Planning and Construction program project closeouts and final vouchers were not sufficient to ensure the proper reporting of total project costs. As a result, the MoDOT incorrectly reported the costs of 2 projects, causing a $19,432 overstatement of the federal share of costs for one project and an incorrect allocation of local entity matching funds for another project.

Because of the nature of this audit, no rating is provided.

State of Missouri - Single Audit
Introduction and Summary
Year Ended June 30, 2018

Introduction

The United States Congress passed the Single Audit Act Amendments of 1996 to establish uniform requirements for audits of federal awards. The Office of Management and Budget (OMB) issued Title 2 U.S. *Code of Federal Regulations* Part 200, *Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards* (Uniform Guidance) to set forth uniform cost principles and audit requirements for federal awards to nonfederal entities and administrative requirements for all federal grants and cooperative agreements.

A single audit under the Uniform Guidance requires an audit of the state's financial statements and expenditures of federal awards. The audit is required to determine whether:

- The state's basic financial statements are presented fairly in all material respects in conformity with generally accepted accounting principles.
- The schedule of expenditures of federal awards is stated fairly in all material respects in relation to the financial statements as a whole.
- The state has adequate internal controls to ensure compliance with federal award requirements.
- The state has complied with federal statutes, regulations, and the terms and conditions of federal awards that could have a direct and material effect on each of its major federal programs.
- The summary schedule of prior audit findings prepared by the state materially represents the status of the prior audit findings.

The Single Audit report includes the federal awards expended by all state agencies that are part of the primary government. The report does not include the public universities and other component units, which are legally separate from the state and audited by other auditors. The state expended approximately $12.5 billion in federal awards during the state fiscal year ended June 30, 2018.

Summary of Single Audit Results

The following is the summary of our Single Audit results for the state fiscal year ended June 30, 2018.

Financial Statements

We issued our audit report (Report No. 2019-003[1]) of the state's Comprehensive Annual Financial Report (CAFR), as of and for the year ended June 30, 2018, on January 24, 2019. The state's financial statements covered approximately $43 billion in total assets and approximately $27 billion in total expenses for state fiscal year 2018. Our report expressed qualified opinions on the governmental activities and the General Fund because we were not allowed access to tax returns and related source documents for income taxes. Our report expressed unmodified opinions on all remaining opinion units.

We reported three findings related to internal control deficiencies. These findings were at the Department of Revenue, the Department of Corrections, and the Department of Social Services. We consider these findings to be significant deficiencies. The state agencies' responses to the findings are included in this report. The agencies prepared a Corrective Action Plan (CAP) for each finding. The CAPs were submitted to the Office of Administration (OA) and are in the Corrective Action Plans section of this report.

Federal Awards

We issued our report on the accompanying Schedule of Expenditures of Federal Awards (SEFA). The state's SEFA, which does not include federal award expenditures of the public universities and other component units, reported the state expended approximately $12.5 billion in federal funds in state fiscal year 2018. Our report expressed the opinion that the SEFA is fairly stated, in all material respects, in relation to the basic financial statements as a whole.

We audited 15 major federal programs with expenditures totaling approximately $9.8 billion, administered by 8 state agencies.

We issued a qualified opinion on 3 major federal programs and an unmodified opinion on 12 major federal programs. A qualified opinion is issued when the audit of a major federal program detects material noncompliance with direct and material compliance requirements. A qualified opinion was issued on the following major programs administered by the Department of Social Services:

Adoption Assistance
Children's Health Insurance Program
Medicaid Cluster

[1] Available on the Missouri State Auditor's Office website: <http://auditor.mo.gov>.

In total, we reported 15 audit findings related to 9 major federal programs at 4 state agencies. We identified over $780,000 in known questioned costs related to federal awards. Of the 15 audit findings, 6 were repeated from prior Single Audits. These findings have been repeated for 2 to 8 years.

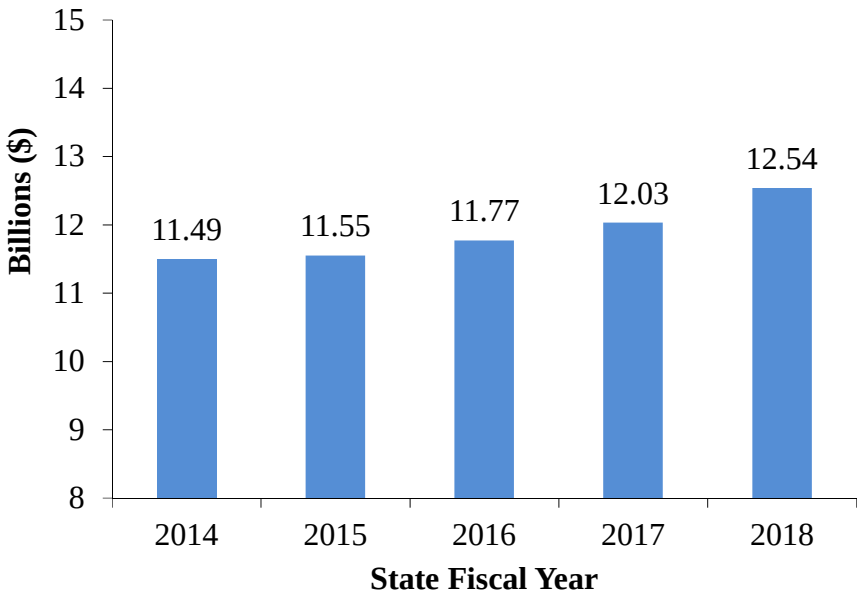
Of the 15 federal award audit findings, 14 related to internal control deficiencies. We consider 2 findings of internal control deficiencies to be material weaknesses and 12 to be significant deficiencies.

The state agencies' responses to the audit findings are included in this report. The state agencies prepared a CAP for each audit finding and submitted them to the OA. They are presented in the Corrective Action Plans section of this report.

In addition, the state agencies prepared and submitted to the OA the status of the prior audit findings. They are presented in the Summary Schedule of Prior Audit Findings section of this report.

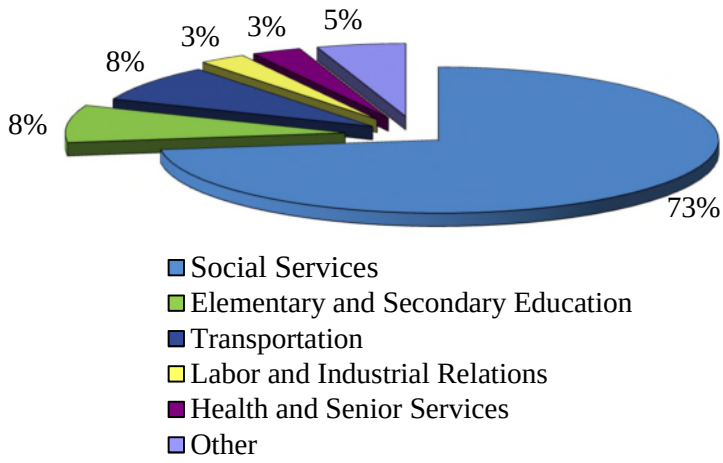
Expenditures of federal awards have increased each year over the past 5 years.

Total Expenditures of Federal Awards
5 Year Comparison



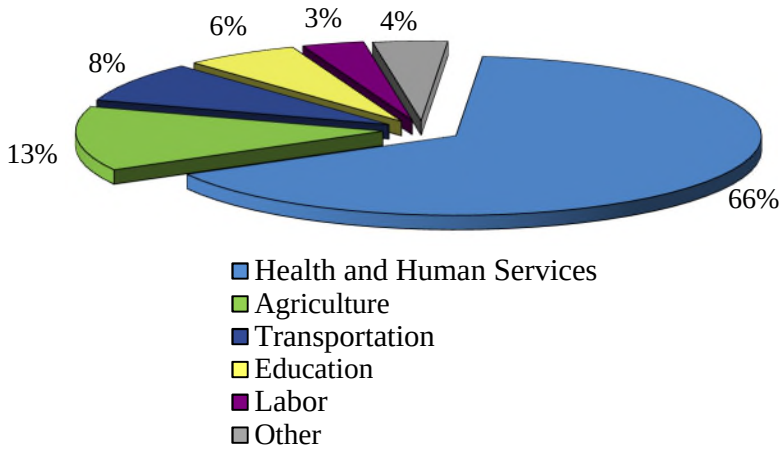
Of the 20 state agencies and other state offices that expended federal awards, 5 state agencies spent the majority of the awards (95 percent) during state fiscal year 2018.

Expenditures of Federal Awards by State Agency



The state expended federal awards received from 23 different federal agencies. Most of the federal award expenditures (96 percent) were from programs of 5 federal agencies.

Expenditures of Federal Awards by Federal Agency

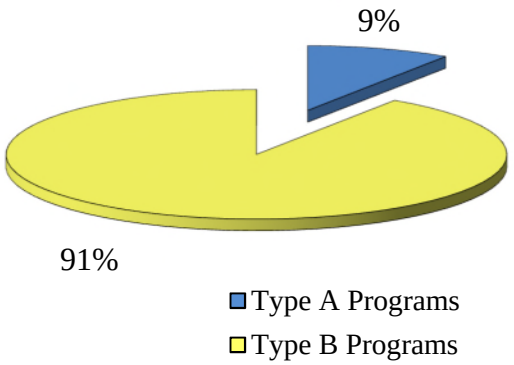


Overall, the state expended federal awards in 302 different programs. These programs are listed in the accompanying Schedule of Expenditures of Federal Awards.

The Uniform Guidance requires federal programs to be labeled Type A programs or Type B programs based on a dollar threshold. For the state of Missouri, the Uniform Guidance defines the dollar threshold as $30 million since the federal award expenditures exceeded $10 billion, but were less than or equal to $20 billion.

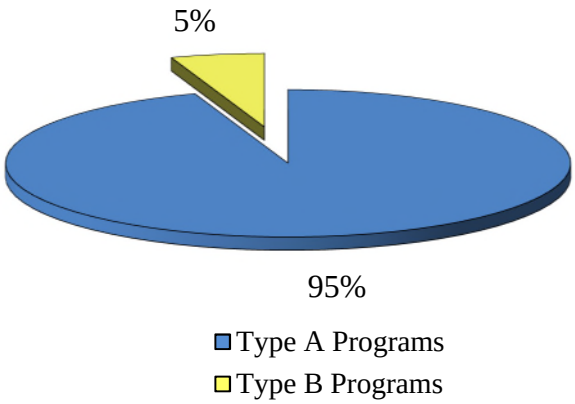
Programs with federal award expenditures over $30 million are Type A programs and programs with federal award expenditures under $30 million are Type B programs. Of the 302 federal award programs, 28 were Type A programs and 274 were Type B programs.

Type A and Type B Programs
Number of Programs



The 28 Type A programs had expenditures totaling approximately $11.9 billion, or 95 percent of total expenditures. The 274 Type B programs had expenditures totaling approximately $671 million, or 5 percent of total expenditures.

Type A and Type B Programs
Expenditures of Federal Awards



The Uniform Guidance requires the auditor to perform risk assessments on Type A programs and to audit as major each Type A program assessed as high risk based on specified risk factors. We performed a risk assessment on each Type A program and determined 14 of the 28 Type A programs were low risk and did not need to be audited as major. In accordance with the Uniform Guidance, we audited as major the 14 Type A programs assessed as high risk.

The Uniform Guidance also requires the auditor to perform risk assessments on larger Type B programs to determine which are high risk and need to be audited as major. The dollar threshold to determine the larger Type B programs is 25 percent of the Type A threshold, or $7.5 million. We performed risk assessments on the 22 larger Type B programs and determined 1 program was high risk. In accordance with the Uniform Guidance, we audited the program as major.

The programs audited as major are listed in the summary of auditor's results section of the accompanying Schedule of Findings and Questioned Costs. We audited 78 percent of total state fiscal year 2018 federal expenditures.

Major and Non-major Federal Programs

Type of Programs	Number of Programs		Expenditures	Percentage of Expenditures
Programs Audited				
Type A major programs	14	$	9,811,504,354	
Type B major programs	1		8,972,135	
Total major programs	15		9,820,476,489	78%
Programs not Audited				
Type A non-major programs	14		2,053,150,978	
Type B non-major programs	273		661,794,175	
Total non-major programs	287		2,714,945,153	22%
Total programs	302	$	12,535,421,642	100%

Correspondence with State Agencies

The Department of Revenue's delays in preparing and submitting to the OA, the Accounts Receivable survey form for various funds (as discussed in finding number 2018-001) led to delays in completing the CAFR audit. See Appendix for a copy of the letter to the OA regarding these delays.

INDEPENDENT AUDITOR'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH *GOVERNMENT AUDITING STANDARDS*

Honorable Michael L. Parson, Governor
and
Members of the General Assembly

We have audited, in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the financial statements of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the state of Missouri, as of and for the year ended June 30, 2018, and the related notes to the financial statements, which collectively comprise the state's basic financial statements, and have issued our report thereon dated January 24, 2019. Our report expressed qualified opinions on the governmental activities and the General Fund, a major fund, because we were not allowed access to tax returns and related source documents for income taxes. Approximately 28 percent of governmental activity revenues and 33 percent of General Fund revenues are from this source. We were unable to satisfy ourselves by appropriate audit procedures as to the income tax revenue beyond the amounts recorded. Our report expressed unmodified opinions on all remaining opinion units.

Our report on the state of Missouri's financial statements includes a reference to other auditors who audited the financial statements of:

1. The Missouri Road Fund, a major fund; the Missouri Road Bond Fund; the Conservation Employees' Insurance Plan; the Transportation Self-Insurance Plan; the Missouri State Employees' Insurance Plan; the Missouri Consolidated Health Care Plan; and the Missouri Department of Transportation and Missouri State Highway Patrol Medical and Life Insurance Plan which represent 77 percent of the assets and 11 percent of the revenues of the governmental activities.

2. The State Lottery and the Petroleum Storage Tank Insurance Fund which are both major funds and represent 12 percent of the assets and 73 percent of the revenues of the business-type activities.

3. The aggregate discretely presented component units.

4. The pension (and other employee benefit) trust funds and the Missouri Department of Transportation agency funds which represent 93 percent of the assets and 97 percent of the additions of the fiduciary funds.

This report does not include the results of the other auditors' testing of internal control over financial reporting or compliance and other matters that are reported on separately by those auditors.

The financial statements of the Conservation Employees' Insurance Plan, the Missouri State Employees' Insurance Plan and the Missouri Consolidated Health Care Plan, internal service funds; the Missouri Development Finance Board and the Missouri Agricultural and Small Business Development Authority, discretely presented component units; and the pension (and other employee benefit) trust funds were not audited in accordance with *Government Auditing Standards*, and accordingly, this report does not include reporting on internal control over financial reporting or instances of reportable noncompliance associated with these entities.

Internal Control Over Financial Reporting

In planning and performing our audit of the financial statements, we considered the state of Missouri's internal control over financial reporting (internal control) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the state's internal control. Accordingly, we do not express an opinion on the effectiveness of the state's internal control.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A *material weakness* is a deficiency, or a combination of deficiencies, in internal control such that there is a reasonable possibility that a material misstatement of the state's financial statements will not be prevented, or detected and corrected, on a timely basis. A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies and therefore, material weaknesses or significant deficiencies may exist that have not been identified. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. We did identify certain deficiencies in internal control, described in the accompanying Schedule of Findings and Questions Costs as finding numbers 2018-001 through 2018-003 that we consider to be significant deficiencies.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the state of Missouri's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards.*

State's Responses to Findings

The state of Missouri's responses to the findings identified in our audit are described in the accompanying Schedule of Findings and Questioned Costs and the state's Corrective Action Plans. The

state's responses were not subjected to the audit procedures applied in the audit of the financial statements and, accordingly, we express no opinion on the responses.

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the entity's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the entity's internal control and compliance. Accordingly, this communication is not suitable for any other purpose. However, pursuant to Section 29.200, RSMo, this report is a matter of public record and its distribution is not limited.

INDEPENDENT AUDITOR'S REPORT ON COMPLIANCE FOR EACH MAJOR FEDERAL PROGRAM AND ON INTERNAL CONTROL OVER COMPLIANCE REQUIRED BY THE UNIFORM GUIDANCE

Honorable Michael L. Parson, Governor
and
Members of the General Assembly

Report on Compliance for Each Major Federal Program

We have audited the state of Missouri's compliance with the types of compliance requirements described in the Office of Management and Budget (OMB) *Compliance Supplement* that could have a direct and material effect on each of the state's major federal programs for the year ended June 30, 2018. The state of Missouri's major federal programs are identified in the summary of auditor's results section of the accompanying Schedule of Findings and Questioned Costs.

The state of Missouri's basic financial statements include the operations of the public universities and other component units, which may have expended federal awards, and which are not included in the state's Schedule of Expenditures of Federal Awards during the year ended June 30, 2018. Our audit, described below, did not include the operations of these component units because federal awards administered by the component units are the subject of audits completed by other auditors, if required.

Management's Responsibility

Management is responsible for compliance with federal statutes, regulations, and the terms and conditions of its federal awards applicable to its federal programs.

Auditor's Responsibility

Our responsibility is to express an opinion on compliance for each of the state of Missouri's major federal programs based on our audit of the types of compliance requirements referred to above. We conducted our audit of compliance in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States; and the audit requirements of Title 2 U.S. *Code of Federal Regulations* Part 200, *Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards* (Uniform Guidance). Those standards and the Uniform Guidance require that we plan and perform the audit to obtain reasonable assurance about whether noncompliance with the types of compliance requirements referred to above that could have a direct and material effect on a major federal program occurred. An audit includes examining, on a test basis, evidence about the state's compliance with those requirements and performing such other procedures as we considered necessary in the circumstances.

We believe that our audit provides a reasonable basis for our qualified and unmodified opinions on compliance for each major federal program. However, our audit does not provide a legal determination of the state's compliance.

Basis for Qualified Opinion on Certain Major Federal Programs

As described in the accompanying Schedule of Findings and Questioned Costs, the state of Missouri did not comply with requirements regarding the following:

Finding Number	CFDA Number(s)	Program (or Cluster) Name	Compliance Requirement(s)
2018-004	93.659	Adoption Assistance	Activities Allowed or Unallowed, Allowable Costs/Cost Principles, and Eligibility
2018-013	93.767 93.775 93.777 93.778	Children's Health Insurance Program and Medicaid Cluster	Activities Allowed or Unallowed, Allowable Costs/Cost Principles, and Special Tests and Provisions

Compliance with such requirements is necessary, in our opinion, for the state of Missouri to comply with the requirements applicable to these programs.

Qualified Opinion on Certain Major Federal Programs

In our opinion, except for the noncompliance described in the "Basis for Qualified Opinion" paragraph, the state of Missouri complied, in all material respects, with the types of compliance requirements referred to above that could have a direct and material effect on the Adoption Assistance program, the Children's Health Insurance Program, and the Medicaid Cluster for the year ended June 30, 2018.

Unmodified Opinion on Each of the Other Major Federal Programs

In our opinion, the state of Missouri complied, in all material respects, with the types of compliance requirements referred to above that could have a direct and material effect on each of its other major federal programs identified in the summary of auditor's results section of the accompanying Schedule of Findings and Questioned Costs for the year ended June 30, 2018.

Other Matters

The results of our auditing procedures disclosed other instances of noncompliance that are required to be reported in accordance with the Uniform Guidance and that are described in the accompanying Schedule of Findings and Questioned Costs as finding numbers 2018-005, 2018-007, 2018-009 through 2018-011, and 2018-014 through 2018-018. Our opinion on each major federal program is not modified with respect to these matters.

The state of Missouri's responses to the noncompliance findings identified in our audit are described in the accompanying Schedule of Findings and Questioned Costs and the state's Corrective Action Plans. The state's responses were not subjected to the auditing procedures applied in the audit of compliance and, accordingly, we express no opinion on the responses.

Report on Internal Control Over Compliance

Management of the state of Missouri is responsible for establishing and maintaining effective internal control over compliance with the types of compliance requirements referred to above. In planning

and performing our audit of compliance, we considered the state's internal control over compliance with the types of requirements that could have a direct and material effect on each major federal program to determine the auditing procedures that are appropriate in the circumstances for the purpose of expressing an opinion on compliance for each major federal program and to test and report on internal control over compliance in accordance with the Uniform Guidance, but not for the purpose of expressing an opinion on the effectiveness of internal control over compliance. Accordingly, we do not express an opinion on the effectiveness of the state's internal control over compliance.

Our consideration of internal control over compliance was for the limited purpose described in the preceding paragraph and was not designed to identify all deficiencies in internal control over compliance that might be material weaknesses or significant deficiencies and therefore, material weaknesses or significant deficiencies may exist that were not identified. However, as discussed below, we identified certain deficiencies in internal control over compliance that we consider to be material weaknesses and significant deficiencies.

A *deficiency in internal control over compliance* exists when the design or operation of a control over compliance does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, noncompliance with a type of compliance requirement of a federal program on a timely basis. A *material weakness in internal control over compliance* is a deficiency, or combination of deficiencies, in internal control over compliance, such that there is reasonable possibility that material noncompliance with a type of compliance requirement of a federal program will not be prevented, or detected and corrected, on a timely basis. We consider the deficiencies in internal control over compliance described in the accompanying Schedule of Findings and Questioned Costs as finding numbers 2018-004 and 2018-013 to be material weaknesses.

A *significant deficiency in internal control over compliance* is a deficiency, or combination of deficiencies, in internal control over compliance with a type of compliance requirement of a federal program that is less severe than a material weakness in internal control over compliance, yet important enough to merit attention by those charged with governance. We consider the deficiency in internal control over compliance described in the accompanying Schedule of Findings and Questioned Costs as finding numbers 2018-005 through 2018-012 and 2018-015 through 2018-018 to be a significant deficiencies.

The state of Missouri's responses to the internal control over compliance findings identified in our audit are described in the accompanying Schedule of Findings and Questioned Costs and the Corrective Action Plans. The state's responses were not subjected to the auditing procedures applied in the audit of compliance and, accordingly, we express no opinion on the responses.

The purpose of this report on internal control over compliance is solely to describe the scope of our testing of internal control over compliance and the results of that testing based on the requirements of the Uniform Guidance. Accordingly, this report is not suitable for any other purpose. However, pursuant to Section 29.200, RSMo, this report is a matter of public record and its distribution is not limited.

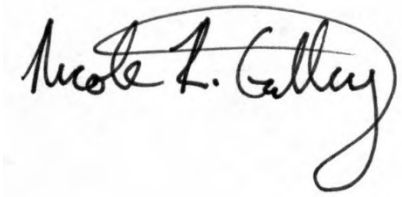
INDEPENDENT AUDITOR'S REPORT ON THE
SCHEDULE OF EXPENDITURES OF FEDERAL AWARDS
REQUIRED BY THE UNIFORM GUIDANCE

Honorable Michael L. Parson, Governor
and
Members of the General Assembly

We have audited the financial statements of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the state of Missouri, as of and for the year ended June 30, 2018, and the related notes to the financial statements, which collectively comprise the state's basic financial statements. We issued our report thereon dated January 24, 2019, which contained qualified opinions on the governmental activities and the General Fund, a major fund, because we were not allowed access to tax returns and related source documents for income taxes. Our report expressed unmodified opinions on all remaining opinion units.

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the state of Missouri's basic financial statements. The accompanying Schedule of Expenditures of Federal Awards is presented for purposes of additional analysis as required by Title 2 U.S. *Code of Federal Regulations* Part 200, *Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards* (Uniform Guidance), and is not a required part of the basic financial statements. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the basic financial statements. The information has been subjected to the audit procedures applied by us and the other auditors in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the Schedule of Expenditures of Federal Awards is fairly stated, in all material respects, in relation to the basic financial statements as a whole.

The purpose of this report is solely to provide an opinion on the Schedule of Expenditures of Federal Awards in relation to the basic financial statements as a whole based on the requirements of the Uniform Guidance. Accordingly, this report is not suitable for any other purpose. However, pursuant to Section 29.200, RSMo, this report is a matter of public record and its distribution is not limited.



Nicole R. Galloway, CPA
State Auditor

January 24, 2019

The accompanying Notes to the Schedule of Expenditures of Federal Awards are an integral part of this schedule.

State of Missouri - Single Audit
Notes to the Schedule of Expenditures of Federal Awards
Year Ended June 30, 2018

1. Significant Accounting Policies

The following is a summary of the significant accounting policies used by the State of Missouri.

A. Purpose of Schedule and Reporting Entity

The accompanying Schedule of Expenditures of Federal Awards (Schedule) of the State of Missouri is presented for purposes of additional analysis as required by Title 2 U.S. *Code of Federal Regulations* Part 200, *Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards* (Uniform Guidance) and is not a required part of the State's basic financial statements. The Uniform Guidance requires a schedule that shows total federal awards expended for each federal financial assistance program, the Catalog of Federal Domestic Assistance (CFDA) number, and the total amount provided to subrecipients from each federal program. Federal financial assistance programs that have not been assigned a CFDA number are identified as CFDA Number XX.Uxx, where XX represents the federal grantor agency and Uxx represents an unknown extension number.

The Schedule includes all federal awards expended by the State during the year ended June 30, 2018, except for those programs administered by public universities and other component units, which are legally separate from the State. They are responsible for engaging other auditors to perform audits in accordance with the Uniform Guidance, if required.

To compile the Schedule, the Office of Administration required each department, agency, and office that expended direct and/or indirect federal funding during the state fiscal year to prepare a schedule of expenditures of federal awards. The schedules for the departments, agencies, and offices were combined to form the Schedule of Expenditures of Federal Awards for the State of Missouri.

B. Basis of Presentation

The accompanying Schedule includes the federal award activity of the State of Missouri for the year ended June 30, 2018. The information in this Schedule is presented in accordance with the requirements of the Uniform Guidance, which defines federal awards as federal financial assistance and cost-reimbursement contracts that non-federal entities receive or administer in the form of grants, loans, loan guarantees, non-cash assistance, property (including donated surplus property), cooperative agreements, interest subsidies, insurance, food commodities, direct appropriations, and other assistance, but does not include other contracts that a federal agency uses to buy goods or services from a contractor. Because the Schedule presents only a selected portion of the operations of the State, it is not intended to and does not present the financial position, changes in net assets, or cash flows of the State.

C. Basis of Accounting

Most expenditures presented in the Schedule are reported on the cash basis of accounting, while some are presented on the modified accrual basis of accounting. Such expenditures are recognized following, as applicable, either

the cost principles in Office of Management and Budget Circular A-87, *Cost Principles for State, Local, or Indian Tribal Governments;* or the cost principles contained in the Uniform Guidance; wherein certain types of expenditures are not allowable or are limited as to reimbursement.

D. Indirect Cost Rate

The state agencies administering the federal programs presented in the Schedule did not elect to use the de minimis cost rate per the Uniform Guidance.

2. Unemployment Insurance Expenditures

The Unemployment Insurance program (CFDA No. 17.225) is administered by the Department of Labor and Industrial Relations through a unique federal-state partnership that was founded upon federal law but implemented through state law. Benefits are paid from federal funds and state unemployment taxes that are deposited into the State's account in the Federal Unemployment Trust Fund. The State's administrative expenditures incurred under this program are funded by federal grants. For the purposes of presenting the expenditures of this program in the Schedule, both state and federal funds have been considered federal awards expended. The breakdown of the State and federal portions of the total program expenditures for the fiscal year ended June 30, 2018, is as follows:

State Portion (Benefits Paid)	$291,644,438
Federal Portion (Benefits Paid)	7,201,179
Federal Portion (Administrative Costs)	37,456,062
Total Program Expenditures	$336,301,679

3. Special Supplemental Nutrition Program for Women, Infants and Children (WIC) Rebates

The State received cash rebates from an infant formula manufacturer totaling $34,971,454 on sales of formula to participants in the WIC program (CFDA No. 10.557) administered by the Department of Health and Senior Services (DHSS). This amount was excluded from total program expenditures. Rebate contracts with infant formula manufacturers are authorized by 7 CFR Section 246.16a as a cost containment measure. Rebates represent a reduction of expenditures previously incurred for WIC food benefit costs. The State was able to extend program benefits to more persons than could have been served this fiscal year in the absence of the rebate contract.

4. Medical Assistance Program (Medicaid) and Children's Health Insurance Program (CHIP) Prescription Drug Rebates

The State received cash rebates from drug manufacturers totaling $449,883,904 (federal share) on purchases of covered outpatient drugs for participants in the Medicaid and the CHIP (CFDA Nos. 93.778 and 93.767) administered by the Department of Social Services - MO HealthNet Division. This amount was excluded from total program expenditures. Rebate contracts with drug manufacturers are authorized by 42 USC Section 1396r-8 as a cost containment measure. Rebates represent a reduction of expenditures previously incurred for medical assistance costs.

5. HIV Care Formula Grants Prescription Drug Rebates

The State received cash rebates from drug manufacturers totaling $36,540,462 on purchases of covered drugs for participants in the HIV Care Formula Grants program (CFDA No. 93.917) administered by the DHSS. This amount was excluded from total program expenditures. The allowable use of drug rebates is restricted by 42 USC Section 300ff-26(g). Rebates represent a reduction in expenditures previously incurred for program costs.

6. Federal Loan Guarantees

Because of the Healthcare and Education Affordability Reconciliation Act enacted March 30, 2010 (Public Law 111-152), the authority to make or ensure loans under the Federal Family Education Loans program (CFDA No. 84.032) ended June 30, 2010. The Department of Higher Education (DHE) will continue to act as the federal Department of Education's agent in fulfilling the responsibilities related to the outstanding guarantees. The original principal outstanding of all loans guaranteed by the DHE is $1,182,186,495 as of June 30, 2018. The balance of defaulted loans (including principal and accrued interest) that the federal Department of Education imposes continuing compliance requirements of the DHE is $248,718,507 as of June 30, 2018.

7. Non-cash Assistance

The Schedule contains values for non-cash assistance for several programs.

Supplemental Nutrition Assistance Program (CDFA No. 10.551) expenditures totaling $1,080,014,681 represent actual disbursements for client purchases of authorized food products through the use of the electronic benefits card program administered by the Department of Social Services - Family Support Division (DSS-FSD).

The Department of Elementary and Secondary Education distributes food commodities to school districts under the National School Lunch Program (CFDA No. 10.555). Distributions are valued at the cost of the food paid by the federal government and totaled $31,320,527.

The DSS-FSD, through the Summer Food Service Program for Children (CFDA No. 10.559), provides United States Department of Agriculture (USDA)-donated foods to providers who serve free healthy meals to children and teens in low-income areas during the summer months when school is not is session. The DSS-FSD, through the Emergency Food Assistance Program (CFDA No. 10.569), provides USDA-donated foods for disaster relief and to six non-profit food banks for distribution to food pantries and community groups for feeding those in need. Distributions are valued at the federally assigned value of the product distributed and totaled $68,964 for the Summer Food Service Program for Children and $10,023,426 for the Emergency Food Assistance Program.

The DHSS distributes food commodities to low-income persons under the Commodity Supplemental Food Program (CFDA No. 10.565). Distributions

are valued at the cost of the food paid by the federal government and totaled $5,690,402.

The Department of Public Safety distributes excess federal Department of Defense (DOD) equipment to state and local law enforcement agencies under the DOD Excess Property Program (CFDA No. 12.U01). Property distributions totaled $2,995,314 when valued at the historical cost assigned by the federal government. Distributions are presented at the estimated fair market value of the property at the time of distribution, calculated as 22.47 percent of the historical cost, or $673,047.

The State Agency for Surplus Property distributes federal surplus property to eligible donees under the Donation of Federal Surplus Personal Property program (CFDA No. 39.003). Property distributions totaled $10,592,861 when valued at the historical cost assigned by the federal government. Distributions are presented at the estimated fair market value of the property at the time of distribution, calculated as 22.47 percent of the historical cost, or $2,380,216.

The DHSS distributes vaccines to local health agencies and other health care professionals under the Immunization Cooperative Agreements program (CFDA No. 93.268). Distributions are valued at the cost of the vaccines paid by the federal government and totaled $66,049,475.

State of Missouri - Single Audit
Schedule of Findings and Questioned Costs
Year Ended June 30, 2018

Section I - Summary of Auditor's Results

Financial Statements

Type of auditor's report issued on whether the financial statements audited were prepared in accordance with GAAP: Qualified

Unmodified for all opinion units except for the governmental activities and the General Fund, which were qualified.

Internal control over financial reporting:

• Material weaknesses identified?	____	yes	X	no
• Significant deficiencies identified?	X	yes	____	none reported

Noncompliance material to financial statements noted? ____ yes X no

Federal Awards

Internal control over major federal programs:

• Material weaknesses identified?	X	yes	____	no
• Significant deficiencies identified?	X	yes	____	none reported

Type of auditor's report issued on compliance for major federal programs:

Unmodified for all major programs except for the following major programs that were qualified:

CFDA Number	Name of Federal Program or Cluster
93.659	Adoption Assistance
93.767	Children's Health Insurance Program
	Medicaid Cluster:
93.775	State Medicaid Fraud Control Units
93.777	State Survey and Certification of Health Care Providers and Suppliers (Title XVIII) Medicare
93.778	Medical Assistance Program

Any audit findings disclosed that are required to be reported in accordance with the Uniform Guidance (2 CFR 200.516(a))? X yes ____ no

Identification of major federal programs:

CFDA Number	Name of Federal Program or Cluster
	Child Nutrition Cluster:
10.553	School Breakfast Program
10.555	National School Lunch Program
10.556	Special Milk Program for Children
10.559	Summer Food Service Program for Children
16.575	Crime Victim Assistance
17.225	Unemployment Insurance
	Workforce Investment Act (WIOA) Cluster:
17.258	WIOA Adult Program
17.259	WIOA Youth Activities
17.278	WIOA Dislocated Worker Formula Grants
	Highway Planning and Construction Cluster:
20.205	Highway Planning and Construction
20.219	Recreational Trails Program
20.224	Federal Lands Access Program
	Special Education Cluster (IDEA):
84.027	Special Education Grants to States
84.173	Special Education Preschool Grants
	TANF Cluster:
93.558	Temporary Assistance for Needy Families
93.568	Low-Income Home Energy Assistance
	CCDF Cluster:
93.575	Child Care and Development Block Grant
93.596	Child Care Mandatory and Matching Funds of the Child Care and Development Fund
93.658	Foster Care Title IV-E
93.659	Adoption Assistance
93.767	Children's Health Insurance Program
	Medicaid Cluster:
93.775	State Medicaid Fraud Control Units
93.777	State Survey and Certification of Health Care Providers and Suppliers (Title XVIII) Medicare
93.778	Medical Assistance Program
93.788	Opioid STR
97.036	Disaster Grants - Public Assistance (Presidentially Declared Disasters)

Dollar threshold used to distinguish
between Type A and Type B programs: $30,000,000

Auditee qualified as a low-risk auditee? _____ yes __X__ no

Section II - Financial Statement Findings

2018-001. Department of Revenue Financial Reporting Controls

The Department of Revenue (DOR) did not have adequate controls and procedures over financial reporting of sales and use tax accounts receivables following the implementation of a new computerized system in September 2017. As a result, sales and use tax accounts receivable data submitted to the Office of Administration - Division of Accounting (DOA) for inclusion in the *Missouri Comprehensive Annual Financial Report* (CAFR) for the year ended June 30, 2018, was misstated. In addition, the data was not submitted to the DOA timely.

Our testing of sales and use tax accounts receivable balances as of June 30, 2018, identified significant differences between the accounts receivable balances reported to the DOA and the accounts receivable balances maintained in the computerized system. Once these errors were identified and brought to the DOR's attention, DOR personnel determined the accounts receivable reports prepared from the new computerized system did not include all required data, resulting in misstated accounts receivable balances for some sales and use tax accounts. The DOR identified total gross sales and use tax accounts receivable were understated by $12.1 million.

The misstatement relates to the accounts receivable and related liability balances for several governmental and agency funds reported within various opinion units of the CAFR. However, because the misstatement was not material to the affected opinion units, the DOA made no corrections to the CAFR. In addition, the accounts receivable data, which was due to the DOA on August 15, 2018, was not submitted until December 4, 2018.

It is essential the DOR establish controls and procedures to prepare and submit accurate and timely financial reports to the DOA. The *Standards for Internal Control in the Federal Government*, issued by the Comptroller General of the United States, states that management is responsible for the design, implementation, and operating effectiveness of the internal control system and that control activities should be designed to achieve objectives and respond to risks. Such controls would allow management or employees, in the normal course of performing their assigned functions, to prevent or detect and correct misstatements.

Recommendation

The DOR implement controls and procedures to prepare and submit accurate and timely financial reports to the DOA.

Auditee's Response

We agree with the auditor's finding. Our Corrective Action Plan includes our planned actions to address the finding.

2018-002. Department of Corrections SAM II User Account Controls

The Department of Corrections (DOC) has not established adequate controls to ensure Statewide Advantage for Missouri (SAM II) Financial system users at the DOC are prevented from approving transactions they created without independent review or approval.

As of June 30, 2018, 3 SAM II Financial system user accounts had authority to enter and approve their own expenditure transactions. This authority was established in 2016 when the DOC's SAM II Security Administrator submitted SAM II Financial Agency Security Request forms to the Office of Administration (OA). These employees had access to process transactions in various funds, including the Working Capital Revolving Fund. However, the DOC did not require documented independent or supervisory reviews of the SAM II entries and approvals made by these employees. DOC officials subsequently restricted 1 employee's entry/approval authority in August 2018, after we brought the issue to their attention. They indicated the other 2 user accounts continue to need this authority to process transactions in emergency situations. However, alternative procedures could be developed for emergency situations.

Allowing users to approve their own transactions without independent review or approval increases the risk that inappropriate or unauthorized transactions may be processed. Rather than allowing such authority, the DOC should work with the OA to establish a procedure for processing transactions during emergency situations.

Recommendation

The DOC establish procedures to restrict SAM II Financial system users from approving expenditure transactions they create.

Auditee's Response

We agree with the auditor's finding. Our Corrective Action Plan includes our planned actions to address the finding.

2018-003. Department of Social Services SAM II User Account Controls

The Department of Social Services (DSS) - Division of Finance and Administrative Services (DFAS) has not established adequate controls to ensure Statewide Advantage for Missouri (SAM II) Financial system users at the DSS are prevented from approving transactions they created without independent review or approval.

As of June 30, 2018, 2 SAM II Financial system user accounts had authority to enter and approve their own expenditure transactions. This authority was established when the DSS's SAM II Security Administrator submitted SAM II Financial Agency Security Request forms to the Office of Administration. DSS officials indicated they were not aware the 2 employees had access to both enter and approve transactions, and subsequently removed the employees' entry/approval authority in September 2018 after we brought the issue to their attention. These employees had self-approval authority for 4 and 5 months before the authority was removed.

Allowing users to approve their own transactions without independent review or approval increases the risk that inappropriate or unauthorized transactions may be processed.

Recommendation

The DSS through the DFAS establish procedures to restrict SAM II Financial system users from approving expenditure transactions they create.

Auditee's Response

We partially agree with the auditor's finding. Our Corrective Action Plan includes an explanation and specific reasons for our disagreement and any planned actions to address the finding.

Auditor's Comment

The DSS Corrective Action Plan (CAP) states the DSS partially agrees with the finding because the DSS has internal processes and procedures to ensure adequate separation of data entry and approval functions in the accounts payable unit. The CAP states the DSS agrees the SAM II users should not have self-approval access and the DSS plans to review a monthly report of SAM II user access rights to ensure self-approval access has not been granted to DSS users. During the audit, DSS officials agreed the 2 employees had self-approval authority, and subsequently removed those rights; therefore, the finding remains valid.

Section III - Federal Award Findings and Questioned Costs

2018-004. Adoption Assistance Eligibility

Federal Agency:	Department of Health and Human Services
Federal Program:	93.659 Adoption Assistance 2017 - G1701MOADP 2018 - G1801MOADP
State Agency:	Department of Social Services (DSS) - Children's Division (CD) and Division of Finance and Administrative Services (DFAS)
Type of Finding:	Internal Control (Material Weakness) and Noncompliance
Questioned Costs:	$28,963

As noted in the four previous audits[2] of the Adoption Assistance program, DSS controls over eligibility are not sufficient to prevent and/or detect payments made on behalf of ineligible children. The CD made payments on behalf of 8 ineligible children and could not provide documentation to demonstrate that another child met the various program eligibility requirements. During the year ended June 30, 2018, the CD paid Adoption Assistance program benefits totaling about $55 million for over 13,400 children.

The Adoption Assistance program assists families in adopting eligible children with special needs by providing subsidy payments to adoptive parents. To be eligible to receive benefits under the program, eligibility requirements outlined at 42 USC Section 673 must be met. Among other things, the DSS is required to enter into adoption subsidy agreements with adoptive parents who receive subsidy payments on behalf of the child. The nature of services to be provided and nonrecurring expenses to be paid must be stated in the subsidy agreement as required by 45 CFR Section 1356.40 and 45 CFR Section 1356.41. Subsidized costs may include maintenance, child care, and nonrecurring adoption expenses.

The subsidy agreement must be signed and in effect prior to or at the time of the final adoption decree per federal regulations and DSS policy. The DSS Child Welfare Manual Adoption Subsidy policy requires subsidy agreements be signed by both the adoptive parents and the DFAS Director to be considered in effect. Subsidy agreements are established by case workers and reviewed by supervisors in the local offices. After the subsidy agreements are signed by the adoptive parents and reviewed and approved by local office supervisors, the agreements are sent to the Central Office Procurement Unit (formerly the Contract Management Unit (CMU)), where the DFAS

[2] *State of Missouri Single Audit*, finding numbers 2015-005, 2014-008, 2011-15, and 2009-14.

Director's (previously the CD Director's) signature is applied by Procurement Unit staff. In previous audits, the Director's signature was applied with a signature stamp but is now applied as an electronic signature.

To test compliance with these requirements, we reviewed eligibility and payment documentation for 60 children receiving Adoption Assistance. Assistance payments totaling approximately $244,600 were made on behalf of these children during the year ended June 30, 2018. We identified payments made on behalf of 8 children ineligible for Adoption Assistance benefits and 1 child for which the DSS could not locate appropriate eligibility documentation. Total known questioned costs for these errors represent approximately 18 percent of payments reviewed. If similar errors were made on the remaining population of Adoption Assistance program assistance payments, questioned costs could be significant.

Subsidy agreements not signed at the date of adoption

For 2 of the 60 cases tested (3 percent), the adoption subsidy agreement was not signed and in effect prior to or at the date of adoption.

For one case, the adoption subsidy agreement did not contain a signature from the CD Director. For the other case, the adoption subsidy agreement was not signed by all applicable parties (i.e., not in effect) until 1 month after the adoption decree. Payments totaling $5,989, made on behalf of the 2 ineligible children during the year ended June 30, 2018, were unallowable. We question the federal share, or $3,844 (approximately 64 percent). Payments for these 2 children were charged to the Adoption Assistance program from October 2007 to June 2018.

Backdated subsidy agreements

For 6 cases tested (10 percent), it appears the subsidy agreements were not signed and in effect prior to or at the date of the adoption decree because the CD Director's signature date was apparently backdated.

For these 6 cases, local office supervisors signed the agreements after the adoption date, but the CD Director's signature pre-dated the adoption, indicating the Director's signature (and, thus, the effect date of the agreement) was backdated and not in effect prior to the adoption decree. CD officials indicated backdating of subsidy agreements by CMU personnel was permissible under DSS policy prior to May 2008, and backdating was utilized because of a backlog in processing and submitting the subsidy agreements to the CMU. For these 6 cases, payments totaling $35,642 made during the year ended June 30, 2018, were unallowable. We question the federal share, or $22,903 (approximately 64 percent). Payments for these 6 children were charged to the Adoption Assistance program from October 2004 to June 2018.

In May 2008, the CD issued a policy memo prohibiting backdating of subsidy agreements. The subsidy agreements for the 6 cases noted above were

established prior to this directive. Our review of subsidy agreements established after this directive noted no instances of apparent backdating.

Federal resolutions of prior audit findings have required the DSS to pay back the costs associated with backdated subsidy agreements identified in the audits. However, the DSS has not attempted to identify all children for which the subsidy agreements were backdated, and as a result, it is likely additional children adopted prior to May 2008 are ineligible.

Incorrect eligibility determinations

For 1 case tested (2 percent), the CD could not provide adequate documentation supporting the child met the various program eligibility requirements. Our review of information in the DSS Family and Children Electronic System (FACES) found the child did not meet the eligibility requirements. Payments totaling $3,448, made on behalf of the ineligible child during the year ended June 30, 2018, were unallowable. We question the federal share, or $2,216 (approximately 64 percent). Payments for this child were charged to the Adoption Assistance program from April 2015 to June 2018.

Conclusions

The failure to implement adequate internal controls to ensure payments are only made on behalf of children that meet federal eligibility requirements and to ensure appropriate documentation supporting eligibility decisions is retained can result in federal reimbursements for ineligible children and/or unallowable costs. Rule 2 CFR Section 200.303(a) requires the non-federal entity to "[e]stablish and maintain effective internal control over the Federal award that provides reasonable assurance that the non-Federal entity is managing the Federal award in compliance with Federal statutes, regulations, and the terms and conditions of the Federal award."

Recommendation

The DSS through the CD and the DFAS strengthen and enforce policies and procedures regarding Adoption Assistance eligibility determinations. These procedures should ensure all adoption subsidy agreements are signed and in effect prior to the adoption and ensure eligibility determinations are proper, documented, and retained. In addition, the DSS should review and correct the eligibility for the children identified in this finding.

Auditee's Response

We partially agree with the auditor's finding. Our Corrective Action Plan includes an explanation and specific reasons for our disagreement and any planned actions to address the finding.

Auditor's Comment

The DSS Corrective Action Plan states the DSS partially agrees with the finding because the DSS implemented new processes in fiscal year 2008 prohibiting backdating of subsidy agreements. However, as noted in the finding, the DSS did not attempt to subsequently identify all children for which the subsidy agreements were backdated and redetermine eligibility for those children. Therefore, this finding remains valid.

2018-005. Department of Social Services Public Assistance Cost Allocation Plan

Federal Agency:	Department of Health and Human Services (DHHS)
Federal Program:	93.658 Foster Care - Title IV-E 2017 - G1701MOFOST 2018 - G1801MOFOST
	93.659 Adoption Assistance 2017 - G1701MOADP 2018 - G1801MOADP
	93.558 Temporary Assistance for Needy Families 2017 - G1702MOTANF 2018 - G1802MOTANF and G1801MOTAN3
State Agency:	Department of Social Services (DSS) - Division of Finance and Administrative Services (DFAS)
Type of Finding:	A - Internal Control (Significant Deficiency) B - Noncompliance

DFAS controls over cost allocation are not sufficient to ensure administrative costs are accurately allocated to various federal programs in accordance with the proposed public assistance cost allocation plan (PACAP), and the proposed PACAP did not include an estimated cost impact analysis as required by federal regulations.

The DSS is required to develop, document, and implement a PACAP in accordance with 45 CFR Sections 95.501 to 95.519. The PACAP is a narrative document outlining procedures to allocate administrative costs to the various programs administered by the DSS, and must be reviewed and approved by the DHHS - Division of Cost Allocation Services (DHHS-CAS) and various federal grantor agencies. The DSS fully revised its PACAP, effective October 1, 2017, and submitted two proposed PACAPs to the DHHS-CAS for review (for the periods October 1, 2017, to March 31, 2018, and April 1, 2018, to June 30, 2018). With the exception of one part that was approved in September 2018,[3] as of January 2019, the proposed PACAP was still under review by the DHHS-CAS. Rule 45 CFR Section 95.517 provides the DSS may claim federal financial participation under the proposed plan with the understanding that, if necessary, the DSS shall retroactively adjust its claims to the plan as subsequently approved by the DHHS-CAS.

DFAS personnel are responsible for preparing and submitting proposed PACAPs for approval and for ensuring costs are allocated in accordance with the proposed PACAP. To develop and implement the new proposed PACAP, the DSS contracted with a vendor to develop the proposed PACAP, purchased the vendor's cost allocation system (AlloCAP system) for allocating costs to

[3] PACAP, Attachment 3 – Title IV-E Eligibility Rate Calculations, was approved in a formal letter dated September 6, 2018, issued by the DHHS-CAS.

the various programs, and developed data input and output reports for the AlloCAP system. The AlloCAP system replaced the DFAS's previous procedures to allocate costs through various spreadsheets.

The proposed PACAP describes the procedures used to identify, measure, and allocate costs to the various programs administered by the DSS. Cost centers are used to classify costs based on the organizational structure of the DSS. The AlloCAP system used about 300 cost centers during the quarter ended March 31, 2018. The proposed PACAP includes organizational charts reflective of the layout of cost centers, a description of activities performed by each cost center, a listing of federal and state programs benefitting from the cost centers, and procedures and methods used to allocate costs. Rule 45 CFR Section 95.507(a) outlines the various requirements of the PACAP.

Each quarter, DFAS personnel obtain expenditure data from the state's accounting system and import the data to the AlloCAP system. Manual adjustments are made to account for expenditures not reflected in the state's accounting system. The AlloCAP system produces reports showing total amounts to be allocated to various programs. DFAS personnel use the reports to prepare and submit quarterly federal reports to the federal agencies. During the quarter ended March 31, 2018, administrative costs totaling $25.3 million were allocated to the Foster Care, Adoption Assistance, and Temporary Assistance for Needy Families programs through the AlloCAP system.

In addition, the DFAS is responsible for monitoring and making changes to the PACAP and the AlloCAP system as needed. If changes are made to the AlloCAP system, the DFAS must submit a revised proposed PACAP to the DHHS-CAS. DFAS personnel indicated the most common changes to the AlloCAP system are the addition or removal of cost centers or the addition of final receiver accounts. DFAS personnel made numerous changes to both the proposed PACAP and the AlloCAP system throughout the year ended June 30, 2018. These changes were partially because of DSS reorganizations and the PACAP and the AlloCAP were in the early stages of implementation.

A. Internal controls

Our review of the DFAS's new cost allocation procedures noted the DFAS did not establish and document adequate internal controls over cost allocation, as follows:

Documentation of internal controls

The DFAS did not have a documented system of internal controls to ensure the contractor properly designed the AlloCAP system to provide for accurate, allowable, and proper allocations in accordance with the proposed PACAP.

Throughout the audit, DFAS personnel verbally described to auditors various internal control procedures established and performed to ensure the AlloCAP system accurately allocated costs in accordance with the proposed PACAP. However, DFAS personnel did not document these procedures in a policy or

procedures manual or document that the procedures were performed. Examples of internal controls described include testing of AlloCAP system allocations; quarterly review and approval of system reports; and segregation of duties over, and review and approval of, revisions to the proposed PACAP and the AlloCAP system.

Effective internal controls include policies and procedures designed to ensure compliance with federal regulations. These policies and procedures should require personnel to document when required procedures were performed.

PACAP and AlloCAP system changes

The DFAS has not implemented procedures to document changes made to the proposed PACAP or the AlloCAP system or approval of such changes, and did not document procedures to test the changes for accuracy and consistency with the proposed PACAP.

During each quarter of the period October 1, 2017, to June 30, 2018, the DFAS made changes to both the proposed PACAP and the AlloCAP system; however, DFAS personnel did not maintain a log of the changes or any other documentation supporting the changes. DFAS personnel indicated the CFO and Assistant CFO review all changes to the PACAP and the AlloCAP system; however, DFAS personnel could not provide any documentation of these approvals. In addition, DFAS personnel indicated they tested some of the changes by manually calculating the allocations for selected cost centers; however, these calculations were not documented and/or retained.

DFAS personnel stated they document changes to the PACAP through the track change function of the electronic PACAP document and that changes to the Allocap system can be identified by comparing the current and prior quarter chart of accounts reports. However, neither of these documents or methods provide proper support for the reason and/or justification of the changes. As a result, there are no records or other audit trails to properly support changes to the PACAP and AlloCAP system. During the quarter ended June 30, 2018, DFAS personnel added 65 cost centers and removed 35 cost centers. DFAS personnel indicated many of these changes were a result of reorganizational changes within the Family Support Division and MoHealthNet Division.

Documentation of changes, approvals, and testing are critical components of an internal control system designed to ensure data reliability and compliance with federal requirements. The AlloCAP system procedures manual, Chapter VII, states users are encouraged to manually document all changes made to the AlloCAP system because the system does not have an internal function that allows the user to automatically track changes made over time. In

addition, according to the Government Accountability Office[4] (GAO), as part of the control of master data, the organization should have an effective auditing and monitoring capability which allows changes to master data records to be recorded and reviewed where necessary.

Compliance test results

To determine if the DFAS followed its proposed PACAP when allocating costs to federal programs, we sampled 14 cost centers allocated during the quarter ended March 31, 2018, and determined each sampled cost center was supported and allocated in accordance with the proposed PACAP. However, without adequate internal controls, there is less assurance the other cost centers allocated using different methodologies or costs centers applicable to other programs not audited as major programs were allocated accurately and/or in accordance with the proposed PACAP.

Conclusions

The failure to implement adequate internal controls to ensure costs are allocated in accordance with the proposed PACAP and federal requirements increases the risk that DFAS staff will not allocate an appropriate share of costs to programs, errors will not be detected on a timely basis, and federal grantor agencies will disallow costs charged to federal programs. Inadequate internal controls could hinder the department's ability to manage federal funds effectively and to comply with federal regulations.

Rule 2 CFR Section 200.303(a) requires the non-federal entity to "[e]stablish and maintain effective internal control over the Federal award that provides reasonable assurance that the non-Federal entity is managing the Federal award in compliance with Federal statutes, regulations, and the terms and conditions of the Federal award. These internal controls should be in compliance with guidance in *Standards for Internal Control in the Federal Government*, issued by the Comptroller General of the United States and the *Internal Control Integrated Framework*, issued by the Committee of Sponsoring Organizations of the Treadway Commission." The *Standards for Internal Control in the Federal Government*, also known as the Green Book, requires management to develop and maintain documentation of its internal control system. The Green Book states, "[e]ffective documentation assists in management's design of internal control by establishing and communicating the who, what, when, where, and why of internal control execution to personnel. Documentation also provides a means to retain organizational knowledge and mitigate the risk of having that knowledge limited to a few personnel, as well as a means to communicate that knowledge as needed to external parties, such as external auditors."

[4] Report GAO-09-232G, Federal Information System Controls Audit Manual, February 2009

Rule 45 CFR Section 95.517(a) provides that "[a] state must claim FFP [federal financial participation] for costs associated with a program only in accordance with its approved cost allocation plan." Rule 2 CFR Section 200.405(a) states, "[a] cost is allocable to a particular federal award or other cost objective if the goods or services involved are chargeable or assignable to that federal award or cost objective in accordance with relative benefits received."

B. Estimated cost impact analysis

The DFAS did not include an estimated cost impact analysis in the proposed PACAP, as required by federal regulations.

Rule 45 CFR Section 95.507(b)(5) requires the DSS's proposed PACAP to include "[t]he estimated cost impact resulting from the proposed changes to a previously approved plan. These estimated costs are required solely to permit an evaluation of the procedures used for identifying, measuring, and allocating costs." The regulation also states if it is impractical to perform such analysis, an alternative approach should be negotiated with the DHHS-CAS.

The proposed PACAP section titled "Cost Impact Statement" simply states the DSS will notify the DHHS-CAS of any significant funding changes as a result of the proposed PACAP implementation. DFAS personnel indicated they did not perform an estimated cost impact analysis because they believed the proposed PACAP would likely continue to be revised and/or amended based on internal and federal reviews of the proposed PACAP.

In addition to complying with federal requirements, performing and reviewing an estimated cost impact analysis could serve as a component of the internal control system over the new cost allocation procedures. Without such analysis, the DSS and the DHHS-CAS may not have sufficient information to evaluate the propriety of the proposed PACAP and AlloCAP system.

Recommendations

The DSS through the DFAS:

A. Implement internal controls and procedures over the PACAP and the AlloCAP system to ensure costs charged to federal programs are accurate, allowable, properly allocated, and consistent with the proposed and/or approved PACAP. Internal controls should be adequately documented and monitored for compliance with applicable requirements. These controls should include policies and procedures, a log of changes to the PACAP and the AlloCAP system, and documentation of approvals and testing of system changes.

B. Prepare and submit an estimated cost impact analysis as part of the PACAP, as required by federal regulations.

Auditee's Response

A. We disagree with the auditor's finding. Our Corrective Action Plan includes an explanation and specific reasons for our disagreement.

B. We disagree with the auditor's finding. Our Corrective Action Plan includes an explanation and specific reasons for our disagreement.

Auditor's Comment

Finding Part A

The DSS Corrective Action Plan states the DSS disagrees with the finding because (1) no deviations were found in audit sampling to support that the DSS did not effectively establish controls to prevent noncompliance, and (2) the DSS provided sufficient evidence to demonstrate internal controls and procedures to ensure costs charged to federal programs are accurate, allowable, and properly allocated.

We used *Audit Guide Government Auditing Standards and Single Audits (Audit Guide),* published by the AICPA, for decisions regarding the reporting of the internal control deficiencies. While the results of compliance testing should be considered when evaluating the operating effectiveness of internal controls, Audit Guide paragraph 9.46 states the absence of noncompliance detected by a compliance test does not provide audit evidence that controls related to a compliance requirement are effective.

In addition, as noted in the finding, the DFAS did not document various internal control procedures verbally described to auditors throughout the audit. In the Corrective Action Plan, the DSS introduced the following additional items it considers to serve as internal controls over the proposed PACAP and the AlloCAP system. However, these items do not address the deficiencies identified in the audit report as follows:

(1) The DSS indicated all changes to the PACAP document are submitted in track changes format; however, as explained in the finding, this does not provide proper support for the reason and/or justification of the changes.

(2) The DSS indicated the revised PACAP document and a summary of quarterly changes are provided to the Grants Unit so it can ensure the AlloCAP system matches the proposed PACAP narrative exactly; however, DFAS personnel did not provide any documented evidence the Grants Unit personnel performed such matches. Additionally, DFAS personnel had difficulties demonstrating to auditors how the cost centers sampled were allocated in the complex AlloCAP system.

(3) The DSS listed the AlloCAP manual outlining the procedures for the quarterly allocation process as documented evidence of internal controls and procedures; however, as noted in the finding, several

processes described by DFAS personnel were not addressed in this or any other manual or policy.

(4) The DSS indicated grant approval tracking sheets documenting all levels of approval are maintained for each grant; however, these documents are used in the review and approval of federal financial reports, and not for purposes of reviewing the PACAP document or the AlloCAP system.

(5) The DSS indicated AlloCAP reports show the allocation methodology matches the proposed PACAP document; however, these reports provide no assurance the costs were allocated in accordance with the proposed PACAP.

As stated in the finding, federal regulations require the DSS to maintain effective controls over, and accountability for, all funds of the DSS programs. Effective internal controls are well documented and include policies and procedures designed to ensure compliance with federal regulations. Because the DSS did not establish and document such controls and procedures over cost allocation, the finding remains valid.

Finding Part B

The DSS Corrective Action Plan states the DSS disagrees with the finding because the proposed PACAP narrative states the DSS will notify the DHHS-CAS of any significant funding changes as a result of the proposed PACAP implementation. Further, the DSS indicated it has corresponded with the DHHS-CAS and other federal agencies regarding the current plan to submit cost impact statements in the near future. However, because the DFAS did not include the required estimated cost impact analysis in the proposed PACAP, the finding remains valid.

2018-006. Child Care Eligibility Case Reviews

Federal Agency:	Department of Health and Human Services
Federal Program:	93.575 Child Care and Development Block Grant 2017 - G1701MOCCDF 2018 - G1801MOCCDF
	93.596 Child Care Mandatory and Matching Funds of the Child Care and Development Fund 2017 - G1701MOCCDF 2018 - G1801MOCCDF
State Agency:	Department of Social Services (DSS) - Children's Division (CD) and Family Support Division (FSD)
Type of Finding:	Internal Control (Significant Deficiency)

The DSS did not ensure monthly supervisory case reviews were completed as required for FSD eligibility specialists (ES) who perform eligibility determinations of households participating in the Child Care Development

Fund (Child Care) subsidy program. Also, the case review policy does not require that case reviews be completed timely. During the year ended June 30, 2018, the DSS paid Child Care benefits on behalf of about 60,400 children.

ES and their supervisors are responsible for determining the eligibility of Child Care participants. The DSS Child Care Manual, Section 2035.000.00, *Child Care Case Reviews*, requires supervisors of ES to review a minimum of 20 Child Care subsidy program cases with case actions (e.g. application approval, change in work schedule, other changes to authorization, etc.) each month to ensure eligibility information is accurately entered into the Family Assistance Management Information System (FAMIS), and to verify compliance with federal eligibility requirements. Case reviews are generally targeted at the areas of highest risk as determined by CD and FSD management. The supervisory reviews are required to be logged into the Case Review System (CRS) and submitted to the ES by the last day of the end of the review month. Management uses data from the CRS to determine if additional training is needed for problem areas. During the year ended June 30, 2018, approximately 2,400 case reviews were logged into the CRS.

Monthly case review data provided by the CD indicated the reviews were not always performed during the year ended June 30, 2018. For the 117 months worked by the 13 supervisors during the year, the supervisors did not perform the minimum 20 case reviews for 46 (39 percent) of these months. In addition, we noted the reviews were not always completed timely. For 16 of 40 case reviews we selected (40 percent), the reviews were not performed during the following month, but were performed up to 3 months after the case action was made. The *Child Care Case Reviews* policy is not clear when the case reviews should be performed but requires the supervisor to provide the case review to the ES by the end of the month the review is conducted. DSS officials stated there is no timeframe for completing case reviews.

When supervisory case reviews are not performed or not performed timely, the department's established controls to ensure compliance with eligibility requirements are diminished, and there is decreased assurance eligibility determinations are accurate and an increased risk of errors going undetected. Rule 45 CFR Section 98.68(a) requires the DSS to document in its Child Care subsidy state plan that it has effective controls to ensure integrity and accountability in the program. To demonstrate and ensure internal controls are effective, supervisory case reviews should be performed as required and monitored for compliance with DSS policy. In addition, the policy should be revised to indicate when the reviews should be performed and to provide for more timely case reviews.

Recommendation

The DSS through the CD and the FSD ensure monthly supervisory case reviews are performed as required by DSS policy and strengthen the policy to indicate when the reviews should be performed.

Auditee's Response

We partially agree with the auditor's finding. Our Corrective Action Plan includes an explanation and specific reasons for our disagreement and any planned actions to address the finding.

Auditor's Comment

The DSS Corrective Action Plan (CAP) states the DSS partially agrees with the finding because the *Child Care Case Reviews* policy does not provide exceptions for staff and supervisor turnover or fluctuating priorities in the field offices. The CAP states if these conditions are considered, the DSS believes supervisors are completing the required number of case reviews and the policy is working to reduce eligibility errors. However, as discussed with DSS officials during the audit, when determining the number of the case reviews not performed, auditors excluded months when supervisor positions were not occupied due to turnover, retirements, or transfers. Because the DSS did not ensure key controls over eligibility of Child Care participants were performed in accordance with established policy, the finding remains valid.

2018-007. Child Care Payments

Federal Agency:	Department of Health and Human Services (DHHS)
Federal Program:	93.575 Child Care and Development Block Grant 2017 - G1701MOCCDF 2018 - G1801MOCCDF
	93.596 Child Care Mandatory and Matching Funds of the Child Care and Development Fund 2017 - G1701MOCCDF 2018 - G1801MOCCDF
State Agency:	Department of Social Services (DSS) - Children's Division (CD) and Family Support Division (FSD)
Type of Finding:	Internal Control (Significant Deficiency) and Noncompliance
Questioned Costs:	$586

As noted in our prior eight audit reports,[5] DSS controls over Child Care Development Fund (Child Care) subsidy provider payments are not sufficient to prevent and/or detect improper payments to child care providers. The DSS has only limited procedures to monitor payments to providers, and overpayments were made to some providers. During the year ended June 30, 2018, the DSS paid over 4,700 child care providers about $150 million for services provided to approximately 60,400 children of eligible clients.

[5] *State of Missouri Single Audit*, finding numbers 2017-010, 2016-002A, 2015-002, 2014-005, 2013-009, 2012-11A&B, 2011-14A, and 2010-16A.

The DSS provides funds to child care providers who serve eligible clients (parents/caregivers). Once approved for services, the client selects a child care provider and the DSS enters into an agreement/contract with the provider for child care services. The DSS Income Maintenance (IM) manual requires the FSD eligibility specialist to set maximum authorized service units for the amount and type of care that best meets the family's need, and enter this into the Family Assistance Management Information System (FAMIS) for each child. The IM manual and provider agreements require providers to submit a monthly invoice electronically through the Child Care Online Invoicing System (CCOIS) or manually through the Child Care Provider Relations Unit. The CCOIS interfaces with the FAMIS to process provider payments.

Providers are required to maintain detailed attendance records documenting daily arrival and departure times and containing a client signature verifying the child received the services. Although all providers are required to retain attendance records for 5 years, the DSS only requires registered (license exempt) providers that submit manual invoices to submit attendance records for payment.

To test compliance with program requirements, we selected a sample of 60 children. We reviewed related provider agreements and payment documentation supporting one payment for each of these children. The department made payments totaling approximately $19,400 to child care providers on behalf of these 60 children during the month reviewed. Documentation was not adequate to support payments for 9 of 60 cases reviewed (15 percent). Attendance records for 2 cases were not provided by the child care provider upon our request and provider invoices did not agree to the corresponding attendance records for the other 7 cases. Unsupported payments for these 9 cases totaled $769. We question the federal share, or $586 (76.14 percent).

An audit performed by the federal DHHS - Office of Inspector General (DHHS-OIG), *Not All of Missouri's Child Care Subsidy Program Payments Complied With Federal and State Requirements,* released in November 2017, identified similar concerns with unsupported provider payments. The DHHS-OIG audit noted attendance records were not adequately documented for 124 of 128 provider service months reviewed and projected total overpayments of $19.1 million for federal fiscal years 2014 and 2015. The audit reported the deficiencies occurred because the DSS did not exercise sufficient oversight over its Child Care subsidy program.

In September 2013, in response to deficiencies identified in previous audits, the DSS created the Child Care Review Team (CCRT) within the Division of Finance and Administrative Services, and began performing reviews of child care providers. Although the CCRT reviews noted similar provider payment issues to those noted above, the CCRT's follow up on identified provider

noncompliance was not sufficient (see finding number 2018-008). In September 2017, the DSS awarded a contract for an electronic Child Care Business Information Solution (CCBIS), to replace the current paper attendance records. DSS officials indicated the CCBIS is scheduled for full implementation by fall 2019, and will allow for greater control of attendance tracking, invoicing, and monitoring for provider compliance.

Rule 45 CFR Section 98.68(a) requires the DSS to document in its Child Care subsidy state plan that it has effective controls to ensure integrity and accountability in the program. To ensure controls are effective, the DSS needs to continue to review, strengthen, and enforce policies and procedures to ensure Child Care subsidy invoices agree to the corresponding attendance records and attendance records are complete. These procedures should include sufficient monitoring of provider payments and follow up on errors identified.

Recommendation

The DSS through the CD and the FSD continue to review, strengthen and enforce policies and procedures regarding Child Care subsidy provider payments. These procedures should include sufficient monitoring of provider payments and follow up on errors identified.

Auditee's Response

We partially agree with the auditor's finding. Our Corrective Action Plan includes an explanation and specific reasons for our disagreement and any planned actions to address the finding.

Auditor's Comment

The DSS Corrective Action Plan (CAP) states the DSS partially agrees controls can be strengthened to ensure payments are always adequately supported. The CAP explains the questioned costs associated with the 9 cases cited in the finding were insignificant, and 1 error was because the DSS was unable to obtain records for one provider who is now deceased. However, the DSS Child Care Policy Manual and provider agreements require attendance records be maintained for 5 years and made available to the DSS upon request. Because the DSS has not established necessary controls to ensure Child Care subsidy provider payments are sufficiently monitored, the finding remains valid.

2018-008. Child Care Provider Monitoring

Federal Agency:	Department of Health and Human Services
Federal Program:	93.575 Child Care and Development Block Grant 2017 - G1701MOCCDF 2018 - G1801MOCCDF
	93.596 Child Care Mandatory and Matching Funds of the Child Care and Development Fund 2017 - G1701MOCCDF 2018 - G1801MOCCDF

State Agency:	Department of Social Services (DSS) - Children's Division (CD) and Division of Finance and Administrative Services (DFAS)
Type of Finding:	Internal Control (Significant Deficiency)

As noted in our prior two audit reports,[6] the DSS's procedures to follow up on provider noncompliance identified during Child Care Review Team (CCRT) reviews were not sufficient.

The CCRT is responsible for conducting compliance reviews of child care providers using a risk-based approach to identify and monitor providers determined to be at high risk of noncompliance with Child Care subsidy provider requirements. CCRT staff perform on-site and desk reviews to evaluate provider billing practices, compare attendance records to amounts invoiced, and review facility staffing ratios and fire safety. The CCRT completed 467 reviews, including 168 desk reviews and 299 on-site reviews, during the year ended June 30, 2018. Of the 467 reviews, 69 (15 percent) were follow-up reviews of providers previously found to be noncompliant.

When the CCRT identifies provider noncompliance, the provider is required to repay any related overpayments identified; and depending on the severity of the noncompliance, the provider may also (1) be referred to provider training or (2) have its provider contract/agreement terminated. The CCRT notifies the CD if a provider should be referred for training or if a provider's contract/agreement should be terminated. The CD is responsible for contacting the provider with the necessary training or termination information. After a provider attends the required training, the CCRT may conduct a follow-up review. Providers referred to training have 45 days to complete the training. If the provider does not complete the required training timely, CD personnel notify the provider it has 10 to 15 days to complete the training or the provider's contract will be terminated.

During most of the year ended June 30, 2018, the CCRT and the CD did not have established criteria or guidance for determining the type and extent of follow-up action, if any, to address identified provider non-compliance. We reviewed documentation supporting 60 CCRT compliance reviews (48 initial reviews and 12 follow-up reviews) finalized during the year ended June 30, 2018. The CCRT determined 53 of these 60 providers were noncompliant. Of the 53 reviews, 39 had significant problems including overpayments or significant technical issues and appeared to require follow up to prevent future noncompliance, and 14 had technical issues and further follow up did not appear necessary.

[6] *State of Missouri Single Audit*, finding numbers 2017-011 and 2016-002B.

In 27 (21 initial and 6 follow-up) of the 39 reviews (69 percent) that appeared to require follow up, the CCRT required the providers to repay the overpayments. However, as of June 30, 2018, the CCRT had taken no further action to address the provider noncompliance, such as referring the provider to the CD for training or other corrective action, or conducting a follow-up review in a timely manner. The average identified overpayment amount for these 27 providers was $514 for the 2-month period the CCRT reviewed. The overpayment to one of the providers exceeded $5,000. To address the prior audit findings, CD personnel indicated they implemented new guidelines, effective in May 2018, for following up on CCRT reviews that identified noncompliance. In addition, DFAS and CD personnel indicated they scheduled follow-up reviews for some of the reviews identified as requiring follow up in the subsequent fiscal year.

CCRT and CD monitoring of providers serves as a control to ensure provider payments are allowable. Rule 45 CFR Section 98.68(a) requires the DSS to document in its Child Care subsidy state plan that it has effective controls to ensure integrity and accountability in the program. Effective monitoring procedures include adequate follow up and resolution of identified provider noncompliance. Without continued monitoring of these providers, continued noncompliance and overpayments are likely.

Recommendation

The DSS through the DFAS and the CD continue to strengthen and enforce procedures to ensure proper follow up on noncompliance identified during CCRT reviews is performed.

Auditee's Response

We partially agree with the auditor's finding. Our Corrective Action Plan includes an explanation and specific reasons for our disagreement and any planned actions to address the finding.

Auditor's Comment

The DSS Corrective Action Plan (CAP) states the DSS partially agrees with the finding because the DSS implemented new procedures as of June 30, 2018, that included following up with a number of noncompliant providers or scheduling a future follow-up review. The new procedures require a timely follow-up review for billing discrepancies. However, the CCRT had not followed up on the 27 reviews identified by auditors as requiring follow up as of June 30, 2018; therefore, the finding remains valid.

2018-009. Foster Care Case Management Contract Payment Reviews

Federal Agency:	Department of Health and Human Services
Federal Program:	93.658 Foster Care - Title IV-E 2017 - G1701MOFOST 2018 - G1801MOFOST
State Agency:	Department of Social Services (DSS) - Children's Division (CD) and Division of Finance and Administrative Services (DFAS)
Type of Finding:	Internal Control (Significant Deficiency) and Noncompliance
Questioned Costs:	$172

The DFAS has not established adequate internal controls to ensure certain Foster Care assistance payments to contractors are allowable and adequately supported.

The CD contracts with 7 foster care case management (FCCM) contractors to provide case management/administration and room and board for certain children in state custody. The DSS pays the contractors a monthly fixed price for a pre-established caseload. Certain costs included in payments to FCCM contractors are allowable Foster Care program costs. The DSS paid these contractors approximately $86 million during the year ended June 30, 2018, of which about $11.6 million, with a federal share of about $7.4 million (64 percent), was claimed to the Foster Care program as allowable assistance payments. During the year ended June 30, 2018, FCCM contractors were assigned about 3,400 foster children, or approximately 25 percent of the state's average daily caseload.

To identify FCCM contractor costs to charge to the Foster Care program, the DFAS requires each FCCM contractor to electronically report monthly payment data for each child it is responsible for managing. Payment data includes type of service, vendor, amount paid, service date(s), and other identifying information. This data is uploaded into the DSS Family and Children Electronic System (FACES), which has various system edits to prevent and/or detect data input errors and duplicate payments. From this data, DFAS personnel determine the amounts to charge to the Foster Care program based each child's eligibility determination and type of service(s) provided.

The DFAS's control procedures over FCCM contracts are not sufficient to ensure FCCM assistance payment amounts charged to the Foster Care program are accurate and supported. The DFAS's procedures are limited to following up on errors identified through FACES system edits. DFAS personnel do not ensure payment rates are in accordance with the foster care rate structure or sample and review contractor supporting documentation of costs incurred. Without such procedures, there is an increased risk that payment errors could occur and go undetected, and the DFAS could charge unallowable or unsupported assistance payments to the Foster Care program.

To test compliance with Foster Care program requirements, we selected a sample of 60 children. We reviewed payment documentation supporting the payments made on behalf of the 60 children during the year ended June 30, 2018, totaling about $271,000. Of the 60 children, 9 were assigned to FCCM contractors. The FCCM contractors made and reported to DSS payments totaling about $50,700 on behalf of these 9 children. For one of the 9 children, the FCCM contractor reported, and the DSS charged to the Foster Care program, the infant allowance during the period December 2017 through June 2018, although the child turned 3 in February 2016. DSS regulations allow

the infant allowance of about $50 per month (either paid by a flat monthly rate or based on a daily rate) up to age 3. The amounts incorrectly claimed for this child totaled $266. We question the federal share, or $172 (65 percent).

Effective internal controls over allowable costs include monitoring and oversight of contractors responsible for carrying out federal requirements. To ensure FCCM contractors are accurately reporting payment data and that payments are adequately supported, detailed reviews of submitted data include reviews of foster care payment rates and supporting documentation such as cancelled checks, receipts or invoices, and/or other supporting documentation.

Rule 45 CFR Section 75.342(a) states the DFAS is "[r]esponsible for oversight of the operations of the Federal award supported activities. The non-Federal entity must monitor its activities under Federal awards to assure compliance with applicable Federal requirements and performance expectations are being achieved. Monitoring by the non-Federal entity must cover each program, function or activity." In addition, 45 CFR Section 75.303(a) requires the non-federal entity to "[e]stablish and maintain effective internal control over the Federal award that provides reasonable assurance that the non-Federal entity is managing the Federal award in compliance with Federal statutes, regulations, and the terms and conditions of the Federal award."

Recommendation

The DSS through the CD and the DFAS strengthen monitoring controls and procedures over FCCM contractor payments to ensure costs claimed to the Foster Care program as assistance payments are allowable and adequately supported. Detailed reviews of data submitted by the FCCM contractors should include reviews of foster care payment rates and supporting documentation.

Auditee's Response

We disagree with the auditor's finding. Our Corrective Action Plan includes an explanation and specific reasons for our disagreement.

Auditor's Comment

The DSS Corrective Action Plan states the DSS disagrees with the finding because the questioned costs were immaterial and the DSS believes reviewing payment documentation is not necessary because the FCCMs were deemed to be contractors (as opposed to subrecipients) in a federal Departmental Appeals Board (DAB) decision. The DSS further stated requesting documentation from the FCCM contractors would impose extraneous requirements on the contractors. However, the classification of, or the burden on, the entities in which the DSS contracts for services under federal programs does not absolve the DSS of responsibilities to ensure costs claimed are allowable and adequately supported. Furthermore, the DAB decision cited by the DSS only addressed resource development (e.g. training) costs and not assistance payments, which is the focus of the finding. Because the DSS has

not established necessary controls to ensure FCCM contractor assistance payments are allowable and adequately supported, the finding remains valid.

2018-010. TANF Work Participation Sanctions

Federal Agency:	Department of Health and Human Services
Federal Program:	93.558 Temporary Assistance for Needy Families (TANF) 2017 - G1702MOTANF 2018 - G1802MOTANF and G1801MOTAN3
State Agency:	Department of Social Services (DSS) - Family Support Division (FSD)
Type of Finding:	Internal Control (Significant Deficiency) and Noncompliance
Questioned Costs:	$171

As noted in our five prior audits[7] of the TANF program, the FSD did not have adequate controls to ensure TANF program recipients who failed to meet work participation requirements were sanctioned. The FSD's procedures to monitor subrecipients responsible for referring TANF program recipients to the FSD for failure to meet work participation requirements were not sufficient; and as a result, a recipient was not sanctioned and continued to receive full benefits.

Under 45 CFR Section 261.14, for a TANF program recipient who refuses to engage in work required under Section 407 of the Social Security Act, the state must reduce or terminate the amount of assistance payable to the family, subject to any good cause or other exceptions the state may establish. A state that fails to impose penalties on individuals in accordance with the provisions of Section 407(e) of the Social Security Act may be subject to penalty. Under 45 CFR Section 261.54, the federal agency may impose a penalty amount for a fiscal year of no less than 1 percent and no more than 5 percent of the annual grant amount.

Ten community organizations, who are FSD subrecipients, perform many of the required TANF program work activity functions for the 11 regions in the Missouri Work Assistance (MWA) program. The FSD refers TANF program recipients who are required to participate in eligible work activities to the MWA subrecipients. Subrecipient duties include case management, enrollment, and reporting recipient hours of participation and noncompliance to the FSD. Sections 285 and 290 of the FSD TANF Manual require MWA subrecipients to place TANF program recipients who are not meeting work participation requirements in conciliation status; attempt to locate and re-engage recipients, if necessary; provide recipients the opportunity to begin

[7] *State of Missouri Single Audit*, finding numbers 2015-014, 2014-010B, 2013-016B, 2012-16B, and 2011-20B.

work participation activities; and notify the FSD of recipients exempt from the work requirements. Additionally, the policies require MWA subrecipients to refer TANF program recipients who failed to meet the work participation requirements (and did not meet an exception) to the FSD for sanctions to be applied to their monthly benefits. The DSS has established the sanction at 50 percent of the monthly benefit amount.

The FSD's monitoring and training of the MWA subrecipients has not been effective to ensure the subrecipients comply with sanction policies and procedures. The FSD performs various monitoring procedures including periodic samples and reviews of cases in each region and reviews of various system-generated reports of cases in possible need of sanction. Also, during state fiscal year 2018, the FSD and the Division of Finance and Administrative Services jointly issued 4 monitoring review reports of MWA subrecipients. Three of these reports showed subrecipients failed to comply with conciliation/sanction policies and procedures, and noted error rates of noncompliance ranging from 4 to 15 percent. The DSS required the MWA subrecipients to submit corrective action plans to address the issues identified and provided additional training to the subrecipients with high rates of noncompliance. Federal resolutions of prior audit findings have required the DSS to take corrective action, including performing additional monitoring activities, to address the findings. However, our review indicates the improved monitoring procedures were not sufficient to ensure MWA subrecipients complied with policies for referring recipients who did not comply with work requirements.

A January 2018 report of 4,743 TANF program recipients referred to the MWA subrecipients included 3,461 recipients for which no work activities were reported during the month. We tested 40 of these TANF program recipients, who received benefits totaling $9,807 during January 2018, and noted 2 recipients (5 percent) were not referred to the FSD by the MWA subrecipient. One of the recipients was not appropriately sanctioned for noncompliance with work participation requirements. The other recipient qualified for an exemption in November 2017, but the exemption was not recorded in FSD records until April 2018. Nine recipients were appropriately sanctioned and the remaining 29 recipients were not subject to sanction during January 2018 due to various reasons, such as the conciliation process was not complete; the recipient was exempt due to age, having a newborn child, or caring for a disabled person; or the recipient received a temporary waiver for childcare, transportation, disability, or domestic violence.

For the case not appropriately sanctioned, the MWA subrecipient did not engage the TANF program recipient in conciliation so they would begin participating in required activities and did not notify the FSD of noncompliance. The recipient should have been sanctioned for the month of January 2018. We question the amount of the sanction that was not imposed on the recipient for January 2018, which totaled $171 (100 percent federal share).

Rule 2 CFR Section 200.303(a) requires the non-federal entity to "[e]stablish and maintain effective internal control over the Federal award that provides reasonable assurance that the non-federal entity is managing the Federal award in compliance with Federal statutes, regulations, and the terms and conditions of the Federal award." To ensure controls are effective, the DSS needs to continue to review, strengthen, and enforce monitoring policies and procedures over MWA subrecipients to ensure work participation sanctions are imposed as required.

Recommendation

The DSS through the FSD continue to review, strengthen, and enforce controls to ensure TANF program recipients who fail to meet work participation requirements are sanctioned as required, or referred to the FSD for exemption.

Auditee's Response

We disagree with the auditor's finding. Our Corrective Action Plan includes an explanation and specific reasons for our disagreement.

Auditor's Comment

The DSS's Corrective Action Plan states the DSS disagrees with the finding because the DSS believes the errors and associated questioned costs were immaterial, and therefore, corrective action is not warranted. However, as discussed with DSS officials during the exit conference, we are required by 2 CFR 200.516(a)(3) to report this finding because likely questioned costs are greater than $25,000 for the compliance requirement. Based on our test results, likely questioned costs are estimated to exceed $70,000.[8] Therefore, the finding remains valid.

2018-011. TANF Subrecipient Risk Assessments

Federal Agency:	Department of Health and Human Services
Federal Program:	93.558 Temporary Assistance for Needy Families (TANF) 2017 - G1702MOTANF 2018 - G1802MOTANF and G1801MOTAN3
State Agency:	Department of Social Services (DSS) - Division of Finance and Administrative Services (DFAS) and Family Support Division (FSD)
Type of Finding:	Internal Control (Significant Deficiency) and Noncompliance

[8] This was calculated by taking total state fiscal year 2018 TANF payments (approximately $29 million) times the percentage of payments associated with recipients with no reported work activities referred to MWA subrecipients during the month tested (3,461 divided by 24,751, or approximately 14 percent) times the percentage of questioned costs for the total amounts tested ($171 divided by $9,807, or approximately 2 percent).

The DSS did not prepare risk assessments for some TANF program subrecipients to determine the nature, timing, and extent of monitoring procedures. During the year ended June 30, 2018, the DSS disbursed approximately $3 million in TANF program (federal) funds to approximately 75 subrecipients. Many of these subrecipients also received TANF program maintenance of effort (state) funds.

Rule 2 CFR Section 200.331(b) requires pass-through entities to evaluate each subrecipient's risk of noncompliance with federal statutes, regulations, and the terms and conditions of the subaward for purposes of determining the appropriate subrecipient monitoring.

The DFAS and the FSD perform various procedures to monitor TANF program subrecipients. However, during the year ended June 30, 2018, the DSS did not prepare risk assessments for 23 subrecipients of 3 TANF-funded programs[9] as follows:

Program	Number of Subrecipients With No Risk Assessments Performed	Related TANF Funding
Alternatives to Abortion	9	$ 1,419,456
Missouri Work Assistance (MWA)	10	354,947
Healthy Marriage and Responsible Fathers	4	125,300
Total	23	$ 1,899,703

The DFAS and the FSD performed procedures to monitor these subrecipients; however, the monitoring procedures were not based on documented risk assessments. Monitoring procedures, which varied among the programs, generally included reviewing external audits, following up on corrective actions related to audit findings, reviewing periodic subrecipient reports, providing training or technical assistance when needed, performing on-site visits, verifying invoices to supporting documentation, and/or testing cases handled by the subrecipients. As noted at finding number 2018-010, the FSD's monitoring of the MWA subrecipients for compliance with work participation sanction requirements was not sufficient

To comply with federal regulations, the DSS should develop procedures to ensure risk assessments are prepared for all subrecipients, and utilize the risk assessments in determining the nature, timing, and extent of monitoring procedures. Rule 2 CFR Section 200.303(a) requires the non-federal entity to

[9] These subrecipients and the TANF funding received were listed in a report prepared by the DFAS supporting the TANF payments to subrecipients reported on the DSS's Schedule of Expenditures of Federal Awards.

"[e]stablish and maintain effective internal control over the Federal award that provides reasonable assurance that the non-federal entity is managing the Federal award in compliance with Federal statutes, regulations, and the terms and conditions of the Federal award."

Recommendation

The DSS through the DFAS and the FSD strengthen controls and procedures to ensure evaluations of each subrecipient's risk of noncompliance with federal statutes, regulations, and the terms and conditions of the subaward are performed and used for monitoring decisions as required by federal regulations.

Auditee's Response

We partially agree with the auditor's finding. Our Corrective Action Plan includes an explanation and specific reasons for our disagreement and any planned actions to address the finding.

Auditor's Comment

The DSS's Corrective Action Plan states the DSS partially agrees with the finding because the DSS provided documented risk assessments for several programs during the audit and monitored subrecipients based on the assessment of risk. However, during the audit, DSS officials agreed they had not performed risk assessments on the 23 subrecipients cited in the finding; therefore, the finding remains valid.

2018-012. VOCA Subrecipient Monitoring

Federal Agency:	Department of Health and Human Services
Federal Program:	16.575 Crime Victim Assistance (CVA) 2015-VA-GX-4065 2016-VA-GX-4056 2017-VA-GX-4056 2018-V2-GX-0035
State Agency:	Department of Social Services (DSS) - Division of Finance and Administrative Services (DFAS)
Type of Finding:	Internal Control (Significant Deficiency)

The DFAS did not perform monitoring reviews in accordance with its monitoring policy for the CVA program, also known as the Victims of Crime Act (VOCA) program. During the year ended June 30, 2018, the DFAS disbursed approximately $35.9 million to approximately 120 subrecipients for costs related to the VOCA program.

Rule 2 CFR Section 200.331(b) requires pass-through entities to evaluate each subrecipient's risk of noncompliance with federal statutes, regulations, and the terms and conditions of the subaward for purposes of determining the appropriate subrecipient monitoring. Rule 2 CFR Section 200.331(d) requires pass-through entities to monitor the activities of subrecipients as necessary to ensure the subaward is used for authorized purposes, in compliance with federal statutes, regulations, and the terms and conditions of the subaward, and to ensure subaward performance goals are achieved. Additionally, 28

CFR Section 94.106 requires the DFAS to conduct regular desk monitoring of all subrecipients and to perform on-site monitoring of all subrecipients at least once every 2 years.

Effective July 1, 2017, the General Assembly transferred the state's administration of the VOCA program from the Department of Public Safety to the DFAS. At that time, the DFAS began preparing a VOCA Monitoring Policy to address various subrecipient monitoring requirements. The policy requires the DFAS to perform a risk assessment for each subrecipient every 2 years and assess the risk of noncompliance as high, moderate, or low based on various risk factors such as results of previous audits and monitoring reviews, turnover of key personnel, and timeliness of reporting. The policy requires the risk assessments be used to determine the nature and frequency of monitoring activities.

DFAS monitoring procedures include on-site visits, desk reviews, and random sampling. On-site visits include inspections of records, tours of facilities, interviews of employees, and other procedures. Desk monitoring includes review and verification of subrecipient documentation supporting a monthly invoice or quarterly report. Random sampling includes review and verification of subrecipient documentation supporting a portion of a monthly invoice. For the federal fiscal year ending September 30, the monitoring policy requires the following monitoring reviews based on the assessed risk level:

	Assessed risk		
Monitoring Type	High	Moderate	Low
On-site	Yearly	Every 2 years	Every 2 years
Desk	Quarterly	Semi-annually	Yearly
Random Sampling	Every other month	Quarterly	Yearly

Around early January 2018, the DFAS performed risk assessments for all VOCA program subrecipients; however, the DFAS did not monitor the subrecipients in accordance with the monitoring policy. The DFAS assessed 11 subrecipients as high risk, 20 subrecipients as moderate risk, and 89 subrecipients as low risk. We selected 12 subrecipients to determine the extent of the DFAS monitoring reviews performed during the year ended September 30, 2018, which is approximately a 9-month period after the risk assessments were performed in early 2018. For 8 of the 12 subrecipients reviewed, the DFAS performed less than the required number of monitoring reviews. For example, for 3 of the 4 subrecipients assessed as high risk, the DFAS performed only 1 desk review when at least 3 desk reviews were required during the 9-month period. Additionally, for the 4 subrecipients assessed as high risk, the DFAS performed zero to 2 random sampling reviews for each of these subrecipients, when at least 4 random sampling

reviews were required during the period.[10] A DFAS official indicated staffing turnover limited the number of monitoring reviews performed.

In order to demonstrate adequate internal controls over compliance with subrecipient monitoring requirements, it is necessary for the DFAS to follow its established policies and procedures. In addition, 2 CFR Section 200.303(a) requires the non-federal entity to "[e]stablish and maintain effective internal control over the Federal award that provides reasonable assurance that the non-federal entity is managing the Federal award in compliance with Federal statutes, regulations, and the terms and conditions of the Federal award."

Recommendation

The DSS through the DFAS ensure VOCA program subrecipients are monitored in accordance with the monitoring policy.

Auditee's Response

We partially agree with the auditor's finding. Our Corrective Action Plan includes an explanation and specific reasons for our disagreement and any planned actions to address the finding.

Auditor's Comment

The DSS's Corrective Action Plan (CAP) states the DSS partially agrees with the finding. The CAP states the DFAS monitoring policy is more stringent than required by the grantor agency, and desk reviews could not be completed for some subrecipients because the subrecipients had submitted no invoices during certain quarters. However, as noted in the finding and as discussed with DSS officials during the audit, all 8 subrecipients identified in the finding as not having the required number of monitoring reviews had submitted a sufficient number of invoices requiring desk or random sampling reviews. Additionally, as noted in the finding, the DSS is required to establish and maintain controls over federal awards. By not following its own policies and procedures, the DSS cannot effectively demonstrate it has maintained adequate VOCA subrecipient monitoring internal controls. Therefore, the finding remains valid.

2018-013. MO HealthNet Division Provider Eligibility

Federal Agency:	Department of Health and Human Services (DHHS)
Federal Program:	93.767 Children's Health Insurance Program
	2016 - 1605MO5021
	2017 - 1705MO5021
	2018 - 1805MO5021
	93.778 Medical Assistance Program
	2017 - 1705MO5MAP and 1705MO5ADM
	2018 - 1805MO5MAP and 1805MO5ADM

[10] Each of the 4 high-risk subrecipients reviewed submitted at least 6 invoices during the 9-month period, 1 submitted invoices every month, 2 submitted invoices during 8 months, and 1 submitted invoices during 6 months.

State Agency:	Department of Social Services (DSS) - MO HealthNet Division (MHD) and Missouri Medicaid Audit and Compliance (MMAC)
Type of Finding:	Internal Control (Material Weakness) and Noncompliance

As noted in our prior two audit reports,[11] the DSS did not establish effective internal controls over and did not fully implement federal revalidation requirements, effective in September 2016, for providers participating in the Medical Assistance Program (Medicaid) and the Children's Health Insurance Program (CHIP). As of June 30, 2018, the DSS had not performed required revalidations for 48 percent of Medicaid and CHIP providers requiring revalidation. There were approximately 60,700 Medicaid and CHIP providers enrolled as of June 30, 2018.

To enroll in the Medicaid and CHIP programs, providers of medical services apply to the MMAC Provider Enrollment Unit, which is responsible for determining the eligibility of providers and performing eligibility revalidations. Rule 42 CFR Section 455.412[12] specifies the enrollment screening (eligibility determination) requirements. The revalidation process involves multiple steps, including reviewing results of ongoing provider monitoring procedures, such as checking federal and state provider databases for excluded providers.

Rule 42 CFR Section 455.414,[12] effective March 2011 with an extended implementation deadline of September 2016,[13] established additional requirements regarding provider eligibility, requiring states to revalidate the eligibility of all Medicaid and CHIP providers, regardless of provider type, at least every 5 years. In addition, the DHHS-CMS issued the Medicaid Provider Enrollment Compendium on January 4, 2017, to clarify how states are expected to comply with the federal regulations. To implement the new requirements, the DSS established state regulation 13 CSR 65-2.020, which gave the DSS authority to implement provider revalidations, effective July 30, 2014; and modified the provider enrollment system for revalidations. MMAC Provider Enrollment Unit personnel began manually performing revalidations in April 2015 and using the system to perform revalidations in July 2016.

[11] *State of Missouri Single Audit*, finding numbers 2017-013 and 2016-003A.

[12] Rule 42 CFR Section 457.990 requires the same enrollment and revalidation requirements for CHIP providers as Medicaid providers, established as 42 CFR Part 455, subpart E, which includes Sections 455.412 and 455.414.

[13] Sub-regulatory Guidance published by the DHHS - Centers for Medicare and Medicaid Services (DHHS-CMS) on December 23, 2011, required implementation of the new revalidation requirements by September 24, 2016; specifically, revalidations for all providers enrolled on or before September 25, 2011, were to be completed by September 24, 2016.

The MMAC has established procedures for performing provider revalidations; however, the procedures were not designed effectively to ensure all providers were revalidated within required timeframes. As explained in our prior audit reports, the revalidations were not performed for 87 percent of the Medicaid and CHIP providers requiring revalidation as of September 24, 2016, and for 71 percent of providers as of June 30, 2017. According to DSS reports, as of June 30, 2018, there were approximately 33,200 active providers enrolled in the Medicaid and CHIP on or before June 30, 2013, that required revalidation. At that time, the MMAC had completed revalidations for approximately 17,200 providers, but had not completed revalidations for the remaining 16,000 providers (48 percent).

DSS officials indicated the backlog of revalidations continued to occur because of difficulties associated with the manual revalidation process and inadequate staff resources to handle the volume of revalidations and new enrollments. During state fiscal year 2018, the legislature authorized the DSS to hire additional staff, the MMAC created a unit dedicated to performing revalidations, and the DSS contracted with a vendor to create a web portal to streamline provider submissions. MMAC officials indicated they plan to have all revalidations completed and on a rotational 5-year schedule by June 30, 2019.

We selected 60 providers paid during the year ended June 30, 2018, to test compliance with federal eligibility requirements. While the MMAC had performed various monitoring procedures for each provider, revalidations had not been completed for all 38 providers requiring a revalidation. As a result, the DSS did not comply with federal revalidation requirements.

In July 2018, the DHHS-CMS, Division of Medicaid and Children's Health Operations, issued a decision letter stating it concurred with our year ended June 30, 2017, audit finding number 2017-013; however, it did not require an adjustment for the questioned costs because there is no federal regulation or policy that requires a financial penalty or disallowance action for payments made to providers that have not been revalidated and are otherwise eligible providers.

To ensure compliance with federal regulations, the DSS needs to follow established controls over performing revalidations of Medicaid and CHIP providers. Rule 2 CFR Section 200.303(a) requires the non-federal entity to "[e]stablish and maintain effective internal control over the Federal award that provides reasonable assurance that the non-federal entity is managing the Federal award in compliance with Federal statutes, regulations, and the terms and conditions of the Federal award."

Recommendation

The DSS through the MHD and MMAC continue to implement internal controls designed to ensure Medicaid and CHIP provider revalidations are performed every 5 years as required by federal regulations.

Auditee's Response

We agree with the auditor's finding. Our Corrective Action Plan includes our planned actions to address the finding.

2018-014. Medicaid Developmental Disabilities Comprehensive Waiver Per Diem Rates

Federal Agency:	Department of Health and Human Services (DHHS)
Federal Program:	93.778 Medical Assistance Program 2017-1705MO5MAP and 1705MO5ADM 2018-1805MO5MAP and 1805MO5ADM
State Agency:	Department of Mental Health (DMH) - Division of Developmental Disabilities (DD)
Type of Finding:	Noncompliance
Questioned Costs:	$732,022

As noted in our prior three audit reports,[14] the DD continued to pay historical per diem rates to providers for residential habilitation services provided to participants of the Home and Community Based Services (HCBS), Developmental Disabilities Comprehensive Waiver (Comprehensive Waiver) program, but did not retain adequate documentation to support these rates. As a result, the DD could not demonstrate some amounts paid were allowable costs of the Comprehensive Waiver program.

The DD with its six habilitation centers and five regional offices is responsible for the direct administration of various Medical Assistance Program (Medicaid)-funded HCBS programs for children and adults with disabilities, including the Comprehensive Waiver program. Various types of services are allowed under the waiver, including residential habilitation services provided to 1,152 participants in group homes and 5,143 participants served by individualized supported living (ISL) providers during the year ended June 30, 2018. Residential habilitation services include care, supervision, and skills training in activities of daily living, home management, and community integration. Providers are paid a per diem rate for each participant receiving these services, based on the individual's needs. Certain costs, such as room and board, are not allowed to be included in per diem rates under the waiver program. During the year ended June 30, 2018, per diem payments for group home services totaled approximately $132 million, and per diem payments for ISL services totaled approximately $528 million.

In October 2013, the DD began phasing in acuity-based per diem rates to replace historical rates for residential habilitation services, and renewed the

[14] *State of Missouri Single Audit*, finding numbers 2017-017, 2016-006, and 2015-015.

Comprehensive Waiver in July 2016 to include the new rates. However, these new rates were not fully phased in as of June 30, 2018. DD officials indicated the updated rates should be fully phased in within the next few years. For participants that received residential habilitation services during the year ended June 30, 2018, DD officials indicated the DMH paid acuity-based per diem rates for approximately half the participants and historical per diem rates for the other half.

To test compliance with various Comprehensive Waiver program requirements, we tested 60 payments to service providers during the year ended June 30, 2018. Of these 60 payments, 37 were to ISL providers and 15 were to group homes for habilitation services. The DD did not retain documentation to support per diem rates, paid at historical rates, for 8 of the 37 ISL habilitation service payments tested and 5 of the 15 group home habilitation service payments tested. The DD retained the original ISL budgets, the group home individual plans of care, and cost of living allowance (COLA) notices supporting some per diem rate increases. However, these documents did not show how the rates were originally determined or what costs were included in the per diem rates. The remaining 29 ISL and 10 group home payments were based on acuity-based per diem rates or historical rates that were less than or equal to acuity-based rates. Payments to providers for habilitation services provided to the 13 participants during the year ended June 30, 2018, for which the historical per diem rates were not supported or exceeded acuity-based rates, totaled $1,141,466. We question the federal share, or $732,022 (64.13 percent).

Audits performed by the federal DHHS - Office of Inspector General (DHHS-OIG), *Missouri Claimed Unallowable and Unsupported Medicaid Payments for Group Home Habilitation Services*, released in August 2015, and *Missouri Claimed Unallowable and Unsupported Medicaid Payments for Individualized Supported Living Habilitation Services*, released in March 2016, noted similar concerns with unsupported per diem rates for some group home payments and noted some ISL payments included unapproved and unallowable costs. The DHHS-OIG audits also determined several per diem rates that were supported by adequate documentation included room and board costs, which are not allowable under the Comprehensive Waiver program.

In July 2018, the DHHS - Centers for Medicare and Medicaid Services (DHHS-CMS), Division of Medicaid and Children's Health Operations issued a decision letter stating it did not concur with our fiscal year 2017 audit finding because the DMH changed to the acuity-based rate-setting method for residential habilitation per diem rates, effective July 2016. However, as noted above, payments to providers for those participants that have not been transitioned from the historical per diem rates to the acuity-based per diem rates, are not adequately supported and documented as required by federal

regulations. Similar errors of noncompliance will likely continue until all participants are transitioned to the acuity-based rate model.

Without proper documentation of the payment rates, the DD cannot demonstrate that payments based on these rates are proper and only include allowable costs. Rule 42 CFR Section 447.203(a) states "[t]he agency must maintain documentation of payment rates. . . ." Rule 2 CFR Section 200.403(g) states costs must be adequately documented to be allowable. Also, the approved DD Comprehensive Waiver Program Application, Appendix I: Financial Accountability, section I-2(e), states "[r]ecords documenting the audit trail of adjudicated claims (including supporting documentation) are maintained by the Medicaid agency, the operating agency (if applicable), and providers of the waiver services for a minimum period of 3 years as required in 45 CFR [Section] 92.42." Adequate documentation of habilitation services per diem rates is necessary to ensure compliance with the federal requirements related to the Comprehensive Waiver program and to ensure only allowable costs are included in the per diem rates.

Recommendation

The DMH through the DD continue to transition all per diem rates paid to providers for residential habilitation services provided under the Comprehensive Waiver program from historical rates to acuity-based rates, ensure documentation to support per diem rates is maintained as required, and ensure the rates only include allowable costs.

Auditee's Response

We disagree with the auditor's finding. Our Corrective Action Plan includes an explanation and specific reasons for our disagreement.

Auditor's Comment

The DMH Corrective Action Plan states the DMH disagrees with the finding because the DMH switched to an acuity-based rate methodology and any historical rates currently in place are expressed as a percentage of the acuity-based rates. However, payments to providers for any participants currently at the historical per diem rates are not adequately supported and documented as required by federal regulations. Therefore, the finding remains valid. Similar errors of noncompliance will likely continue until all participants are transitioned to the acuity-based rate model.

2018-015. State Emergency Management Agency Subrecipient Monitoring

Federal Agency: Federal Emergency Management Agency (FEMA)
Federal Program: 97.036 Disaster Grants - Public Assistance (Presidentially Declared Disasters)
2011 - FEMA-1980-DR-MO
2013 - FEMA-4130-DR-MO
2013 - FEMA-4144-DR-MO
2014 - FEMA-4200-DR-MO
2015 - FEMA-4238-DR-MO
2015 - FEMA-4250-DR-MO
2017 - FEMA-4317-DR-MO

State Agency:	Department of Public Safety - State Emergency Management Agency (SEMA)
Type of Finding:	A - Internal Control (Significant Deficiency) and Noncompliance B - Internal Control (Significant Deficiency) and Noncompliance C - Internal Control (Significant Deficiency) and Noncompliance

The SEMA did not perform all required subrecipient risk assessments, perform monitoring reviews in accordance with its monitoring policy, or monitor subrecipient compliance with cash management requirements for the Public Assistance (PA) program.

Rule 2 CFR Section 200.331(b) requires pass-through entities to evaluate each subrecipient's risk of noncompliance with federal statutes, regulations, and the terms and conditions of the subaward for purposes of determining the appropriate subrecipient monitoring. Office of Management and Budget (OMB) Circular A-133 Section 400(d)(3) and 2 CFR Section 200.331(d) require monitoring the activities of a subrecipient as necessary to ensure the subaward is used for authorized purposes, in compliance with federal statutes, regulations, and the terms and conditions of the subaward, and that subaward performance goals are achieved. The SEMA fiscal and PA departments perform various procedures to monitor subrecipients of the PA program.

To establish controls over new Uniform Guidance[15] requirements related to subrecipient monitoring, the SEMA implemented the Recovery Division Monitoring Policy, effective March 8, 2017. This policy requires the fiscal department to perform risk assessments and classify the subrecipient as low risk, medium risk, or high risk. It also requires fiscal personnel to monitor all subrecipients at least annually, and requires desk monitoring for low-risk subrecipients, desk monitoring or on-site monitoring for medium-risk subrecipients, and on-site monitoring for high-risk subrecipients. This new policy applies to subrecipients of disaster grants awarded on or after the Uniform Guidance effective date of December 26, 2014. In addition to fiscal department monitoring of subrecipients, the PA department performs ongoing and close-out monitoring of all subrecipients by providing day-to-day oversight, reconciling and approving programmatic subrecipient expenditures, and providing general support and assistance relating to project implementation.

[15] Title 2 U.S. *Code of Federal Regulations* Part 200, *Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards* (Uniform Guidance)

During the year ended June 30, 2018, the SEMA disbursed approximately $45 million to approximately 290 subrecipients of the PA program through 7 FEMA grants. Four grants approved from 2011 through 2014 are subject to OMB Circular A-133 requirements and three grants (disaster numbers 4238, 4250, and 4317) approved during and after 2015 are subject to Uniform Guidance requirements. Of the disbursements during the year ended June 30, 2018, approximately 25 percent was subject to OMB Circular A-133 requirements and approximately 75 percent was subject to Uniform Guidance requirements.

During the year ended June 30, 2018, fiscal department personnel completed risk assessments for all subrecipients of disaster grant numbers 4238 and 4250. These risk assessments were all completed between May 2017 and July 2017 in response to a FEMA Financial Monitoring Review[16] that noted the SEMA did not fully implement the subrecipient monitoring plan for the PA program. Also, during the year ended June 30, 2018, fiscal department personnel performed monitoring reviews of 21 subrecipients.

A. Risk assessments

The fiscal department did not perform risk assessments for all subrecipients, as required by the Recovery Division Monitoring Policy and the Uniform Guidance. In addition, the policy does not address when subrecipient risk assessments should be performed, and the fiscal department's current practice provides for risk assessments that are not effective.

During May through July 2017, subsequent to the FEMA review, fiscal department personnel completed risk assessments for all subrecipients of disaster grant numbers 4238 and 4250. However, as of June 30, 2018, the only risk assessments performed for the 210 subrecipients of disaster number 4317, were the risk assessments performed for the 125 subrecipients that also received funding from disaster grant numbers 4238 and 4250. Risk assessments were not performed for the remaining 85 subrecipients of disaster grant number 4317 (40 percent). Fiscal department personnel indicated they were required by the FEMA to complete the risk assessments for the two open disaster grant numbers (4238 and 4250) shortly after the FEMA review. Because disaster number 4317 was subsequently declared and SEMA's normal procedure is to perform the risk assessments at the end of the project, risk assessments were not performed for disaster grant number 4317.

When a risk assessment is performed at the end of the project, which can be up to 5 years after project initiation, the risk assessment is not effective because the fiscal department cannot use the risk assessment to monitor the subrecipient for that project. It can only be used for subsequent projects for which the subrecipient receives a subaward. For new subrecipients that have

[16] FEMA *Financial Monitoring Review - R7-GM-2017-006 - Results Letter*, June 29, 2017

not received a previous subaward, the fiscal department lacks the required risk assessment to guide its monitoring of the subrecipient.

To comply with Uniform Guidance risk assessment requirements, which require that risk assessments be used for monitoring decisions, the fiscal department should evaluate its current practices, and document in the Recovery Division Monitoring Policy when risk assessments should be performed. Rule 2 CFR Section 200.303(a) requires the non-federal entity to "[e]stablish and maintain effective internal control over the Federal award that provides reasonable assurance that the non-Federal entity is managing the Federal award in compliance with Federal statutes, regulations, and the terms and conditions of the Federal award."

B. Fiscal department monitoring reviews

The fiscal department did not monitor subrecipients in accordance with the Recovery Division Monitoring Policy. Although the policy requires monitoring of all subrecipients at least annually, the fiscal department's monitoring of subrecipients was limited to only 10 percent, or 21, of the 210 subrecipients of disaster grant number 4317. The fiscal department did not select any of the subrecipients for disaster grant numbers 4238 or 4250 to monitor for compliance with Uniform Guidance requirements.

In addition, the fiscal department did not use the prepared risk assessments to determine the type of monitoring necessary for each subrecipient. For each of the 21 subrecipients monitored during the year ended June 30, 2018, fiscal department personnel performed desk monitoring procedures regardless of the subrecipient's assessed risk as noted in the following table.

Number of Subrecipients	Assessed Risk	Required Monitoring	Actual Monitoring
1	Low	Desk monitoring	Desk monitoring
10	Medium	Desk monitoring or On-site visit	Desk monitoring
1	High	On-site visit	Desk monitoring
9	None(1)	Unknown(1)	Desk monitoring

(1) SEMA personnel did not perform a risk assessment as required; therefore, the SEMA does not know the type of monitoring that should have been performed.

Fiscal department personnel stated they did not have a sufficient number of personnel to monitor all subrecipients in accordance with the Recovery Division Monitoring Policy, and when developing the policy, they did not realize the magnitude of subrecipients that would require monitoring.

In order to demonstrate adequate internal controls over compliance with subrecipient monitoring requirements, it is necessary for the SEMA to follow its established policies and procedures. The fiscal department should periodically review the Recovery Division Monitoring Policy for

completeness and effectiveness, and review for compliance with the policy. If the fiscal department determines the policy is too labor intensive, revisions should be considered. Rule 2 CFR Section 200.303(a) requires the non-federal entity to "[e]stablish and maintain effective internal control over the Federal award that provides reasonable assurance that the non-Federal entity is managing the Federal award in compliance with Federal statutes, regulations, and the terms and conditions of the Federal award."

C. Monitoring of subrecipient cash management

The SEMA has not established procedures to ensure subrecipients minimize the time elapsed between receipt of funds to disbursement of funds for program purposes.

Some PA subawards provide for advance payments to subrecipients. When requesting project funds, subrecipients complete and submit form PA-8 to the SEMA, which includes a certification the subrecipient will disburse the monies within 30 days of receipt of federal funds. However, the SEMA does not monitor to ensure subrecipients disburse the monies within the required 30 days. The PA department periodically requests subrecipients to provide copies of checks or other documentation supporting actual disbursements; however; the department does not review these records for compliance with the 30-day requirement.

Rule 2 CFR Section 200.305(b) requires subrecipients to minimize the time elapsing between the transfer of funds from the pass-through entity and disbursement of the funds. Without procedures to monitor for compliance with SEMA policy and federal regulations, the SEMA has little assurance the subrecipients are complying with these requirements. In addition, OMB Circular A-133 Section 300(b) and 2 CFR Section 200.303(a) require the non-federal entity to maintain internal control over federal awards that provides reasonable assurance that the non-federal entity is managing federal awards in compliance with federal laws and terms and conditions of the federal awards.

Recommendations

The SEMA:

A. Through the fiscal department ensure evaluations of each subrecipient's risk of noncompliance with federal statutes, regulations, and the terms and conditions of the subaward are performed as required by the Uniform Guidance.

B. Through the fiscal department review, strengthen, and enforce policies and procedures regarding subrecipient monitoring.

C. Establish controls and procedures to ensure subrecipients comply with SEMA policy and federal regulations requiring subrecipients to

minimize the time elapsed between the receipt of federal funds to disbursement of the funds.

Auditee's Response

A. We agree with the auditor's finding. Our Corrective Action Plan includes our planned actions to address the finding.

B. We agree with the auditor's finding. Our Corrective Action Plan includes our planned actions to address the finding.

C. We agree with the auditor's finding. Our Corrective Action Plan includes our planned actions to address the finding.

2018-016. State Emergency Management Agency Subrecipient Audits and Awards

Federal Agency:	Federal Emergency Management Agency (FEMA)
Federal Program:	97.036 Disaster Grants - Public Assistance (Presidentially Declared Disasters) 2011 - FEMA-1980-DR-MO 2013 - FEMA-4130-DR-MO 2013 - FEMA-4144-DR-MO 2014 - FEMA-4200-DR-MO 2015 - FEMA-4238-DR-MO 2015 - FEMA-4250-DR-MO 2017 - FEMA-4317-DR-MO
State Agency:	Department of Public Safety - State Emergency Management (SEMA)
Type of Finding:	A - Internal Control (Significant Deficiency) and Noncompliance B - Internal Control (Significant Deficiency) and Noncompliance

The SEMA has not established adequate controls to follow up on subrecipient audit findings of the Public Assistance (PA) program or to ensure all required award information is communicated to the subrecipients. During the year ended June 30, 2018, the SEMA disbursed approximately $45 million to approximately 290 subrecipients of the PA program through 7 FEMA grants.

A. Subrecipient audits

The fiscal department has not established controls and procedures to follow up on subrecipient audit findings.

As the grantor agency, the SEMA is required to monitor the activities of subrecipients, including reviewing subrecipient audit reports. Each subrecipient that spent in excess of $750,000 in federal awards during its fiscal year must obtain an audit in accordance with the Uniform Guidance within 9 months after the end of the fiscal year. Office of Management and Budget (OMB) Circular A-133 Section 400(d)(4) and 2 CFR Section 200.331(f) require the SEMA to verify the subrecipients have been audited. OMB Circular A-133 Section 400(d)(5) and 2 CFR Section 200.331(d)

require the SEMA to follow up on audit findings related to SEMA awards, issue a management decision on the audit findings, and ensure the subrecipient takes timely and appropriate action to correct the deficiency(ies). These requirements help ensure federal awards are used for purposes that are authorized and within the provisions of contracts or grant agreements. The SEMA fiscal department is responsible for obtaining and reviewing subrecipient audit reports.

The SEMA's procedures, documented in its Administrative Plan, do not require the SEMA to follow up on the audit findings to ensure recommendations have been implemented or require the SEMA to issue a management decision on the audit findings. During our review of subrecipient audit reports issued during the year ended June 30, 2018, we identified 2 subrecipients with audit findings related to the PA program. The SEMA did not follow up or issue a management decision on any of these findings as required by federal regulations. Fiscal department personnel indicated they did not follow up on these findings because they accepted the subrecipients' responses to the audit findings, and they believed no further action was necessary.

To strengthen internal controls over subrecipient monitoring and ensure compliance with federal regulations, the SEMA should establish procedures to follow up on subrecipient audit findings involving PA program awards and issue management decisions on subrecipient audit findings. OMB Circular A-133 Section 300(b) and 2 CFR Section 200.303(a) require the non-federal entity to maintain internal control over federal awards that provides reasonable assurance that the non-federal entity is managing federal awards in compliance with federal laws and terms and conditions of the federal awards.

B. Award identification

The SEMA did not establish internal controls to ensure subawards included all federal award information required by federal regulations. The SEMA sends an award letter at the time of the subaward, notifying the subrecipient of certain required information. However, the award letter does not identify the Catalog of Federal Domestic Assistance (CFDA) number and name as required by federal regulations. SEMA personnel indicated this information was verbally communicated to subrecipients, but could not explain why it was not formally documented in the award letters.

OMB Circular A-133 Section 400(d) and 2 CFR Section 200.331(a) require the SEMA, as a pass-through entity, to ensure every subaward includes certain information at the time of the subaward, including the CFDA number and name.

Without properly communicating federal award information to subrecipients, the SEMA has less assurance subrecipients properly prepare their Schedules

of Expenditures of Federal Awards (SEFAs) and obtain required single audits. Additionally, OMB Circular A-133 Section 300(b) and 2 CFR Section 200.303(a) require the non-federal entity to maintain internal control over federal awards that provides reasonable assurance that the non-federal entity is managing federal awards in compliance with federal laws and terms and conditions of the federal awards.

Recommendations

The SEMA:

A. Strengthen internal controls and procedures to follow up on subrecipient audit findings related to PA program awards and issue management decisions for the applicable audit findings as required by federal regulations.

B. Strengthen internal controls and procedures to communicate all required federal award information to subrecipients at the time of the subaward as required by federal regulations.

Auditee's Response

A. We agree with the auditor's finding. Our Corrective Action Plan includes our planned actions to address the finding.

B. We agree with the auditor's finding. Our Corrective Action Plan includes our planned actions to address the finding.

2018-017. MoDOT Project Closeouts and Final Vouchers

Federal Agency:	Federal Highway Administration (FHWA)
Federal Program:	20.205 Highway Planning and Construction Various awards
State Agency:	Missouri Department of Transportation (MoDOT)
Type of Finding:	Internal Control (Significant Deficiency) and Noncompliance
Questioned Costs:	$19,432

The MoDOT's procedures related to preparation and review of Highway Planning and Construction program project closeouts and final vouchers were not sufficient to ensure the proper reporting of total project costs and the proper determination of the federal and state/local shares of project costs. As a result, the MoDOT incorrectly reported the costs of 2 projects, causing an overstatement of the federal share of costs for one project and an incorrect allocation of local entity matching funds for another project.

Rule 2 CFR Section 200.343 requires the MoDOT to perform project closeout procedures and submit required financial reports to the FHWA. Title 23 USC Section 120(b) sets the federal share payable for Highway Planning and Construction program projects at 80 percent of total project costs. Title 23 USC Section 133(f)(3) allows local entities receiving MoDOT subgrants to claim soft match credits against the required local share. These soft match

credits are earned by local entities for certain local expenditures on qualifying non-federal aid projects.

As project costs are incurred, the MoDOT's Financial Services unit requests reimbursement from the FHWA for the federal share of project costs. After project completion, the MoDOT's closeout procedures require the Financial Services Specialist to review and reconcile project costs to ensure the costs were properly claimed for federal reimbursement and to prepare and submit a final voucher to the FHWA reporting total project costs, federal share, and state/local share. The final voucher is completed using information reported in the state's computerized accounting (SAM II) system, and/or the project file. The Financial Services Manager is responsible for reviewing and approving the final voucher. During the year ended June 30, 2018, the MoDOT closed and prepared final vouchers for 592 projects.

We tested a sample of final vouchers filed during the year ended June 30, 2018, for 40 projects and noted 2 projects (5 percent) for which project costs were overstated and the federal and state/local shares were incorrectly reported.

For one project, total costs, federal share, and state share were overstated because total actual payments were incorrectly reported in the final project voucher as the federal share of costs. The federal share percentage had been incorrectly recorded in the SAM II system as 100 percent rather than the required 80 percent. When preparing the final project voucher, the staff used the incorrect federal share amount shown in the SAM II system to calculate the state share of costs. Consequently, state funds and total project costs were incorrectly reported in the final project voucher based on the overstated federal share. We question the federal share of the project costs incorrectly claimed for reimbursement, or $19,432, as noted in the following table.

		Reported	Actual	Reported Over/(Under) Actual
Federal funds	$	97,160	77,728	19,432
State funds		24,290	19,432	4,458
Total project costs	$	121,450	97,160	23,890

For another project, total costs and local funds were overstated and federal share (including local soft match) was understated because (1) a portion of the local entity's soft match credits was omitted from the federal funds, (2) some local entity right of way costs were excluded from the federal share, and (3) an estimate, rather than the actual, was incorrectly reported for local funds. These errors caused the local entity to incur unreimbursed right of way costs totaling $7,481 and to pay $6,857 from local funds rather than using available soft match credits, as noted in the following table.

		Reported	Actual	Reported Over/(Under) Actual
Federal funds:				
federal share	$	530,218	537,699	(7,481)
local soft match		123,947	130,804	(6,857)
Federal funds	$	654,165	668,503	(14,338)
Local funds		28,275	3,621	24,654
Total project costs	$	682,440	672,124	10,316

These misstatements were not detected by the Financial Services Manager during review of the final vouchers. More thorough reviews of actual project costs, match amounts, and available soft match credits are needed during the project closeout and final voucher preparation process.

Rule 2 CFR Section 200.303(a) requires the non-federal entity to "[e]stablish and maintain effective internal control over the Federal award that provides reasonable assurance that the non-Federal entity is managing the Federal award in compliance with Federal statutes, regulations, and the terms and conditions of the Federal award." Effective internal controls should include detailed reviews of actual project costs including comparisons of costs to supporting records, and recalculations of the federal, state, and local share amounts.

Recommendation

The MoDOT strengthen project closeout procedures to ensure project costs, including federal and state/local share are accurately reported on final vouchers.

Auditee's Response

We agree with the auditor's finding. Our Corrective Action Plan includes our planned actions to address the finding.

2018-018. MoDOT Subrecipient Risk Assessments

Federal Agency:	Federal Highway Administration
Federal Program:	20.205 Highway Planning and Construction Various awards
State Agency:	Missouri Department of Transportation (MoDOT)
Type of Finding:	Internal Control (Significant Deficiency) and Noncompliance

The MoDOT did not adequately perform and document risk assessments of Highway Planning and Construction program subrecipients (local public agencies (LPAs)), and did not use prepared risk assessments to determine the nature, timing, and extent of monitoring procedures. During the year ended June 30, 2018, the MoDOT disbursed approximately $108 million to approximately 245 LPAs for costs related to Highway Planning and Construction program projects.

Rule 2 CFR Section 200.331(b) requires pass-through entities to evaluate each LPA for the risk of noncompliance with federal statutes, regulations, and the terms and conditions of the subaward for purposes of determining the appropriate LPA monitoring. Rule 2 CFR Section 635.105 requires the MoDOT to ensure each LPA is adequately staffed and suitably equipped to satisfactorily complete the project, and to ensure LPA projects are completed in conformance with approved plans and specifications.

The MoDOT district offices are responsible for monitoring LPA performance. The district offices provide training to LPAs and monitor all LPA projects, including review and approval of plans, bids, contracts, and progress invoices, and performs periodic on-site inspections. The MoDOT developed an official LPA Certification Process document that requires district offices to perform risk assessments on spreadsheet forms and to classify each LPA as low, moderate, or high risk. According to a MoDOT official, the certification process was designed primarily to aid in satisfying monitoring requirements of 23 CFR Section 635.105, but was also intended to satisfy the requirements of 2 CFR Section 200.331(b). Additionally, the Audits and Investigations (AI) unit reviews external audits and performs agreed-upon procedures engagements for some LPAs.

However, we noted the MoDOT's risk assessments were not always completed and documented, and prepared risk assessments were not always used to make monitoring decisions. The LPA Certification Process document states the risk assessments affect the amount of oversight required, but the process provides no additional guidance regarding the monitoring activities necessary for each risk level. Additionally, the district offices did not use prepared risk assessments to determine the type of monitoring necessary for each LPA. According to a MoDOT official, prepared risk assessments are primarily used for making decisions about awarding future projects to the LPAs. Additionally, the spreadsheet forms prepared by the district offices detailing the risk assessments for each LPA were not always complete or consistently prepared. Neither the spreadsheet forms nor the LPA Certification Process document provide guidance for completing the risk assessments, such as the specific information to record for each risk factor and how to use the information to determine the LPA's risk level.

Furthermore, the AI did not adequately document evaluations of LPA risk of noncompliance for purposes of selecting entities for agreed upon procedures engagements (audits). An AI official indicated the AI considers certain risk factors such as prior experience and project size when identifying LPAs for which audits appear necessary. The AI provided a list of LPAs flagged for potential audit including brief comments about each listed LPA, but it was not clear from the documentation that risk had been assessed for each LPA, what factors caused the listed LPAs to be identified for potential audit, or the basis for selecting the LPAs for audit.

To comply with federal regulations, the MoDOT should strengthen risk assessment policies and procedures and fully utilize the risk assessments to determine the nature, timing, and extent of monitoring procedures. Rule 2 CFR Section 200.303(a) requires the non-federal entity to "[e]stablish and maintain effective internal control over the Federal award that provides reasonable assurance that the non-federal entity is managing the Federal award in compliance with Federal statutes, regulations, and the terms and conditions of the Federal award."

Recommendation

The MoDOT ensure risk of noncompliance with federal statutes, regulations, and terms and conditions of the subaward is assessed on each LPA, and used for monitoring decisions as required by federal regulations. Policies and procedures should be strengthened to define risk assessment criteria; require risk assessments to be complete and documented; and include guidelines for using the risk assessments to determine the nature, timing, and extent of monitoring procedures.

Auditee's Response

We agree with the auditor's finding. Our Corrective Action Plan includes our planned actions to address the finding.

Additional State Auditor's Reports

The Missouri State Auditor's Office regularly issues audit reports on various programs, agencies, and divisions of the state of Missouri. Audit reports may include issues related to the administration of federal programs. We reviewed the reports issued from April 2018 to March 2019 and the following reports relate to a federal program.

Report Number	Report Name
2018-032	Supplemental Nutrition Assistance Program (SNAP) Data Analytics Program
2018-064	Crime Victims' Compensation System Data Security
2018-105	Temporary Assistance for Needy Families (TANF) Data Analytics
2018-125	Home and Community Based Services
2018-134	Department of Social Services Prescription Drug Oversight
2019-008	Unemployment Insurance System Data Security

All reports are available on the Missouri State Auditor's Office website: http://auditor.mo.gov.

State of Missouri - Single Audit
Summary Schedule of Prior Audit Findings
Year Ended June 30, 2018

The Uniform Guidance requires the auditee to prepare a Summary Schedule of Prior Audit Findings to report the status of all audit findings included in the prior audit's Schedule of Findings and Questioned Costs. The schedule is also to report the status of findings included in the prior audit's Summary Schedule of Prior Audit Findings, except those that were corrected, no longer valid, or not warranting further action.

The Uniform Guidance requires the auditor to follow up on prior audit findings; perform procedures to assess the reasonableness of the Summary Schedule of Prior Audit Findings; and report, as a current year audit finding, when the auditor concludes the schedule materially misrepresents the status of any prior audit finding.

SUMMARY SCHEDULE OF PRIOR YEAR AUDIT FINDINGS

The Uniform Guidance requires the auditee to prepare a Summary Schedule of Prior Audit Findings to report the status of all audit findings included in the prior audit's Schedule of Findings and Questioned Costs. The Schedule is also to report the status of findings included in the prior audit's Summary Schedule of Prior Audit Findings, except those that were corrected, no longer valid, or not warranting further action.

The attached documents are the Summary Schedule of Prior Audit Findings for the year ended June 30, 2018, and includes all findings from the audit for the Fiscal Year ended June 30, 2017, and certain similar findings from the audits for the Fiscal Years ended June 30, 2016, 2015, 2014, 2013, 2012, 2011, and 2010.

These documents were prepared by the applicable State agencies as noted with each prior year finding.

2017-001A. Unemployment Compensation Fund - Financial Reporting and Benefit Payment Account Controls

State Agency: Department of Labor and Industrial Relations (DLIR)

The DLIR implemented the UInteract system without fully developing and testing financial reports needed to manage and report Unemployment Compensation Fund (UCF) activities. Some reports were inaccurate and some data was not converted completely and accurately from the legacy system to the UInteract system. As a result, certain UCF data submitted to the Office of Administration - Division of Accounting for inclusion in the *Missouri Comprehensive Annual Financial Report* for the year ended June 30, 2017, was misstated. In addition, corrections to system data were made in a manner that was not subject to the system's logging capabilities and there were no records or other audit trails supporting changes to the master records.

Recommendation:
The DLIR develop a comprehensive plan to resolve the identified UInteract system financial reporting issues. In addition, procedures should be established to ensure corrections to UInteract system data occur in a manner subject to the system's logging capabilities.

Status of Finding:
Corrective action was taken. Reporting issues have been addressed and corrections are logged and documented. The U.S. Department of Labor did not include this finding in its Initial Determination dated July 20, 2018; therefore, a response by DLIR was not required.

Contact Person: Rebecca Voss
Phone Number: 573-751-1135

2017-001B. Unemployment Compensation Fund - Financial Reporting and Benefit Payment Account Controls

State Agency: Department of Labor and Industrial Relations (DLIR)

Due to various UInteract system implementation and financial reporting problems, Unemployment Compensation Fund (UCF) net accounts receivable information submitted by the DLIR to the Office of Administration - Division of Accounting (DOA) was understated for the year ended June 30, 2017. Finalized accounts receivable reports, which were not developed until 11 months after system implementation and 5 months after fiscal year end, were not adequately tested for accuracy prior to submission to the DOA. The errors were not detected by DLIR staff and the incorrect information was used by DOA to prepare the *Missouri Comprehensive Annual Financial Report.*

Recommendation:
The DLIR implement controls and procedures to prepare and submit accurate and timely UCF accounts receivable reports to the DOA.

Status of Finding:
Corrective action was taken. DLIR implemented controls and procedures to ensure information provided to DOA was accurate and timely. The U.S. Department of Labor did not include this finding in its Initial Determination dated July 20, 2018; therefore, a response by DLIR was not required.

Contact Person: Rebecca Voss
Phone Number: 573-751-1135

2017-001C. Unemployment Compensation Fund - Financial Reporting and Benefit Payment Account Controls

State Agency: Department of Labor and Industrial Relations (DLIR)

The DLIR did not implement adequate controls and procedures for reporting and reconciling the activities of the Unemployment Compensation Fund (UCF) benefit payment bank account. As a result, UCF cash and disbursement information reported to the Office of Administration - Division of Accounting was potentially misstated. The DLIR did not reconcile the benefit payment bank account until over 1 year after UInteract system implementation and these bank reconciliations contained numerous errors and were not reliable.

Recommendation:
The DLIR implement controls and procedures to prepare accurate reports for reporting and reconciling benefit payment bank account activity. In addition, the DLIR should ensure monthly reconciliations of the benefit payment account are performed timely and differences between accounting records and reconciliations are promptly investigated and resolved. Restatements should be made for any material misstatements identified.

Status of Finding:
Corrective action was taken. Bank reconciliations have been prepared timely and differences investigated. The U.S. Department of Labor (USDOL) did not include this finding in its Initial Determination dated July 20, 2018; therefore, a response by DLIR was not required. The USDOL did resolve finding 2017-005 Unemployment Insurance Benefit Payment Bank Account Internal Controls which is related.

Contact Person: Rebecca Voss
Phone Number: 573-751-1135

2017-002. Unemployment Compensation Fund - Segregation of Duties

State Agency: Department of Labor and Industrial Relations (DLIR)

The DLIR did not adequately segregate the duties of administering Unemployment Insurance (UI) benefits and authorizing transactions from the Unemployment Compensation Fund benefit payment bank account. A Division of Employment Security (DES) Benefits Analyst occasionally contacted the bank directly to authorize and reverse UI benefit payments from the benefit payment bank account. These bank transactions were made without any independent supervisory review and the DLIR Administration - Financial Management Unit (FM) was not notified of these transactions.

Recommendation:
The DLIR through the DES and the FM restrict employee access to UI bank accounts and adequately segregate duties related to administering UI benefits and authorizing transactions from the UI bank accounts.

Status of Finding:
Corrective action has been taken. A list of staff authorized to communicate with the bank has been incorporated into the banking contract. The U.S. Department of Labor did not include this finding in its Initial Determination dated July 20, 2018; therefore, a response by DLIR was not required. The USDOL did resolve finding 2017-009 Unemployment Insurance Segregation of Duties, which is related.

Contact Person: Rebecca Voss
Phone Number: 573-751-1135

2017-003. Unemployment Compensation Fund - Transfers

State Agency: Department of Labor and Industrial Relations (DLIR)

The DLIR did not establish procedures to transfer interest and penalty collections to the Special Employment Security Fund (SESF) as required by state law. As of June 30, 2017, the DLIR had not transferred interest and penalties totaling approximately $3.4 million held in the Unemployment Compensation Fund to the SESF.

Recommendation:
The DLIR establish procedures to ensure interest and penalty collections are transferred to the SESF, as required by state law.

Status of Finding:
Corrective action has been taken. Transfers to the SESF are current. The U.S. Department of Labor (USDOL) did not include this finding in its Initial Determination dated July 20, 2018; therefore, a response from DLIR was not required

Contact Person: Rebecca Voss
Phone Number: 573-751-1135

2017-004. Unemployment Insurance Federal Reporting

Federal Agency: U.S. Department of Labor
Federal Program: 17.225 Unemployment Insurance
State Agency: Department of Labor and Industrial Relations (DLIR)

The DLIR did not establish adequate controls and procedures to prepare and submit accurate, complete, and timely federal reports for the Unemployment Insurance program. Our review of various federal reports identified several federal financial reports that were not accurate and/or were not submitted within the required timeframes.

Recommendation:
The DLIR establish controls and procedures to ensure required federal reports are accurately prepared and submitted in accordance with federal requirements. These procedures should ensure the UInteract system supporting queries and reports are properly designed and programmed to achieve federal reporting objectives. In addition, the DLIR should continue to review, revise, and resubmit previously submitted inaccurate federal reports.

Status of Finding:
Corrective action has been taken. Federal reports from Fiscal Years 2017 and 2018 have been reviewed. If necessary, revised reports have been resubmitted. Current reports are accurate and timely. The U.S. Department of Labor has resolved this finding and determined that documentation submitted by DOLIR confirms that it has been corrected.

Contact Person: Candace Williams
Phone Number: 573-522-3699

2017-005. Unemployment Insurance Benefit Payment Bank Account Internal Controls

Federal Agency: U.S. Department of Labor
Federal Program: 17.225 Unemployment Insurance
State Agency: Department of Labor and Industrial Relations (DLIR)

The DLIR did not implement adequate controls and procedures for reporting and reconciling the activities of the Unemployment Insurance benefit payment bank account.

Recommendation:
The DLIR implement controls and procedures to prepare accurate reports for reporting and reconciling benefit payment bank account activity. In addition, the DLIR should ensure monthly reconciliations of the benefit payment account are performed timely and differences between accounting records and reconciliations are promptly investigated and resolved. Restatements should be made for any material misstatements identified.

Status of Finding:
Corrective action was taken. Bank reconciliations have been prepared timely and differences investigated. The U.S. Department of Labor has resolved this finding and determined that documentation submitted by DOLIR confirms that it has been corrected.

Contact Person: Rebecca Voss
Phone Number: 573-751-1135

2017-006. Unemployment Insurance Wage Cross-matches

Federal Agency: U.S. Department of Labor
Federal Program: 17.225 Unemployment Insurance
State Agency: Department of Labor and Industrial Relations (DLIR) - Division of Employment Security (DES)

The DES did not follow established controls over Unemployment Insurance program eligibility and payments related to wage cross-matches, and as a result, federally-required wage cross-matches were not performed during the 9-month period after implementation of the new UInteract computerized system.

Recommendation:
The DLIR through the DES ensure wage cross-matches are performed in accordance with federal requirements.

Status of Finding:
Corrective action was taken. Cross-match investigations are now completed in compliance with federal requirements. The U.S. Department of Labor has resolved this finding and determined that documentation submitted by DOLIR confirms that it has been corrected.

Contact Person: Candace Williams
Phone Number: 573-522-3699

2017-007A. Unemployment Insurance Benefit Accuracy Measurement Program

Federal Agency: U.S. Department of Labor
Federal Program: 17.225 Unemployment Insurance
State Agency: Department of Labor and Industrial Relations (DLIR) - Division of Employments Security (DES)

The DES did not complete Unemployment Insurance program Benefit Accuracy Measurement (BAM) case investigations within the required timeframes.

Recommendation:
The DLIR through the DES ensure BAM case investigations are completed within federally-required time frames.

Status of Finding:
Corrective action was taken. Case investigations are now completed within prescribed timelines. The U.S. Department of Labor has resolved this finding and determined that documentation submitted by DOLIR confirms that it has been corrected.

Contact Person: Candace Williams
Phone Number: 573-522-3699

2017-007B. Unemployment Insurance Benefit Accuracy Measurement Program

Federal Agency: U.S. Department of Labor
Federal Program: 17.225 Unemployment Insurance
State Agency: Department of Labor and Industrial Relations (DLIR) - Division of Employment Security (DES)

Benefit Accuracy Measurement (BAM) paid claim case investigations performed during the period October 2016 to July 2017 did not include National Directory of New Hires (NDNH) wage cross-matches.

Recommendation:
The DLIR through the DES ensure BAM case investigations include NDNH cross-matches as required.

Status of Finding:
Corrective action was taken. BAM case investigations now include NDNH cross-matches as required. The U.S. Department of Labor has resolved this finding and determined that documentation submitted by DOLIR confirms that it has been corrected.

Contact Person: Candace Williams
Phone Number: 573-522-3699

2017-007C. Unemployment Insurance Benefit Accuracy Measurement Program

Federal Agency: U.S. Department of Labor
Federal Program: 17.225 Unemployment Insurance
State Agency: Department of Labor and Industrial Relations (DLIR) - Division of Employment Security (DES)

The DES did not establish written policies and procedures regarding supervisory reviews of Benefit Accuracy Measurement (BAM) case investigations.

Recommendation:
The DLIR through the DES establish written policies and procedures regarding supervisory reviews of BAM case investigations.

Status of Finding:
Corrective action was taken. The BAM manual has been expanded to include information regarding supervisory reviews of case investigations. The U.S. Department of Labor has resolved this finding and determined that documentation submitted by DOLIR confirms that it has been corrected.

Contact Person: Candace Williams
Phone Number: 573-522-3699

2017-008. Unemployment Insurance Maximum Benefit Amount

Federal Agency: U.S. Department of Labor
Federal Program: 17.225 Unemployment Insurance
State Agency: Department of Labor and Industrial Relations (DLIR) - Division of Employment Security (DES)
Questioned Costs: $134,388

The DES did not properly design and implement internal controls to ensure the new Unemployment Insurance computerized system (UInteract) correctly calculated claimant Maximum Benefit Amounts (MBA). As a result, the MBA for some claimants was incorrectly calculated and some claimants received overpayments.

Recommendation:
The DLIR through the DES continue to establish and monitor controls to ensure the UInteract system properly calculates claimant MBA and continue efforts to collect identified overpayments.

Status of Finding:
Corrective action was taken. All impacted claims were corrected and overpayments have been established, if appropriate. The U.S. Department of Labor (USDOL) has resolved this finding and determined that documentation submitted by DOLIR confirms that it has been corrected. The USDOL has disallowed the $134,388 questioned costs and determined it is not subject to federal debt collection.

Contact Person: Matthew Hankins
Phone Number: 573-526-8219

2017-009. Unemployment Insurance Segregation of Duties

Federal Agency: U.S. Department of Labor
Federal Program: 17.225 Unemployment Insurance
State Agency: Department of Labor and Industrial Relations (DLIR) - Division of Employment Security (DES) and DLIR Administration - Financial Management Unit (FM)

The DLIR did not adequately segregate the duties of administering Unemployment Insurance (UI) benefits and authorizing transactions from the benefit payment bank account.

Recommendation:
The DLIR through the DES and the FM restrict employee access to UI bank accounts and adequately segregate duties related to administering UI benefits and authorizing transactions from the UI bank accounts.

Status of Finding:
Corrective action has been taken. A list of staff authorized to communicate with the bank has been incorporated into the banking contract. The U.S. Department of Labor has resolved this finding and determined that documentation submitted by DOLIR confirms that it has been corrected.

Contact Person: Rebecca Voss
Phone Number: 573-751-1135

2017-010. Child Care Eligibility and Payments

Federal Agency: Department of Health and Human Services
Federal Program: 93.575 Child Care and Development Block Grant
93.596 Child Care Mandatory and Matching Funds of the Child Care and Development Fund
State Agency: Department of Social Services (DSS) - Children's Division (CD) and Family Support Division (FSD)
Questioned Costs: $1,659 (2017)
Similar Findings: 2016-002A, 2015-002, 2014-005, 2013-009, 2012-11A&B, 2011-14A, and 2010-16A

DSS controls over Child Care Development Fund (Child Care) subsidy eligibility and provider payments were not sufficient to prevent and/or detect payments made on behalf of ineligible clients or improper payments to child care providers. Payments were made on behalf of one ineligible client and overpayments were made to some providers.

Recommendation:
The DSS through the CD and the FSD continue to review, strengthen, and enforce policies and procedures regarding Child Care subsidy eligibility determinations and provider payments. These procedures should include sufficient monitoring of eligibility determinations and provider payments and follow up on errors identified.

Status of Findings:
The DSS disagrees that controls are not sufficient to prevent and/or detect payments on behalf of ineligible clients found in the FY2017 Single Audit. One eligibility error out of 60 cases was found resulting in questioned costs of $1,085 ($846 federal share), and the error was a result of a parent not reporting loss of employment; this was not an error on the part of DSS. One client error does not support the conclusion that "Controls are not sufficient to prevent payment on behalf of ineligible clients" or that DSS has only limited procedures to review eligibility determinations." One error does not represent a material internal control weakness nor warrant an audit finding on noncompliance.

The DSS agrees additional controls are needed to ensure payments are adequately supported. In September 2017, the DSS awarded a contract to Control Tec for a Child Care Business Information Solution (CCBIS). This electronic solution will replace the current paper attendance records allowing for greater control of attendance tracking, invoicing, and monitoring for provider compliance. Implementation is scheduled to begin mid-November 2018 and with the CCBIS to be fully implemented by fall 2019.

Contact Person: Marianne Dawson
Phone Number: 573-522-2294

2017-011. Child Care Provider Monitoring

Federal Agency: Department of Health and Human Services
Federal Program: 93.575 Child Care and Development Block Grant
93.596 Child Care Mandatory and Matching Funds of the Child Care and Development Fund
State Agency: Department of Social Services (DSS) - Children's Division (CD) and Division of Finance and Administrative Services (DFAS)
Similar Finding: 2016-002B

The DSS' procedures to follow up on provider noncompliance identified during Child Care Review Team (CCRT) reviews were not sufficient. The CCRT and the CD did not establish criteria or guidance for determining the type and extent of follow-up action, if any, to address identified provider noncompliance. For some reviews that appeared to require follow up, the CCRT required the providers to repay the overpayments, but took no further action to address the provider noncompliance, such as referring the provider to the CD for training or other corrective action, or conducting another follow-up review. For some reviews in which the provider was referred to the CD for training or other corrective action, the provider did not complete the training within the required 45 days and the CD did not follow up timely with the provider or terminate the contract.

Recommendation:
The DSS through the DFAS and the CD establish and enforce procedures to ensure proper follow up on noncompliance identified during CCRT reviews is performed. These procedures should include criteria for determining the type and extent of follow-up action that should be taken, and provide for continued monitoring and final resolution of provider compliance.

Status of Findings:
The CCRT has established the following new procedures:

- Notified all child care providers of new future monitoring and follow-up processes.
- Updated entrance letters to clarify requirements for submitting attendance records to the DSS.
- If the review finds error rates of 5% or more, DSS's notification letter to the provider references Educare training as an option to be completed within 45 days of the date of the letter.
- A follow up review will be conducted of the first full month's records following the 45-day Educare option provided in the decision letter.
- If the provider has an error rate in excess of 5% in the follow up review, the provider will be referred to Early Childhood and Prevention Services Section for corrective action.

Contact Person: Brenda Labella
Phone Number: 573-526-6806

2017-012. Child Care Provider Eligibility

Federal Agency: Department of Health and Human Services
Federal Program: 93.575 Child Care and Development Block Grant
93.596 Child Care Mandatory and Matching Funds of the Child Care and Development Fund
State Agency: Department of Social Services (DSS) - Children's Division (CD) and Family Support Division (FSD)
Questioned Costs: $1,189 (2017)
Similar Findings: 2016-001, 2015-003, 2014-006, and 2013-010

The DSS did not have adequate controls and procedures in place to ensure "four-or-less" (FOL) child care providers participating in the Child Care Development Fund (Child Care) subsidy program complied with statutory requirements for license-exempt status. For some FOL providers reviewed, DSS employees did not follow the department's procedures to ensure the providers do not care for more than four unrelated Child Care subsidy children. As a result, the DSS classified the children as related to their FOL child care providers and made Child Care subsidy payments to the providers without obtaining the required documentation to support the relationships.

Recommendation:
The DSS through the CD and the FSD continue to improve controls and procedures to ensure clients and FOL child care providers participating in the Child Care subsidy program comply with DSS policy, and FOL providers comply with state licensing requirements.

Status of Findings:
The DSS did not agree with the audit finding and did not believe a corrective action was required. As noted in the audit finding, effective April 2017, DSS Child Care policy requires eligibility specialists to enter a relationship code of unrelated until the Child to Provider Relationship form is received. Additionally, DSS implemented procedures requiring supervisors to review a daily report of all FOL authorizations and make corrections as needed. No errors were identified by the SAO after this policy was put into place. All corrective actions for the previous audit finding have been successfully implemented. DSS disagrees that there was a material internal control weakness and disagrees that a finding of noncompliance was appropriate.

Contact Person: Marianne Dawson
Phone Number: 573-522-2294

2017-013. MO HealthNet Division Provider Eligibility

Federal Agency: Department of Health and Human Services
Federal Program: 93.767 Children's Health Insurance Program
93.778 Medical Assistance Program
State Agency: Department of Social Services (DSS) - MO HealthNet Division (MHD) and Missouri Medicaid Audit and Compliance (MMAC)
Questioned Costs: $223,188,969 (2017)
Similar Finding: 2016-003A

The DSS did not fully implement federal revalidation requirements for providers participating in the Medical Assistance Program (Medicaid) and the Children's Health Insurance Program (CHIP). As of June 30, 2017, the DSS had not performed required revalidations for 71 percent of Medicaid and CHIP providers requiring revalidation.

Recommendation:
The DSS through the MHD and the MMAC revalidate Medicaid and CHIP providers every 5 years as required by federal regulations.

Status of Findings:
On July 6, 2018, CMS sent their management decision regarding 2017-013 to DSS:

> SAO Recommendation: This is a material instance of non-compliance, a material weakness, and a repeat finding. We recommend that the MO HealthNet Division revalidate Medicaid and CHIP providers every five years as required by federal regulation.
>
> CMS Decision regarding SAO recommendation: We concur with the finding based on the work conducted by the state auditor. However, there is no federal regulation or policy that requires a financial penalty or disallowance action for payments made to providers that have not been revalidated and are otherwise eligible providers. Therefore, no adjustment is required for this recommendation on the next CMS-64.

As of June 30, 2017, MMAC had revalidated 9,699 providers out of 33,194 (29%) requiring revalidation. During SFY 2018, MMAC revalidated 8,070 providers. As of June 30, 2018, MMAC had revalidated 17,236 out of 33,265 (51.8%) requiring revalidation.

Effective July 1, 2018, the legislature authorized three additional full time positions for the MMAC Provider Enrollment Unit (PEU). Those three new employees have been hired. MMAC created a Revalidations Section within the PEU consisting of one Medicaid Specialist and two Medicaid Clerks to work revalidation applications full-time. The Revalidations Section is also being supplemented with temporary staff.

During SFY 2018, MMAC received CMS approval to contract with the state Medicaid Management Information System (MMIS) vendor (Wipro Infocrossing) for the implementation of a 100% electronic revalidations portal on Wipro's existing EMOMED system. The contract has a 24 week implementation schedule. Implementation began on July 9, 2018 and was completed on January 7, 2019. The new revalidations portal will

allow MMAC to replace the current paper application process and eliminate duplicate enrollment data entry in multiple databases. The contract includes having the vendor notify Medicaid providers that they are due for revalidation and directing them to the electronic portal. The new solution allows MMAC PEU to run reports and know the status of any or all revalidation applications in progress. Using the new revalidations solution, MMAC intends to eliminate the backlog of overdue revalidations before June 30, 2019.

During SFY 2018, MMAC continued to conduct monthly monitoring of approximately 60,000 active providers and their owners, directors, officers, and managing employees through a contract with Lexis-Nexis and Wipro Infocrossing. Even if a provider's enrollment has not been revalidated timely, MMAC is still conducting a robust set of federal and state database checks (which exceed CMS requirements) to verify the continuing eligibility of each enrolled provider to continue to participate in the Missouri Medicaid program.

2017-014. MO HealthNet Division Cash Receipt Controls

Federal Agency: Department of Health and Human Services
Federal Program: 93.767 Children's Health Insurance Program
93.778 Medical Assistance Program
State Agency: Department of Social Services (DSS) - MO HealthNet Division (MHD)
Similar Findings: 2016-004A&C and 2015-009A&C

The MHD did not have adequate controls in place to ensure the proper management of receipts received by the division. The MHD did not adequately restrict user access within the cash receipts and accounts receivable modules of the Medicaid Management Information System (MMIS). In addition, the MHD did not implement procedures to ensure the accuracy of the cash control number log, monitor deleted cash control numbers, and remove the ability to delete cash control numbers until we made inquiries after the audit period.

Recommendation:
The DSS through the MHD continue to restrict user access within the MMIS and adequately segregate duties related to record keeping and asset custody, or perform documented supervisory reviews of MMIS entries and changes.

Status of Findings:
The Finance staff members in the Financial Operations and Reporting Unit (FORU) no longer have deletion capacity. Quarterly reports continue to be created and reviewed by the Supervisor of the FORU to ensure that if a FORU staff member entered checks and assigned them to an account that those funds were dispositioned accurately.

Phone Number: 526-4671

2017-015. Medicaid Physician-Administered Drugs

Federal Agency: Department of Health and Human Services (DHHS)
Federal Program: 93.778 Medical Assistance Program
State Agency: Department of Social Services (DSS) - MO HealthNet Division (MHD)
Questioned Costs: $242,656

The MHD did not establish controls to comply with Medical Assistance Program (Medicaid) requirements to invoice prescription drug manufactures for rebates for certain physician-administered drugs. As a result, the MHD claimed costs of physician-administered drugs that were not allowable costs of the program because rebates were not billed for the drugs.

Recommendation:
The DSS, through the MHD, continue to establish controls to ensure the required drug utilization data is obtained for all physician-administered drug claims and claim only allowable costs for the Medicaid. These controls should include procedures to recoup and reimburse the DHHS for claims identified as noncompliant.

Status of Finding:
This recommendation regarding obtaining drug utilization data makes changes to a very complex process governed by differing federal and state agreements and as such the Department of Social Services has a two part response.

1) "Gateway to Better Health" is a section 1115 demonstration project approved in accordance with section 1115(a) of the Social Security Act. Approval of the demonstration project is subject to the limitations specified in the Special Terms and Conditions (STCs) attached to the demonstration approval. As stated in Section V of the STC Gateway specialty care claims are reimbursed by an alternate payment methodology established at 100% of the Medicare rates. The specialty care claims must be submitted with a procedure code in order for the claim to be priced using the Medicare rate methodology required under the "Gateway to Better Health" demonstration program. Medicare does not collect drug rebate and as a result the National Drug Code (NDC) isn't included on the claim. The audit finding states that the claims lacked the required NDCs to bill manufacturers for rebates. The NDCs were not included on the claims because they are paid under an alternate payment methodology as approved in the 1115 demonstration and are not required under the Medicare rate methodology.

   Section 1902(a)(54) states that if a state plan provides medical assistance for covered outpatient drugs, the state has to comply with the requirements of section 1927. However, DSS received notification from CMS on November 9, 2018 that the Division of Pharmacy subject matter experts made a specific determination on rebates for drugs reimbursed under the Gateway to Better Health (GTBH) section 1115 demonstration. CMS determined that the state is not required to comply with the requirements of section 1927, due to the limited nature of the GTBH pharmacy benefit.

2) MHD identified claims in September 2016 (JIRA ticket was created on September 30, 2016 with the "fix" put into production November 30, 2016 by WIPRO) and the modification was completed in February 2017 in the Medicaid Management

Information System (MMIS) to prevent submission of physician-administered drug claims as procedural claims, thereby ensuring NDCs are submitted when required. Going forward, MHD has made the necessary system changes to ensure accuracy.

2017-016. Medicaid Aged, Blind, and Disabled Eligibility

Federal Agency: Department of Health and Human Services
Federal Program: 93.778 Medical Assistance Program
State Agency: Department of Social Services (DSS) - MO HealthNet Division (MHD) and Family Support Division (FSD)
Similar Findings: 2016-005, 2015-012A, and 2014-013A

The DSS did not ensure monthly supervisory case reviews were completed as required for call center employees who performed eligibility determinations for aged, blind, and disabled individuals in the Medical Assistance Program (Medicaid).

Recommendation:
The DSS through the MHD and the FSD ensure supervisory call reviews are performed and documented as required by DSS policy.

Status of Findings:
Since November 2017, when the FSD created a centralized shared drive to save all quality monitoring forms for each call center eligibility specialist. The FSD has followed the established Quality Assurance Process and has completed and documented supervisory reviews as required by DSS policy.

2017-017. Medicaid Developmental Disabilities - Comprehensive Waiver Per Diem Rates

Federal Agency: Department of Health and Human Services
Federal Program: 93.778 Medical Assistance Program
State Agency: Department of Mental Health (DMH) - Division of Developmental Disabilities (DD)
Questioned Costs: $416,966 (2017)
Similar Findings: 2016-006 and 2015-015

The DD did not retain documentation to support the per diem rates paid to some providers for residential habilitation services provided to participants of the Home and Community Based Services, Developmental Disabilities Comprehensive Waiver (Comprehensive Waiver) program. As a result, the DD could not demonstrate amounts paid to some providers were allowable costs of the Comprehensive Waiver program.

Recommendation:
The DMH through the DD ensure documentation to support habilitation services per diem rates is maintained to support Comprehensive Waiver program payments for these services as required, and ensure rates only include allowable costs.

Status of Findings:
The Centers for Medicare and Medicaid Services (CMS) does not agree with the finding per their letter dated July 6, 2018. CMS is not pursuing a disallowance for this finding.

CORRECTIVE ACTION PLANS

The State of Missouri's Office of Administration, Division of Accounting respectfully submits the following Corrective Action Plans for the findings related to the Statewide Single Audit for fiscal year ended June 30, 2018. Each Corrective Action Plan was prepared by the State agency noted.

State of Missouri
Single Audit
Corrective Action Plan
Year Ended June 30, 2018

State Agency: Department of Revenue (DOR)

Audit Finding Number: 2018-001 Financial Reporting Controls

Name of the contact person
Responsible for corrective action: Esta Zaring

Anticipated completion date for corrective action: Completed

Corrective action planned is as follows:

The Department of Revenue took corrective action following the State Auditor's notification of the misstated accounts receivable balance for some sales and use tax accounts. The corrective action included a detailed review of the data extracted from the system and completing reconciliation steps to validate the data. The corrected receivables were resubmitted and validated by the State Auditor. The Department of Revenue will use the same corrected methodology to produce the accounts receivable reports at the end of this fiscal year.

State of Missouri
Single Audit
Corrective Action Plan
Year Ended June 30, 2018

State Agency: Department of Corrections (DOC)

Audit Finding Number: 2018-002 SAMII User Account Controls

Name of the contact person
Responsible for corrective action: Susan Pulliam, Chief Financial Officer

Anticipated completion date for corrective action: Already Implemented

Corrective action planned is as follows: The DOC agrees with the finding. The two staff members in DOC with the authority to enter and approve expenditure transactions have now been restricted to only approve expenditure transactions. Monthly reports generated by the Office of Administration listing each DOC SAMII user and corresponding access will be reviewed by the Chief Financial Officer to confirm that no user has the ability to approve expenditure transactions they create.

State of Missouri
Single Audit
Corrective Action Plan
Year Ended June 30, 2018

State Agency: Department of Social Services (DSS)

Audit Finding Number: 2018-003 - SAM II User Account Controls

Name of the contact person
Responsible for corrective action: Theresa McDonald

Anticipated completion date for corrective action: Completed

Corrective action plan is as follows:

The DSS partially agrees with the finding. DSS agrees SAM II users should not have self-approval access; however, DFAS Accounts Payable does have internal processes and procedures to separate data entry and approval functions. Additionally, DSS provided the SAO a copy of the SAM II authorization form for one of the two users which reflects the DSS did not request self-approval access for this user. However, upon learning of the self-approval access, the DSS took the necessary steps to have the self-approval access removed for both users. Furthermore, the DSS plans to review the SAM II access report on a monthly basis to ensure self-approval access is not granted to DSS users.

State of Missouri
Single Audit
Corrective Action Plan
Year Ended June 30, 2018

State Agency: Department of Social Services (DSS) – Children's Division (CD) and Division of Finance and Administrative Services (DFAS)

Audit Finding Number: 2018-004 Adoption Assistance Eligibility

Name of the contact person
Responsible for corrective action: Amy Martin and Jodi Rush

Anticipated completion date for corrective action: May 2019

Recommendation: The DSS through the CD and the DFAS strengthen and enforce policies and procedures regarding Adoption Assistance eligibility determinations. These procedures should ensure all adoption subsidy agreements are signed and in effect prior to the adoption and ensure eligibility determinations are proper, documented, and retained. In addition, the DSS should review and correct the eligibility for the children identified in this finding.

The DSS partially agrees with this finding. The DSS agrees with strengthening and enforcing policies and procedures regarding Adoption Assistance eligibility determination; however, the department implemented new processes in FY 2008 regarding backdating subsidy agreements.

Corrective action planned is as follows:

The DSS will continue new worker training and refresher training of adoption assistance staff regarding adoption assistance agreement requirements and quality assurance reviews to assure service start dates are after the date of the director's signature on the agreement. The DSS will continue to train IV-E Eligibility Analysts on criteria for applicable/non-applicable child for the adoption subsidy determination.

State of Missouri
Single Audit
Corrective Action Plan
Year Ended June 30, 2018

State Agency: Department of Social Services (DSS), Division of Finance and Administrative Services (DFAS)

Audit Finding Number: 2018-005 DSS Public Assistance Cost Allocation Plan

Contact Person: Kristen Pattrin

The DSS does not agree with the audit findings and believes that corrective action is not required. Explanation and specific reasons are as follows:

Recommendation A: Implement internal controls and procedures over the PACAP and the AlloCAP system to ensure costs charged to federal programs are accurate, allowable, properly allocated, and consistent with the proposed and/or approved PACAP. Internal controls should be adequately documented and monitored for compliance with applicable requirements. These controls should include policies and procedures, a log of changes to the PACAP and the AlloCAP system, and documentation of approvals and testing of system changes.

Response: The DSS firmly disagrees with this finding/recommendation.

Audit Requirements for Federal Awards are covered under 2 CFR 200. Under section 200.516 subpart 7, auditors are required to indicate whether an audit finding represents an isolated instance or a systematic problem. Instances identified must be related to the universe and the number of cases examined and be quantified in terms of dollar value. The auditor should report whether the sampling was a statistically valid sample.

As noted in the audit finding, the sample selected included 14 cost centers allocated during the quarter ending March 31, 2018 and for every cost center examined, it was determined that all costs were supported and allocated in accordance with the proposed Public Assistance Cost Allocation Plan (PACAP). No deviations were found in the tested sample to support that the DSS did not effectively design, implement, or put controls in place to prevent detection of non-compliance.

In addition to the successful results of the tested sample supporting DSS' position, the DSS has provided sufficient evidence to demonstrate internal controls and procedures to ensure costs charged to federal programs are accurate, allowable, and properly allocated.

Effective October 1, 2017, the DSS transitioned from utilizing an indirect cost rate methodology allocated manually on a spreadsheet to implementing a PACAP to directly allocate through cost pools which is allocated systematically in a proprietary cost allocation system. Implementation of a thoroughly documented PACAP coupled with the AlloCAP system supports that DSS has

strengthened internal controls and procedures. Additionally, the DSS has provided documented evidence to support the internal controls and procedures over PACAP and AlloCAP which includes but is not limited to: (1) All changes made to the PACAP narrative are submitted in track changes format to Cost Allocation Services (CAS) for review and evaluation by federal partners; (2) The submitted PACAP narrative is provided to the Grants Unit in addition to a summary of the quarterly changes which is prepared by the Cost Allocation Manager to assist the Grants Unit in ensuring that AlloCAP matches the PACAP narrative exactly; (3) The AlloCAP manual outlining procedures for the quarterly cost allocation process; (4) Grant approval tracking sheets which document all levels of approval for each grant sheet from preparation to submission; and (5) Reports directly from the AlloCAP system showing the allocation methodology matches the PACAP as submitted quarterly.

The DSS' internal controls were and continue to be a component of the successful implementation of the PACAP and AlloCAP system in order to ensure accuracy and compliance with federal requirements as supported by the sample results reviewed under this audit.

Recommendation B: Prepare and submit an estimated cost impact analysis as part of the PACAP, as required by federal regulations.

Response: The DSS disagrees with this finding; however, the DSS has already corresponded with CAS regarding submission of cost impact statements.

As noted in the audit finding, the PACAP narrative states that the DSS will notify the CAS of any significant funding changes as a result of the proposed PACAP implementation. The DSS has apprised CAS and other federal agencies of the current status of providing detailed cost analysis and impact. The DSS anticipates submission in the near future.

State of Missouri
Single Audit
Corrective Action Plan
Year Ended June 30, 2018

State Agency: Department of Social Services (DSS) – Children's Division (CD) and Family Support Division (FSD)

Audit Finding Number: 2018-006 Child Care Eligibility Case Reviews

Name of the contact person
Responsible for corrective action: Marianne Dawson

Anticipated completion date for corrective action: June 30, 2019

Recommendation: The DSS through the CD and the FSD ensure monthly supervisory case reviews are performed as required by DSS policy and strengthen the policy to indicate when the reviews should be performed.

The DSS partially agrees with the FY 2018 audit findings regarding Child Care Eligibility Case Reviews. The development of the Case Review System in 2012 was in response to numerous child care eligibility findings in previous state audits. Policies on case reviews have evolved over the years to align with the changing needs of the Family Support Division. However, the policy does not address staff turnover and the hiring of new supervisory staff or the fluctuating priorities in the field office. In taking these additional conditions into consideration, the finding would indicate that overall the required number of case reviews are being conducted. The state auditor asserted the opinion that the case reviews were not completed timely without taking into account the meaning of targeted case reviews or additional considerations. The DSS fully believes the current policy is working as we have noted that over the last several audit years child care eligibility audit findings have decreased significantly with only one child care eligibility finding as a result of a recipient not reporting timely in FY 2017 and zero child care eligibility findings in FY 2018.

Corrective action planned is as follows:

The DSS recognizes the opportunity to strengthen policy and will update the case review policy to address the reality of fluctuating conditions in the Family Support Division field office as well as consider including a set timeline for the completion of case reviews. The DSS will send an "All About Child Care" email reminder to Eligibility Specialist Supervisors to complete required case reviews.

State of Missouri
Single Audit
Corrective Action Plan
Year Ended June 30, 2018

State Agency: Department of Social Services (DSS) – Children's Division (CD) and Family Support Division (FSD)

Audit Finding Number: 2018-007 Child Care Payments

Name of the contact person
Responsible for corrective action: Marianne Dawson

Anticipated completion date for corrective action: 12/31/2019

Recommendation: The DSS through the CD and the FSD continue to review, strengthen and enforce policies and procedures regarding Child Care subsidy provider payments. These procedures should include sufficient monitoring of provider payments and follow up on errors identified.

Response: The DSS partially agrees the FY2018 audit findings indicate controls can be strengthened to ensure payments are always adequately supported. The questioned cost for nine child care attendance records totaled $585, seven of those findings together totaled less than $100. There were two missing attendance records of which one was unable to be requested due to the child care provider being deceased. It should be noted that over the last several audit years, questioned costs have decreased significantly with reduced provider billing errors and fewer missing attendance records.

Corrective action planned is as follows:

The DSS agrees additional controls are needed to further ensure payments are adequately supported. In September 2017, the DSS awarded a contract to Controltec LLC for a Child Care Business Information Solution (CCBIS). This electronic solution will replace the current paper attendance records allowing for greater control of attendance tracking, invoicing, and monitoring for provider compliance. CCBIS is anticipated to be collecting attendance in all child care homes and facilities by fall 2019.

The DSS is reviewing the errors referred to in this finding. Claims will be entered and adjustments will be made for agreed upon unallowable costs.

State of Missouri
Single Audit
Corrective Action Plan
Year Ended June 30, 2018

State Agency: Department of Social Services (DSS) – Children's Division (CD) and Division of Finance and Administrative Services (DFAS)

Audit Finding Number: 2018-008 Child Care Provider Monitoring

Name of the contact person
Responsible for corrective action: Brenda LaBella

Anticipated completion date for corrective action: June 30, 2018

Recommendation: The DSS through the DFAS and the CD continue to strengthen and enforce procedures to ensure proper follow up on noncompliance identified during CCRT reviews is performed.

The DSS partially agrees with the finding. Although the DSS agrees with continuing to strengthen and enforce procedures to ensure proper follow up when noncompliance is identified, the DSS did follow up with a number of noncompliant providers or has a future follow up review scheduled.

Corrective action planned is as follows:

There is no further corrective action planned as the DSS implemented the following processes as of June 30, 2018:

- Notified all child care providers of the new monitoring and follow up processes during April 2018.
- Updated entrance letters to include expectations that attendance records must be provided to DSS at the time of the review.
- If errors are found during the review, DSS's notification letter has been updated to alert the provider that Educare training is optional to be completed within 45 days of the date of the letter.
- If the initial review shows an error rate in excess of 5%, a follow up review will be conducted within six months of the initial review.
- If the provider has an error rate in excess of 5% in the follow up review, the provider will be referred to the Children's Division for corrective action.

State of Missouri
Single Audit
Corrective Action Plan
Year Ended June 30, 2018

State Agency: Department of Social Services (DSS), Division of Finance and Administrative Services (DFAS)

Audit Finding Number: 2018-009 FCCM Contract Payment Reviews

Contact Person: Kristen Pattrin

The DSS does not agree with the audit findings and believes that corrective action is not required. Explanation and specific reasons are as follows:

Recommendation: The DSS through the CD and the DFAS strengthen monitoring controls and procedures over FCCM contractor payments to ensure costs claimed to the Foster Care program as assistance payments are allowable and adequately supported. Detailed reviews of data submitted by the FCCM contractors should include reviews of foster care payment rates and supporting documentation.

Response: The DSS firmly disagrees with this finding/recommendation.

The Foster Care payment was allowable as the child was IV-E eligible and in a reimbursable placement. The rate paid should have been slightly less due to the child's age. This occurred due to timing of system changes with the FCCM and is a unique instance. Based on the finding, the selected sample population of $271,000 included 60 items of which $50,700 and 9 children correspond to FCCMs. The sample identified $266 ($172 federal share) of questioned costs pertaining to FCCMs which results in a potential deviation of 0.10% of the total and 0.52% corresponding to FCCMs and is deemed by the DSS to be immaterial. In addition to the immateriality of questioned costs, the DAB upheld that FCCMs are a contractor of the DSS pursuant to decision 2681. In accordance with the DAB decision, the DSS will not request documentation from FCCMs for review that would be required of a subrecipient as doing so would be imposing extraneous requirements of contractors. As evidenced by the sample tested under this audit, the DSS has demonstrated sufficient monitoring controls and procedures over FCCM contractor payments to ensure accuracy and compliance with federal requirements.

Additionally, child placement and IV-E eligibility are not uploaded to the system by the vendor. Placement and eligibility for all children in the care of Children's Division are housed in the same area of the system regardless of internal versus external case management.

Payment data for children case managed by a FCCM is uploaded to the state's system. Once payments are uploaded, the data runs through case management and eligibility code to determine the payment fund to assign. The system is programmed to only allow a IV-E Foster Care claim if the child is determined to meet Title IV-E eligibility criteria and is in an allowable placement to Title IV-E. Therefore, payments for foster care could only be claimed to the grant if the child was in a foster home setting where a family would receive a payment to meet the needs of the child(ren) in their care and if both the child and the placement were eligible.

State of Missouri
Single Audit
Corrective Action Plan
Year Ended June 30, 2018

State Agency: Department of Social Services (DSS) – Family Support Division (FSD)

Audit Finding Number: 2018-010 TANF Work Participation Sanctions

Name of the contact person: Jeriane Jaegers-Brenneke

The agency does not agree with the audit findings and believes that corrective action is not required. Explanation and specific reasons are as follows:

Recommendation: The DSS, through the FSD, continue to review, strengthen, and enforce controls to ensure TANF program recipients who failed to meet work participation requirements are sanctioned as required, or referred to the FSD for exemption.

Response: The DSS disagrees with this audit finding. Although it is important to continue to review, strengthen, and enforce controls regarding TANF work participation sanctions, the DSS asserts that the amounts referenced in this finding are immaterial. Regarding the immateriality, there was an error rate of less than 2% regarding the costs under review and an error rate of 5% regarding the cases under review.

The DSS agrees that internal controls are imperative to reducing errors and has successfully implemented controls to ensure clients are timely sanctioned. While the TANF regulations do not provide a threshold or an acceptable error rate, this is below what is required in other programs. Therefore, the DSS deems a Corrective Action Plan is not warranted.

State of Missouri
Single Audit
Corrective Action Plan
Year Ended June 30, 2018

State Agency: Department of Social Services (DSS) – Division of Finance and Administrative Services (DFAS) and Family Support Division (FSD)

Audit Finding Number: 2018-011 TANF Subrecipient Risk Assessments

Name of the contact person
Responsible for corrective action: Alicia Kolb

Anticipated completion date for corrective action: September 2019

Recommendation: The DSS through the DFAS and the FSD strengthen controls and procedures to ensure evaluations of each subrecipient's risk of noncompliance with federal statutes, regulations, and the terms and conditions of the subaward are performed and used for monitoring decisions as required by federal regulations.

Response: The DSS partially agrees with this finding. The DSS provided documented risk assessments for several programs during the audit. Additionally, the DSS has performed monitoring of subrecipients based on the assessment of risk.

Furthermore, the Alternatives to Abortion program was new to DSS in FY 2018. The DSS plans to monitor each of the program's subrecipients by September 2019. This is consistent with the DSS' usual practice of post-monitoring. The DSS has monitored the MWA subrecipients on a three-year monitoring cycle in coordination with the monitoring of the subrecipients of two other DSS programs Through the close monitoring of these subrecipients and assessment of risks, the DSS has performed more frequent monitoring when deemed necessary. The Healthy Marriages and Responsible Fathers program subrecipient agreements started in March of 2018. The DSS performed on-site monitoring visits of these subrecipients in FY 2018.

Corrective action planned is as follows:

DSS plans and performs on-site monitoring of subrecipients based on federal requirements, risk assessment, and effective, efficient use of resources. The DSS has performed risk based monitoring of subrecipients in accordance with Uniform Guidance and will continue to do so. The DSS will develop a standardized process, with consideration of unique program types, to ensure risk assessments performed are documented.

State of Missouri
Single Audit
Corrective Action Plan
Year Ended June 30, 2018

State Agency: Department of Social Services (DSS), Division of Finance and Administrative Services (DFAS)

Audit Finding Number: 2018-012 VOCA Subrecipient Monitoring

Name of the contact person: Kristen Pattrin

Anticipated completion date for corrective action: The DSS is currently working on policy revision to be completed by June 2019 and performing monitoring which will be completed within the grant required timeframes.

Recommendation: The DSS through the DFAS ensure VOCA program subrecipients are monitored in accordance with the monitoring policy.

Response: The DSS partially agrees with this finding. The DSS performs the on-site monitoring once every contract period as required by the Office of Justice Programs (OJP). Desk monitoring includes monitoring of the payment requests and backup to support the payment request. During the time period under review, there were agencies that did not submit invoices during certain quarters and therefore would not have documents for desk monitoring review.

Additionally, the monitoring requirements as laid out in policy are more stringent than required by the grantor agency. Due to the excessive monitoring and burden both on subrecipient partners and staff, the DSS is revising policy to right size the requirements while remaining compliant. To achieve this, DSS has contracted with a nationally known agency to work toward monitoring policies consistent with other states. This agency will also ensure DSS policies remain aligned with federal requirements.

Corrective action planned is as follows: This is noted above in the anticipated completion date for corrective action statement.

State of Missouri
Single Audit
Corrective Action Plan
Year Ended June 30, 2018

State Agency: Department of Social Services (DSS)
Mo HealthNet Division (MHD)
Missouri Medicaid Audit & Compliance (MMAC)

Audit Finding Number: 2018-013 Mo HealthNet Division Provider Eligibility

Name of the contact person
Responsible for corrective action: Dale Carr

Anticipated completion date for corrective action: June 30, 2019

The DSS agrees with this finding.

The DSS agrees with this recommendation as the DSS has implemented and will continue to implement internal controls designed to ensure Medicaid and CHIP provider revalidations are performed every five years per federal regulations.

While 42 CFR 455.414 states, "The State Medicaid agency must revalidate the enrollment of all providers regardless of provider type at least every 5 years," the purpose of section 455.400 of subpart E is to implement provider screening and enrollment requirements, fees associated with provider screening, and temporary moratoria on enrollment of providers. MMAC had already implemented monthly eligibility screening and monitoring requirements, a collection of enrollment application fees, fingerprint-based criminal history checks, and assignment of provider risk categories prior to September 2016. MMAC had also notified all active providers of the revalidation requirements prior to September 2016 and posted MMAC's revalidation schedule on its website.

Although the DSS did not revalidate all providers prior to September 24, 2016, during the period from September 24, 2016 to June 30, 2018 all of the 60,000+ enrolled Mo HealthNet providers (including those that had not been revalidated) were screened monthly against more federal and state databases than are required by CMS to verify their continued eligibility to participate in the Medicaid program. Additionally, all of the 60 sample providers selected by SAO were screened monthly during that time period and none of those providers had any eligibility issues.

Corrective Action planned is as follows:

The legislature authorized MMAC three additional FTE for provider enrollment in SFY-2018. Those three positions were filled and the staff have been assigned to process revalidations exclusively.

MMAC currently has 14 enrollment staff working on revalidations. The MMAC Provider Enrollment Unit (PEU) has planned monthly "one week bursts" where all available enrollment staff will be working on revalidations only.

MMAC contracted with the state MMIS fiscal agent to develop a provider revalidations portal in the same system providers use to submit their electronic claims to Mo HealthNet. The electronic portal became operational on January 7, 2019. The new portal allows providers to electronically update their enrollment information and upload any needed documentation. The portal allows the PEU to process revalidation applications more quickly and without duplicate data entry.

MMAC plans to have all overdue revalidations completed prior to June 30, 2019.

State of Missouri
Single Audit
Corrective Action Plan
Year Ended June 30, 2018

State Agency: Department of Mental Health

Audit Finding Number: 2018-014 Medicaid Developmental Disabilities Comprehensive Waiver Per Diem Rates

Name of the contact person
Responsible for corrective action: Bryan Connell

Anticipated completion date for corrective action: Not Applicable

The agency does not agree with the audit finding and believes that corrective action is not required. Explanation and specific reasons are as follows:

As the State Auditor's finding states, The Division of Developmental Disabilities (the Division) switched to an acuity-based rate methodology with its 2016 Waiver renewal. All existing rates were translated to the new methodology and rate schedule with the goal of standardizing rates to the same level over time. Even though some historic rates are still in place, those rates are expressed as a percentage of the published rate schedule. Any subsequent rate changes, due to changes in acuity or provider, are based on the new procedures adopted for the new rate methodology.

State of Missouri
Single Audit
Corrective Action Plan
Year Ended June 30, 2018

State Agency: State Emergency Management Agency

Audit Finding Number: 2018-015 Subrecipient Monitoring- A. Risk Assessments

Name of the contact person
Responsible for corrective action: Shelly Honse

Anticipated completion date for corrective action: Completed

Corrective action planned is as follows:

The SEMA has updated the Recovery Division Monitoring Policy to show that risk assessments will be conducted within twenty-four months (24) after the disaster declaration to comply with Uniform Guidance. The majority of subrecipients will be considered high risk, as documentation is not available at the beginning of a disaster declaration, therefore; completing the assessment within 50% of the disaster time-line is judicious.

State Agency: State Emergency Management Agency

Audit Finding Number: 2018-015 Subrecipient Monitoring- B. Monitoring Reviews

Name of the contact person
Responsible for corrective action: Shelly Honse

Anticipated completion date for corrective action: Completed

Corrective action planned is as follows:

The SEMA has updated the Recovery Division Policy to reflect that 20% of applicants with a determining risk assessment score will either receive an on-site visit or desk monitoring as determined by the aforementioned score.

State Agency: State Emergency Management Agency

Audit Finding Number: 2018-015 Subrecipient Monitoring- C. Cash Management

Name of the contact person
Responsible for corrective action: Shelly Honse

Anticipated completion date for corrective action: March 1st, 2019

Payment letters for large projects and small projects sent to Applicants will inform the Applicant that a copy of the cancelled check, bank documentation of an electronic transfer, or other proof of the expenditure of the funds described must be provided to SEMA within 30 days of receipt of the payment. Verification of documentation will be accessed and confirmed at project close-out and said action will be integrated into the Recovery Division Policy.

This subject will all also be discussed with FEMA Region VII for guidance on their upcoming desk review of SEMA in March. 44 CFR requires payment of small projects to the Applicant upon obligation by FEMA. Dependent upon the category of work, the Applicant may be permitted to complete work within a 6 to 48 month timeframe. This conflict in Federal guidance makes the 30 day rule in 2 CFR, impossible to accomplish for many projects/Applicants.

State Agency: State Emergency Management Agency

Audit Finding Number: 2018-016 Audits and Awards- A. Subrecipient Audits

Name of the contact person
Responsible for corrective action: Shelly Honse

Anticipated completion date for corrective action: June 30th, 2019

Corrective action planned is as follows:

SEMA will follow-up on audit findings related to the Public Assistance program by development of a management letter to be sent to subrecipients requesting a response indicating if the corrective action plan outlined in the audit has been implemented or will be within a timely manner. This management decision procedure will be outlined in SEMA's administrative plan.

State Agency: State Emergency Management Agency

Audit Finding Number: 2018-016 Audits and Awards- B. Award Identification

Name of the contact person
Responsible for corrective action: Shelly Honse

Anticipated completion date for corrective action: Completed

Corrective action planned is as follows:

SEMA has amended the payment letters sent to Applicant's to include identification of the CFDA number for the Public Assistance program. The CFDA number will also be incorporated into the next Applicant briefing in future declared disaster.

State of Missouri
Single Audit
Corrective Action Plan
Year Ended June 30, 2018

State Agency: Missouri Department of Transportation (MoDOT)

Audit Finding Number: 2018-017 MoDOT Project Closeouts and Final Vouchers

Name of the contact person
Responsible for corrective action: Brenda Morris

Anticipated completion date for corrective action: May 31, 2019

Corrective action planned is as follows:

- MoDOT has corrected the SAM II system and reconciled with the federal highway administration the overstatement of the project's federal share.
- MoDOT has corrected the SAM II system and reconciled with the federal highway administration the incorrect allocation of the local entity's matching funds.
- MoDOT will assess procedures related to preparation and review of Highway and Planning Construction program project closeouts and final vouchers and revise, as necessary within 30 days.
- MoDOT will require training for all Financial Services staff responsible for preparing project closeouts and final vouchers within 45 days.
- MoDOT will require written approval by Financial Services Manager and Assistant Financial Services Director for all project closeouts and final vouchers, effective immediately.

State of Missouri
Single Audit
Corrective Action Plan
Year Ended June 30, 2018

State Agency: Missouri Department of Transportation (MoDOT)

Audit Finding Number: 2018-018 MoDOT Subrecipient Risk Assessments

Name of the contact person
Responsible for corrective action: Brenda Morris

Anticipated completion date for corrective action: December 31, 2019

Corrective action planned is as follows:

- MoDOT will develop standard procedures for performing and documenting risk assessments of Highway Planning and Construction program subrecipients (local public agencies (LPAs)) and guidelines to determine the nature, timing and extent of monitoring activities within 3 months.
- MoDOT will require training for all Central Office and District staff responsible for performing risk assessments and monitoring within 9 months.

State of Missouri - Single Audit
Letter to the Office of Administration Regarding Comprehensive Annual Financial Report Audit Delays
Year Ended June 30, 2018

NICOLE GALLOWAY, CPA
Missouri State Auditor

November 8, 2018

Ms. Sarah Steelman, Commissioner
Office of Administration
State Capitol Building
201 W. Capitol Avenue, Room 125
Jefferson City, MO 65101

Dear Commissioner Steelman:

This letter serves as communication of a potential delay in issuing our opinion on the Comprehensive Annual Financial Report (CAFR) for the year ended June 30, 2018. As known by your staff, the Department of Revenue (DOR) continues to experience delays in preparing and submitting to your office, the Accounts Receivable survey for various funds. This survey, which was due to your office on August 15, 2018, has not been finalized and submitted as of today. As you are aware, Office of Administration staff use the financial information included in the survey to report accounts receivable in the state's CAFR; and our office is responsible for auditing the CAFR. The survey will include significant accounts of the General Fund, Public Education, and Conservation and Environmental Protection, all major funds of the CAFR. We are unable to begin our audit testing until we receive the survey from the DOR.

The DOR's delays appear to result from implementation of the new Revenue Premier system. Once we receive the survey, we will begin audit testing which will include testing of information from the new system. This work has taken several weeks in past years, but could take longer this year because of the new system. Our audit work related to DOR accounts receivable will be completed once we have performed necessary audit procedures to obtain sufficient and appropriate audit evidence to support our conclusions on the amounts reported in the CAFR. We will issue our opinion on the state's CAFR for the year ended June 30, 2018, once all audit procedures have been performed, including the procedures to audit DOR accounts receivable described in this paragraph.

If you have any questions, please contact Josh Allen, Audit Manager, at 573-751-4213.

Sincerely,

Michael A. Moorefield
Chief of Staff and Counsel

cc: Director Joel Walters, Department of Revenue

State Auditor's Letter 2

Status of Findings*

1. Missing Monies and Unsupported and Falsified Transactions 3
2. Conflict of Interest, Board Objectivity, Oversight, and Annual Audits 4
3. Accounting Controls and Procedures 5
4.2 Electronic Data Security - Security controls.....7

*Includes selected findings

NICOLE GALLOWAY, CPA
Missouri State Auditor

To the Honorable Mayor
and
Members of the Board of Aldermen
City of Coffey, Missouri

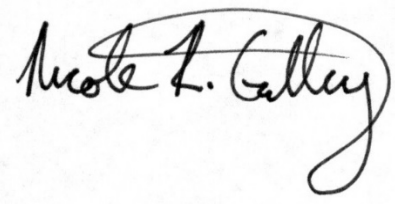
We have conducted follow-up work on certain audit report findings contained in Report No. 2018-046, *City of Coffey* (rated as Poor), issued in July 2018, pursuant to the Auditor's Follow-Up Team to Effect Recommendations (AFTER) program. The objectives of the AFTER program are to:

1. Identify audit report findings for which follow up is considered necessary, and inform the city about the follow-up review on those findings.

2. Identify and provide status information for each recommendation reviewed. The status of each recommendation reviewed will be one of the following:

    - Implemented: Auditee fully implemented the recommendation, either as described in the report or in a manner that resolved the underlying issue.
    - In Progress: Auditee has specific plans to begin, or has begun, to implement and intends to fully implement the recommendation.
    - Partially Implemented: Auditee implemented the recommendation in part, but is not making efforts to fully implement it.
    - Not Implemented: Auditee has not implemented the recommendation and has no specific plans to implement the recommendation.

As part of the AFTER work conducted, we reviewed documentation provided by city officials and held discussion with city officials to verify the status of implementation for the recommendations. Documentation provided by the city included minutes of meetings, financial records, and other pertinent documents. This report is a summary of the results of this follow-up work, which was substantially completed during February 2019.



Nicole R. Galloway, CPA
State Auditor

City of Coffey
Follow-Up Report on Audit Findings
Status of Findings

1. Missing Monies and Unsupported and Falsified Transactions

Utility receipts totaling at least $33,984 were received but not deposited. In addition, unsupported payroll checks totaling $24,634 were written to the former City Clerk, and payroll records indicated the former City Clerk was overpaid an additional $1,556.

Undeposited utility receipts

Between September 2015 and August 2017, the former City Clerk did not deposit $33,984 of recorded utility receipts. The former City Clerk recorded unsupported utility payments for herself totaling $2,645 (included in the $33,984), but these payments could not be traced to a deposit.

Improper payroll checks

Improper payroll checks totaling $24,634 were written to the former City Clerk from the city's water and sewer bank accounts from April 29, 2016, through July 28, 2017. Also, $13,432 of improper payroll payments made during 2016 and $11,202 of improper payroll payments and $201 of regular payroll payments made during 2017 were not included on the former City Clerk's W-2 forms and not subject to payroll tax withholdings.

Payroll over (under) payments

A comparison of the hours reported on timesheets to hours paid according to the payroll reports showed discrepancies resulting in the former City Clerk being overpaid an additional $1,556 from November 2015 through August 2017.

Falsified document

According to city officials, the former City Clerk created false meeting minutes indicating a special Board meeting was held on February 23, 2017, authorizing a $1,500 withdrawal from one of the city's savings accounts and subsequent deposit into 3 other city bank accounts.

Recommendation

The Board of Aldermen work with law enforcement officials regarding criminal prosecution of the undeposited utility receipts, improper payroll checks, payroll over (under) payments, and the falsified meeting minutes, and take the necessary actions to seek restitution. The Board should also ensure payroll taxes are properly withheld and all compensation reported on W-2 forms, and amend W-2 forms for unreported compensation, as appropriate.

Status

In Progress

The Board of Aldermen is working with the Daviess County Sheriff and Prosecuting Attorney regarding criminal prosecution of the former City Clerk. Multiple criminal charges of stealing and forgery were filed against the former City Clerk and the case is ongoing as of February 2019. The city received a $50,000 insurance settlement for employee dishonesty in October 2017. The Board does not plan to amend the former City Clerk's W-2 forms until the criminal case is concluded.

2. Conflict of Interest, Board Objectivity, Oversight, and Annual Audits

Some activities involving former Alderman Browning created a conflict of interest, and the employment of individuals directly supervised by and related to Board members could have compromised the Board's objectivity. The Board had not established adequate oversight of the City Clerk position or obtained annual audits as required by state law.

2.1 Conflict of interest and objectivity

Former Alderman Browning created a conflict of interest when he voted to approve salary increases and payroll checks to his wife, the former City Clerk. In addition, the current City Clerk is the daughter of 2 of 4 current Board members, and the Board had not established policies and procedures to address employment and supervision of a related employee. As a result, the objectivity and effectiveness of the Board may have been compromised.

Recommendation

The Board of Aldermen closely examine city transactions to identify apparent and actual conflicts of interest and adopt procedures to address the employment and supervision of relatives.

Status

Implemented

The Board of Aldermen approved revised ordinances on December 17, 2018, and Section 7 of these ordinances addresses conflicts of interest, procedures to identify conflicts of interest, and the employment and supervision of relatives. Currently, the 2 Board members that are related to the City Clerk abstain from voting on issues with her involvement, including salary increases. The Mayor is responsible for supervising the City Clerk's duties and reviews all financial reports, bank statements, and her timesheets and the related payroll checks.

2.2 Oversight and segregation of duties

The Board had not established adequate segregation of duties or supervisory reviews over the various financial accounting functions performed by the City Clerk. In addition, Board members indicated the former Mayor often signed blank checks in advance.

Recommendation

The Board of Aldermen segregate accounting duties to the extent possible and implement appropriate reviews and monitoring procedures. In addition, the Board should not allow any check signers to sign checks in advance.

Status

Implemented

The Mayor indicated he now reviews and documents his review of monthly bank statements and reconciliations. Board members indicated financial statements are presented at each monthly meeting for review and approval. We reviewed the December 2018 bank statements, reconciliations, and monthly financial statements, and evidence of the Mayor or Board's review and approval. Board members indicated checks are no longer signed in advance.

2.3 Annual audits

The city did not obtain annual audits as required.

Recommendation

The Board of Aldermen obtain annual audits of the waterworks and sewerage system as required by state law.

Status

In Progress

The Board of Aldermen contracted for an audit of the city for the year ending June 30, 2018, and the audit was in process as of February 2019.

3. Accounting Controls and Procedures

Significant weaknesses existed in the city's accounting controls and procedures.

3.1 Receipting and depositing procedures

The city's procedures for receipting and depositing monies were poor.

- The former City Clerk did not always issue receipt slips for monies received.
- All copies of some receipt slips were missing from the receipt books. Also, the top copy of some voided receipt slips was not retained.
- City personnel did not consistently indicate the method of payment, or reconcile the method of payment to the composition of receipts recorded in the computerized utility system or to the deposit.
- The former City Clerk did not deposit monies timely or intact.

Recommendation

The Board of Aldermen require receipt slips be issued for all monies received with the method of payment indicated, the composition of receipts be reconciled to the composition of amounts recorded and deposited, receipt slips (including the top copy of voided receipt slips) be retained, and monies received be deposited timely and intact.

Status

Implemented

Our review of December 2018 financial activity showed that manual receipt slips were issued for all monies received with the method of payment indicated on the receipt slip, the composition of receipt slips was reconciled to amounts recorded and deposited, and monies received were deposited timely and intact. No receipt slips were voided during December 2018. The City Clerk indicated that all copies of voided receipt slips are now being retained.

3.2 Bank accounts, reconciliations, and fees

Controls and procedures over bank accounts and reconciliations needed improvement.

Number of bank accounts	The city maintained an excessive number of bank accounts, resulting in cumbersome record keeping.
Bank reconciliations	The former City Clerk did not perform monthly bank reconciliations from March 2017 through July 2017.
Overdraft and minimum balance fees	The Board and the former City Clerk failed to monitor the city's cash balances and incurred overdraft and minimum balance fees.

Recommendation

The Board of Aldermen review the number of bank accounts. The Board should also ensure monthly bank reconciliations are prepared and reconciled timely, and any differences are promptly investigated and resolved. The Board should also properly monitor bank account balances to avoid bank fees.

Status

Implemented

The Board reduced the number of bank accounts by eliminating the savings account. The City Clerk and Board members indicated bank accounts are reconciled timely and bank account balances are monitored to avoid fees. Our review of the December 2018 bank reconciliations showed the reconciliations were prepared by the City Clerk and reviewed by the Mayor timely. The city was not charged any overdraft fees during the year ended December 31, 2018.

3.3 Accounting records and financial statements

City officials did not maintain accurate accounting records and financial statements.

- Some transactions were not accurately recorded in the computerized accounting system, and the dates recorded on the actual checks differed from those recorded in the computerized accounting system.
- The semiannual financial statements prepared by the former City Clerk were misleading and significantly inaccurate.
- The former City Clerk prepared packets for Board members for each monthly meeting and most information contained in the packets was inaccurate.

Recommendation

The Board of Aldermen ensure accounting records and financial reports are accurate. The Board should perform adequate reviews of financial reports and checks written before approving.

Status

Implemented

The Mayor reviews and compares bank activity to the accounting records monthly and reviews financial reports, supporting documentation, and

checks written before approving and signing checks. Our comparison of the accounting records to the monthly financial report prepared for the Board for December 2018, showed no discrepancies. The semiannual financial statement for the 6 month period ending December 31, 2018, was accurate and reviewed and approved by the Board.

3.4 Excessive and unauthorized transfers and commingling of restricted funds

The former City Clerk made excessive and unauthorized transfers between various bank accounts, and did not always deposit utility receipts into the proper bank account, which led to commingling of restricted funds.

Recommendation

The Board of Aldermen monitor and reduce the number of transfers made between bank accounts and ensure monies received are deposited in the appropriate bank accounts.

Status

Implemented

Board members indicated they have reduced the number of transfers made between bank accounts and the Mayor reviews deposits and bank statements to ensure monies received are deposited in the appropriate bank accounts. We reviewed the December 2018 bank statements and accounting records, and determined no transfers between bank accounts occurred and the City Clerk deposited monies into the correct bank accounts.

3.5 Utility deposits

The list of refundable utility deposits was not accurate and not reconciled to the balance of the utility deposit bank account.

Recommendation

The Board of Aldermen reconcile the utility deposit listing monthly to the utility deposit bank account balance. Any discrepancies should be investigated and resolved.

Status

Implemented

The City Clerk prepares a list of refundable utility deposits monthly and reconciles it to the utility deposit bank account balance. The Mayor reviews the list and the related bank statement and reconciliation monthly. We reviewed the December 31, 2018, reconciliation and noted the list agreed to the balance of the utility deposit bank account.

4.2 Electronic Data Security - Security controls

Security controls were not in place to lock the city's computer after a specified number of incorrect logon attempts or after a certain period of inactivity.

Recommendation

The Board of Aldermen ensure the city's computer has security controls in place to lock after a specified number of incorrect logon attempts and after a certain period of inactivity.

Status

Implemented

The City Clerk indicated the city's computer now locks after a specified number of incorrect logon attempts and a certain period of inactivity.

Office of Missouri State Auditor

Nicole Galloway, CPA

Village of Ferrelview

Report No. 2019-019
March 2019

auditor.mo.gov

Nicole Galloway, CPA
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the Village of Ferrelview

Financial Condition	The village's General Fund is in poor financial condition. Budgets are not prepared timely, payroll costs increased significantly during 2016 and 2017, and transfers from the Water and Sewer and Street Funds have kept the General Fund from having a negative fund balance.
Utilities	Financial information in the village's utility system is not complete and accurate. The village is not following its service shut off ordinance and has not developed adequate procedures to monitor and collect delinquent water accounts. A written policy regarding partial payments by customers who have delinquent accounts has not been developed and customers are allowed to make partial payments without entering into a written payment agreement and Board approval. Adequate procedures are not in place to pursue collection of accounts receivable and monthly reconciliations of total amounts billed, payments received, and amounts unpaid for any of the utility services are not performed. Controls over non-monetary adjustments posted to customer utility accounts need improvement. Refundable utility deposits held in the Water and Sewer Fund account exceeded the bank balance as of February 28, 2018, and are not accounted for properly. The Board could not provide documentation that a formal review of utility rates had ever been performed, and as a result there is less assurance the utility rates are set at an appropriate level. The village has not obtained annual audits of its combined waterworks and sewage system as required by state law.
Budgets, Financial Planning, and Reporting	The village did not prepare a budget for 2016 or 2017 and the budget prepared for 2018 lacked some information required by state law and was not approved timely. Budget to actual reports were not prepared provided to the Board for review. The village has not developed formal written long-range plans for streets or utilities. The financial statement submitted to the State Auditor's Office for 2017 was not adequate and the statement filed for 2016 had to be resubmitted several times due to errors.
Accounting Controls and Procedures	The Board has not adequately segregated accounting duties or ensured documented supervisory or independent reviews of work performed by village personnel is performed. Receipts slips are not issued for most payments received by the village. A restricted $15,000 certificate of deposit in the Water and Sewer Fund was cashed in October 2017 and the proceeds deposited in the General Fund. Village officials indicated this transfer was part of a repayment of a liability to the General Fund and that an additional $6,550 is still owed, but it is unclear if this amount is accurate based on records provided.
Payroll Controls and Procedures	Payroll functions are not segregated and there is not a sufficient review of time records and payroll functions. The village did not have ordinances to address some significant issues and did not always comply with established ordinances. Wages paid to the Police Chief included significant overtime pay in 2016 and 2017, even though not required by federal wage laws. Total payroll costs for the village increased significantly from 2014 to 2017, and reached a high of approximately $113,000 in 2016. Police payroll totaled approximately $95,000 during 2016 and 2017, accounting for approximately 45 percent of General Fund spending.

Disbursements	The Board's approval process for disbursements is not adequate and Board meeting minutes did not mention bills approved for payment. The Board has no documentation of any discussions held or the basis for determining the amounts paid from the Water and Sewer Fund and Street Fund to the General Fund. During 2016 and 2017, approximately $103,000 was paid from the Water and Sewer Fund to the General Fund and approximately $15,000 from the Street Fund to the General Fund. Documentation is not maintained to support the amounts paid and a method for allocating administrative costs has not been developed. The village was required to repay $5,102 in grant funding due to noncompliance with the grant agreement. The Village Treasurer does not maintain a petty cash ledger or adequate documentation to support petty cash transactions. The village does not have written contracts with some service providers and certain outside parties.
Capital Assets	The village does not maintain records of its capital assets including buildings, land, vehicles, equipment, and other property. A police vehicle was sold to a Board member for less than the minimum amount established by the Board and without Board approval, giving the appearance of a conflict of interest and in violation of the Missouri Constitution. The village has not developed a policy for disposing of property items.
Ordinances and Sunshine Law	Village ordinances are not organized, complete, or up to date. Village personnel do not maintain adequate records of requests for records to show compliance with state law. The village did not comply with state law regarding closed sessions. Minutes for monthly Board meetings are neither signed by the Village Clerk as the preparer, nor the Board Chairperson or another Board member to indicate Board approval.
Electronic Data Security	Controls over village computers are not sufficient to prevent unauthorized access, and sufficient plans and processes are not in place for recovering systems and data.

In the areas audited, the overall performance of this entity was **Poor**.*

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

NICOLE GALLOWAY, CPA
Missouri State Auditor

To the Honorable Chairperson
and
Members of the Board of Trustees
Village of Ferrelview, Missouri

The State Auditor was petitioned under Section 29.230, RSMo, to audit the Village of Ferrelview. We have audited certain operations of the village in fulfillment of our duties. The scope of our audit included, but was not necessarily limited to, the year ended December 31, 2017. The objectives of our audit were to:

1. Evaluate the village's internal controls over significant management and financial functions.

2. Evaluate the village's compliance with certain legal provisions.

3. Evaluate the economy and efficiency of certain management practices and procedures, including certain financial transactions.

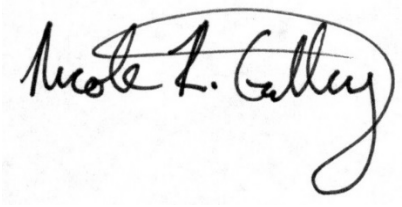
Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the village, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of applicable contract, grant agreement, or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the village's management and was not subjected to the procedures applied in our audit of the village.

For the areas audited, we identified (1) deficiencies in internal controls, (2) noncompliance with legal provisions, and (3) the need for improvement in management practices and procedures. The accompanying Management Advisory Report presents our findings arising from our audit of the Village of Ferrelview.

An additional report, No. 2018-004, *Sixth Judicial Circuit, Village of Ferrelview Municipal Division*, was issued in January 2018.



Nicole R. Galloway, CPA
State Auditor

The following auditors participated in the preparation of this report:

Senior Director:	Regina Pruitt, CPA
Audit Manager:	Todd M. Schuler, CPA
In-Charge Auditor:	Richard Stuck
Audit Staff:	Amanda G. Flanigan, MAcc

1. Financial Condition

The village's General Fund is in poor financial condition. The Board of Trustees is not adequately monitoring the financial condition of the village. Budgets are not prepared timely, payroll costs increased significantly during 2016 and 2017, and transfers from the Water and Sewer and Street Funds have kept the General Fund from having a negative fund balance. A class action lawsuit settlement totaling approximately $88,000 received in February 2015 from a phone provider improved the village's financial condition at that time, but expansion of the police department beginning in June 2015 has contributed to the poor condition of the General Fund.

As discussed in Management Advisory Report (MAR) finding number 5.3, the General Fund is in a weakened condition as a result of excessive spending on salaries, particularly for the police department, during 2016 and 2017. As discussed in MAR finding number 3.1, the village's poor budgetary preparation and monitoring procedures have also contributed to this problem.

The reconciled cash balance of the General Fund at December 31, 2017, was $19,053, and a receivable, totaling $6,550, from the Water and Sewer Fund was listed as an asset for the General Fund in the 2018 budget. The balance of the General Fund was approximately 10 percent of General Fund spending, but as discussed in MAR finding number 6.2, that balance was achieved through significant transfers from the Water and Sewer and Street Funds. Without those transferred funds, the General Fund balance at December 31, 2017, would likely have been negative. In addition, the General Fund balance is not sufficient to allow the village to pay calculated excess revenues collected from traffic tickets during 2016 and 2017, totaling $20,300 and $1,551, to the Department of Revenue, according to addendums filed with the State Auditor's Office.

In July 2017, in part due to the excess revenue owed to the state for 2016 and the overall financial condition of the General Fund, the Board voted to dissolve the village's municipal division and disband the police force. The Police Chief remained employed, but part-time officers were no longer used, and traffic tickets have not been issued since that time. Due to ongoing disputes with the Board, the Police Chief was suspended with pay in November 2017. He continued to be paid $300 per week from mid-November 2017 to April 2018, for a total of approximately $6,000. New Board members took office in April 2018 and the Police Chief was reinstated and began working again.

It is essential the Board address the financial condition of the General Fund both in the immediate- and long-term future. To improve the financial condition the Board should reduce spending as much as possible, address interfund and other obligations, and evaluate controls and management practices to ensure efficient use of village resources.

Recommendation

The Board of Trustees closely monitor the village's financial condition. The Board should reduce spending where possible, establish a plan to pay interfund obligations and excess revenues to the state, and evaluate controls and management practices to ensure efficient use of resources.

Auditee's Response

We are currently monitoring the village's financial condition more closely. We have reduced payroll significantly in 2018 by consolidating some positions. We will review records related to the amount due from the Water and Sewer Fund to the General Fund and are in the process of establishing a plan to repay the excess revenues due to the Department of Revenue. We plan to evaluate controls and management practices overall to ensure resources are used efficiently.

2. Utilities

Controls over utilities need improvement.

2.1 Utility financial data

Financial information in the village's utility system is not complete and accurate. During a request for documents in March 2018, we were informed that on January 10, 2018, the utility software provider performed a procedure referred to as a "compact and repair" to the utility system database. The compact and repair procedure is built into the Microsoft Access application and it is customary to periodically perform this procedure to keep the database working properly. Microsoft recommends making a backup of the database prior to performing the procedures, which was done by the software provider, because Access may truncate some data from tables that are damaged and some data may be lost in the process. If a backup of the data is made, it is possible to recover any lost data. According to the software provider, who was contacted by village personnel because they were having trouble accessing data for us, the process deleted some historical data from the system. The software provider told us the company informed village personnel that to restore the missing data and move forward with accurate data for 2018, the village would need to save the backup file created by the software provider and re-enter all transactions after January 10, 2018, into the saved back up database. The village has not completed this process, bringing into question the accuracy of the utility system data.

To ensure the accuracy of data within the utility system, it is imperative the village follow up on instructions from its software provider timely.

2.2 Shut off procedures

The village is not following its service shut off ordinance and has not developed adequate procedures to monitor and collect delinquent water accounts. Village personnel do not periodically prepare a delinquent accounts listing and could not provide us a listing of unpaid water and sewer bills. The Board established an ordinance to shut off water service to any customer whose bill has not been paid within 15 days after the due date (10th of the month). Testwork performed for 3 months, (July 2017, February 2018, and March 2018), showed numerous customers who had not made payments

within 15 days of the due date, but service was not disconnected. The former Village Clerk could not provide records to show that any customers had service shut off prior to March 2018.

The former Village Clerk indicated that the Water Commissioner (one of the Trustees) instructed her to prepare shut off notices on March 5, 2018, for customers whose February 2018 billings were unpaid. The Village Clerk informed him his account was among those receiving shut off notices. The next day the Trustee sent the former Village Clerk an email message advising her to delay shut offs until March 12, 2018. On March 12 only two customers still had not paid their outstanding bill, including this Trustee. The contracted water operator was requested to shut off these two customers' service, but upon arrival at the Trustee's residence was told by the Trustee to not turn off either his water or the other customer's water. The water operator requested something in writing from the Trustee regarding this directive and received an email message from him documenting this instruction. The Trustee indicated he was going to pay his bill the following day and did so. However, he used his position as a Trustee for personal gain in this situation, which violates state law. Public officials cannot make decisions that may financially impact themselves or their family. By stopping his service from being disconnected, this Trustee avoided having to pay the reconnect fee, along with not losing service. The other customer had his/her service disconnected on March 13, 2018, per village records.

To help maximize utility revenues, procedures should be developed to ensure adequate steps are taken to collect delinquent accounts and shut off service in accordance with village ordinance. In addition, Section 105.452(4), RSMo, prohibits an official from acting favorably on any matter specifically designed to provide a special monetary benefit to such official.

2.3 Partial payments

The village does not have a written policy regarding partial payments by customers who have delinquent accounts, and customers are allowed to make partial payments without entering into a written payment agreement and without Board approval.

We tested billings and payments made in July 2017, February 2018, and March 2018. Of the 55 billings tested during those months, 15 were partial payments. There were no written agreements for or Board approval of these arrangements.

A written policy is necessary to establish and document the process to determine when payment agreements are allowed, how the payment amount is to be established, and the approval process for these arrangements. In addition, a signed written payment agreement is necessary to indicate the intent of the customer to pay the outstanding balance and to aid in accounting for and collecting amounts due.

2.4 Accounts receivable

The village does not have accurate records of outstanding utility accounts nor adequate procedures to pursue collection of accounts receivable. In addition to not following established shut off procedures, as discussed in section 2.2, phone calls are not made and letters are not sent to delinquent customers in an attempt to collect past due amounts. We asked village personnel why the village was not pursuing collection of outstanding amounts due from renters with landlords, as allowed by state law. Village personnel indicated a settlement agreement entered into in July 2003 with the owner of a mobile home park stated the village would not pursue collection of renters delinquent balances with management of the park.

Section 250.140, RSMo, provides that all combined utility services shall be deemed furnished to both the occupant and the owner of the premises, which allows utility providers to pursue collection from the owners of property if the renters do not keep the account in good standing. It is unclear if the settlement agreement is still valid due to changes in the law but a legal opinion has not been sought by the village regarding this matter. In addition, there are several other apartment complexes and mobile home parks in the village and the village also did not seek payment of delinquent amounts from the owners of those properties. The village should use all available means to collect amounts owed from tenants of these properties.

Good business practices require establishment of adequate collection procedures to ensure accounts are collected timely and bad debts are kept to a minimum. To ensure revenues of the utility system are maximized, the village should start holding property owners liable for outstanding accounts where applicable and determine if the prior settlement agreement is still valid.

2.5 Accounts receivable reconciliations

The village does not perform monthly reconciliations of total amounts billed, payments received, and amounts unpaid for any utility services.

Monthly reconciliations are necessary to ensure accounting records balance, transactions are properly recorded, and errors or discrepancies are detected and corrected timely.

2.6 Non-monetary adjustments

Controls over non-monetary adjustments posted to customer utility accounts need improvement. Non-monetary adjustments are any transactions where payment is not received; however, the account balance is changed in the accounting records, such as for waiving customer late charges, adjusting usage for inaccurate meter readings, or reducing a balance due to water leaks. The Village Clerk, who is responsible for receipting and posting utility payments to the system, made 431 non-monetary adjustments, totaling $207,885, during 2017 to reduce customer account balances. Of this total, 57 adjustments were made on 4 customer accounts and totaled $191,939. The Village Clerk indicated these adjustments were needed due to errors in the meter reading or the meter being broken but documentation was not maintained to support these reasons. Non-monetary adjustments posted to the system are not reviewed and approved by an independent person and

documentation of reasons for adjustments is not always retained. Because the Village Clerk is responsible for collecting utility payments and has the ability to alter or delete individual utility account information, there is an increased risk that unsupported or unauthorized changes can be made in the utility system. In addition, a comparison of approved adjustments to adjustments actually made to the system is not performed by an independent person.

Non-monetary adjustments should be verified and approved by a person independent of the person posting these transactions to ensure they are necessary and properly handled. Considering the risks associated with non-monetary adjustments, the Board should consider monitoring all such transactions.

2.7 Utility deposits

Refundable utility deposits held in the Water and Sewer Fund, along with other water receipts, are not accounted for properly.

Effective October 2017, village Ordinance No. 315 requires a $250 deposit when an account is activated (deposit amounts in previous years were $150, $100, and $25). The village's list of refundable utility deposits totaled $31,956 as of February 28, 2018; however, the bank balance of the Water and Sewer Fund account was only $31,654. Considering all activity of the combined water and sewer system is accounted for within this fund, village officials need to determine what is causing this shortage. In addition, during 2016 and 2017, village personnel refunded 4 deposits ($750) to customers with active accounts. They could not explain why this occurred. In addition, 9 active accounts did not have deposits shown on the listing.

Maintaining and updating a complete list of customer utility deposits is necessary to provide a record of deposits held. In addition, maintaining a separate accounting record of utility deposits and reconciling it to the fund balance provides the village assurance the Water and Sewer Fund account balance is sufficient to cover customer deposit liabilities and ensure customer deposits are not used for water operations.

2.8 Utility rates

The Board could not provide documentation that a formal review of utility rates had ever been performed, and as a result there is less assurance the utility rates are set at an appropriate level. Rates charged for water and sewer services changed in July 2017, with water rates decreasing and sewer rates increasing. Village officials provided some calculations to support the rate changes, but the amounts used in those calculations were not supported and depreciation and replacement costs were not considered in the computations.

Section 67.042, RSMo, provides that fees may be increased if supported by a statement of costs that shows the increase is necessary to cover costs of providing the service. To ensure utility rates are appropriately set, village officials should perform and document a detailed cost study of the village's

water and sewer costs, including depreciation, and set rates to cover the total cost of operations without generating excessive profits.

2.9 Annual audits

The village has not obtained annual audits of its combined waterworks and sewage system as required by state law. The last audit of the village was for 2015. Section 250.150, RSMo, requires the village to obtain annual audits of the combined waterworks and sewage system, with the cost of the audit to be paid from revenues received from the system.

Recommendations

The Board of Trustees:

2.1 Contact the utility software provider and determine what actions are necessary to ensure data in the system is complete and accurate.

2.2 Ensure utility accounts are shut off in accordance with village ordinance and no one is given preferential treatment.

2.3 Establish a written policy regarding partial payments and ensure signed written payment agreements are prepared and approved by the Board.

2.4 Ensure adequate records are maintained to determine unpaid utility bills and pursue collection of outstanding balances. In addition, consult with the village's attorney regarding the ability to pursue collections from owners of rental property for unpaid utility bills and develop adequate procedures to pursue amounts due.

2.5 Ensure monthly reconciliations of amounts billed to amounts collected and delinquent accounts are performed.

2.6 Ensure all non-monetary adjustments are properly approved and compared to actual changes posted to the computer system, and documentation of reasons for all non-monetary adjustments is retained.

2.7 Ensure utility deposits held in the Water and Sewer Fund are accounted for properly and reconcile the utility deposit listing monthly to the amount held in the Water and Sewer Fund bank account. Any discrepancies should be investigated and resolved.

2.8 Ensure a statement of costs is prepared to support changes in utility rates and document formal reviews of water and sewer rates periodically to ensure revenues are sufficient to cover all costs of providing these services.

2.9 Obtain annual audits of the waterworks and sewerage system as required by state law.

Auditee's Response

2.1 We agree and plan to do this.

2.2 We agree and have implemented the recommendation.

2.3 We are now following our policy regarding shut off of service and plan to continue enforcing the due date for utility bills. We will discuss the need for a written policy. Partial payments will be accepted but if full payment is not made by the shut off date, the shut off of utilities will occur.

2.4 We will ensure an outstanding balances report is prepared and reviewed during Board meetings, and we are currently pursuing collection of outstanding accounts. We will discuss with our attorney the former settlement and determine if our current procedures are adequate.

2.5 We agree and will ensure the Village Clerk prepares reconciliations of amounts billed to amounts collected and delinquent accounts monthly in the future.

2.6 We will develop procedures to approve adjustments to the system before they are made and will ensure the actual changes made agree to items approved. In addition, documentation will be retained to support non-monetary adjustments.

2.7 We will develop a system to track utility deposits and will reconcile the total balance to the amount of water deposits held in the Water and Sewer Fund monthly.

2.8 We will ensure adequate documentation is prepared to support changes in utility rates and ensure formal reviews are done periodically.

2.9 We agree and plan to obtain annual audits in the future.

3. Budgets, Financial Planning, and Reporting

The village's budgeting practices, financial planning, and reporting needs improvement.

3.1 Budgets

The village did not prepare a budget for the year ended December 31, 2017, or 2016. A budget was prepared for the year ended December 31, 2018, but lacked some information required by state law and was not approved timely. The failure to prepare budgets does not allow for adequate monitoring of budget to actual receipts and disbursements. Although a budget was

eventually prepared for 2018, budget to actual reports were not prepared and provided to the Board for review.

The 2018 budget did not include a budget message or comparative statements of receipts or disbursements for the 2 preceding years, did not include all village funds, and had mathematical errors. The budget was not approved by the Board until its February 13, 2018, meeting several weeks after the village's fiscal year began on January 1, and did not include a budget for the Law Enforcement Training Fund. In addition, the Board budgeted all available revenue for each budgeted fund, resulting in unreasonable disbursement estimates for some funds. For example, the Street Fund budget included a line item for street improvements totaling approximately $109,000. That amount was used so budgeted disbursements would equal the available resources for the fund. According to the current Village Clerk, through November 30, 2018, the village has spent nothing on street improvements. Village personnel indicated budgets have been prepared in this manner because they believed this method was required to balance the budget.

A complete and well-planned budget, in addition to meeting statutory requirements, can serve as a useful management tool by establishing specific financial expectations for each area of village operations. It also assists in setting tax levies and informing the public about village operations and current finances. Section 67.010, RSMo, requires the budget present a complete financial plan for the ensuing budget year and sets specific guidelines for the information to be included in the budget. In addition, Section 67.080, RSMo, provides that no expenditures of public monies should be made unless it is authorized in the budget. Furthermore, proper monitoring of budgeted amounts to actual results is necessary for the budget to be an effective management tool.

3.2 Long range plans

The village has not developed formal written long-range plans for streets or utilities.

Streets

The village has not developed a formal annual maintenance plan for village streets. Village streets are in very poor condition and a relatively small amount of money has been spent to repair/replace village streets since 2015. As of December 31, 2017, the Street Fund balance was $55,923. This balance includes approximately $48,000 requested from Platte County in October 2015 as a distribution of the village's share of the countywide transportation sales tax passed by county voters in 2013. The village can make semi-annual requests for its share of this money, but has not requested or received any additional funds since October 2015. Personnel at the Platte County Treasurer's office indicated the village has approximately $68,000 available for distribution as of June 30, 2018. While the 2018 budget prepared by the village had a line item for street improvements totaling approximately $109,000, no significant street improvement projects were planned or completed as of June 30, 2018, and we identified no significant discussions

documented in Board minutes regarding street maintenance plans or street improvement projects.

A formal maintenance plan should be prepared in conjunction with the annual fiscal budget and include a description of the streets to be worked on, the type of work to be performed, an estimate of the quantity and cost of materials needed, the dates such work could begin, the amount of labor required to perform the work, and other relevant information.

Utilities

The village has an aging infrastructure for its water and sewer system and a multi-year capital improvement plan has not been documented. Because bonds issued in 1991 to build the system have been repaid, no reserve funds or repair and replacement funds are required, and as of December 31, 2017, no funds have been set aside for the system's long-term repairs or maintenance.

Adequate long-range planning helps ensure critical needs of the village are identified, priorities are established, and the village makes the best use of the funds available. After a long-term plan is developed, it should be reviewed annually and modified as necessary to meet the changing needs of the village.

Conclusion

Development of a formal maintenance plan for village streets and a multi-year capital improvement plan for the utility system are necessary to ensure the needs of village residents are met in the future. Details of each plan should be included in the budget message and approved by the Board. In addition, public hearings should be held to obtain input from residents.

3.3 Financial reporting

The financial statement submitted to the State Auditor's Office for the year ended December 31, 2017, was filed timely but not adequate. The data submitted consisted of meeting agendas, utility financial reports, and the advertisement for the sale of police vehicles. The information submitted did not include any annual financial data for village funds. In addition, a financial statement for the year ended December 31, 2016, was submitted timely, but had to be resubmitted several times after being updated due to errors identified by the Village Treasurer in the financial records of the village. A final revision was submitted in February 2018.

Section 105.145, RSMo, requires each political subdivision to file annual reports of its financial transactions with the State Auditor's Office. 15 CSR 40-3.030 details the elements needed, which include beginning and ending balance, summary of receipts and disbursements, statement of indebtedness at the beginning and ending, and the property tax rate levied for each fund for the reporting period.

Recommendations

The Board of Trustees:

3.1 Prepare annual budgets for all funds that contain statutorily required information and approve the budget prior to the beginning of the operating year, and ensure budgeted disbursements for each fund are a reasonable approximate of what the Board actually intends to spend. In addition, the Board should monitor budgets by reviewing monthly budget to actual reports.

3.2 Develop a formal street maintenance plan which will utilize available resources in a manner consistent with existing restrictions on the funds and prepare a formal capital improvement plan for the water and sewer system and a means to fund it.

3.3 Ensure financial data submitted complies with state regulations and statutes.

Auditee's Response

3.1 We will ensure the 2020 budget contains all information required by state law and is approved timely. We will ensure budgeted disbursements for each fund are reasonable and are reflective of what we actually plan to spend. We will discuss whether an amendment to the 2019 budget is necessary. We will request the Village Clerk begin providing budget to actual reports at the monthly Board meeting.

3.2 We are in the process of developing long-range plans for streets and utilities.

3.3 We will ensure financial data submitted in the future is accurate and filed timely.

4. Accounting Controls and Procedures

Accounting controls and procedures need improvement.

4.1 Segregation of duties

The Board has not adequately segregated accounting duties or ensured documented supervisory or independent reviews of work performed by village personnel is performed. The Village Clerk receipts and deposits payments received and posts transactions to the utility system, including adjustments to customer account balances. The Village Treasurer posts transactions to the accounting system and receives and deposits non-utility payments as well as preparing bank reconciliations and writing checks for all bank accounts. No one reviews the work performed by either of these employees.

Proper segregation of duties helps ensure all transactions are accounted for properly and assets are adequately safeguarded. If proper segregation of duties cannot be achieved, documented independent or supervisory reviews of accounting and bank records should be performed.

4.2 Receipting

Receipts slips are not issued for most payments received by the village. The Village Clerk issues a manual receipt for utility payments when payment is in cash or if a receipt is requested. The utility software system assigns a sequential number for each transaction posted to the system, but these transactions includes non-monetary adjustments where no payment is received. Personnel do not account for manual receipts issued by the Village Clerk or have procedures to determine that all manual receipts slips issued have been accounted for and posted to the system. The Village Treasurer does not issue receipt slips for non-utility payments received.

To adequately account for all receipts and to ensure all receipts are deposited intact, prenumbered receipt slips should be issued for all monies received and the numerical sequence of receipt slips should be accounted for properly.

4.3 Interfund liability

A restricted $15,000 certificate of deposit (CD) in the Water and Sewer Fund was cashed in October 2017 and the proceeds deposited in the General Fund. Village officials indicated this transfer was part of the repayment of a liability the Water and Sewer Fund had to the General Fund dating back to 2012. Some village financial records indicate an interfund liability still exists from the Water and Sewer Fund to the General Fund totaling $6,550, although it is unclear if this amount is accurate based on the records provided.

In October 2017, the former Village Treasurer, after researching various transactions dating back to 2012, requested the Board authorize a $15,000 Water and Sewer Fund CD be cashed and the proceeds deposited to the General Fund. She reported that $6,550 would still be due to the General Fund from the Water and Sewer Fund after this transaction. She summarized a series of transactions related to the purchase of police radios in 2012 and subsequent repayment of Water and Sewer funds used for the purchase. She reported that after researching the transactions, she determined the $25,000 CD cashed back in 2012 was in fact a General Fund CD, so the repayments to the Water and Sewer Fund in 2014 and 2015 were unnecessary. She reported payments made, totaling $3,450, to purchase new police vehicles (date unknown) were made from the Water and Sewer Fund, which should be credited against this liability, leaving the balance due to the General Fund at $21,550. By authorizing the $15,000 Water and Sewer Fund CD to be cashed and the proceeds being put in the General Fund bank account, the Water and Sewer Fund liability as of October 2017 would still be $6,550. None of the amounts paid from the Water and Sewer Fund to the General Fund as part of the allocation of administrative costs (see MAR finding number 6.2) was counted as a repayment of this liability.

Without clear documentation to support all aspects of this situation, it is unclear if the cashing of this CD and deposit of the proceeds to the General Fund was appropriate or if a liability still exists. The current Board needs to review this matter and determine if actions taken were appropriate and determine if this liability exists.

Receipts of the Water and Sewer Fund represent user fees restricted for the operation of the water and sewer system, including buying and delivering water to customers, repaying debt, if applicable, and preparing and replacing infrastructure.

Recommendations

The Board of Trustees:

4.1 Segregate the accounting duties of the village office personnel. If proper segregation cannot be achieved, ensure a documented independent or supervisory review of detailed accounting and bank records is performed.

4.2 Ensure receipt slips are issued for all monies received and account for the numerical sequence of all receipt slips issued.

4.3 Determine and resolve interfund liabilities and refrain from interfund borrowing of restricted funds.

Auditee's Response

4.1 We will ensure an independent review of accounting records is performed in the future.

4.2 We will ensure numerical receipt slips are issued for all funds received and account for the numerical sequence.

4.3 We agree and plan to review records surrounding this liability to determine any amount owed. We will refrain from interfund borrowing in the future.

5. Payroll Controls and Procedures

Significant improvement over payroll controls and procedures is needed. The village disbursed approximately $100,000 in wages during the year ended December 31, 2017.

5.1 Payroll procedures

Payroll functions are not segregated and there is not a sufficient review of time records and payroll functions. We noted errors with time and leave records, and documentation to support payroll transactions was not always adequate.

- Payroll records were not reviewed by the Board or someone independent of the payroll function. The Village Treasurer was primarily responsible for all payroll functions.

- Timecards were not always prepared or maintained for all police department personnel and prepared timecards were not signed by a supervisor to document approval of time worked.

Proper segregation of duties helps ensure all payroll transactions are accounted for properly and assets are adequately safeguarded. If proper segregation of payroll duties cannot be achieved, a periodic independent review of the records should be performed and documented. Signed and approved time records are necessary to document hours worked, substantiate payroll disbursements, monitor hours worked and leave taken, and demonstrate compliance with the Fair Labor Standards Act (FLSA).

5.2 Personnel ordinances and policies

The village did not have ordinances to address some significant issues and did not always comply with established ordinances. The village also had not adopted a personnel manual or other needed policies.

- During portions of 2016 and 2017, the Police Chief was paid a weekly salary, but the number of hours required to be worked each week was not established by ordinance or policy. Payroll records indicate the Police Chief was expected to work 15 hours weekly from January through May 2016 and was paid $10 per hour for any hours in excess of the 15. In June 2016, the salary was discontinued and the Police Chief was paid $15 per hour, but no minimum or maximum was established regarding the number of hours to be worked each week. While timecards were not available for several weeks during 2016 and 2017, the Police Chief's timecards reported at least 498 hours of overtime worked from June 2016 through mid-July 2017 (cost $11,272). In July 2017, the Board voted to pay the Police Chief a $300 per week salary for 20 hours of work and no overtime was incurred for the remainder of the year. An ordinance was not adopted establishing the compensation for the Police Chief and no formal policies were adopted to establish normal hours for the Police Chief. In addition, overtime is not required for the Police Chief since the village has fewer than 5 law enforcement officers, according to the FLSA. As a result, excessive pay for the Police Chief was incurred.

- Compensation for the Village Clerk and Village Treasurer was not established by ordinance.

To ensure employees are treated equitably and compensation is reasonable, personnel policies should be adopted to reflect the village's intended practices. By not following overtime requirements established by the FLSA, the village paid overtime wages when not required resulting in a greater financial burden for the village. In addition, ordinances documenting approved salary amounts help ensure equitable treatment and prevent misunderstandings.

5.3 Police department payroll costs

Total payroll costs for the village increased significantly from 2014 to 2017, especially for the police department, which has contributed to the poor financial condition of the General Fund discussed in MAR finding number 1. During the 2 years ending December 31, 2017, approximately $214,000 was spent on payroll, with more than $95,000 (45 percent) being for police officer salaries. Total spending from the General Fund was approximately $400,000, meaning approximately 53 percent of total spending was for salaries. Payroll expenditures totaled $75,069 for 2014, $85,468 for 2015, $113,332 for 2016, and $100,950 for 2017.

The Board has not performed an analysis to determine the level of police protection needed or if its police department payroll costs are comparable to other similar cities. Payroll for the police department increased significantly from 2014 to 2016, and then began to decrease in 2017 and 2018 after the police department was disbanded and all officers but the Police Chief were terminated. During 2014 to 2018, the following amounts were spent by the village on police payroll.

2014 - $26,842
2015 - $35,256
2016 - $53,417
2017 - $41,627
2018 - $17,739

We performed a comparison of police department payroll to 3 other cities in Platte County with a similar population size and determined that Ferrelview spent significantly more on law enforcement than those cities. The following chart shows the police payroll comparison.

City/Village	2017 Population[1]	2017 Police Payroll Costs
Ferrelview	373	$ 41,627
Dearborn	446	6,713
Camden Point[2]	695	0
Edgerton	564	14,599

[1] Population obtained from https://datausa.io.
[2] The Camden Point City Clerk indicated the city has no police force and does not pay for police protection from another entity.

Given the village's poor financial condition and to ensure taxpayer funds are spent wisely, the Board should evaluate the overall payroll costs, particularly the amount spent for police services, to determine the level of personnel necessary to properly serve the village.

Recommendations

The Board of Trustees:

5.1 Adequately segregate payroll duties or, at a minimum, ensure a documented periodic review of these functions is performed by someone independent of the payroll functions. In addition, the Board should ensure timesheets are prepared, properly signed, approved and retained for all employees, and the information is reviewed for accuracy prior to entry into the accounting system.

5.2 Adopt necessary personnel ordinances and/or policies, and ensure compliance with those ordinances and policies.

5.3 Evaluate the level of personnel services, including police protection, provided by the village and determine if any changes are warranted.

Auditee's Response

5.1 We will develop procedures to ensure a review of payroll records is performed and will ensure timesheets are prepared for employees and reviewed for accuracy.

5.2 We will update ordinances and personnel policies and ensure they are followed in the future.

5.3 We have already taken steps to reduce the level of personnel employed by the Board. We have placed limits on the level of police protection provided to keep costs at a level affordable to the village and have consolidated some administrative positions in an effort to reduce payroll.

6. Disbursements

Village procedures over disbursements need improvement.

6.1 Approval process

The Board's approval process for disbursements is not adequate. The Village Treasurer indicated a copy of the check register showing all checks written since the last meeting is presented to the Board at each Board meeting, but these registers have not been part of the official minutes. Since the registers report spending for the time period prior to the meeting, the Board was not approving payments before they occurred and the minutes of Board meetings during 2017 did not mention bills approved for payment. In addition, we saw no evidence any Board members reviewed invoices or other supporting documentation prior to payments occurring or that the Chairperson or other check signers reviewed invoices prior to signing checks.

To ensure disbursements are appropriate the Board should require a complete and accurate listing of all disbursements be provided for its review and approval, and conduct an adequate review of the list of bills, invoices and checks written prior to checks being issued. The Chairperson or other Board member signing checks should also document their approval of invoices.

6.2 Allocation of funds

The Board has no documentation of any discussions held or the basis for determining the amounts paid from the Water and Sewer Fund and Street Fund to the General Fund. During the years ended December 31, 2016, and 2017, the village issued checks totaling $39,855 and $63,292, respectively from the Water and Sewer Fund to the General Fund and $697 and $14,948, respectively from the Street Fund to the General Fund.

Documentation is not maintained to support the amounts paid and the village has not developed a method to allocate administrative costs to any funds, so these payments appear, at least partially, to be subsidies to the General Fund. The minutes for the September 12, 2017, Board meeting indicate the Village Treasurer told the Board that $2,040 was paid monthly from the Water and Sewer Fund to the General Fund during 2016 for general office expenses, but that amount was increased to $4,800 during 2017. These minutes also document the Village Treasurer reporting that no further payments from the Water and Sewer Fund to the General Fund could occur during 2017, although more than $15,000 of the total payments from the Water and Sewer Fund to the General Fund occurred from September 15, 2017, to December 31, 2017. No discussions by the Board were held on this topic, and no explanation or documentation of the support for these payments was provided.

The proper allocation of expenses is necessary for the village to accurately determine the results of operations of specific activities, thus enabling the village to establish the level of taxation and/or user charges necessary to meet all operating costs. To ensure restricted funds are used for intended purposes, the allocation of expenditures to village funds should be based on specific criteria, such as the number of hours worked by each employee, if possible, or by determining a reasonable basis to allocate costs from shared functions/employees benefiting multiple funds.

6.3 Grant expenditures

The village was required to repay $5,102 in grant funding due to noncompliance with the grant agreement. The police department applied for a grant from the Department of Public Safety (DPS) in September 2016 to purchase equipment, consisting of 2 flare containers and sets of flares, 2 sets of traffic cones, and 4 body armor vests. The village received the grant funding in January 2017.

The grant application specified various grant requirements, including attendance at a mandated grant training session, and specified the date ranges within which the purchase of equipment and payment to the vendor had to occur. The purchase of approximately $4,700 worth of equipment occurred on June 6, 2017, but the vendor was not paid until October 17, 2017, after the deadline established in the grant agreement. An email message was sent to the village from the DPS on September 11, 2017, requesting return of grant funds, and a letter was also sent to the village on that date. Subsequently, documentation obtained indicates an official with DPS spoke with a village

official and informed them that deadlines were missed and the funds would have to be returned. On December 18, 2017, the village repaid the funds to the DPS. Lack of monitoring by the Police Chief and the Board to ensure grant requirements and deadlines were met resulted in the loss of this funding.

The Board has a fiduciary responsibility to develop effective grant monitoring procedures to ensure grant requirements are met.

6.4 Petty cash

The Village Treasurer does not maintain a petty cash ledger or adequate documentation to support petty cash transactions. Vendor receipts maintained show $1,214 was spent in 2016 and $290 in 2017 from petty cash funds. The village maintained two petty cash funds, one which was being used and at the time of our cash count on March 7, 2018, held $76 (along with receipts for purchases totaling $29). Village personnel indicated the other petty cash fund had not been used recently, but at the time of our cash count on March 13, 2018, held $32 (along with receipts for various petty cash expenditures from 2014 to 2017 totaling $1,788). Neither fund is maintained at an imprest level, but personnel indicated they are supposed to be kept at $100 and $50. In addition, supporting documentation is not retained for all purchases.

To ensure all activity of the petty cash fund is properly accounted for, the village should maintain a petty cash ledger documenting receipts, disbursements, and the balance of the petty cash fund. In addition, documentation should be retained to support disbursements from the fund.

6.5 Written contracts

The village does not have written contracts with some service providers and certain outside parties. Written contracts have not been established with vendors or entities providing information technology, fire protection, and legal services.

Clear and detailed written contracts are necessary to ensure all parties are aware of their duties and responsibilities, prevent misunderstandings, and ensure village monies are used appropriately and effectively. Section 432.070, RSMo, requires contracts for political subdivisions to be in writing.

Recommendations

The Board of Trustees:

6.1 Ensure complete lists of disbursements are prepared and compared to invoices and other supporting documentation, check signers review invoices, and these reviews are documented.

6.2 Ensure payroll costs and other disbursements are properly allocated to the applicable village funds and allocations are supported by adequate documentation.

6.3 Develop procedures to ensure requirements are complied with for any future grants obtained.

6.4 Maintain a petty cash fund ledger and retain adequate documentation of all petty cash disbursements.

6.5 Enter into written contracts defining services provided and benefits received.

Auditee's Response

6.1 We will tighten controls over the disbursement process and will begin requiring a complete listing of disbursements be provided to the Board monthly. Supporting documentation for disbursements is now being reviewed by all check signers and we will ensure the review of invoices is documented in the future.

6.2 We agree and will develop procedures to properly allocate payroll costs and administrative expenses to the various village funds.

6.3 We will ensure grant requirements are met in the future.

6.4 We have eliminated all petty cash funds.

6.5 We agree and will do this.

7. Capital Assets

Improvement is needed over capital asset records and for dispositions of capital assets.

7.1 Capital asset records

The village does not maintain records of its capital assets including buildings, land, vehicles, equipment, and other property. The village also does not tag, number, or otherwise identify assets for specific identification or perform physical inventories.

A lack of records related to capital assets almost resulted in the loss of several body armor vests (costing about $1,000 each). In July 2017, the Municipal Court and the police department were disbanded. The Police Chief was kept on initially, but subsequently, in November 2017, was placed on paid administrative leave. An interim Police Chief was hired to assist with the closing of the police department. He contacted the Police Chief to obtain the 4 custom body armor vests assigned to officers (see MAR finding number 6.3). While 4 vests were returned, we inspected the returned vests in March 2018 and it was clear from this visual inspection that at least 2 of the 4 vests returned were not the vests purchased by the village. None of the 4 vests were tagged or marked as village property and 2 of the vests were clearly different than the other 2, but all 4 vests purchased in June 2017 should have been the same based on the invoice. Eventually, when the Police Chief was reinstated in April 2018, the remaining 2 vests were returned.

Property control tags should be affixed to all property items to help improve accountability and ensure assets are properly identified as belonging to the

village. For capital assets assigned to individual employees a document should be signed upon checkout of the asset detailing the asset is property of the village, the process for returning those items upon resignation or termination from the village, and the responsibilities of the individual in regards to the asset.

7.2 Disposition of police vehicles

The sale of police vehicles was not handled properly.

Village personnel placed an advertisement in the local newspaper on December 20, 2017, soliciting bids for the sale of 2 police vehicles. The advertisement stated the village was accepting sealed bids for the sale of a 2005 Ford Crown Victoria, with a minimum bid of $900, and a 2002 Ford Crown Victoria, with a minimum bid of $500. Bids were required to be mailed or emailed to the village by January 2, 2018. The advertisement did not specify the color of each vehicle and when bids were received, several referred to the vehicles by year and by color, but the year indicated did not match the year of the vehicle. For example, some bids referred to the 2005 vehicle as the tan/brown vehicle, while the 2002 was referred to as the white vehicle. The 2005 vehicle is actually white, while the 2002 is the tan/brown vehicle.

The Board selected the winning bidders at its January 9, 2018, meeting with the results documented in the minutes. However, the sales did not occur to those bidders as approved. A summary of the bids received follows, and the vehicle bid on is based on the vehicle the city understands the bidder intended to bid on.

Bidder	Vehicle Bid On*	Amount Bid	Status
1	White 2005	$ 2,500	Still wants vehicle
2	White 2005	$ 550	Purchased White 2005 for bid of $550
2	Tan/Brown 2002	$ 1,100	Not sold - still owned by village
3	Tan/Brown 2002	$ 1,200	Declined purchase
4	White 2005	$ 600	Declined purchase
5	Tan/Brown 2002	$ 1,800	Declined purchase

* Several bid documents showed the year for the other vehicle for sale, but we list here what the city interpreted as the vehicle the bidder intended to bid on, primarily based on the color listed on the bid documents. For example, Bidder 1 indicated White 2002 on his bid, but he intended to bid on the 2005 vehicle.

The January 9, 2018, Board meeting minutes indicate bidder 1 won the bid for the 2005 vehicle and bidder 5 won the bid for the 2002 vehicle. At the meeting, bidder 2 (who was a village Trustee and submitted a bid for each vehicle) pointed out that the 2002 vehicle had been broken into and damaged

after the advertisement was run. Bidders 3, 4, and 5 subsequently contacted the Village Clerk to withdraw their bids. A February 21, 2018, email message from the Village Clerk to bidder 2 (Trustee) indicated that she was planning to contact bidder 1 to determine if he wanted the 2005 vehicle and, if not, the trustee would be awarded the bid for both vehicles.

On February 23, 2018, the Village Clerk sent bidder 2 (Trustee) an email stating "the guy wants to buy the white car he wants the other decals off he is coming on Monday (February 26) to bring his money he is paying $600 and get the title." We saw no evidence in the minutes of any Board meetings that the price of either vehicle was approved to be reduced by the Board. The former Village Clerk told us a representative of bidder 1 came to look at the 2005 vehicle on February 26, but since it was not operable, she could not test drive it and left. It is unclear who approved the sale of the 2005 vehicle to bidder 2 (Trustee). No documentation could be provided showing this action was approved by the Board. On February 26, 2018, bidder 2 (Trustee) paid $550 to the Village Treasurer and took possession of the 2005 vehicle.

We contacted bidder 1 on March 13, 2018, to inquire whether he had declined to purchase the 2005 vehicle. He indicated he still wanted it and he stated the day after his bid was accepted the Village Clerk had called offering the vehicle for $600. Bidder 1 indicated he sent a representative to look at the vehicle on February 23, 2018, but she could not drive it because it did not have a battery. The March 13, 2018, Board minutes indicate there were concerns with the process followed regarding the vehicle purchased by bidder 2 (Trustee). A motion was made, and the Board voted unanimously, to contact the high bidder and determine if he was still interested in purchasing the vehicle. If he was not, the Board voted to rerun the advertisement. Bidder 2 (Trustee) and his wife, the Board Chairperson at the time, both voted on this matter.

Although the bid submitted for the 2005 vehicle by Bidder 2 (Trustee) did not meet or exceed the minimum bid set forth in the advertisement and the Board never approved his purchase of the vehicle, he currently retains possession of the vehicle. Due to the conflicts between years and colors of vehicles bid on, the lack of clear documentation on decisions made by the Board and how those directions were carried out, and the vehicle being sold to a Board member for much less than the minimum bid amount established in the advertisement, this transaction gives the appearance of a conflict of interest and violates the Missouri Constitution. All bids should have been rejected once village officials identified errors in the process and bids should have been re-solicited. Any bids received below the minimum threshold for each vehicle should have also been rejected. Had that been done, the Trustee would not have been in a position to purchase the 2005 vehicle. The 2002 vehicle was never purchased and is still owned by the village.

Board members serve in a fiduciary capacity. Failing to ensure adequate documentation was maintained surrounding the sale of a village asset to a Board member and selling it for less than the minimum amount set by the Board violates the Missouri Constitution by of donating things of value to an individual. Article VI, Section 23 and 25 of the Missouri Constitution specifically prohibits counties, cities, or other political subdivisions of the state from granting public money or things of value to any corporation, association, or individual.

Recommendations

The Board of Trustees:

7.1 Ensure village personnel properly tag, number, or otherwise identify all applicable village property and conduct and document an annual inventory.

7.2 Establish policies and procedures for the sale of village assets and ensure future sales are clearly documented, bid specifications for payment are met, and avoid the appearance of a conflict of interest. In addition, the Board should take action to retrieve the vehicle sold.

Auditee's Response

7.1 We will ensure village property is properly accounted for in the future and will ensure an annual inventory of assets is performed.

7.2 We plan to review procedures and will tighten controls over the sale of any village assets in the future. Any future sales involving a Board member will be monitored closely to ensure conflicts of interest are avoided. We will discuss the situation surrounding the sale of the village police vehicle and determine what action to take to retrieve the vehicle if possible.

8. Ordinances and Sunshine Law

Village ordinances are not organized, complete, or up to date. The Board generally meets once per month and did not always comply with the Sunshine Law. The Board held 16 closed sessions in 2016, 13 closed session in 2017, and 3 closed sessions from January to March 2018.

8.1 Ordinances

Village ordinances are not organized, complete, or up to date. Village ordinances are not codified or maintained in a well-organized manner. Also, the ordinances pertaining to employees' job responsibilities, work hours, compensation, and other applicable items have not been updated since December 1953. Section 80.240, RSMo, provides that the Board may appoint certain officials, prescribe their duties, and fix their compensation. Compensation should be set by ordinance.

Because ordinances passed by the Board to govern the village and its residents have the force and effect of law, it is important they are current, complete, and organized.

8.2 Record requests

Village personnel do not maintain adequate records of requests for records to show compliance with state law. While the village could produce actual request letters and their response letters, a log of requests is not maintained for providing other important information, such as the date a request was received, when records were provided, or important communications related to these requests.

Section 610.023, RSMo, provides each request for access to public records shall be acted upon as soon as possible, but in no event later than the end of the third business day following the date the request is received by the custodian of records. To ensure compliance with state law, the village should document adequate information in a log to determine if requests are completed timely and all requests are adequately filled. Necessary information includes, but is not limited to, the date of request, a brief description of the request, the date the request is completed or reason why the request cannot be completed, and any associated costs of filling the request.

8.3 Closed sessions

The village did not comply with state law regarding closed sessions.

Reasons for closing meetings

Open meeting minutes did not always document the specific reasons or section of law allowing the meetings to be closed. Most meeting notices and agendas included a statement that a closed session would be held, in the event the Board wanted to enter closed session, and the statement generally included the same list of potential discussion matters.

Section 610.022, RSMo, of the Sunshine Law, requires public bodies announce the specific reasons allowed by law for going into a closed session and to enter the vote and reason into the minutes. The section also limits discussion topics and actions in closed meetings to only those specifically announced prior to closure.

Allowable topics

Some topics discussed and voted on in closed meetings were not allowable under the Sunshine Law. For example, the Board discussed the disposal of a police vehicle, voted to give the now former Village Clerk a raise, and had a discussion of audience behavior at Board meetings.

Section 610.021, RSMo, provides that the discussion topics and actions in closed meetings should be limited to only those specifically allowed by law.

Insufficiently detailed meeting minutes

Minutes for some closed session meetings did not include sufficient details of the topics discussed. During our review of closed session minutes, we noted 3 instances in 2017 where the topic of the meeting could not be determined and the minutes simply indicated no votes were taken. While the open meeting minutes documented a specific section of law for closing each meeting, without documentation of topics addressed, we could not determine if the discussion was restricted to only allowable topics.

Such documentation is important to both demonstrate compliance with statutory provisions and provide information for future reference should concerns or questions be raised regarding topics addressed in closed meetings. Sections 610.020, 610.021, and 610.022, RSMo, provide requirements regarding closure of meetings and documentation.

8.4 Meeting minutes

Minutes for monthly Board meetings are neither signed by the Village Clerk as the preparer, nor the Board Chairperson or another Board member to indicate Board approval.

Section 610.020, RSMo, requires meeting minutes be maintained as a record of business conducted and to provide an official record of Board actions and decisions. The meeting minutes should be signed by the Village Clerk as preparer and Board Chairperson or another Board member to provide an independent attestation that the minutes are a correct record of the matters discussed and actions taken during the meetings.

Recommendations

The Board of Trustees:

8.1 Ensure ordinances are maintained in a complete and well-organized manner and an index of all ordinances passed and rescinded is established. The Board should also establish and or update, by ordinance, village employees' compensation and fees for village services.

8.2 Ensure requests for information are responded to timely and maintain a public request log to help ensure compliance with state law.

8.3 Ensure specific reasons for closing a meeting are documented in the open minutes, and ensure only topics allowed by state law are discussed in closed meetings. In addition, the Board should ensure closed meeting minutes include sufficient detail necessary to provide a complete record of matters discussed and actions taken.

8.4 Maintain complete and accurate minutes for all meetings and ensure meeting minutes are signed by the preparer as well as the Board Chairperson or another Board member following Board approval.

Auditee's Response

8.1 We are in the process of updating and implementing revisions to the village ordinances to address these concerns.

8.2 We agree with this recommendation and plan to ensure a log of sunshine requests is developed to ensure responses are timely.

8.3 We will ensure state law is followed in the future when closing meetings and will ensure sufficient documentation is maintained in the minutes for closed meetings.

8.4 We have already implemented this recommendation.

9. Electronic Data Security

Controls over village computers are not sufficient to prevent unauthorized access, and sufficient plans and processes are not in place for recovering systems and data. As a result, village records are not adequately protected and are susceptible to unauthorized access, and the village faces an increased risk of not being able to resume normal business operations timely.

9.1 Passwords

The Board has not established adequate password controls to reduce the risk of unauthorized access to the village's computers and data. The Village Treasurer and Village Clerk are not required to change passwords periodically. In addition, the village has not established procedures to disable computer access promptly upon employee terminations/resignations.

While passwords are required to authenticate access, the security of these logon credentials is dependent upon keeping them confidential. Passwords should be unique and confidential and changed periodically to reduce the risk of a compromised password and unauthorized access to and use of computers and data. Without effective procedures to periodically review and remove user access, terminated employees could continue to have access to confidential data or other sensitive resources.

9.2 Contingency plan and backup data

The village has not developed a formal, written contingency plan for resuming normal business operations and recovering computer systems and data in the event of a disaster or other extraordinary situations. In addition, the village does not periodically test backup files to ensure essential data can be restored, and does not store backup files at a secure off-site location.

The Village Clerk periodically backs up data from the utility system on her office computer. Instead of storing this data on a removable media that can be taken to an off-site location, she just overwrites the previous backup file.

A formal, written contingency plan should be prepared, and periodically tested and updated as needed to address actions for restoring computer systems should a disaster or other extraordinary situation occur. In addition, completing regular data backups and periodically testing for recovery of the data helps ensure current data is available to be restored and is complete and reliable. Storing backup files in a secure off-site location increases assurance village the records will be available if necessary.

Recommendations

The Board of Trustees:

9.1 Require a unique password for each employee that is confidential and periodically changed to prevent unauthorized access to the village's computers and data. Ensure all user access to the system is periodically reviewed and unnecessary access is removed timely.

9.2 Develop a formal, written contingency plan that is periodically tested, evaluated, and updated as needed. The Board should also require

village personnel to back up data properly, test restoration of backup data periodically, and store backup files in a secure off-site location.

Auditee's Response

9.1 *We will ensure adequate password controls are in place and will review access controls to ensure users are removed timely when necessary.*

9.2 *We are in the process of developing a formal written contingency plan and will ensure backup files are prepared, maintained off-site, and periodically tested.*

Village of Ferrelview
Organization and Statistical Information

The Village of Ferrelview is located in Platte County. The village was incorporated in 1953. The village employed one full-time employee and 4 part-time employees on December 31, 2017.

Village operations include law enforcement services, water and sewer services, and street maintenance.

Chairperson and Board of Trustees

The village government consists of five-member board of trustees. The members are elected for 2-year terms. The chairperson, who is a member of the board, is elected to a 1-year term and presides over the board of trustees. The Board of Trustees, at December 31, 2017, are identified below. The Board members are paid $75 per month, with the Chairperson receiving an additional $75 per month.

Theresa Wilson, Board Chairperson
Deidre Carr, Trustee (1)
Russell Wilson, Trustee (2)
Melvin Rhodes, Trustee (3)
Phillip Gilliam, Trustee (4)

(1) Lydia (Beth) Whorton was elected in April 2018 to fill this position.
(2) Russell Wilson resigned in September 2018 and Frank Baumann was appointed to fill this position in October 2018.
(3) John Rydholm was elected in April 2018 to fill this position.
(4) Selected as Board Chairperson in April 2018.

Financial Activity

The following page shows the city's financial activity, prepared using the city's bank statements, for the year ended December 31, 2017.

Village of Ferrelview
Schedule of Receipts, Disbursements, and Changes in Cash Balances
Year Ended December 31, 2017

	General	Street	Water and Sewer	Law Enforcement Training	Certificates of Deposit		Total
RECEIPTS	$ 214,913	17,290	197,944	517	0		430,664
DISBURSEMENTS	(194,588)	(26,896)	(221,021)	(2,185)	(15,000)		(459,690)

(1) The balances maintained in certificates of deposit include $10,000 for the General Fund and $35,000 for the Water and Sewer Fund.

NICOLE GALLOWAY, CPA
Missouri State Auditor

March 12, 2019

Honorable Charles Robert Vunovich, Mayor
and
Members of the Board of Aldermen
City of Amoret
PO Box 105
Amoret, Missouri 64722

This letter communicates the results of our review of the handling of utility receipts by city personnel. This review was initiated based on work performed as part of the Auditor's Follow-Up Team to Effect Recommendations (AFTER) program when we identified missing utility receipts from October 2018 totaling $170.40 and additional concerns related to the handling of customer utility payments. The objectives of our review were to evaluate the city's internal controls over the handling of utility payments and determine the extent of utility payments missing from the city during the period September 2018 through December 2018. The Follow-Up Report on Audit Findings - City of Amoret, Report No. 2019-017, was issued in March 2019.

Methodology

Our methodology included obtaining an understanding of procedures and records related to the handling of customer utility payments; reviewing utility receipt and deposit records, and other pertinent documents; interviewing various city personnel, as well as certain external parties; and testing selected transactions.

Background

In January 2018, the former City Clerk resigned and an alderman's wife was appointed to serve as City Clerk. In April 2018, this Alderman was elected as Mayor. In September 2018, the former City Treasurer resigned and rather than appointing a new City Treasurer, the Board appointed the City Clerk as City Treasurer and combined these positions, resulting in control problems more serious than those reported in the audit report. The City Clerk/Treasurer is primarily responsible for financial accounting functions and records of the city, including the duties of receiving, recording, preparing and making deposits, receiving and reconciling bank statements to accounting records, and preparing financial reports. The Board is not performing independent reviews of the detailed accounting records or deposits prepared by the City Clerk/Treasurer.

The City Clerk/Treasurer processes payments received through the drop box and mail, and in person at city hall approximately 2 or 3 times a month, but does not issue receipt slips. Instead, she records the date of payment, amount, and method of payment on the monthly utility billing ledger that lists customers alphabetically and prepares the deposits.

Results and Conclusions

Receipting, recording, and depositing procedures are not adequate. The City Clerk/Treasurer does not record receipts on the monthly utility billing ledger in date order and receipts are not reconciled to deposits. Although the City Clerk/Treasurer lists payee names for individual checks and money orders on the deposit slips, there is no indication of which cash receipts are included in the deposit. As a result, it is not possible to demonstrate all monies received were deposited. On December 6, 2018, after our inquiry about the October 2018 missing receipts totaling $170.40, the City Clerk/Treasurer said she found the $100.00 cash and $70.40 money order in a separate money bag in city hall and would get it deposited. On December 21, 2018, the City Clerk/Treasurer provided us with a deposit slip copy dated December 10, 2018, listing October cash of $170.40 and November cash of $449.35, for a total cash deposit of $619.75. This copy included a handwritten note stating the $70.40 was cash recorded as a money order on the utility billing ledger by mistake (see Appendix A). On January 2, 2019, after multiple requests for the bank receipt to confirm deposit of the $619.75, the City Clerk/Treasurer provided us a copy of a bank receipt dated December 31, 2018, for $1,172.59, and indicated the $619.75 cash was included in this deposit. However, we obtained bank deposit records for this deposit and confirmed it did not include the October and November cash totaling $619.75. Rather, it was comprised of $200.00 cash, $882.43 of checks, and a $90.16 money order, and these items agree to utility monies collected between December 16 and December 31, 2018, per the utility billing ledger. Our review of bank records confirms the deposit slip dated December 10, 2018, for cash totaling $619.75 was not deposited in the bank account during December 2018, and matched none of the December 2018 bank deposit records.

Our review of city receipt and bank deposit records from September through December 2018 identified recorded receipts totaling $634.60 ($487.80 cash plus $146.80 money orders) were not deposited. The money orders not deposited were recorded as payments for the City Clerk/Treasurer's personal utility account. It is unclear if these money orders ever existed or rather were just recorded on the ledger to show the City Clerk/Treasurer's account balance as paid. See Appendix B for details regarding undeposited receipts.

In addition to undeposited monies, we also identified 2 checks and 1 money order totaling $717.16 that were deposited but not recorded as receipts on the monthly utility billing ledgers.

The lack of segregation of duties, inadequate controls, and the absence of proper oversight by the Board of Aldermen resulted in the missing monies and unrecorded receipts going undetected.

In addition, the Water Meter Reader responsible for preparing utility bills has access to the drop box and collects cash payments from some customers at their homes. Monies collected by the Water Meter Reader are either placed in the drop box or turned over to the City Clerk/Treasurer to record and deposit. Because the Water Meter Reader is responsible for preparing the utility billings, she should not have access to the drop box or collect monies from customers. Preparing billings and also collecting monies represents a significant control weakness.

Proper segregation of duties helps ensure all transactions are accounted for properly and assets are adequately safeguarded. Also, Attorney General's Opinion No. 24-1955 (June 10, 1995) to Dodds, concluded that in a fourth-class city, the holding of the positions of City Clerk, City Treasurer, and City Collector, or any two of these offices, by the same person at the same time would be incompatible. To reduce the risk of loss, theft, or misuse of funds, internal controls should provide reasonable assurance all transactions are accounted for properly and assets are adequately safeguarded. Internal controls could be improved by issuing prenumbered receipt slips for all monies received, reconciling the composition of receipts to the composition of deposits, segregating duties, and implementing documented supervisory or independent reviews of detailed accounting records and deposits.

Recommendations

The Board of Aldermen should further investigate the missing utility payments and take necessary action to recover this money as appropriate. The Board should ensure prenumbered receipt slips are issued for all monies received and the composition of deposits is reconciled to the composition of receipt slips. In addition, the Board should segregate accounting duties as appropriate, and implement independent reviews and monitoring procedures.

NICOLE GALLOWAY, CPA
Missouri State Auditor

To the Honorable Mayor
and
Members of the Board of Aldermen
City of Amoret, Missouri

We have conducted follow-up work on certain audit report findings contained in Report No. 2017-123, *City of Amoret* (rated as Poor), issued in October 2017, pursuant to the Auditor's Follow-Up Team to Effect Recommendations (AFTER) program. The objectives of the AFTER program are to:

1. Identify audit report findings for which follow up is considered necessary, and inform the city about the follow-up review on those findings.

2. Identify and provide status information for each recommendation reviewed. The status of each recommendation reviewed will be one of the following:

    - Implemented: Auditee fully implemented the recommendation, either as described in the report or in a manner that resolved the underlying issue.
    - In Progress: Auditee has specific plans to begin, or has begun, to implement and intends to fully implement the recommendation.
    - Partially Implemented: Auditee implemented the recommendation in part, but is not making efforts to fully implement it.
    - Not Implemented: Auditee has not implemented the recommendation and has no specific plans to implement the recommendation.

As part of the AFTER work conducted, we reviewed documentation provided by city officials and held discussions with city officials to verify the status of implementation for the recommendations. Documentation provided by the city included minutes of meetings, financial records, and other pertinent documents. This report is a summary of the results of this follow-up work, which was substantially completed during June, July, and October through December 2018. While working with the city in conducting the follow-up work, we identified missing utility receipts totaling $170.40 and various concerns related to the handling of customer utility payments. Additional work related to these payments was completed during December 2018 and January 2019, and the results and conclusions are addressed in a letter to the Mayor and the Board of Aldermen dated March 12, 2019, and released as Report No. 2019-018.

Nicole R. Galloway, CPA
State Auditor

City of Amoret
Follow-Up Report on Audit Findings
Status of Findings

1. Accounting Controls and Procedures

Accounting controls and procedures needed improvement.

1.1 Receipting, recording, and depositing procedures

The city's procedures for receipting, recording, and depositing were poor. As a result, there was no assurance all monies collected were properly receipted, recorded, and deposited.

A review of receipts and deposits records noted various concerns.

- The City Treasurer did not issue receipts slips or retain paid billing statements for utility collections, which included charges and fees for water, sewer, and fire protection services.
- The City Collector did not record the date of payment and method of payment in the paid tax receipt book or identify the receipts composing tax deposits.
- The composition of both utility and tax collections was not reconciled to deposits.

In addition, the City Collector was solely responsible for receiving and recording property tax payments and transmitting them to the bank for deposit. The City Clerk compared the paid tax receipt book to payment notations made in the tax assessment books, but did not compare receipt records to deposits.

Recommendation

The Board of Aldermen ensure receipt slips are issued for all utility payments, the date of payment and method of payment is noted for tax collections, receipts composing tax deposits are properly noted on the deposit slip, and the composition of all receipts is reconciled to the composition of deposits. In addition, the Board should implement procedures to ensure documented independent or supervisory reviews of the City Collectors' deposits are performed.

Status

Not Implemented

The city had significant turnover in the positions of City Collector, City Clerk, and City Treasurer since the release of our audit report in October 2017. The City Collector indicated she took the oath of office after winning reelection in April 2017, but has not collected any monies since the election because the Board entered into an agreement with the Bates County Collector-Treasurer in September 2017 to collect future taxes. In January 2018, the former City Clerk resigned and an alderman's wife was appointed as City Clerk. In April 2018, this Alderman was elected as Mayor. The former City Treasurer resigned in September 2018. Rather than appointing a

new City Treasurer, the Board appointed the City Clerk as City Treasurer and combined these positions.

The City Clerk/Treasurer is primarily responsible for financial accounting functions and records of the city, including the duties of receiving, recording, preparing and making deposits, receiving and reconciling bank statements to accounting records, and preparing financial reports. The Board does not perform independent reviews of the detailed accounting records or deposits. In addition, the Water Meter Reader responsible for preparing utility bills has access to the payment drop box and collects cash payments from some customers at their homes. As a result, controls over receipting, recording, and depositing have further weakened since the completion of the audit.

We reviewed utility records for March, April, September, and October 2018 and determined city personnel do not (1) issue receipt slips or maintain a complete record of all receipts, (2) always record the method of payment, and (3) reconcile the composition of receipts to the composition of deposits. In addition, independent reviews are not performed.

Our limited review of the March, April, and September 2018 utility billing ledgers determined the method of payment was not recorded for 33 receipts in March, any of the 77 receipts in April, and 7 receipts in September. We noted the method of payment was not recorded for 1 receipt on the October 2018 monthly utility billing ledger.

Our detailed review of the October 2018 utility receipts identified discrepancies between payments recorded on the utility billing ledger and corresponding deposits. The October 2018 utility billing ledger showed payments totaling $6,480.11, comprised of $442.70 cash, $5,845.91 checks or money orders, $128.00 prepaid on account, and $63.50 with no method of payment recorded. The corresponding deposits dated October 17, 2018, and November 6, 2018, totaled $6,181.71 ($298.40 less than recorded receipts). After considering the monies prepaid on account were deposited on September 4, 2018, and accounted for in the ledger, items that could not be traced to deposit were $100.00 in cash and a $70.40 money order (total $170.40). The money order was recorded as payment for the City Clerk/Treasurer's personal utility bill.

As a result of continued problems with records and inadequate reviews, the Board was not aware of the $170.40 in unaccounted for utility receipts until we discussed this issue with the Mayor. Due to this discrepancy and the significant control weaknesses effective with the personnel changes and combined City Clerk/Treasurer position, we reviewed additional utility and deposit records and identified various concerns. The results and conclusions

are addressed in a letter (report No. 2019-018), issued in March 2019 to the City of Amoret Mayor and Members of the Board of Aldermen.

1.2 Bank reconciliations

The City Treasurer did not perform bank reconciliations for the city's 7 bank accounts. In addition, beginning and ending book balances were not maintained in the monthly account ledgers prepared by the City Treasurer. The lack of beginning and ending book balances hindered the City Treasurer's ability to complete bank reconciliations.

Recommendation

The Board of Aldermen ensure monthly bank reconciliations are prepared for all bank accounts and cumulative book balances are maintained.

Status

In Progress

City personnel indicated they have prepared bank reconciliations since January 2018. However, our review of the April, May, and October 2018 bank reconciliations shows they are not prepared properly because they simply restate the information shown on the bank statements. After receiving the bank statements, the City Clerk/Treasurer prepares the monthly account ledgers (summary financial reports) using amounts from the bank statements, then adjusts the total disbursements for any checks that have not cleared the bank to arrive at the ending book balance. In addition, the checkbook registers did not contain running book balances. Because financial records were not maintained independent of the bank records, it was not possible to reconcile the bank statement balance to the book balance. In December 2018, city personnel began adding cumulative book balances to the checkbook registers and agreeing the reconciled bank balances to the book balances.

1.3 Board of Aldermen and Mayor qualifications

The city does not have procedures in place to ensure information regarding a person who may be unqualified to run for or hold elected office is reported to the appropriate authority, such as the state Department of Revenue (DOR) for unpaid tax issues as provided in Section 115.306, RSMo. An Alderwoman may not have been qualified to serve on the Board due to questions about her residency and the Mayor may not have been qualified to file as a candidate due to having delinquent city taxes.

Recommendation

Seek legal advice and resolve concerns regarding the current Alderwoman's and Mayor's qualifications to serve. In addition, the Board should establish procedures for handling future situations when the city receives information regarding a person potentially unqualified to run for or hold office, including transmitting this information to the appropriate authority.

Status

Not Implemented

The Alderwoman and Mayor who were potentially unqualified to run for or hold office, as discussed in the audit report finding, no longer serve on the Board. The Board has not established procedures for handling future situations when the city receives information regarding a person potentially unqualified to run for or hold office. A similar election issue occurred again in 2018. A person running for alderman was listed on the April 2018 election ballot and won despite owing delinquent city property taxes at the time of the election. The newly elected Alderman served on the Board until he resigned in August 2018, after we began inquiring about the status of report recommendations.

2. Utility System Controls and Procedures

Utility system controls and procedures needed improvement.

2.1 Delinquent accounts

The Board had not established adequate procedures to ensure the accounts of city officials, city employees, and their family members were properly monitored, assessed applicable penalties, or disconnected when appropriate. Ordinance, billing statement instructions, and city practice regarding the handling of delinquent accounts differed, and reports of delinquent utility accounts were not provided to the Board for review.

Ordinance 2003-115 indicated utility bills were due and payable the first day of the month, late and subject to an additional $10 charge if unpaid after 10 days, and to be disconnected after 30 days. Monthly utility billing statements also listed potential penalties and indicated all water bills will be due and payable on the first day of each month, delinquent on the 15th, and service will be disconnected without further notice on the 16th. However, according to the Water Meter Reader who was also on the Board, neither the ordinance or statement on the utility billing was strictly followed. As of December 31, 2016, 16 customers had accrued delinquent balances totaling approximately $1,700.

The Water Meter Reader maintained a monthly spreadsheet documenting customer billings, payments, and past due balances, but she did not present past due account information to the Board for review. The spreadsheet did not reflect a past due balance for her own account until July 2017, when previous charges were added to it and paid. In addition, utility accounts for the Mayor and his son accrued delinquent balances from December 1, 2016, until March 2017 and July 2017, respectfully, at which time they were paid in full. None of these accounts were assessed penalties or disconnected while delinquent.

Recommendation

The Board of Aldermen clarify and then ensure city policies regarding the assessment of penalties and shut off procedures for delinquent accounts are

followed. In addition, require the Water Meter Reader provide the Board with a complete and accurate report of delinquent accounts along with documentation of any actions taken to collect unpaid amounts.

Status

Partially Implemented

The Board rescinded Ordinance 2003-115 on December 13, 2017, and adopted Ordinance 2018-142 on August 8, 2018, clarifying city policies regarding the assessment of penalties and shut off procedures for delinquent accounts. In addition, the Board approved the Water Meter Reader to purchase blank billing cards so she could print the billing statement instructions on these cards, and ensure it agrees to the newly adopted ordinance. Reports of delinquent accounts and documentation of any actions taken to collect on unpaid amounts are still not provided to the Board for review. Instead, the Water Meter Reader attends each Board meeting and verbally reports summary information to the Board regarding accounts past due, late notices sent out, partial payments made, and accounts disconnected or reconnected. This verbal reporting was evident from our review of April, May, October, and December 2018 meeting minutes.

2.2 Utility rates

The Board could not provide documentation that a formal review of water rates had ever been performed, and as a result there was less assurance the water rates are set at an appropriate level. In addition, the Board last performed a review of sewer rates in 2012. The city last increased sewer rates in 2012 and water rates in 2014.

Recommendation

The Board of Aldermen ensure a statement of costs is prepared to support utility rate increases and document formal reviews of water and sewer rates periodically to ensure revenues are sufficient to cover all costs of providing these services.

Status

In Progress

The May 2018 meeting minutes show the Board discussed the possibility of raising the base sewer rate because the sewer department is short of funds. City personnel subsequently worked on a formal sewer rate review and the Board voted to increase the base sewer rate in December 2018. In addition, city officials indicated they plan to perform a review of water rates in the near future.

2.3 Utility deposits

Refundable utility deposits held in the Meter Deposit Fund were not accounted for properly. The city did not have a listing of deposits held and was not properly tracking deposits. Effective October 2010, Ordinance 2010-100 required a $200 deposit when an account was activated (deposit amounts in previous years were $100, $50, $25, $15, and $5). The city had approximately 90 water and/or sewer accounts, but customer account records were not adequate to determine the amount of deposits held. The

Meter Deposit Fund bank account balance was $3,393 as of December 31, 2016.

Recommendation

The Board of Aldermen account for customer utility deposits previously paid and resolve any discrepancy with the Meter Deposit Fund account balance. In the future the Board should also ensure an accurate list of utility deposits is prepared and reconciled monthly to monies in the Meter Deposit Fund bank account.

Status

In Progress

At the time of our follow-up review, the city has made little effort to implement this recommendation. The City Clerk/Treasurer indicated she has located two old receipt books when organizing records in city hall and plans to work with the Water Meter Reader to create an accurate list of paid utility deposits when time permits. Once prepared, it will be reconciled monthly to monies in the Meter Deposit Fund bank account.

3. Delinquent Property Taxes

The City Collector did not prepare and submit for approval by the Board a monthly list of delinquent tax collections or an annual delinquent tax listing.

Recommendation

The Board of Aldermen require the City Collector to submit monthly lists of delinquent tax collections and an annual list of all taxes remaining due and uncollected at the first meeting of the Board in April.

Status

Not Implemented

While the Bates County Collector-Treasurer is responsible for collecting 2017 and future years' taxes, the city remains responsible for collection of taxes due for 2016 and prior years. City personnel are not actively pursuing collection or maintaining a list of paid and unpaid back taxes.

The City Clerk/Treasurer indicated monthly lists of delinquent tax collections are not presented to the Board, and an annual list of all taxes remaining due and uncollected was not presented to the Board in April 2018. After our follow up inquiries, the City Clerk/Treasurer created a list of delinquent taxes due for the years 2014 through 2016 as of June 25, 2018, totaling $875. In addition, the City Clerk/Treasurer obtained a list of 2017 delinquent taxes from the Bates County Collector-Treasurer on July 3, 2018, totaling $532. The City Clerk/Treasurer indicated she would prepare or obtain monthly lists for the Board. We reviewed the July through October 2018 meeting minutes, and noted there is no indication monthly lists of delinquent taxes have been submitted to the Board.

4.1 Disbursements - Restricted monies

The city did not spend all restricted monies in the Street Fund for street purposes. During the year ended December 31, 2015, the city posted $7,453

in motor vehicle-related revenues received from the state to the Street Fund. However, city officials used $5,085 of this money to pay city insurance costs and another $1,000 to supplement General Fund expenditures.

Recommendation

The Board of Aldermen ensure restricted street monies are spent for allowable purposes only and develop plans to repay the amounts owed to the Street Fund.

Status

Partially Implemented

The City Clerk/Treasurer indicated the Board is monitoring expenses to ensure street monies are spent for allowable purposes only; however, they have not developed any plans to repay the amounts owed to the Street Fund. We scanned disbursements recorded on the city's financial records for the Street Fund for January through October 2018, and noted no improper disbursements. According to the March 2018 meeting minutes, the Board approved the allocation of city insurance costs and only $350 of the total $4,997 paid came from the Street Fund.

4.2 Disbursements - Transfers

The Board had not established controls to ensure transfers between funds were proper, approved by the Board, and timely. Minutes did not always document the discussion or approval of transfers.

Customer monthly billings include charges for water, sewer, and fire department services. Payments are initially deposited into the Water Fund and then money is transferred to the Sewer and Fire Funds. However, these transfers were not always based on actual collections, but rather on utility billings or amounts needed to cover fund expenses. In addition, transfers from the Water Fund to the Fire Fund were only performed periodically. Only 5 transfers from the Water Fund to the Fire Fund occurred during the year ended December 31, 2016.

Recommendation

The Board of Aldermen establish a process to ensure transfers between funds are proper, approved, and timely.

Status

Partially Implemented

Our review of the January through October 2018 meeting minutes showed the Board approved transfers from other funds to the General Fund for payment of the audit costs, which appears appropriate. However, the Board approved a transfer in May 2018 from the Water Fund to the Sewer Fund to pay for the new sewer pump because there was not enough money in the Sewer Fund to cover these expenses, which is not appropriate. In addition, there was no evidence in the meeting minutes to show that transfers of actual collections from the Water Fund to the Sewer Fund and Fire Fund were reviewed and approved by the Board. Our review of April, May, and

October 2018 bank and billings records showed that transfers of sewer and fire services payments initially deposited into the Water Fund to the Sewer Fund and Fire Fund appeared to be based on actual collections. However, there was no documentation in the meeting minutes to show the Board reviewed and approved these monthly transfers.

4.3 Disbursements - Allocation

Some disbursements allocated to only the General Fund and Water Fund could have been allocated to various city funds. For example, in 2016 all costs of the City Clerk and City Treasurer's wages, insurance coverage for buildings and vehicles, and surety bond coverage were allocated to the General Fund when some of these costs could have been allocated to other funds. Similarly that year worker's compensation insurance costs were fully allocated to the Water Fund when some of these costs could have been allocated to other funds.

Recommendation

The Board of Aldermen ensure costs are allocated to the appropriate funds, supported by adequate documentation, and the documentation retained.

Status

Partially Implemented

Based on our review of the meeting minutes and financial records, some costs are being allocated to the appropriate funds. However, documentation is lacking and some costs are still not allocated. For example, the Board approved the breakdown of city insurance costs at its March 2018 meeting, but the city did not retain documentation to demonstrate how the allocation amounts were determined. In addition, city personnel could not provide documentation showing if other costs for items such as wages and bond coverage were allocated to appropriate funds in 2018.

4.5 Disbursements - Bidding policy

The city did not have a written bid policy. In addition, during the 2 years ended December 31, 2016, the city did not solicit bids for insurance, tree trimming service, mowing, or fire truck repairs.

Recommendation

The Board of Aldermen establish a formal bidding policy and ensure all applicable purchases are made in accordance with the policy.

Status

Implemented

The Board proposed Ordinance 2017-003 to establish a formal bidding policy in December 2017, and it was adopted by the Board on December 3, 2018.

4.6 Disbursements - Supporting documentation

The city did not maintain adequate supporting documentation for some disbursements and employee compensation was not always approved for payment by the Board at its regular monthly meeting similar to other invoices. For example, payments totaling $2,736 to the City Treasurer for

mileage reimbursements between January 1, 2015, and April 30, 2016, were not supported by reimbursement requests showing actual miles driven. During this period, the city regularly paid the City Treasurer $144 per month for 16 trips to the city's bank (30 miles round trip) at $0.30 per mile, regardless of the number of actual trips made in the month. In addition, the city made 3 extra payments for a total of 19 payments of $144 to the City Treasurer over these 16 months. The city also made 2 extra payments for a total of 14 payments of $150 per month to the City Treasurer for her compensation in 2015. The City Treasurer indicated that she had declined the $144 monthly mileage reimbursement, effective May 2016, because she realized she was being overpaid. Supporting documentation was not retained to explain these extra payments, nor were these issues discussed with the Board.

Recommendation

The Board of Aldermen require adequate, detailed supporting documentation be retained for all disbursements and approved. In addition, the Board should review for potential additional extra payments and seek reimbursement of all amounts overpaid as appropriate.

Status

Partially Implemented

The City Clerk/Treasurer indicated the Board is now requiring detailed supporting documentation be retained for all approved disbursements. In addition, the Board approved Ordinance 2017-002 in February 2018 establishing city employee compensation and requiring documentation showing actual mileage be presented to the Board for approval prior to paying mileage reimbursement. However, the Board did not review for potential additional extra payments or seek reimbursement of any amounts overpaid. The Mayor and City Clerk/Treasurer indicated they spoke with a Bates County Sheriff's detective in late December 2018 regarding possible reimbursement for amounts overpaid, but determined it would not be feasible to pursue further as the recovery costs would likely exceed the amounts overpaid. This discussion and any resulting Board decisions were not documented.

5. Ordinance and Sunshine Law Issues

City ordinances were not organized or complete. In addition, the city did not always comply with Chapter 610, RSMo (the Sunshine Law).

5.1 Ordinances

City ordinances were not codified, complete, and maintained in a well-organized manner. The city did not have ordinances establishing the compensation of city officials and employees, the additional $0.50 charged to county residents receiving city water service, and the $2.00 fire department service fee.

Recommendation

The Board of Aldermen ensure ordinances are maintained in a complete and well-organized manner and an index of all ordinances passed and rescinded

is established. The Board should also establish, by ordinance, city employees' compensation and fees for city services.

Status

Partially Implemented

The City Clerk/Treasurer has organized the ordinances by number, but an index of all ordinances passed and rescinded has not been prepared. In February 2018, the Board passed several ordinances, including Ordinance 2017-002 establishing city employee compensation and requirements for mileage reimbursement, Ordinance 2017-004 establishing fire department fees, Ordinance 2017-005 establishing a service fee for water provided to county residents, and Ordinance 2017-008 establishing a procedure for annual reviews each May of rates assessed for city services. In addition, the Board updated and/or passed several ordinances in August and December 2018.

5.2 Public access policy

The Board had not adopted a written policy regarding public access to city records as required by state law.

Recommendation

The Board of Aldermen develop a written public access policy.

Status

Not Implemented

At its December 2017 meeting, the Board proposed a new ordinance establishing a written public access policy. However, the Board made changes to the draft ordinance at its February 2018 meeting and additional discussion and finalization was tabled until a future meeting. The Board had not approved a written public access policy as of December 31, 2018.

5.3 Record requests

City personnel did not maintain adequate records of requests for records to show compliance with state law. While the city provided us the request letters and their response letters, a log of requests was not maintained to document other important information, such as the date a request was received, when records were provided, or important communications related to these requests.

Recommendation

The Board of Aldermen ensure requests for information are responded to timely and maintain a public request log to help ensure compliance with state law.

Status

Not Implemented

The City Clerk/Treasurer indicated she has not developed a public request log because the city has not had any record requests since her appointment in January 2018.

5.4 Agendas

The city did not give notice of regular monthly Board meetings or prepare a tentative agenda in compliance with the Sunshine Law.

Recommendation

The Board of Aldermen ensure meeting notices and agendas are given for all Board meetings.

Status

Implemented

The City Clerk/Treasurer indicated she has been preparing agendas since January 2018 and posting them between 24 and 72 hours in advance of the meeting. We observed meeting notices and agendas for the January through November 2018 Board meetings.

6. Budgets and Financial Reporting

Annual budgets were not prepared for city funds in accordance with state law and significant improvement was needed in financial reporting practices.

6.1 Budgets

The Board did not have adequate procedures to prepare or monitor budgets.

City budgets prepared for the year ended December 31, 2016, did not contain all required elements. The 2016 budget document presented total receipts and disbursements for the General Fund, Water Fund, Sewer Fund, Street Fund, and Fire Fund, but the receipts were not categorized by source nor were the disbursements categorized by function. The budget did not include a budget message, actual or budgeted amounts for the 2 preceding years, the actual beginning and estimated ending cash balance for any funds, or a budget summary. While current bank account balances were provided, budget-to-actual reports of financial activity were not presented to the Board at monthly meetings. There was no evidence the 2016 budget was approved by the Board.

Recommendation

The Board of Aldermen prepare annual budgets that contain all information required by state law and ensure the budget and financial condition are adequately monitored. In addition, the Board's approval of the budget should be documented in the Board minutes.

Status

Not Implemented

The Board did not prepare and approve a budget for 2018. The Board approved the 2019 budget on January 9, 2019, but it does not include all elements required by state law. The 2019 budget did not include a budget message, actual or budgeted amounts for the 2 preceding years, the actual beginning and estimated ending cash balance for any funds, or a budget summary.

6.2 Published financial statements

The city did not publish semiannual financial statements as required by state law.

Recommendation

The Board of Aldermen publish semiannual financial statements as required by state law.

Status

Not Implemented

The city has not published semiannual financial statements.

6.3 Filing of financial reports

City personnel had not filed annual financial reports with the State Auditor's Office as required by state law. Until 2017, the last annual financial report filed was for the year ending December 31, 2012, filed in February 2014. In July 2017, the city filed a financial report for the year ended December 31, 2016.

Recommendation

The Board of Aldermen file annual financial reports with the State Auditor's Office as required by state law.

Status

In Progress

The city filed its financial report for the year ended December 31, 2017, on July 9, 2018, after the June 30, 2018, filing deadline. City personnel indicated they plan to file financial reports timely going forward.

6.4 Audits

The city had not obtained annual audits of its sewer system as required by state law.

Recommendation

The Board of Aldermen obtain annual audits of the sewer system as required by state law.

Status

Not Implemented

The city has not obtained an annual audit of the sewer system as required by state law.

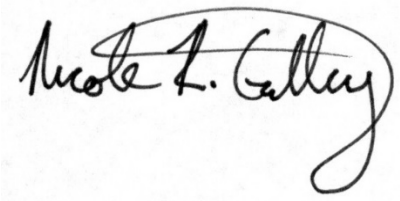
NICOLE GALLOWAY, CPA
Missouri State Auditor

Honorable Michael L. Parson, Governor
and
Members of the General Assembly
Jefferson City, Missouri

The primary objective of this compilation is to report the filing status for political subdivisions other than cities, towns, and villages, required to file a financial report, under Section 105.145, RSMo, and 15 CSR 40-3.030. Section 105.145, RSMo, provides that the State Auditor's Office notify the Department of Revenue if any political subdivision fails to timely submit a copy of its annual financial report. Because of different filing requirements, a separate report is issued for cities, towns, and villages.

The filing status for the 31 political subdivisions required to file a financial report by January 31, 2019, is presented in summary on page 3 and by individual entity in Appendix A. We have not audited the reports submitted and, accordingly, do not express an opinion or any other assurance on them.

This report also includes the updated filing status for political subdivisions, other than cities, towns, and villages, that filed a financial report in January 2019, after their filing deadline. The filing status for these 55 entities is presented in summary on page 3 and by individual entity in Appendix B-D.



Nicole R. Galloway, CPA
State Auditor

The following staff participated in the preparation of this report:

Director of Audits:	Jon Halwes, CPA, CGFM
General Counsel:	Paul Harper, JD
Senior Analyst:	Jill Wilson, MBA

Executive Summary

Section 105.145, RSMo, requires the governing body of each political subdivision in the state, except counties and school districts, to prepare and remit to the state auditor an annual report of financial transactions.

15 CSR 40-3.030 requires the financial report to be remitted to the state auditor within 6 months of the end of the political subdivision's fiscal year. The State Auditor's Office posts individual annual financial reports to its website. A searchable link is available at http://auditor.mo.gov.

Section 105.145, RSMo, requires the state auditor to notify the Department of Revenue if any political subdivision fails to timely submit a copy of its annual financial report. Any political subdivision that fails to timely submit the annual financial report shall be subject to a fine of $500 per day upon notice by the Department of Revenue, except transportation development districts with a gross revenues less than $5,000 in the fiscal year of the annual financial report.

This report includes the filing status for the 31 political subdivisions, other than cities, towns, and villages, with a fiscal year end of July 31, 2018. Cities, towns, and villages have additional filing requirements and their reporting status is included in a separate report. Of the 31 political subdivisions, 23 filed an annual financial report by January 31, 2019.

This report also includes the filing status for 55 political subdivisions, other than cities, towns, and villages, that filed their financial report in January 2019, after their filing deadline.

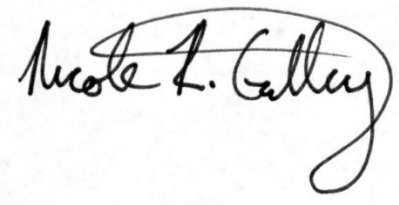
NICOLE GALLOWAY, CPA
Missouri State Auditor

Honorable Michael L. Parson, Governor
and
Members of the General Assembly
Jefferson City, Missouri

The primary objective of this compilation is to report the filing status for the municipalities required to file a financial report by January 31, 2019, under Section 105.145, RSMo, and 15 CSR 40-3.030, and, when applicable, an addendum under Section 479.359, RSMo, and 15 CSR 40-3.170 and a municipal court certification under Section 479.360, RSMo, and 15 CSR 40-3.180. No cities, towns, or villages had a fiscal year end of July 31, 2018; therefore, no financial reports, addendums, or certifications were due by January 31, 2019.

Section 105.145, RSMo, provides that the State Auditor's Office (SAO) notify the Department of Revenue if any city, town, or village fails to timely submit a copy of its annual financial report. Additionally, Section 479.362, RSMo, provides that the SAO notify the Department of Revenue whether counties, cities, towns, and villages have timely filed under Sections 479.359 and 479.360, RSMo. Because of different filing requirements, a separate report is issued for all other political subdivisions required to file a financial report.

This report includes the updated filing status for municipalities that filed at least one of the items (financial report, addendum, or certification) in January 2019, after their filing deadline. The filing status for these 49 cities, 2 towns, and 6 villages is presented in summary on pages 3 and by individual entity in Appendixes A to C.



Nicole R. Galloway, CPA
State Auditor

The following staff participated in the preparation of this report:

Director of Audits:	Jon Halwes, CPA, CGFM
General Counsel:	Paul Harper, JD
Senior Analyst:	Jill Wilson, MBA

Executive Summary

Section 105.145, RSMo, requires the governing body of each political subdivision, except counties and school districts, in the state to prepare and remit to the state auditor an annual report of financial transactions. 15 CSR 40-3.030 requires the financial report to be remitted to the state auditor within 6 months of the end of the political subdivision's fiscal year. The State Auditor's Office (SAO) posts individual annual financial reports to its website. A searchable link is available at http://auditor.mo.gov.

Section 105.145, RSMo, requires the state auditor to notify the Department of Revenue if any political subdivision fails to timely submit a copy of its annual financial report. Any political subdivision that fails to timely submit the annual financial report shall be subject to a fine of $500 per day upon notice by the Department of Revenue, except transportation development districts with a gross revenues less than $5,000 in the fiscal year of the annual financial report.

Section 479.359.1, RSMo, requires every county, city, town, and village to annually calculate the percentage of its annual general operating revenue received from fines, bond forfeitures, and court costs for minor traffic violations.

Section 479.359.3, RSMo, provides that all entities having a municipal court file an addendum to the annual financial report containing items listed in 15 CSR 40-3.170, which also provides the procedures to file an addendum.

Section 479.360, RSMo, requires every county, city, town, and village that has a municipal court to file, with its annual financial report, a certification of substantial compliance with 10 municipal court procedures. This certification must be signed by the municipal court judge. 15 CSR 40-3.180 provides the procedure to file the municipal court certification. Any county, city, town, or village that does not have a municipal court judge is not required to file a certification.

Section 479.362, RSMo, requires that the SAO notify the Department of Revenue whether counties, cities, towns, or villages have timely filed their addendums under Section 479.359 and certificates of substantial compliance under Section 479.360, RSMo. Section 479.368, RSMo, provides penalties for counties, cities, towns, and villages that fail to file, including loss of revenue and mandatory ballot measure to dissolve the political subdivision.

No cities, towns, or villages had a fiscal year end of July 31, 2018; therefore, no financial reports, addendums, or certifications were due by January 31, 2019.

This report includes the filing status for 49 cities, 2 towns, and 6 villages that filed at least one of the items (financial report, addendum, or certification) in January 2019, after their filing deadline. Of these entities, 46 filed an annual financial report, 16 filed an addendum, and 10 filed a certification.

NICOLE GALLOWAY, CPA
Missouri State Auditor

March 6, 2019

Honorable Mike Parson, Governor
and
Members of the General Assembly

The State Auditor's Office reviewed state agency compliance with Section 536.175, RSMo. We determined the Departments of Public Safety, Revenue, Social Services, and Corrections met the requirements of Section 536.175, RSMo. These requirements include each agency reviewing its existing rules, completing and filing the periodic rule review report with the Joint Committee on Administrative Rules (JCAR), and ensuring the report is available on the agency's website.

Section 536.175, RSMo, requires a 5 year rolling review by all state agencies of their existing rules. The first agencies (Title 1 through 6 of the Code of State Regulations [CSR]) were required to begin their rule review no later than July 1, 2015, and to complete it by June 30, 2016. The second group of agencies (Title 7 through 10 of the CSR) were required to begin their rule review no later than July 1, 2016, and to complete it by June 30, 2017. The third group of agencies (Title 11 through 14 of the CSR) were required to begin their rule review no later than July 1, 2017, and complete it by July 30, 2018. The next group began no later than July 1, 2018 and the following group will begin no later than July 1, 2019. Each agency must repeat this process every 5 years.

The JCAR publishes in the Missouri Register a notification of which rules are subject to review and the process for this review, including who the public may submit comments to at each agency. Each agency must prepare a report of the results of the agency's rule review with an attached appendix summarizing comments received and the agency's response. The agency must file the report and appendix electronically with the JCAR and the small business regulatory fairness board no later than June 30th after the JCAR publishes the notice. These reports also must be made available on the state agency's website.

Any rule not included in the agency review and report may become null and void. There is a process in place before nullification of a rule, including the ability of the agency to request an extension from the JCAR and a notice and opportunity for the agency to correct the delinquency.

On July 1, 2017, the JCAR published in the Missouri Register the notification of the agency rules (Title 11 through 14) subject to review and the process, as required by Section 536.175.2, RSMo. The following agencies began their rule review on July 1, 2017, and completed the review process by June 30, 2018:

Title 11 - Department of Public Safety
Title 12 - Department of Revenue, Lottery Commission and State Tax Commission
Title 13 - Department of Social Services
Title 14 - Department of Corrections

Based on a review of the JCAR's website, each agency timely completed and filed its periodic rule review report by June 30, 2018. These reports are available on that website. Each agency also posts its report on the agency's website.

P.O. Box 869 • Jefferson City, MO 65102 • (573) 751-4213 • FAX (573) 751-7984

On December 7, 2018, my office sent a letter to each agency to confirm the information from this review. Each agency provided a response. The table below provides a summary of the information determined from this review.

Department	Number of Rules Reviewed	Number of Comments Received	Rule Report Filed with JCAR	Rule Report Available on Agency Website
Department of Public Safety	704	205	Yes	Yes
Department of Revenue	423	0	Yes	Yes
Lottery Commission	64	0	Yes	Yes
State Tax Commission	24	0	Yes	Yes
Department of Social Services	333	106	Yes	Yes
Department of Corrections	17	0	Yes	Yes

Based on this review, these agencies timely completed their rule review process and report as required under Section 536.175, RSMo; and, no further action is necessary.

Crawford County Collector and Property Tax System

Report No. 2019-013
March 2019

auditor.mo.gov

Nicole Galloway, CPA
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the Crawford County Collector and Property Tax System

Property Tax System Controls and Procedures	Neither the County Clerk nor the County Commission adequately reviews the financial activities of the County Collector. The County Clerk does not prepare or verify the accuracy of the current or delinquent tax books. The County Clerk did not prepare the land and personal or back (delinquent) tax aggregate abstracts timely. The County Clerk and the County Commission do not adequately review changes (e.g., additions and abatements) entered into the County Collector's property tax system and our review identified discrepancies with additions and abatements. The county has not adequately restricted access to the property tax system.
County Collector's Receipt Controls	The County Collector does not account for the numerical sequence of receipt slip numbers assigned by the property tax system.
Tax Maintenance Fund	Some disbursements from the county's Tax Maintenance Fund were not in compliance with uses allowed by state law and/or were not a prudent use of Tax Maintenance Fund monies. The County Collector did not provide all required budget information to the county budget officer for the Tax Maintenance Fund.

In the areas audited, the overall performance of this entity was **Fair**.*

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

Organization and Statistical Information 11

NICOLE GALLOWAY, CPA
Missouri State Auditor

County Commission
and
County Collector
Crawford County, Missouri

We have audited the County Collector and Property Tax System of Crawford County. Section 52.150, RSMo, requires the State Auditor to audit the office of the County Collector after being notified of a vacancy in that office. On March 15, 2018, a vacancy occurred in the office of the County Collector of Crawford County. A successor was appointed and sworn into office effective April 24, 2018. The scope of our audit included, but was not necessarily limited to, the period of March 1, 2018, to March 15, 2018, and the year ended February 28, 2018. The objectives of our audit were to:

1. Evaluate the county's internal controls over significant property tax functions.

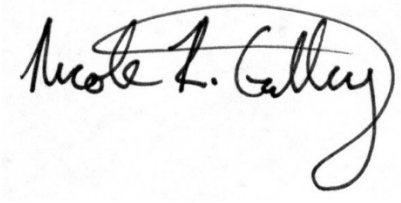
2. Evaluate the county's compliance with certain legal provisions.

Our methodology included reviewing written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the county, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of applicable contract, grant agreement, or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the County Collector and county management and was not subjected to the procedures applied in our audit of the County Collector and Property Tax System.

Section 52.150, RSMo, requires the County Commission to accept the State Auditor's report and, if necessary, to take certain specific actions if the State Auditor finds any monies owed to the county or the former County Collector. For the areas audited, we identified (1) deficiencies in internal controls, and (2) noncompliance with legal provisions. The accompanying Management Advisory Report presents our findings arising from our audit of the County Collector and Property Tax System of Crawford County.



Nicole R. Galloway, CPA
State Auditor

The following auditors participated in the preparation of this report:

Director of Audits:	Randall Gordon, M.Acct., CPA, CGAP
Audit Manager:	Heather R. Stiles, MBA, CPA, CFE
In-Charge Auditor:	Matthew Schulenberg, CFE
Audit Staff:	Zach Andrews

1. Property Tax System Controls and Procedures

Controls and procedures over the property tax system need improvement. Property taxes and other monies collected by the County Collector's office totaled approximately $15.8 million during the year ended February 28, 2018.

1.1 Review of activity

Neither the County Clerk nor the County Commission adequately reviews the financial activities of the County Collector. The County Clerk does not maintain an account book or other records summarizing property tax charges, transactions, and changes. In addition, the County Clerk and the County Commission do not perform procedures to verify the accuracy and completeness of the County Collector's annual settlements. As a result, there is an increased risk of loss, theft, or misuse of property tax monies going undetected, and less assurance the annual settlements are complete and accurate.

Section 51.150.1(2), RSMo, requires the County Clerk to maintain accounts with all persons chargeable with monies payable into the county treasury. An account book or other records that summarize all taxes charged to the County Collector, monthly collections, delinquent credits, additions and abatements, and protested amounts should be maintained by the County Clerk. Such records would help the County Clerk ensure taxes charged and credited to the County Collector are complete and accurate and could also be used by the County Clerk and the County Commission to verify the County Collector's annual settlements. In addition, Section 139.190, RSMo, requires the County Commission to carefully and fully examine the annual settlement of the County Collector. Such procedures are intended to establish checks and balances related to the collection of property taxes.

1.2 Tax books

The County Clerk does not prepare or verify the accuracy of the current or delinquent tax books. The county's property tax system vendor prepares the current tax books based on assessed valuations and tax levies provided by the County Assessor and the County Clerk. The County Collector prepares the delinquent tax books by combining the uncollected taxes from the current tax year and uncollected taxes from all prior years. The County Clerk does not review the tax books, which should include verification of individual entries in the tax books and recalculating tax book totals and charges. Failure to prepare and/or review the tax books and test individual tax statement computations may result in errors or irregularities going undetected.

Sections 137.290 and 140.050, RSMo, require the County Clerk to extend the current and delinquent tax books and charge the County Collector with the amount of taxes to be collected. If it is not feasible for the County Clerk to prepare the tax books, at a minimum, the accuracy of the tax books should be verified and approval of the tax book amounts to be charged to the County Collector should be documented.

1.3 Aggregate abstracts

The County Clerk did not prepare the land and personal or back (delinquent) tax aggregate abstracts timely. The 2017 land and personal aggregate abstract was not prepared until June 13, 2018, although the information needed to prepare this aggregate abstract was available at the beginning of November 2017. The 2017 back tax aggregate abstract was not prepared until December 5, 2018, and the 2016 back tax aggregate abstract was not prepared. The information needed to prepare these back tax aggregate abstracts were available at the beginning of March 2017 and 2018.

Section 137.295, RSMo, requires the County Clerk to prepare these reports and forward them to the Department of Revenue and the State Tax Commission upon completion of current and delinquent tax books.

1.4 Additions and abatements

The County Clerk and the County Commission do not adequately review changes (e.g., additions and abatements) entered into the County Collector's property tax system and our review identified discrepancies with additions and abatements. The County Assessor initiates changes to the County Collector's property tax system records by importing individual tax record changes from the County Assessor's assessment system to the property tax system. However, the County Assessor's office does not provide documentation of these changes made in the assessment system to the County Collector's office so the County Collector's office can ensure these changes were imported correctly into the property tax system.

In addition, the County Commission does not review and approve actual changes made to property tax records in the property tax system. Instead, the County Assessor submits a monthly report of changes made to property tax records in the assessment system for the County Commission's review and approval. Neither the County Clerk nor the County Commission compare the monthly report of changes prepared by the assessment system to the actual changes made in the property tax system. As a result, changes to the amount of taxes the County Collector is charged with collecting are not properly monitored and errors or irregularities could go undetected.

Our review of monthly additions and abatements records from both the assessment system and the property tax system for the months of March 2017 and February 2018 identified discrepancies in assessed valuations between the two systems. For example, according to assessment system reports for February 2018, the County Assessor's office processed an addition for a vehicle not previously reported by the taxpayer, thus, increasing the assessed valuation for a taxpayer for tax years 2015, 2016, and 2017. However, the vehicle addition for the 2016 tax year did not get imported into the property tax system and 2016 property taxes were not assessed or collected on this vehicle.

Sections 137.260 and 137.270, RSMo, assign responsibility to the County Clerk for making corrections to the tax books with the approval of the County Commission. If it is not feasible for the County Clerk to make corrections to the tax books, an independent reconciliation of approved changes to actual corrections made to the property tax system would help to ensure changes are proper.

1.5 Tax system access

The county has not adequately restricted access to the property tax system. The County Collector has access rights allowing her to enter additions and abatements into the system. In addition, the County Collector and her staff have access to void receipt transactions after they are completed. The property tax system does not provide a report of transactions deleted and documentation was not always maintained for voided transactions. As a result, there is an increased risk of unsupported or unauthorized changes being made to the property tax system after property taxes are approved for the year. Because the County Collector is responsible for collecting tax payments, good internal controls require the County Collector not have access rights allowing alteration or deletion of tax rates, assessed valuations, and property tax billing information.

To prevent unauthorized changes to the property tax records, as well as to reduce the risk of loss, theft, misuse, or errors occurring and going undetected, access should be limited based on user needs. Unrestricted access can result in the alteration of data files and programs. If transactions needed to be voided, documentation should be retained to support the voided transactions.

Similar conditions previously reported

A similar condition to section 1.1 was noted in our 3 prior county audit reports, a similar condition to section 1.2 was noted in our prior county audit report, and a similar condition to section 1.5 was noted in our 2 prior county audit reports.

Recommendations

1.1 The County Clerk maintain an account book with the County Collector. In addition, the County Clerk and the County Commission should use the account book to review the accuracy and completeness of the County Collector's annual settlements.

1.2 The County Clerk prepare the current and delinquent tax books, or at a minimum verify the accuracy of the tax books prior to charging the County Collector with the property tax amounts to be collected. Procedures performed should be documented.

1.3 The County Clerk prepare and timely file current and delinquent tax aggregate abstracts with the Department of Revenue and the State Tax Commission.

1.4 The County Clerk and the County Commission ensure changes made to the property tax system are supported by court orders approved by the County Commission and an independent reconciliation of additions and abatements between the County Assessor's system and the County Collector's property tax system is performed.

1.5 The County Collector work with the County Commission to ensure property tax system access is limited to only what is needed for users to perform their job duties and responsibilities.

Auditee's Response

The County Commission and County Clerk provided the following response:

The County Commission and the County Clerk recognize the issues presented by the State Auditor's report, and will give each issue the attention they deem necessary.

The County Collector and County Collector Elect (former County Collector) provided the following response:

1.5 We agree with the recommendation that access should be limited to any program in the property tax system that allows adjustments to taxpayer records. However, as long as the County Assessor's office and the County Collector's office utilize different systems, the County Collector's office will need access to the assessment module within the property tax system to ensure adjustments to real and/or personal property records initiated by the County Assessor's office have been updated and/or imported accurately into the property tax system. Additionally, in order for our office to provide the County Clerk with a monthly report of adjustments made in the property tax system, we must have access to the assessment module within the property tax system to run this report. The County Collector cannot limit the number of employees who can post changes made by the County Assessor's office and imported to the property tax system due to the limited number of employees in the office.

2. County Collector's Receipt Controls

The County Collector does not account for the numerical sequence of receipt slip numbers assigned by the property tax system. The 4 collection stations (cash drawers) share the same sequence of receipt slip numbers; therefore, receipt slip numbers are not in numerical sequence on each station's daily cash report. In addition, due to system limitations, a comprehensive report of all receipt slip numbers assigned cannot be printed. No one in the County Collector's office accounts for the numerical sequence of the receipt slip numbers. This control weakness allows for possible manipulation of receipt data.

To ensure all monies received are properly recorded and deposited, and to reduce the risk of loss, theft, or misuse of funds, the County Collector should ensure adequate controls are in place to properly account for the numerical sequence of receipt slip numbers assigned by the property tax system.

Recommendation

The County Collector implement procedures to account for the numerical sequence of receipt slip numbers.

Auditee's Response

The County Collector and County Collector Elect (former County Collector) have reached out to the property tax system programmer to determine the best way to implement this recommendation and the programmer has indicated a report will be created to assist us with implementation of this recommendation.

3. Tax Maintenance Fund

Controls over the management and use of the Tax Maintenance Fund (TMF) need improvement. By law, prior to January 1, 2018, the County Collector is required to collect a penalty of 7 percent of the total charged on delinquent taxes, and distribute two-sevenths of this penalty to the TMF to be used for additional administrative and operational costs related to the office of the County Collector. Effective January 1, 2018, this penalty was increased to 9 percent and two-ninths of this penalty is required to be distributed to the TMF. During the year end February 28, 2018, approximately $38,000 in penalties were deposited into the TMF and disbursements totaled approximately $32,400.

3.1 Disbursements

Some disbursements from the county's TMF were not in compliance with uses allowed by state law and/or were not a prudent use of TMF monies.

- Between October 2014 and October 2017, the former County Collector hired and paid her sister $1,345 as a contract employee to assist with preparing and mailing annual tax statements. Effective March 15, 2018, the former County Collector resigned from office as required by the Missouri Constitution after the nepotism concerns were raised and made public.

  Article VII, Section 6, Missouri Constitution, provides that any public official who names or appoints to public office or employment any relative within the fourth degree shall forfeit his office.

- In January 2018, the former County Collector paid $1,000 in legal fees to a law firm for an attorney to personally represent her in a Missouri Ethics Commission inquiry related to nepotism allegations. This disbursement was for personal reasons and not essential to the administration or operation of the County Collector's office or a prudent use of TMF monies.

Section 52.315, RSMo, requires expenditures from the TMF be for additional administration and operation costs of the County Collector's office. Because the legal fees listed above were primarily for the benefit of the County Collector, personally, and not related to costs or expenses incurred in the office of the County Collector, the disbursement would not be appropriate from the TMF.

3.2 Budget

The County Collector did not provide all required budget information to the county budget officer for the TMF. While estimates of receipts and disbursements for the upcoming fiscal year were submitted, other required information including beginning and projected ending cash balances or comparative statements of actual receipts and disbursements for the prior 2 years were not included.

To be of maximum assistance as a planning tool and to adequately inform the public, budgets should include all beginning available resources and actual receipts and disbursements of the prior 2 years. Section 50.590, RSMo, requires budgets to include detailed budget estimates, showing the recommendations of the budget officer compared with the figures for the last completed fiscal year and the estimates for the current fiscal year.

Recommendations

The County Collector:

3.1 Ensure all disbursements from the TMF are in compliance with legal provisions and are a prudent use of taxpayer funds. In addition, the former County Collector should reimbursed the TMF for the personal disbursement made.

3.2 Ensure all necessary budget information is prepared and provided to the county budget officer as required by state law.

Auditee's Response

The County Collector and County Collector Elect (former County Collector) provided the following responses:

3.1 The County Collector has always been and will always be prudent in making decisions with regards to the use of taxpayer funds.

In regards to the $1,000 in legal fees paid from the county's TMF for a law firm to represent the County Collector Elect in a Missouri Ethics Commission inquiry, it should be noted that legal fees incurred related to this representation totaled $2,480, of which the County Collector Elect personally paid $1,480 of this cost. As the attorney continued to work directly and/or indirectly with the County Counselor, the Missouri Ethics Commission, the Crawford County Commissioners, the Governor's Office, and the Crawford County Republican Central Committee as to the time period and the process

of a County Collector resigning from office, up to and including the completion of the County Collector's annual settlement, the remaining cost of $1,000 was paid from the TMF. These additional services provided by the attorney did not have any direct correlation to the personal representation of the County Collector Elect with regards to her guilt and resignation of the office, but to assure county residents the welfare of the office.

It should be noted all the County Collectors in the state pay yearly into the Missouri County Collectors Association Legal Fund should legal issues arise that may affect the integrity of the Collectors Association, and those payments are made by the County Collectors from their Tax Maintenance Fund.

Although the County Collector Elect does not agree with the statement that the $1,000 payment was for personal reasons, the County Collector Elect reimbursed the TMF $1,011.16 on January 16, 2019. This payment includes the base amount of $1,000 and 372 days of interest at one percent per annum of $11.16.

3.2 *The County Collector's office has always completed and submitted the budgetary form provided to them by the Budget Officer for Crawford County. The County Collector and County Collector Elect will ensure all necessary budget information required by state law is provided to the budget officer in the future.*

Crawford County Collector and Property Tax System
Organization and Statistical Information

The County Collector bills and collects property taxes for the county and most local governments. Pursuant to Section 52.015, RSMo, the term for which collectors are elected expires on the first Monday in March of the year in which they are required to make their last final settlement for the tax book collected by them. Annual settlements are to be filed with the county commission for the fiscal year ended February 28 (29).

Pat Schwent served as County Collector until March 15, 2018. She was hired as a clerk for County Collector's office on March 16, 2018. Linda Hamilton was appointed the Crawford County Collector on April 9, 2018, and sworn into office on April 24, 2018. On November 6, 2018, Pat Schwent was elected Crawford County Collector and will take office effective March 1, 2019.

The former County Collector received compensation of $1,792 for the period March 1, 2018, to March 15, 2018. During the year ended February 28, 2018, the former County Collector received compensation of $43,000. Compensation was in accordance with statutory provisions.

Office of Missouri State Auditor

Nicole Galloway, CPA

Compilation of 2018 Criminal Activity Forfeiture Act Seizures

Report No. 2019-012
February 2019

auditor.mo.gov

Nicole Galloway, CPA
Missouri State Auditor

CITIZENS SUMMARY

Compilation of 2018 Criminal Activity Forfeiture Act Seizures

Background	State law requires prosecuting attorneys and the Attorney General to report seizures made under the Criminal Activity Forfeiture Act (CAFA) to the State Auditor and the Director of the Department of Public Safety.
CAFA Seizure Reports Submitted	The State Auditor's Office received 116 CAFA seizure reports from prosecuting attorneys and the Attorney General for property seized during the 2018 calendar year. State law states intentional or knowing failure to comply with reporting requirements shall constitute a class A misdemeanor.
Disposition of the Seizures Reported	The overall dollar value for property seized in 2018 was $9,102,717. Of that total, $571,892 was returned, $5,767,867 was transferred to a federal agency, and $100,915 was transferred to the state. The disposition for $2,067,837 was pending at the time of reporting, and no disposition was reported for $549,548. Dispositions reported by each prosecuting attorney and the Attorney General are included in a report appendix.
Reporting of Seizures Information	State law states prosecuting attorneys and the Attorney General are to report the date, time, and place of the seizure; property seized; estimated value of the property seized; person(s) from whom the property was seized; criminal charges filed; and disposition of the seizure, forfeiture, and criminal actions.

Because of the nature of this compilation, no rating is provided.

NICOLE GALLOWAY, CPA
Missouri State Auditor

Honorable Michael L. Parson, Governor
and
Members of the General Assembly
Jefferson City, Missouri

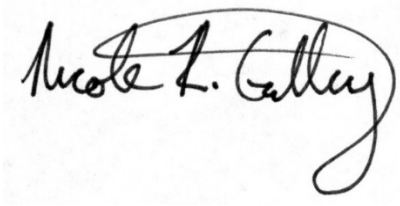
As required by Section 513.607, RSMo, we have compiled the 2018 Criminal Activity Forfeiture Act (CAFA) seizure reports submitted to the State Auditor by prosecuting attorneys and the Attorney General. The compilation is limited to information submitted to the State Auditor's Office. We have not audited the reports submitted and, accordingly, do not express an opinion or any other form of assurance on them. The primary objectives of this compilation were to:

1. Compile the 2018 CAFA seizure information reported.

2. Identify officials who submitted 2018 CAFA seizure reports to the State Auditor.

Section 513.607, RSMo, requires prosecuting attorneys and the Attorney General to report CAFA seizures for the previous calendar year by January 31, to both the Director of the Department of Public Safety and the State Auditor. Of the 116 potential reporting officials, we received reports from each official.

Compliance with Section 513.653, RSMo, which requires law enforcement agencies involved in using the federal forfeiture system to submit reports regarding federal seizures and the proceeds therefrom to the State Auditor's Office, will be separately reported.



Nicole R. Galloway, CPA
State Auditor

The following auditors participated in the preparation of this report:

Director of Audits: Kelly Davis, M.Acct., CPA, CFE
Senior Analyst: Jill Wilson, MBA

Compilation of 2018 Criminal Activity Forfeiture Act Seizures Executive Summary

CAFA Seizure Reports Submitted

The State Auditor received 116 of the total possible 116 CAFA seizure reports from prosecuting attorneys and the Attorney General for property seized during calendar year 2018.

Section 513.607.10, RSMo, states intentional or knowing failure to comply with any reporting requirement shall be a class A misdemeanor punishable by a fine of up to $1,000.

Disposition of the Seizures Reported

We compiled the disposition of seizures as reported by prosecuting attorneys and the Attorney General for property seized during calendar year 2018. The following table lists the overall dollar value of the dispositions by category as reported to the State Auditor for 2018, 2017, and 2016.

Reported Disposition	2018		2017		2016	
Pending	$ 2,067,837	22.7 %	$ 2,542,029	36.0 %	$ 2,588,046	41.4 %
Returned	571,892	6.3	679,549	9.6	482,142	7.7
Transferred to Federal Agency	5,767,867	63.4	3,256,377	46.2	2,745,658	43.9
Transferred to State	100,915	1.1	180,363	2.6	97,067	1.6
Other	44,658	0.5	72,354	1.0	15,680	0.2
Disposition Not Reported	549,548	6.0	322,784	4.6	324,733	5.2
Total	$ 9,102,717	100.0 %	$ 7,053,456	100.0 %	$ 6,253,326	100.0 %

See Appendix I for the 2018 CAFA seizures disposition as reported by each prosecuting attorney and the Attorney General.

Reporting of Seizures Information

Section 513.607.8, RSMo, states prosecuting attorneys and the Attorney General are to report the date, time, and place of the seizure; property seized; estimated value of the property seized; person(s) from whom the property was seized; criminal charges filed; and disposition of the seizure, forfeiture, and criminal actions. See Appendix II for the number of 2018 CAFA seizures reported with this information.

* Estimated values or dispositions were indicated for only a portion of the seizure(s).

This appendix compiles only the data and dispositions pertaining to 2018 CAFA seizures, the total estimated value of seizures reported, and the number of seizures categorized by the type of information reported for each prosecuting attorney and the Attorney General. Criminal Charges Filed and Criminal Actions were only counted if a criminal case was in existence for the seizure. We did not verify this data. Information regarding seizures in previous years is not reflected in this compilation.

Office of Missouri State Auditor

Nicole Galloway, CPA

Interstate 470 and 350 Transportation Development District

Report No. 2019-011
February 2019

auditor.mo.gov

Nicole Galloway, CPA
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of Interstate 470 and 350 Transportation Development District

Financial Status

Our audit of the Interstate 470 and 350 Transportation Development District (TDD) indicates the financial condition of the district is such that it may be abolished. In April 2001, the qualified voters of the Interstate 470 and 350 TDD approved a 1-cent (1 percent) sales tax on all taxable transactions within the boundaries of the district. During 2001, the Interstate 470 and 350 TDD Board issued $14,755,000 of tax-exempt transportation sales tax revenue bonds. In October 2018, the TDD Board of Directors approved a resolution to repeal the sales tax at the earliest possible date and no later than December 31, 2018. The TDD was notified by the Missouri Department of Revenue that the sales tax would be repealed effective December 31, 2018. Full repayment of the TDD debt occurred in November 2018. Based on our audit, the cash balance of the Interstate 470 and 350 TDD at November 30, 2018 was $464,593. The TDD subsequently received sales tax collections in December 2018 and January 2019, increasing the cash balance to approximately $895,089 as of January 9, 2019. Based on our audit, the Board of Directors may proceed with the abolishment of the district in accordance with Section 238.275, RSMo.

Due to the nature of this report, no rating will be given.

Management Advisory Report - State Auditor's Findings

Financial Status 4

NICOLE GALLOWAY, CPA
Missouri State Auditor

Melissa Goodson, Chairperson
and
Board of Directors
Interstate 470 and 350 Transportation Development District
Lee's Summit, Missouri

The State Auditor is required under Section 238.275, RSMo, to audit a transportation development district prior to the question of abolishment being submitted to a vote. On October 10, 2018, the Board of Directors of the Interstate 470 and 350 Transportation Development District approved a resolution of its intent to dissolve the district and request an audit as required by statute. The State Auditor was subsequently notified of this resolution.

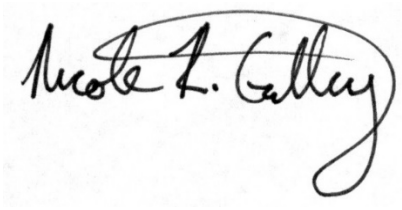
The district engaged Deborah Loomis, CPA, LLC to audit the district's financial statements for the years ended December 31, 2017 and 2016. To minimize duplication of effort, we reviewed the reports of the CPA firm. The scope of our audit included, but was not necessarily limited to, the year ended December 31, 2017, and the period from January 1 through November 30, 2018. The objectives of our audit were to evaluate the financial status of the district and determine whether it may be abolished pursuant to law.

Our methodology included reviewing minutes of meetings, financial records, and other pertinent documents; interviewing various personnel of the district, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of applicable contract, grant agreement, or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The audit determined the district's Board of Directors may proceed with abolishment of the district in accordance with Section 238.275, RSMo.

The accompanying Management Advisory Report presents our findings arising from our audit of the Interstate 470 and 350 Transportation Development District.



Nicole R. Galloway, CPA
State Auditor

The following auditors participated in the preparation of this report:

Director of Audits:	Robert E. Showers, CPA, CGAP
Audit Manager:	Todd M. Schuler, CPA
In-Charge Auditor:	Alex Bruner, MBA, CFE

Financial Status

Our audit of the Interstate 470 and 350 Transportation Development District (TDD) indicates the financial condition of the district is such that it may be abolished.

The Interstate 470 and 350 TDD is located in the city of Lee's Summit. The district was organized in 2001 by petition of the property owners within the boundaries of the proposed TDD. The members of the Board of Directors are representatives of the property owner. The district has a fiscal year end of December 31 and obtained an independent audit for the year ended December 31, 2017.

In April 2001, the qualified voters of the Interstate 470 and 350 TDD approved a 1-cent (1 percent) sales tax on all taxable transactions within the boundaries of the district. The Board of Directors subsequently passed a resolution formally establishing the sales tax rate to be effective October 1, 2001, for 40 years unless terminated sooner. The retail establishments within the district collected and remitted the sales tax to the Missouri Department of Revenue (DOR). In turn, the DOR disbursed the sales tax monies to the district.

The Interstate 470 and 350 TDD was formed for the purpose of acquiring land, conducting site work, conducting work on Pryor and Chipman Roads, conducting work on U.S. 50 Highway ramps at Chipman Road, implementing improvements to Pryor Road south of Chipman Road, acquiring highway right-of-way, and constructing half diamond interchange ramps and an overpass at Interstate 470 and Pryor Road. The City of Lee's Summit and the Missouri Department of Transportation (MoDOT) are the public entities with jurisdiction over the project and serve as the Local Transportation Authorities. The project was completed in 2009 and MoDOT accepted dedication of the project in March 2009. City of Lee's Summit officials could not provide the exact date of when they accepted dedication; however, they confirmed it occurred prior to December 2018.

During 2001, the Interstate 470 and 350 TDD Board issued $14,755,000 of tax-exempt transportation sales tax revenue bonds (Series 2001). During 2007, the TDD issued $18,765,000 of tax-exempt transportation revenue bonds (Series 2007) to refund the Series 2001 bonds and to finance the completion of the I-470 and Pryor Road improvements. The Series 2001 bonds were refunded in 2008. All sales tax proceeds collected by the TDD were pledged to repay the bonds. Full repayment of the Series 2007 bonds occurred in November 2018.

In October 2018, the TDD Board of Directors approved a resolution to repeal the sales tax at the earliest possible date and no later than December 31, 2018. The TDD was notified by DOR that the sales tax would be repealed effective December 31, 2018. In October 2018, the TDD Board of Directors approved a resolution formalizing its intent to dissolve the TDD. The TDD's legal counsel advised the State Auditor's Office (SAO) of these resolutions and

requested the SAO proceed with all necessary actions as required pursuant to Section 238.275, RSMo.

The SAO has performed an audit of the Interstate 470 and 350 TDD as required by Section 238.275, RSMo. That statute requires the State Auditor to audit the district to determine its financial status, and determine whether it may be abolished pursuant to law. That law also states the board shall not propose the question to abolish the district while there are outstanding claims or causes of action pending against it; if its liabilities exceed its assets; or while the district is insolvent, in receivership, or under the jurisdiction of a bankruptcy court.

The following table presents the financial activity and cash balances of the Interstate 470 and 350 TDD for the year ended December 31, 2017, and the period from January 1 through November 30, 2018.

	January 1, 2018 to November 30, 2018	Year Ended December 31, 2017
RECEIPTS		
Sales taxes and other revenues	$ 1,937,107	2,158,936
Total Receipts	1,937,107	2,158,936
DISBURSEMENTS		
Debt service: interest	141,312	229,655
Debt service: principal	4,135,000	1,715,000
Administration expenses	77,932	108,262
Total Disbursements	4,354,244	2,052,917
RECEIPTS OVER (UNDER) DISBURSEMENTS	(2,417,137)	106,019
BEGINNING CASH	2,881,730	2,775,711
ENDING CASH	$ 464,593	2,881,730

Based on our audit, the cash balance of the Interstate 470 and 350 TDD at November 30, 2018 was $464,593. The TDD subsequently received sales tax collections in December 2018 and January 2019, increasing the cash balance to approximately $895,089 as of January 9, 2019. The TDD's Attorney estimated future obligations for the district to close out are less than $59,000. Based on this representation, TDD assets will be sufficient to pay any remaining costs and obligations. The remaining balance will be distributed to the city of Lee's Summit and Missouri Highways and Transportation Commission (MHTC) in accordance with the TDD Act and in relative proportion to the TDD improvements within the jurisdiction of the city and MHTC, respectively.

Based on our audit, the Board of Directors may proceed with the abolishment of the district in accordance with Section 238.275, RSMo.

Office of Missouri State Auditor

Higher Education

Harris-Stowe State University

Report No. 2019-010
February 2019

auditor.mo.gov

Nicole Galloway, CPA
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of Harris-Stowe State University

Board Oversight of University Resources and Budgets	Continuous oversight by the Board of Regents is needed to ensure the efficient use of university resources while facing declining state appropriations. The Board has not established fund balance benchmarks and/or minimums to ensure sufficient funding for university operations, although Board minutes indicate the Board discussed the need for a "rainy day fund." University budgets are not complete.
Student Account Balances	The university is not following established procedures for the monitoring, follow up, and collection of tuition and fees on student accounts. Significant improvement is needed in the monitoring and collection of student accounts. The university does not have written policies and procedures for the issuance, monitoring, and collection of emergency loans made to students.
Payroll and Personnel Procedures	Numerous problems existed with the university's payroll and personnel procedures. The university paid individuals that did not have payroll or personnel files to support their employment and other employment records were incomplete. Timesheets required for hourly employees were not prepared or maintained for some employees. The university only performs background checks that identify Missouri criminal records despite actively recruiting and hiring employees from other states.
Disbursements	The university does not ensure employees follow credit card and travel policies and procedures and allows employees to continue making significant credit card purchases without supporting documentation. Some university disbursements should be further evaluated to ensure they provide a benefit to the university.
Early Childhood Development Center	The university subsidizes the William L. Clay Early Childhood Development/Parenting Education Center (ECDC) due to the program's annual operating losses. In addition, the ECDC does not sufficiently monitor outstanding balances due, enforce current policies for payment of outstanding balances, or have an updated agreement with another university for use of its facilities leading to further potential losses.
Tuition Analysis	University officials have not conducted a recent formal analysis of the impact on enrollment due to potential tuition rate changes or charging students for all credit hours.
Sunshine Law	The university did not always comply with the Sunshine Law. The Board discussed several topics in closed meetings that are not allowable by state law. The Board generally uses the same statement for each meeting notice/agenda to indicate the potential for a closed meeting, instead of citing the specific section of the law as the reason for a closed meeting. The public record request log documenting Sunshine Law requests is not complete.
University Foundation	The university subsidizes certain operating expenses of the University Foundation. In addition, the university has no formal contract or agreement with the Foundation and the University President is overseeing the Foundation because a Foundation Board of Directors has not been established.

Accounting Controls and Procedures	Significant improvements are needed in the university's cash handling and accounting procedures. Receipts are not deposited timely and intact. Receipt slips are not issued for monies transmitted to the Bursar's office by the Athletic Department and the ECDC. Voided system transactions do not require supervisory approval, are not periodically reviewed by an independent person or supervisor, and are not adequately documented. The university has not established procedures to routinely follow up on outstanding payroll checks.
Capital Assets	The university does not always follow its policies and procedures for capital assets.

In the areas audited, the overall performance of this entity was **Fair**.*

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

B Additional University Comments 35

NICOLE GALLOWAY, CPA
Missouri State Auditor

Honorable Michael L. Parson, Governor
and
Board of Regents of Harris-Stowe State University
and
Dr. Dwaun J. Warmack, President
Harris-Stowe State University
St. Louis, Missouri

We have audited certain operations of Harris-Stowe State University, in fulfillment of our duties under Chapter 29, RSMo. In addition, the audit was performed at the request of the Harris-Stowe State University Board of Regents. The university engaged RubinBrown LLP, Certified Public Accountants (CPAs), to audit the university's financial statements for the year ended June 30, 2017, and June 30, 2016. To minimize duplication of effort, we reviewed the report and substantiating working papers of the CPA firm for the year ended June 30, 2016, since the year ended June 30, 2017, audit had not been completed at the time we started the audit. We subsequently reviewed the report of the CPA firm for the year ended June 30, 2017, upon its completion. The scope of our audit included, but was not necessarily limited to, the years ended June 30, 2017 and 2016. The objectives of our audit were to:

1. Evaluate the university's internal controls over significant management and financial functions.

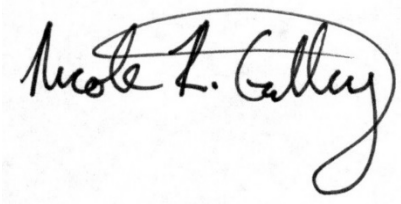
2. Evaluate the university's compliance with certain legal provisions.

3. Evaluate the economy and efficiency of certain management practices and procedures, including certain financial transactions.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the university, as well as certain external parties and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We tested certain of those controls to obtain evidence regarding the effectiveness of their design and operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of applicable contract, grant agreement, or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis. The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the university's management and was not subjected to the procedures applied in our audit of the university.

For the areas audited, we identified deficiencies in internal controls, noncompliance with legal provisions, and the need for improvement in management practices and procedures. The accompanying Management Advisory Report presents our findings arising from our audit of Harris-Stowe State University.



Nicole R. Galloway, CPA
State Auditor

Harris-Stowe State University
Management Advisory Report
State Auditor's Findings

1. Board Oversight of University Resources and Budgets

Continuous oversight by the Board of Regents is needed to ensure the efficient use of university resources while facing declining state appropriations. Also, the Board did not budget for all funds or include necessary information in budget documents.

1.1 Oversight of university resources

The Board has not established fund balance benchmarks and/or minimums to ensure sufficient funding for university operations, although Board minutes indicate the Board discussed the need for a "rainy day fund." As noted throughout this report, the university did not adequately monitor and ensure outstanding amounts due were collected (see MAR finding number 2), made unsupported or non-essential disbursements (see MAR finding numbers 3 and 4), subsidized other non-higher education operations (see MAR findings numbers 5 and 8) , did not adequately safeguard university assets (see MAR finding number 10), and did not formally study the impact of potential tuition changes (see MAR finding number 6), while state appropriations were flat or decreasing. The university's fund and unrestricted cash balances have decreased since 2015, indicating the need to continue to consider fund and/or cash balance benchmarks.

The following table presents the actual and projected change in fund balance for the 5 years ended June 30, 2019:

	Fiscal Year Ended June 30,				
	2019 Budgeted	2018 Not Audited	2017 Actual	2016 Actual	2015 Actual
Beginning Fund Balance	$ 25.6	26.2	28.0	27.3	25.4
Operating Revenues	17.8	16.7	15.6	14.9	13.3
Non-operating Revenues	16.5	15.7	14.8	14.8	14.7
Total Funds Available	59.9	58.6	58.4	57.0	53.4
Less: Expenditures	34.0	33.0	32.2	29.0	26.1
Ending Fund Balance	$ 25.9	25.6	26.2	28.0	27.3
Fund Balance Increase/(Decrease)	$ 0.3	(0.6)	(1.8)	0.7	1.9

Source: 2015, 2016, and 2017 audited financial statements. Amounts for fiscal years 2018 and 2019 were provided by the university. Amounts presented are in millions of dollars.

The following table presents the unrestricted cash, cash equivalents, and other long-term investments balances for the 5 years ended June 30, 2018.

	June 30,				
	2018 Not Audited	2017 Actual	2016 Actual	2015 Actual	2014 Actual
Unrestricted Cash and Cash Equivalents	$ 3.7	5.6	6.2	6.9	5.0
Unrestricted Long-Term Investments	2.3	2.1	1.9	1.9	1.9
Total	$ 6.0	7.7	8.1	8.8	6.9

Source: Year ended June 30, 2015, 2016, and 2017 audited financial statements. Amounts for June 30, 2018, were provided by the university. Amounts presented are in millions of dollars.

The university's fiscal year 2017 audited financial statements show the university continues to be affected by lower or flat state appropriations, which represent the largest single portion of its revenue (30 percent in 2017). In fiscal years 2017 and 2018 the university sustained decreases in state core funding totaling approximately $1.1 million. State core funding reductions in 2017 ($153,000) and 2018 ($986,000) represented approximately 2 and 9 percent of the core funding, respectively. The reductions contributed to budgetary restrictions including a hiring freeze, no employee raises except for faculty, and delaying capital improvements. While the General Assembly approved a slightly higher appropriation for the fiscal year 2019 budget due to 2 additional specific appropriations of $750,000 each, the Governor reduced the additional amounts to $500,000 and $250,000, indicating the university may not be able to depend on further increases.

During these years of reduced or flat state appropriations, the university did not ensure students resolved outstanding balances prior to registering, declined to pursue further collection efforts for unsupported credit card transactions and made other non-essential purchases (see MAR finding numbers 2 and 4). The university also is subsidizing the Early Childhood and Development Center due to operating losses and the University Foundation (see MAR finding numbers 5 and 8). In addition, the university did not formally study the impact of tuition changes and not charging tuition for several credit hours (see MAR finding number 6).

The university's reliance on state appropriations for a large portion of its revenue when those appropriations are declining or flat, makes it essential the Board continuously oversee the use of university resources, safeguard assets, and consider other potential revenue sources if necessary to ensure the efficient use of resources and adequate operating fund balances.

1.2 Budget procedures

University budgets are not complete. The university only prepared annual budgets for 4 of its 20 funds for the fiscal years ended June 30, 2016, 2017, and 2018. Those funds include the General Revenue, Gillespie Residence Hall, Bosley Residence Hall and Dining Facility, and the Early Childhood Development Center Funds. University officials stated they only prepare budgets for operating funds. Also, the budget documents approved by the Board for the years ended June 30, 2016, 2017, and 2018 only included the prior year and current year budgeted revenues and expenditures. The budgets did not include the beginning and estimated ending available resources for each fund or comparative statements of actual or estimated actual revenues and expenditures for the 2 previous years. Because the budget preparation process begins before the completion of the prior fiscal year, having comparative information from the 2 previous years can provide valuable information.

Budgets present a complete financial plan for the ensuing budget year. A complete and well-planned budget can serve as a useful management tool by establishing specific revenue and cost expectations for each area. Beginning and ending available resources and comparative statements to prior years are necessary to ensure budgeted amounts are realistic based on past performance and the complete financial position of the budgeted funds is presented.

Recommendation

The Board of Regents:

1.1 Consider setting benchmarks or minimums for fund balances to ensure sufficient resources for university operation and continue to eliminate unnecessary spending and evaluate controls and management practices to ensure efficient use of university resources.

1.2 Ensure the budget documents prepared by the university include all planned financial activity of the university and essential budgetary information.

Auditee's Response

1.1 As a preliminary matter, it is worth pointing out that the Board initiated this state audit to gain insight and for the purpose of continuing assisting the university in becoming a premier institution of higher learning. In working with the State Auditor's Office, we were impressed with their thoroughness, dedication and professionalism. Although we do not see eye to eye with the State Auditor on several points — points that, as explained throughout our responses, we believed required further explanation and context — the university appreciates each of the recommendations and is eagerly taking steps to address the Auditor's concerns as needed. The university worked hard to efficiently use its resources while facing declining state appropriations and was able to meet all financial obligations while creating a surplus and without placing an extra burden on the students. We therefore disagree with the Auditor's comments and assessments. In response to the issue of fund balances, it should be noted that the university, over the last four years, has increased fund balances by $200,000. This increase was accomplished despite the state withholding of funds and state cuts to core funding totaling $3.2 million during the current and the last fiscal year. This surplus was realized without laying off employees, and without adversely affecting student outcomes or the student experience. No degree programs were discontinued, and no buildings were closed as a result of state funding reductions. The university's surplus has been accomplished through a 34% increase in enrollment, monitoring of spending and prudent purchase practices. Based on the recommendations of the State Auditor, the institution will set aspirational goals/benchmarks regarding fund balances going forward and continue to ensure sufficient resources for the

university's operations are available by continuing to monitor spending, and evaluating controls and management practices. In addition, the disbursement/procurement policy will be reviewed and enhanced. The university's responses to the Auditor's references made here to MAR findings 2, 3, 4, 5, 6, 8 and 10 are set forth below.

1.2 To provide further context, it should be noted the Board approves the university budgets that are related to unrestricted funds and auxiliary enterprises. This accounts for 80% of the institution's total expenses. The remaining expenditures are from restricted, reimbursable state and federal grants. Since these programs are paid through reimbursement, the expenses equal the revenue and no surplus or deficit results from these restricted funds. Annual budgets for each restricted account are completed annually and submitted to the granting agency for approval. A copy of that budget is also provided to the Business Office for post-award monitoring and management. Federal expenditures are subject to an annual audit that is conducted by an external auditor. Any findings from these audits are shared with the Board annually in an open session meeting. Although the university's operations are reviewed annually by its outside audit firm, RubinBrown LLP, Certified Public Accountants, and no issues have been raised regarding how budgets are prepared, as a result of the State Auditor's recommendations, the institution will include all activities in the budget documents presented to the Board of Regents at all future meetings, which occur every two months, and annually thereafter.

2. Student Account Balances

The university is not following established procedures for the monitoring, follow up, and collection of tuition and fees on student accounts. In addition, the university has not established policies and procedures for emergency loans made to students.

2.1 Student accounts

Significant improvement is needed in the monitoring and collection of student accounts. Balances owed by students over 90 days past due totaled approximately $1,567,000 and $1,304,000 for the fiscal years ending June 30, 2017 and June 30, 2016, respectively.

The university does not enforce its current policies and procedures regarding financial holds on registration and collections. As a result, the university allowed students to register for classes with significant outstanding balances.

University policy states that all fees are to be paid in full at the time of registration, and students with an unpaid balance will not be permitted to register for the following semester with an outstanding balance. Tuition and fees not paid prior to completing registration can be paid by obtaining financial aid, using third party payors, or initiating and executing an approved

payment plan with the university. In addition, the university's collection policy requires sending a reminder email if a student account is 60 days past due, sending a collection warning letter if an account is past due 30 days after semester end, and written communication for all collection efforts.

Our test of 30 student accounts noted the following issues.

- Of the 25 students tested with balances due, 16 were allowed to register for the next semester. Balances for these 16 students ranged from $25 to $14,951 with 9 having balances of more than $1,000. University personnel indicated the school has an informal policy to allow students residing on-campus to register if their balance due is $1,000 or less and students residing off-campus to register if their balance due is $500 or less.

- Five students with outstanding balances did not have payment plans or other documented financial aid sufficient to pay the outstanding balance as required.

- The Bursar could only provide delinquency letters sent to 5 of the 10 students with past due balances on payment plans. Also, no supervisory review is done of the follow-up work performed on the payment plans.

- The university did not maintain records or documentation of the email messages sent to 20 students indicating payment on their account balance was 60 days past due. A required collection letter for 19 of these students, whose outstanding balances totaled almost $156,000, was not mailed until 12 to 25 months after the students' last semester attended.

- The university did not send 2 of the student accounts to the third party collection agency as records indicated had occurred. The university sent a collection letter to one of the students.

Policies and procedures for student registration and collection of amounts due should be written and those procedures should be consistently followed. In addition, proper and timely monitoring of balances due is necessary to help ensure unpaid amounts are collected and proper follow-up action is taken for nonpayment, including sending accounts to collection agencies or using alternative collection efforts.

2.2 Student emergency loans

The university does not have written policies and procedures for the issuance, monitoring, and collection of emergency loans made to students. The university also does not advertise or otherwise publicize the service to allow all students the opportunity to use it. The university provides interest free, short-term emergency loans to students seeking financial assistance to pay personal bills or other purchases. Restricted donations are used for the loans,

which are approved by the Director of Financial Aid, Dean of Enrollment Management (EM), and the Chief Financial Officer (CFO). Loans range from $50 to $3,000. Written procedures could not be provided outlining eligibility guidelines, allowable needs and uses, or the process for approving these loans. The university made 180 emergency loans totaling approximately $117,000 between January 2016 and March 2018.

Also, the outstanding emergency loan balances were not always monitored or paid off with excess financial aid when allowable. The university procedure is to deduct the amount due from additional financial aid due to the student prior to disbursing financial aid to the student. A review of emergency loans issued, identified a remaining balance due for four loans, totaling $2,164, as of March 31, 2018. Two of the 4 loans have been outstanding for more than a year. According to accounting and financial aid personnel, the university has not established any procedures (such as sending statements to the students, placing holds on student accounts, or attempting other collection efforts) to collect past due accounts. Additionally, the university accounting system does not allow students to see the emergency loans as part of the their student account or to monitor the amount due. Ten students received additional emergency loans totaling $6,117 while already having outstanding emergency loans totaling $6,206. The students repaid all loans by March 2018.

A written policy is necessary to establish and document the emergency loan process including the eligibility guidelines, allowable amounts, approval, and repayment terms of the loan and to ensure all students are aware of the program. In addition, follow-up procedures are necessary to safeguard against possible loss or misuse of funds going undetected.

Recommendations

The Board of Regents:

2.1 Ensure policies and procedures to restrict registration, monitor, and collect student account balances are written and followed timely and consistently.

2.2 Develop formal written policies and procedures for the issuance, monitoring, and collection of student emergency loans.

Auditee's Response

2.1 We agree with the Auditor's comments and are continuing to address these concerns as we have done prior to receiving the Auditor's recommendation. Recognizing the need for improvement in monitoring student payment plans, the university adopted a new electronic tracking system, Cashnet, for payment plans in July of 2018. The university was in the testing stage of this new system prior to receiving the State Auditor's verbal recommendations in June 2018. The new Cashnet system was signed on August 28, 2017 and

fully implemented in July 2018. The university's Student Account Office will also review and update its policy and procedures regarding the monitoring and collection of student account balances. Further, the Student Account Office and Accounting Specialist will follow up monthly to ensure adherence to these policies and procedures. The university's Student Account Office will continue to monitor the collection of outstanding student balances. This is a symptom of low staffing due to reduced appropriations.

2.2 We disagree with the Auditor's comments and assessments that the university does not maintain policies and procedures for the issuance, monitoring, and collecting of these emergency student loans, although we acknowledge they were not maintained in a formal written format. The Emergency Refund Loan (ERL) fund has been in existence since the early to mid-1980s. A private donor provided the funds to the university for the specific purpose of assisting students with unforeseen financial difficulties. The program continues to be funded through the original donation 30 years ago and nearly all of the funds have been recovered.

A formal written policy and procedure for the issuance, monitoring, and collection of student emergency loans has been developed by the Director of Financial Assistance and will become effective during the Spring 2019 semester. The Dean of EM will be responsible for monitoring compliance with the written policy. Going forward, the university will advertise the ERL information to all students.

The ERL policy implemented for Spring 2019 is as follows:

The Office of Financial Assistance provides zero interest loans to students that are experiencing financial hardships and expecting a refund from their federal student aid. Loans are usually granted in amounts up to $800 for undergraduate students. Loans may be greater for extenuating circumstances (if approved by the Dean of EM and the Vice President (VP) of Business and Finance).

ERLs are available to students who are registered for the current semester and who demonstrate extreme and immediate financial need and will have a refund of at least 2 times the amount of their request. Students must (1) submit a written request for an ERL, (2) provide statements, bills, etc… displaying need or hardship, and (3) receive approval from Director of Financial Aid, Dean of EM, and VP of Business and Finance.

3. Payroll and Personnel Procedures

We noted numerous problems with the university's payroll and personnel procedures. The university had payroll expenditures of approximately $17.5 million and $15.4 million for the years ended June 30, 2017, and June 30, 2016.

3.1 Missing and incomplete personnel records

The university paid temporary employees who did not have payroll or personnel files to support their employment. In addition, employment records for other employees were not complete. We reviewed the employment records for 85 employees to ensure documentation was included to substantiate proper hiring, position, pay rate, and completion of all required forms. We initially reviewed personnel, payroll, and I-9 (Employment Eligibility Verification) form files for 25 university employees. Personnel files are to include applications and transcripts/certifications. Payroll files are to contain pay rates, federal and state W-4 forms, and background checks. I-9 forms are filed separately for each employee. Our review included looking for completed job applications, W-4 and I-9 forms, transcripts/certifications, and documentation of positions and pay rates. After we noted records missing for one employee paid by a manual payroll check, we expanded our work to include a review of employment records for 60 additional employees paid by at least one manual payroll check for years ended June 30, 2017, and June 30, 2016. This additional test included reviewing for completed job applications, I-9 forms, transcripts, and background checks.

Missing payroll records

Our review of the records for the 85 employees noted employment records could not be located for 3 employees (4 percent), limited information was available for a fourth employee reviewed, and one employee's files could not be located until months after originally requested. As a result, there is less assurance salary payments were appropriate for these employees.

University personnel indicated one of these employees was a summer intern and another was a graduate assistant. For one of the employees, the university provided a grant report listing him as a researcher as the only available documentation of employment. No email messages or other documentation were provided for the remaining 2 employees. The file for a fourth employee only included a payroll employment authorization form indicating this person was a temporary part-time instructor.

Incomplete records

Our review of various employment records for the 85 employees noted files were often missing one or more required documents. We identified the following problems.

- The approved pay rate for 3 of 25 employees was missing from their personnel files and another employee received a manual payroll check on the same date as an automated check with no supporting documentation. The CFO indicated the additional check was issued to correct an earlier

error, but he could not provide documentation to substantiate the circumstances.

- Federal and state W-4 forms were missing for 15 of the 25 employees and another employee's file was missing the state W-4 form. (University personnel indicated the forms may be in storage, but could not provide them.)

- I-9 forms were not on file for four employees and the forms were incomplete for another 12 of the 85 employees tested.

- Employment applications were missing for 3 of the 85 employees. One employee has been employed for more than 30 years and university officials indicated the application may be missing due to the age of the records.

- One employee's personnel file included another employee's information.

Conclusion

Without sufficient employee payroll and personnel records, the university has less assurance payments made to employees are appropriate. Complete employment records should be maintained for all employees to provide documentation of personnel actions. In addition, employment records should at a minimum contain documentation for hiring the employee, the employee's authorized pay rate, and any subsequent changes in pay rate. The Internal Revenue Service (IRS) requires employers to ensure a W-4 form is completed by each employee to support payroll tax withholdings. The Immigration Reform and Control Act of 1986 indicates an individual may not begin employment unless an I-9 form is completed.

3.2 Timesheets

Timesheets required for hourly employees were not prepared or maintained for 6 of the applicable 12 employee records tested. The missing timesheets included 5 student workers and 1 part-time employee. For the part-time employee, only an email noting hours per day was available. For 2 of the student workers, the university provided a listing of various student workers and total hours worked. This listing did not indicate specific dates or times worked and was not signed by a supervisor indicating the hours were approved. No information was provided for the other student workers.

Paying employees without proper documentation of time worked may lead to errors and the potential for employees to be over/under paid. In addition, the university should establish procedures to ensure required timesheets are approved and fully document dates and times worked.

3.3 Background checks

The university only performs background checks that identify Missouri criminal records despite actively recruiting and hiring employees from other states. As a result, background checks performed may not be sufficient to

safeguard the university. The proximity of the university to the Illinois border and the likelihood of employees from at least Illinois applying for employment indicates nationwide or other state background checks would be appropriate. In addition, our audit work noted the university has hired several employees from Florida and Georgia, further indicating the need to perform out-of-state background checks. University personnel could not explain why background checks are limited to Missouri. Also during our review we noted 3 of 60 employees tested had no documentation of a background check being performed.

Performing sufficient background checks on new employees reduces exposure to potential liabilities and helps safeguard university personnel, students, and assets.

Recommendations

The Board of Regents:

3.1 Ensure employment records are maintained and complete for all employees.

3.2 Ensure university employees complete required timesheets and timesheets are reviewed and approved by supervisors prior to processing payroll.

3.3 Ensure background checks are sufficient to safeguard university personnel, students, and assets.

Auditee's Response

3.1 The university maintains payroll and personnel files for all university employees and we therefore disagree with the Auditor's comments and assessments. This issue was limited to visiting students/interns who were working on their Master's degree. They were temporary employees paid a nominal stipend amount, typically $2,000 or less. All regular full-time and part-time employee files were intact. Further, the Employment Eligibility Verification Forms GS031 under Missouri Revised Statutes Chapter 109 (Public and Business Records) Section 255 states: "I-9 Forms - This form is not part of the Employee Personnel Record and should be filed separately." The university's Human Resources practices are in alignment with the state's statutes; we maintain our I-9s separate from payroll and personnel files. New procedures have been implemented to ensure W-4 forms for temporary part-time student workers are collected and maintained separately in accordance with the Missouri statutes.

3.2 We disagree with the Auditor's comments and assessments. We have located all timesheets for all employees referenced in the finding. In 2016, the university transitioned to an electronic timekeeping system. All full- and part-time employee's timesheets are electronic and are

approved by the employee's supervisor before being processed. A new employee's time is tracked with the old punch card system before being inputted into the payroll system. Student workers are paid hourly and time is summarized on a worksheet. The individual student worker's timesheets are reviewed and signed by the supervisors. All timesheets were signed and submitted as additional evidence to the auditors.

3.3 *We do not fully agree with the Auditor's comments and assessments. The university began its research for a Human Resources Information System in 2016 to enhance our capacity for background checks and other human resources requirements. Vendors were evaluated in late 2016 through mid-2017 and Automated Data Processing (ADP) was selected in 2017 to provide the university with a new Human Resources Information System that contained the capacity for nationwide background checks.*

During the years included in this audit, the university was following State of Missouri guidelines for background checks, which only requires that employers perform a background check for the state of Missouri. The university's implementation and transition to ADP began in April 2018 and as of December 5th, 2018, the university is conducting nationwide background checks for criminal, sexual offender, education, work history, and credit history based on the position for which an applicant applies. The background check is completed through the ADP system and the results of the check are sent to the Director of Human Resources.

Auditor's Comment

3.1 Complete employment records are necessary for all employees, including temporary employees, to ensure payroll and personnel actions are appropriate and documented. Contrary to the university's response, the audit noted incomplete employment records from full-time as well as temporary employees. Also, the temporary nature of the summer and graduate assistant employment increases the risk that employment transactions may be entered incorrectly or fraudulently and not detected, making it critical that these employees' files also be maintained and complete. No matter the filing methods, all required forms should be on file.

3.2 While the auditee's response indicates timesheets were provided, the information provided did not constitute a timesheet, did not include dates and times worked, and did not include any indication of approval.

4. Disbursements

Controls and procedures over disbursements need improvement.

4.1 Credit card purchases

The university does not ensure employees follow credit card and travel policies and procedures and allows employees to continue making significant credit card purchases without supporting documentation.

University policy and credit cardholder agreements limit credit card purchases to specific uses and require employees on travel status submit supporting documentation within 10 days and all other employees submit supporting documentation within 30 days. The cardholder agreement states failure to submit required documentation can result in the amount of unsupported charges being withheld from the employee's paycheck. University officials indicated additional controls were put in place to address issues including limiting card purchases to travel only. University officials indicated that if they allowed non-travel purchases by removing some of the card restrictions, the restrictions were added back the following day. Also, they indicated employees who continually did not submit documentation would have their credit limit reduced to $1.

Despite existing and additional controls, some employees did not submit required supporting documentation for credit card purchases and the university did not always withhold amounts from their paycheck or otherwise limit use of the university credit card. If an employee does not submit supporting documentation, the university pays the credit card bills without the supporting documentation, and tracks the amount of unsupported charges as a balance due from the employee. As a result, the university is paying charges without verification that purchases are appropriate uses of university funds. We noted the following concerns:

- Ten employees left employment without resolving disapproved or unsupported credit card charges totaling almost $75,000, including one employee who left with undocumented credit card charges totaling about $65,000. Due to the lack of documentation, the university could not ensure the charges were reasonable or appropriate and did not pursue further collection after the employee left the university. The university recategorized the $75,000 in unresolved charges for the year ended June 30, 2017 as a bad debt expense at the recommendation of its external auditor.

- As of April 2018, the balance of unsupported credit card charges by current university employees from 2017 and prior years totaled approximately $66,500. We contacted 20 current employees and requested they provide the supporting documentation. In May 2018, employees provided documentation to support $22,130 of the charges.

- All employees with unsupported charges dating prior to June 30, 2017 were able to use their credit card in calendar year 2018, indicating their credit limit was not reduced as required by newly implemented procedures.

Credit card compliance

Several credit card transactions were not compliant with existing policies. We reviewed 40 credit card transactions for the 2 years ending June 30, 2017 and noted purchases at local food and other non-travel related vendors. We reviewed the remaining expenditure data and noted credit card purchases totaling about $4,700 for fiscal year 2016 and $1,800 for fiscal year 2017 at the food vendors. We also identified non-travel related expenditures totaling about $11,600 for fiscal year 2016 and $26,500 for fiscal year 2017. These other charges included gift cards, local parking, flowers, clothing, fabric, and office supplies.

The university credit card policy does not allow for the purchase of hospitality or entertainment, gift cards, personal items, or purchases that by-pass existing procurement and payment procedures. Also, a review of calendar year 2018 credit card purchases noted usage at restaurants, online retailers, and department stores indicating additional usage restrictions may not have been put on credit cards in accordance with newly implemented procedures.

Conclusion

Adequate controls should be in place to properly monitor credit card transactions to ensure accuracy, necessity, reasonableness, and compliance with university policies. Controls, including procedures to address inappropriate usage, are not effective if not consistently and routinely utilized.

4.2 Disbursements needing further review

Some university disbursements should be further evaluated to ensure they provide a clear benefit to the university. We reviewed university disbursements for the 2 fiscal years ended June 30, 2017 and identified the following purchases.

- $15,327 for membership fees and benefits to 2 private clubs for the University President
- $1,250 for a corporate sponsorship of a golf tournament
- $1,537 for various purchases of cards and flowers

Public funds should be spent only on items necessary and beneficial to the university and that enhance the education process. Taxpayers have placed a fiduciary trust in their public officials to spend university resources in a prudent and necessary manner.

Recommendations

The Board of Regents:

4.1 Ensure all credit card transactions comply with university policy including enforcing existing procedures to limit inappropriate use and pursue collection for unsupported charges.

4.2 Ensure costs incurred by the university are necessary and a prudent use of taxpayer monies and enhance and benefit the education of the students.

Auditee's Response

4.1 We agree with the Auditor's comments and began to enact procedures to address these concerns prior to the Auditor's findings. All credit card transactions are monitored daily. Credit cards are canceled if the employee is not in compliance with policies. Further, credit card purchases are limited by not only the total credit available, but by merchant code, which limits where the card can be used and for how much at specific vendors. Payroll checks are garnished for noncompliance with expenditure policy. Final payroll checks are not distributed until all credit card transactions are fully documented. While the university has determined that identified expenditures were appropriate, the university has continued to seek further documentation.

4.2 We disagree with the Auditor's comments and assessments. The Director of Purchasing and the CFO monitor all of the institution's expenses to ensure that they are necessary, prudent and to the benefit of our students. The membership to two private clubs referenced within the audit report includes the Missouri Athletic Club and the St. Louis Club. Both are used to hold alumni events, solicit donors, and to host university events and programs. At one of those events held at the St. Louis Club, the university received our largest alumni donation of $150,000. The use of the off campus clubs has been a great return on our investment. The golf tournament referenced was a fundraising event for a Historically Black College and University scholarship fund and the cards and flowers referenced were sent to the families of students who passed away, and to faculty or staff who experienced a death in their immediate family.

5. Early Childhood Development Center

The university subsidizes the William L. Clay Early Childhood Development/Parenting Education Center (ECDC) due to the program's annual operating losses. In addition, the ECDC does not sufficiently monitor outstanding balances due, enforce current policies for payment of outstanding balances, or have an updated agreement with another university for use of its facilities leading to further potential losses.

The ECDC is a state-licensed on-campus facility that serves the university and community by providing child care and learning services for children of students, university faculty and staff, and members of the community. The ECDC offers programs for infants, toddlers, and pre-kindergarten (ages 3-5 years old). Child care fees vary based on the age group and whether the children are receiving state Child Care and Development Fund subsidies. Harris-Stowe faculty, staff, and students receive a 10 percent discount. This discount is also extended to faculty and staff of other local universities.

In July 2016, the center increased its capacity from 120 to 140 children per week and attendance averaged approximately 115 children per week for the year ended June 30, 2017. According to university officials, of the children enrolled, less than half were children or grandchildren of Harris-Stowe or other local university employees or current or past students. As of June 30, 2017, the ECDC had 12 full-time employees and 13 part-time employees.

5.1 Subsidization

The university routinely subsidizes the operating costs of the ECDC. Child care fees were not increased between fiscal years 2015 and 2017, current revenue levels include some temporary and non-child care revenues, and operating costs are increasing, indicating the potential for further losses. While the ECDC increased fees by 3 percent for fiscal year 2018, staff did not perform a cost study or analysis to determine the sufficiency of this increase or other fees charged to ensure financial stability. Financial statements prepared by the university CFO indicate the ECDC incurred cumulative losses of $98,000 for the 4 years ended June 30, 2017. During that period the ECDC generated revenues of $4.3 million and incurred expenses of $4.4 million. In addition, the CFO indicated the ECDC had a loss of approximately $90,000 for the year ended June 30, 2018.

ECDC revenues for the 4 years ended June 30, 2017 included approximately $191,000 in non-child care revenues ($128,000 in limited-time grants, $46,000 in rental income, and $17,000 in donations) that may not be sustainable. In addition, in 2017, the ECDC began a summer daycare program that generated approximately $12,000 in new revenues; however, operating costs associated with the summer program were not tracked to allow a comparison of revenues to expenses to determine the program's viability.

Operating the ECDC at a deficit requires other university funds to subsidize its operations and activities while the university faces additional financial pressures (see MAR finding number 1). A cost-benefit analysis evaluating ways to make the ECDC more self-sufficient and cost effective is necessary to ensure university and program resources are maximized while meeting the needs of the university and community. The analysis should include a review of the adequacy of fees currently charged, discounts and programs offered, and ECDC operating costs.

5.2 Unpaid balances

The ECDC does not restrict attendance for families with unpaid fee balances, as required by policy. In addition, the ECDC does not proactively follow up on unpaid balances and does not have written procedures for collections, payment plans, or write-off of past due amounts. Unpaid balances due to ECDC totaled approximately $149,400 as of June 30, 2016 and increased to $224,800 as of June 30, 2017.

The ECDC offers 3 payment timeframe options including monthly, semi-monthly, and weekly. Effective January 1, 2016, ECDC policy states "If fees are not paid by the end of the month or the end of the week (depending on the payment option selected), your child will not be accepted into the program until all fees are paid. If there are outstanding fees, child-care services may be terminated."

The ECDC does not have written policies or procedures to monitor or collect outstanding past due accounts. In addition, ECDC and university staff indicated to resolve delinquent accounts, they will set up payment plans or turn over outstanding balances to the Missouri Department of Revenue for tax refund interception or to collection agencies. These procedures are not reflected in policy. We reviewed 50 account balances for both active (children currently attending) and inactive (children no longer attending) accounts as of May 2018, and noted the following:

- For 28 of the 50 accounts reviewed, children were allowed to attend while their parents or guardians had an outstanding balance due, in violation of the ECDC payment policy. In addition, as of May 2018, 23 of the 28 accounts were inactive with an outstanding balance due totaling approximately $107,400. The other 5 accounts were active and had an outstanding balance of approximately $12,600. Balances ranged from $2,020 to $3,340.

- We noted 12 of the 28 accounts had no documentation of a past due notice sent and 25 of the 28 did not have a payment plan. In addition, none of the 23 inactive accounts had been sent to a collection agency or received any additional collection efforts.

Incomplete application data contributed to the lack of follow up on old outstanding accounts. Our review noted applications completed by parents registering children into the ECDC were not always complete. As a result, the center did not have sufficient information necessary to follow up on past due accounts or attempt other collection efforts. We noted 16 of 17 delinquent accounts from fiscal year 2014, totaling about $27,130, were not turned over to a collection agency or the Missouri Department of Revenue due to missing or incorrect information recorded on the application. These accounts were written off as uncollectible in June 2017.

Written procedures should be established and followed to ensure the consistency and propriety of the collection and write-off of balances due. In addition, proper and timely monitoring of unpaid accounts is necessary to help ensure unpaid amounts are collected and proper follow-up action is taken for non-payment. Also, complete and accurate information is necessary to ensure information is available for proper account follow up and prevent potential loss of revenues.

5.3 Memorandum of understanding

The university has not updated the fees charged through a memorandum of understanding (MOU) with the Washington University School of Medicine for use of the ECDC facilities for parent education classes since 2013. The original MOU included a $200 classroom fee and an additional hourly campus security fee. The MOU estimated the total costs would be $264 per session. The university continues to charge Washington University this $264 per session rate without consideration of current security or overhead costs. University officials indicated a discussion of increasing usage fees was proposed for the 2016-2017 MOU but an agreement could not be reached. Instead, the number of classes was limited. The ECDC received $23,245 in fiscal year 2017 and $22,865 in fiscal year 2016 for use of the facility.

Clear, detailed, and updated written agreements, are necessary to ensure that the university is receiving adequate compensation for facility usage and campus security provided.

Recommendations

The Board of Regents:

5.1 Review operations of the Early Childhood Development Center to determine how the program can be operated as a self-sustaining entity.

5.2 Ensure procedures to monitor and collect unpaid accounts are established, implemented, and performed consistently. In addition, the Board ensure applications are accurate and complete to allow for appropriate follow up.

5.3 Periodically revise fees charged to ensure the university receives adequate compensation for services provided.

Auditee's Response

5.1 We agree with the Auditor's comments and have initiated steps to address them, many were in process prior to the initiation of the audit. The Early Childhood Development Center has transitioned to a new leadership structure that includes a new Dean for the College of Education as well as a new Assistant Director of the Early Childhood Development Center. The leadership team that includes the Director of the Early Childhood Development Center has

developed an innovative strategic plan (2018-2020) to ensure that it becomes a self-sustaining entity.

The Director of the Clay Center is responsible for all administrative and operational activities associated with the Center. In addition, the Director serves as the leader for the planning, implementing, and monitoring of all activities related to curriculum and instruction and compliance with licensing regulations and accreditation. The Director monitors the Center's finances and in conjunction with the Accounting Department ensures that accounts are reconciled quarterly.

The Assistant Director is charged with assisting the Center Director in ensuring that the center is operating in accordance with university, National Association for the Education of Young Children, and state licensing standards. The Assistant Director assists with developing fundraisers to support the Center's programs and works to implement strategic marketing for the Center. The Assistant Director also manages the Child and Adult Care Food Program, maintains and updates records to meet deadlines, and assists with keeping projects on schedule.

The execution of the plan is the responsibility of the Center's leadership team. Based on various aspects of the plan, the Director and Assistant Director often work cooperatively to achieve stated goals. Weekly accountability meetings are held with the Dean of the College of Education to ensure that the plan is being implemented and to provide guidance as needed.

5.2 We agree with the Auditor's comments and have initiated steps to address them, many were in process prior to the completion of the audit. A review and update to the financial policies of the Early Childhood Development Center was implemented on July 1, 2018. These updates include removal of some discounts, streamlined payment due date to the 1st of each month, implementation of a new payment processing and tracking system (Procare), working with a collection agency to collect outstanding unpaid accounts, and regular reporting and analysis of the status of enrollment and center finances.

5.3 We agree with the Auditor's comments and have initiated steps to address them, many were in process prior to the initiation of the audit. The fee structure is reviewed annually by the leadership team of the Clay Center. This involves conversations with the Accounting Department and analysis of the Center's annual operating budget. Any changes to the fee structure are then determined near the end of

the fiscal year (May) in order to be implemented in the upcoming academic year. This occurred in May 2018, with new policies and fee structure changes implemented in July 2018. The process for changes in the fee structure or any changes in the Clay Center, include a written proposal submitted to the Dean for consideration. The proposal must provide evidence of the need for changes and how the changes will impact the Clay Center. The Dean then takes the proposal under consideration, typically after a conversation with the members of the leadership team and makes a decision to approve, deny or change the proposal request. At times, proposals may require additional input from university administration before a decision is made.

In addition, the Clay Center is reviewing other opportunities to increase the revenue for the center, including additional grant opportunities, extended hours, and providing childcare services for our students and the greater community when advantageous.

6. Tuition Analysis

University officials have not conducted a recent formal analysis of the impact on enrollment due to potential tuition rate changes or charging students for all credit hours.

University officials stated in an effort to attract and retain students, and provide an affordable university education, the university did not increase tuition rates for the 4 year period ended June 30, 2017. The university raised tuition by 2.5 percent for fiscal year 2018. In addition, the university bands tuition rates for credit hours 12 to 16 and as a result does not bill students for those credit hours. According to university officials, this policy allows students to take more credit hours without paying more tuition, increasing their ability to graduate on time.

While university officials stated the tuition rates and structure were set to retain students, the university has not conducted a recent formal analysis to determine what the impact on enrollment was or would be if changes occurred. University officials produce strategic plans and present budget and tuition information to the Board periodically. Also in the past, when facing state budget withholdings, university officials conducted town hall meetings to address concerns. However, these analyses do not include a study of the relationship of tuition changes to enrollment that would further help the Board make informed tuition decisions.

As noted throughout the report, the university incurred significant annual decreases in fiscal years 2017 and 2018 state core funding resulting in budgetary restrictions while also making unsupported or unnecessary disbursements, subsidizing non-higher education operations, not safeguarding university assets, and not ensuring outstanding amounts due

were collected. Given the university's reliance on state appropriations for revenue, the university may find it necessary to consider tuition rate changes like those in fiscal year 2018, even after addressing the management issues included in this report. Recent legislation allows the university to increase tuition to offset prior year state operating support[1] reductions. A formal analysis of the impact of changes in tuition rates or structure on enrollment would allow the university to make more informed decisions on the impact on university revenues.

The following table indicates university staff estimates of potential foregone revenues due to not increasing tuition rates and having banded credit hours.

	Fiscal Year Ended June 30,				
Estimated Reduced Revenue	2014	2015	2016	2017	Total
Unchanged Tuition Rate	$ 133,120	272,657	447,886	694,475	1,548,138
Banded Credit Hours	685,011	723,381	881,502	1,133,615	3,423,509
Total	$ 818,131	996,038	1,329,388	1,828,090	4,971,647

Source: Estimates prepared by the University's CFO based on an allowable tuition increase of 2.1 percent (the amount allowed for fiscal year 2017) and the same number of full-time students each year. Estimates of banded credit hour revenue based on the actual number of unbilled credit hours and the effective tuition rate for each year.

Tuition rate increases are capped by state law. Through fiscal year 2018, the limit on the potential increase was the higher of the percentage change of the federal consumer price index (CPI) multiplied by either the university's average tuition or the average tuition of all state universities and colleges. Effective August 2018, Section 173.1003, RSMo, was amended to permit universities to increase tuition. For universities with a lower than average tuition, this amendment allows them an increase of no more than the product of the percent change in CPI times the average tuition plus a percentage of no more than 5 percent that would produce revenue no greater than the amount the state support was reduced in the prior year. The university's tuition is below the state average. University officials stated several additional factors are used when establishing tuition rates including, but not limited to, reviewing enrollment and projected revenues, the level of planned employee raises, and new initiatives or planned construction projects.

Preparing and maintaining a formal cost study would allow the university to determine the impact of tuition decisions on university operations, including enrollment, and make better informed tuition rate decisions accordingly. Cost

[1] State operating support is defined as the funding actually disbursed from state operating appropriations and does not include appropriations or disbursement for special initiatives or specific program additions or expansions.

studies should include an evaluation of the current and future financial position of the university.

Recommendation

The Board of Regents ensure a formal cost study of the impact of changes in tuition rates and credit hours billed is performed to support future tuition plans. In addition, the university should periodically review the tuition plan to ensure it adequately reflects current conditions affecting the university.

Auditee's Response

We disagree with the Auditor's comments and assessments. The university's mission is to serve first generation college students from lower socio-economic backgrounds. An overwhelming 73 percent of our students are first generation college students. A vast majority, 76 percent, receive federal financial assistance in the form of a Pell grant. Unfortunately, the state has continued to cut our appropriations, but we find it difficult to place the financial burden solely on our students, who are mainly from low income families. The language used in this finding does not consider the special needs of our students.

The university has studied the outcomes of raising tuition and lifting the banded tuition caps currently in place. Each year, the university conducts a robust tuition analysis as a part of the university wide budget committee composed of representatives of all members of the university community. Each year, the CFO presents to the Board of Regents various scenarios that include raising tuition and fees and has identified other avenues to generate revenue.

Over the years included in the audit, the university has identified that raising tuition would adversely affect our students, 76 percent of whom are Pell eligible and for whom the majority have estimated family contributions of $0. Increasing tuition for the university's students would mean they would have to borrow more money in order to obtain a degree. This would adversely affect the retention and graduation rate of our students and potentially negatively influence our default rate. The university has to be mindful of these factors as it considers raising tuition.

The banded tuition for credit hours over 12 and less than 16 is purposeful. In summer 2016, the institution became involved in Complete College America's Fifteen to Finish program. The program encourages students to enroll in 15 credit hours each semester in order to remain on track to graduate in four years. Lifting the band will negatively affect students focused on this goal. Further, there is no guarantee that by lifting the band that the university will see any increase in revenue since students might elect to enroll in just 12 hours to maintain full-time status and to ensure that their college education remains affordable and within their means. Per the Auditor's recommendations, the university will continue to undertake a formal cost

study of the impact of changes in tuition hours and credit hours billed as it considers increases to tuition as needed.

Auditor's Comment

We acknowledge the university's mission and the unique needs of its students as well as the efforts to analyze tuition. However, as noted in the finding, the efforts do not constitute a formal tuition analysis. The formalization of the analysis is necessary to ensure the university is able to demonstrate the reason for tuition decisions and that those decisions support the university's mission and meet the needs of its students.

7. Sunshine Law

The university did not always comply with the Sunshine Law. We noted the following concerns during our review of university records:

- The Board discussed several topics in closed meetings that are not allowable by state law. Our review noted this problem occurred in 8 of the 15 closed meetings held from July 2015 through March 2018. For example, closed meetings minutes indicated unallowable topics discussed included the creation of a Foundation Board, building up the university's reserves, funeral services, and marketing of the university. The Board did not maintain sufficient documentation to demonstrate how these discussions would be allowable under the law.

- The Board generally uses the same statement for each meeting notice/agenda to indicate the potential for a closed meeting, instead of citing the specific section of the law as the reason for a closed meeting. The agendas also refer to closing the meeting under Section 610.25, RSMo, which does not exist. In addition, the vote of each member approving to enter into a closed meeting is not documented as required.

- The public record request log documenting Sunshine Law requests is not complete. The log does not include the date the request was processed or if any fees were charged.

Section 610.022, RSMo, mandates the discussion topics and actions in closed meetings must be limited to only those specifically allowed by law, requires the specific reasons for closing a meeting by citation to a specific section of the Sunshine Law be announced publicly at an open meeting, and requires documentation of the roll call votes to enter closed meetings in public minutes. To ensure compliance with Sunshine Law request requirements, the university should document adequate information in its request log to demonstrate requests are completed timely and sufficiently.

Recommendations

The Board of Regents ensure items discussed in closed meetings are allowable topics under state law and adequately documented as such. In addition, the Board should note the roll call votes to enter into closed meetings

and ensure the public request log is maintained and updated timely with all necessary information to ensure compliance with the Sunshine Law.

Auditee's Response

We do not fully agree with the Auditor's comments. Going forward only allowable topics will be discussed in closed session. The Board makes every attempt to fully comply with the Missouri Sunshine Law. However, there might have been limited instances where comments were made by Board members regarding matters that were outside the scope of the original, proper reason for closing the session. In response to the State Auditor's recommendations, the university will work diligently to fully comply with all aspects of the Missouri Sunshine Law, and will designate one member of the Board to monitor compliance. Going forward, the proper statutes will be cited for closed session and proper documentation kept of roll call votes. The Sunshine Law request log has been updated to reflect the date the request was processed and no fees were ever charged.

8. University Foundation

The university subsidizes certain operating expenses of the University Foundation. In addition, the university has no formal contract or agreement with the Foundation and the University President is overseeing the Foundation because a Foundation Board of Directors has not been established.

The Harris-Stowe State University Foundation, established in 1993, is a not-for-profit 501(c)(3) tax exempt public benefit corporation and is considered a blended component unit within the university's financial statements. Its mission is to help ensure the academic development, excellence, and success of students through financial and other forms of support, thereby enhancing the mission of Harris-Stowe State University. An independent Board of Directors has not been appointed to serve the Foundation.

8.1 Subsidy and written agreement

The university subsidizes a portion of the operating costs of the Foundation and has not entered into a formal agreement with the Foundation.

The university does not receive reimbursement from the Foundation for two university paid employees performing work as the Foundation's Executive Director and an assistant or the time spent by the University President on Foundation business. The Foundation employs no other staff and has no physical office space. University officials indicated these individuals do not track the time worked on Foundation business versus university activities. Therefore, it is unclear exactly how much of their time was related to Foundation activities and should have been reimbursed by the Foundation. The Executive Director of the Foundation estimated she and the assistant spend 50 hours per month working solely on Foundation business. We divided the time worked evenly between both the employees and estimated at least $20,000 of their combined salaries should be reimbursed to the

university annually. Also, the Foundation does not reimburse the university for any use of supplies or equipment.

The university has not entered into a written agreement with the Foundation to address the financial support provided, or a requirement to reimburse the university for the employee salaries and other expenses paid on behalf of the Foundation. A formal agreement that clearly indicates the benefit to the university for this arrangement is necessary to ensure the university and Foundation are aware of their duties and responsibilities and to prevent misunderstandings.

8.2 Foundation Board

The Foundation has no Board of Directors and as a result, the University President is overseeing the Foundation. The university's Board of Regents acted as the Foundation's Board until July 2015, when the University President and Executive Director of the Foundation assumed control of the Foundation's activities. The minutes of a closed session meeting held on July 1, 2015, indicate the University President informed the Board of Regents he was working on creating a Board of Directors for the Foundation. However, as of June 2018, a Board has not been established.

A Board of Directors is necessary to ensure Foundation operations receive proper oversight, are transparent, and distinct from university operations.

Recommendations

The Board of Regents:

8.1 Discontinue the practice of subsidizing operations and activities of the Foundation or enter into a written agreement with the Foundation that documents the duties and responsibilities of both parties.

8.2 Appoint a Board of Directors to oversee Foundation activities.

Auditee's Response

8.1 We agree with the Auditor's comments and have initiated steps to address them, many of which were in process prior to the initiation of the audit. The Foundation has less than $50,000 in unrestricted funds to reimburse the university for Foundation activities. A plan has been put in place to reinforce the agreement with the university and the reestablishment of the Foundation Board of Directors. Also, the Foundation helps to increase tuition revenue obtained by the university by awarding scholarships to our students.

8.2 We agree with the Auditor's comments and have initiated steps to address them, many of which were in process prior to the initiation of the audit. Appointment of a Foundation Board has been a priority of the university. The Board of Regents has not served in any capacity as it relates to this Foundation. Once in place, the Foundation Board of Directors will direct and monitor the Foundation activities. The

Foundation has set a deadline of June 30, 2019 to have a full Board of Directors appointed and operational.

9. Accounting Controls and Procedures

Significant improvements are needed in the university's cash handling and accounting procedures.

9.1 Depositing timely and intact

Receipts are not deposited timely and intact. Collections are often deposited several days or more after receipt, allowing a significant amount of cash and checks to accumulate. We reviewed deposits made in February 2017 and March 2018. Monies collected were receipted and deposits prepared daily; however, the deposits were held for several days or weeks prior to actual deposit. Collections totaling $34,222 (including $6,952 in cash) receipted in February 2017, were deposited from 3 to 46 days later. Although the timeliness of deposits made in March 2018 improved, our review noted collections totaling $279,224 (including $8,541 in cash and one check for $249,492) were held up to 12 days prior to deposit. In addition, monies were not always deposited intact. The Bursar's office indicated personal checks can be cashed up to $25. To reduce the risk of loss, theft, or misuse of funds all receipts should be deposited timely and intact.

9.2 Receipt slips

Receipt slips are not issued for monies transmitted to the Bursar's office by the Athletic Department and the ECDC.

To establish proper accountability over transmittals and reduce the risk of loss, theft, or misuse of funds, employees should issue receipt slips for monies received from other departments and programs or develop a process to better document transmittals made.

9.3 Voided transactions

Voided system transactions do not require supervisory approval, are not periodically reviewed by an independent person or supervisor, and are not adequately documented. All employees in the Bursar's office can void transactions and there are no supervisory reviews performed of voided transactions to ensure the entries are proper. In addition, voided transactions are not referenced to replacement transaction numbers when applicable. We reviewed 32 voided transactions, totaling approximately $122,000, and found no documentation explaining why the transactions were voided or indicating any supervisory review occurred.

To ensure all voided transactions are valid and to reduce the risk of loss, theft, or misuse of funds, proper documentation should be maintained and someone independent of the receipting and recording function should review and approve these transactions.

9.4 Outstanding checks

The university has not established procedures to routinely follow up on outstanding payroll checks. At June 30, 2017, the payroll bank account had 42 checks totaling $7,414 that had been outstanding for more than a year. As of June 2018, the university has not taken any action to reissue or resolve these checks.

Proper follow-up procedures are necessary to prevent the accumulation of old outstanding checks and ensure monies are appropriately disbursed to the payee or as otherwise allowed by state law. Section 447.532, RSMo, states intangible personal property held for an owner by a state agency or department that remains unclaimed for more than 3 years is deemed abandoned and shall be turned over to the State Treasurer's Unclaimed Property Fund.

Recommendations

The Board of Regents:

9.1 Ensure monies are deposited timely and intact. In addition, the Board should discontinue the practice of cashing personal checks.

9.2 Ensure receipt slips are issued or transmittal records are signed to better document the transmittal of money between departments and establish custody of it.

9.3 Ensure adequate documentation is maintained to support all voided transactions and ensure an independent review and approval of these transactions is performed and documented.

9.4 Routinely investigate outstanding checks. Old outstanding checks should be voided and reissued to payees that can be readily located. If the payee cannot be located the amount should be disbursed in accordance with state law.

Auditee's Response

9.1 We agree with the Auditor's comments and have initiated steps to address them, many of which were in process prior to the initiation of the audit. The university will ensure that monies are deposited daily or within the next working day. In July 2018, the university's Student Account Office adopted a new on-line payment function that manages all check and credit card transactions in a real time environment. The university was in the testing stage of this new system prior to the findings being communicated in June 2018. The university will discontinue the practice of cashing personal checks at the end of the 2018 calendar year.

9.2 We agree with the Auditor's comments and have initiated steps to address them, many of which were in process prior to the initiation of the audit. The Early Childhood Center no longer accepts checks

or cash as payments, therefore no money will be transferred from the ECDC to the Student Account Office. All payments are now processed through Procare. Receipt slips are now issued to the athletic department for concession sales. The new Cashnet system agreement was signed on August 28, 2017 and fully implemented in July 2018.

9.3 We agree with the Auditor's comments and have initiated steps to address them, many of which were in process prior to the initiation of the audit. All voided transactions are reviewed and approved by an independent party. All approvals will be documented.

9.4 In July 2018, all outstanding checks were voided and reissued. The university was in the process of voiding and reissuing old outstanding checks prior to the State Auditor's findings being communicated in June 2018. All payroll checks will be investigated and other outstanding checks will be reviewed periodically.

10. Capital Assets

The university does not always follow its policies and procedures for capital assets. As a result, assets are more susceptible to theft or misuse. Per the university asset listing, the university had assets totaling approximately $84.3 million including capital assets and buildings at June 30, 2017.

University officials do not maintain a complete record of all capital assets owned by the university. In addition, the CFO indicated an annual physical inventory of university capital assets is not performed. In 2017, the university completed an inventory of only capital assets purchased with approximately $1 million of federal grant funding. Prior to 2017, the most recent inventory of capital assets occurred in 2013.

During our test work, 7 out of 10 capital assets in various locations could not be traced to capital asset records. For example, a desktop computer, microfilm scanner, and memory writer located in the library could not be traced to capital asset records.

Adequate capital asset records are necessary to better secure university property and provide a basis for determining proper insurance coverage. Board inventory management policy 5410 requires a physical count of all stock supply and equipment items at least once each year.

Recommendation

The Board of Regents ensure complete and detailed capital asset records are maintained and annual physical inventories are periodically performed and compared to the detailed records.

Auditee's Response

We agree with the Auditor's comments and have initiated steps to address them, many of which were in process prior to the initiation of the audit. A

complete annual physical inventory will be performed and compared to the detailed records. The university currently utilizes an automated inventory-management system for its networked computing assets. The system is known as a K1000 Management Appliance. This device exists in a secured, climate-controlled location in the main administration building. The system is monitored by the Assistant Vice President for IT Services and his staff. Networked assets (e.g. connected CPUs) automatically report into central IT's K1000 unless physically or logically removed. The university, however, recognizes that some technology assets exist outside the network channels and must be inventoried in a more manual way.

The VP for Business and Financial Affairs, the VP for IT Services, and the Director of Facilities Management will develop a formal protocol for identifying assets requiring an annual inventory. This protocol will be in place by July 1, 2019. Assistant directors in each area will be trained on the protocol and the inventory-management system in order to complete annual inventories no later than August 1 of each subsequent year.

As of January 2, 2019, oversight of library technology will be transferred from the Director of Library Services (in the Division of Academic Affairs) to the Division of IT Services. By March 15, 2019, all existing technology will be inventoried by central IT Services personnel under the supervision of the Assistant Vice President of IT Services. Inventory data will be presented in an Excel spreadsheet, reviewed by the Vice President of IT Services, and approved by the Vice President for Business and Finance. The March 15, 2019 inventory will serve as a basis for future, annual audits of library technology assets. As a matter of ongoing practice, inventory discrepancies will be formally documented in the IT Services division and reported to the Division of Business and Finance on an annual basis and no later than March of the given year.

Harris-Stowe State University
Organization and Statistical Information

Harris-Stowe State University, located in St. Louis, Missouri, was formed in 1954, when Harris (founded in 1857) and Stowe (founded in 1890) Teachers Colleges merged. The institution joined the state system of public higher education in 1978 and changed its name to Harris-Stowe State University in 2005.

In the fall of 2017, the university's student full-time enrollment totaled 1,253. The school employed approximately 231 full-time and 465 part-time employees as of June 30, 2017.

The university is governed by a six-member Board of Regents, appointed by the Governor, with the advice and consent of the Missouri Senate. The Board members serve 6-year terms. These individuals serve without compensation; however, they receive reimbursement for any expenses incurred in performing their duties. The Board functions as the legislative and policy-making body of the university. The Board is responsible for defining the purpose of the university, developing and adopting the mission statement, appointing the president of the university, and approving all personnel and financial dealings.

Board of Regents

Name	Term Ends
Ronald A. Norwood, Chairman	July 2020
Vanessa F. Cooksey, Vice Chair Member	July 2020
Reginald D. Dickson, Board Member (1)	July 2016
Christine A. Chadwick, Board Member (1)	July 2016
Debra A. Hollingsworth, Board Member (1)	July 2014
Deborah Price, Board Member	July 2020

(1) Terms have expired; however, the member continues to serve on a voluntary basis until a new appointment is made.

Executive Officers

The Board of Regents appoints a President to serve as the university's Chief Executive Officer. The President appoints four Vice Presidents to oversee various aspects of the university. The following schedule lists the annual compensation reported for these officials:

Name	Position	Compensation
Dr. Dwaun J. Warmack	President (1)	$ 237,786
Dr. Dwyane Smith	Provost & Vice President of Academic Affairs	133,000
Brian M. Huggins	Vice President - Financial and Administration and CFO	95,000
James D. Fogt	Vice President - Information Technology	95,107

(1) Includes $40,000 housing allowance and an $18,000 annuity.

Appendix A

Harris-Stowe State University
Statement of Revenues, Expenses, and Changes in Net Position

	Year Ended June 30,	
	2017	2016
OPERATING REVENUES		
Tuition and fees (net scholarship allowances)	$ 4,826,354	$ 4,572,854
Governmental grants and contracts	4,611,583	5,024,615
Nongovernmental grants	42,474	4,900
Auxiliary enterprises (net scholarship allowances)	5,336,012	4,351,922
Other operating revenues	834,952	860,136
Total Operating Revenues	15,651,375	14,814,427
OPERATING EXPENSES		
Salaries and wages	12,555,856	11,860,765
Fringe benefits	5,007,756	3,483,584
Supplies and other services	8,816,262	8,097,120
Utilities	1,167,145	1,282,324
Scholarships and awards	2,757,016	2,351,279
Depreciation and amortization	1,896,031	1,916,417
Total Operating Expenses	32,200,066	28,991,489
OPERATING INCOME (LOSS)	(16,548,691)	(14,177,062)
NON-OPERATING REVENUES (EXPENSES)		
State appropriations	9,485,264	10,009,807
Governmental grants and contracts	5,693,535	5,524,683
Gifts	719,906	731,378
Investment income	298,052	35,772
Interest on capital related debt	(1,426,100)	(1,470,343)
Total Non-Operating Revenues (Expenses)	14,770,657	14,831,297
CHANGE IN NET POSITION	(1,778,034)	654,235
NET POSITION, BEGINNING OF YEAR	28,029,516	27,375,281
NET POSITION, END OF YEAR	$ 26,251,482	$ 28,029,516

Source: Harris-Stowe State University audited financial statements. The foundation financial statements are included.

Harris-Stowe State University's governing Board of Regents and administration would like to thank the Office of Missouri State Auditor for the thorough efforts put forth to conduct an audit of the University's financial statements, policies, guidelines and procedures between November of 2017 and June of 2018.

With a legislated mission to serve the unmet higher educational needs of the greater St. Louis region, Harris-Stowe State University serves a large population of minority, first-generation, low income college students. With year after year increases in student enrollment, performance and graduation rates, we believe that the University is continuing to improve the lives and outcomes for many minorities and other disadvantaged individuals who might otherwise be unable to complete college at other institutions of higher learning. The University decision makers are committed to our mission to provide a quality education and college attainment for under-represented populations while working to ensure HSSU has adequate resources to achieve that mission. We are also committed to ensuring HSSU has sound, ethical, and legal governance and financial management policies to strengthen the fiscal health and wellbeing of the University as a whole.

As a state institution, the decisions of the University's Board of Regents and administration are also shaped by agreements and expectations of the Missouri Department of Higher Education, the Council on Public Higher Education (COPHE), the Missouri Governor's office, General Assembly, federal-level oversight entities, and our accrediting bodies (most notably The Higher Learning Commission). For example, fiscal decisions such as raising tuition tend to occur within a larger context in which the General Assembly, MDHE, and COPHE collectively act to determine an appropriate amount for all state institutions to increase tuition. In exchange, legislative bodies are better able to shoulder some of the student cost through increases in core appropriations (or by minimizing funding cuts). If the University acted independently to raise tuition higher than the amount recommended by these agreements to the maximum amount allowed by statute, it would destabilize these agreements. Maintaining large fund balances also creates challenges for these agreements, as the University must balance its need to invest in infrastructure and ensure its obligations to its constituents on a very limited and somewhat unpredictable budget. We feel it important to share this context as it relates to why the University expresses disagreement with several of the findings below. In areas in which we disagree, we do so respectfully and with a welcome appreciation for the perspective and input the State Auditor has provided. In sections where the University has noted it is in agreement with the State Auditor's findings, we have outlined specific policies and activities we are continuing to pursue or will initiate to remediate the issues raised. Please feel free to contact us with any questions or requests for clarification.

We requested this audit because we are committed to ensuring that the University is successful in providing a quality education to our increasingly growing and talented student body and ensuring we have sound policies and practices in place. We are appreciative of the substantive work of the Auditor's office, their professionalism and the extensive time they have invested in the

review process. We hope to serve as an example of transparency and reflective assessment for how public institutions can engage the office of the auditor to continuously improve fiscal processes and procedures.

Respectfully Submitted,

Ronald A. Norward

Chairman, Board of Regents

Office of Missouri State Auditor

Nicole Galloway, CPA

Gasconade County

Report No. 2019-009
February 2019

auditor.mo.gov

Nicole Galloway, CPA
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of Gasconade County

Sheriff's Office Reserve Fund	The former Sheriff maintained the Sheriff's Office Reserve Fund bank account outside the county treasury. The Sheriff's office did not retain documentation related to the Sheriff's Office Reserve Fund bank account. We could not ensure the disbursements made from this account were a prudent use of taxpayers dollars due to the lack of documentation and several disbursements do not appear to be proper or essential to the administration and operation of the office. In additon, the former Sheriff failed to withhold and report payroll and income taxes on payments to former deputies for time worked at the Gasconade County Fair. Timesheets were not prepared for $36,480 paid to 26 deputies and $2,500 paid to the former Sheriff from January 1, 2014, through December 31, 2016, for providing security for the Gasconade County Fair. The county may not have properly compensated some former deputies for overtime in compliance with its overtime policy and the Fair Labor Standards Act.
Ex-Officio Recorder of Deeds' Controls and Procedures	The Ex-Officio Recorder of Deeds does not account for the numerical sequence of all transaction numbers.
Public Administrator's Controls and Procedures	The Public Administrator does not always file annual settlements timely. The Public Administrator lacked adequate documentation for several gift cards purchased for wards during the year ended December 31, 2017.
Electronic Data Security	The County Assessor, County Clerk, County Treasurer, Ex-Officio Recorder of Deeds, Prosecuting Attorney, Public Administrator, and Sheriff have not established adequate password controls to reduce the risk of unauthorized access to computers and data. Security controls are not in place to lock computers in the offices of the County Assessor and Public Administrator after a specified number of incorrect logon attempts. The Public Administrator does not store data backup files at an off-site location.
Additional Comments	Because counties are managed by several separately-elected individuals, an audit finding made with respect to one office does not necessarily apply to the operations in another office. The overall rating assigned to the county is intended to reflect the performance of the county as a whole. It does not indicate the performance of any one elected official or county office.

In the areas audited, the overall performance of this entity was **Fair**.*

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

Organization and Statistical Information 11

NICOLE GALLOWAY, CPA
Missouri State Auditor

County Commission
and
Officeholders of Gasconade County

We have audited certain operations of Gasconade County in fulfillment of our duties under Section 29.230, RSMo. In addition, Daniel Jones & Associates, Certified Public Accountants, was engaged to audit the financial statements of Gasconade County for the 2 years ended December 31, 2017. The scope of our audit included, but was not necessarily limited to, the year ended December 31, 2017. The objectives of our audit were to:

1. Evaluate the county's internal controls over significant management and financial functions.

2. Evaluate the county's compliance with certain legal provisions.

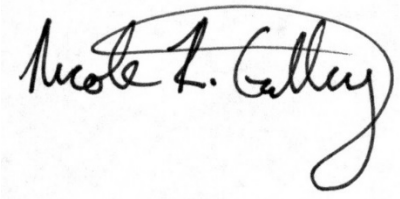
3. Evaluate the economy and efficiency of certain management practices and procedures, including certain financial transactions.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the county, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of applicable contract, grant agreement, or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the county's management and was not subjected to the procedures applied in our audit of the county.

For the areas audited, we identified (1) deficiencies in internal controls, (2) noncompliance with legal provisions, and (3) the need for improvement in management practices and procedures. The accompanying Management Advisory Report presents our findings arising from our audit of Gasconade County.



Nicole R. Galloway, CPA
State Auditor

The following auditors participated in the preparation of this report:

Director of Audits:	Randall Gordon, M.Acct., CPA, CGAP
Audit Manager:	Wayne T. Kauffman, MBA, CPA, CGAP
In-Charge Auditor:	David T. Olson
Audit Staff:	Morgan Alexander
	Troy Tallman, CFE
	Joseph T. Magoffin

1. Sheriff's Office Reserve Fund

Controls and procedures over a bank account maintained by the former Sheriff outside the county treasury were not adequate. The former Sheriff deposited $66,115 into this account and disbursed $71,469 from this account during the 3 years ended December 31, 2016. The account was closed during December 2016.

1.1 Bank account

The former Sheriff maintained the Sheriff's Office Reserve Fund bank account outside the county treasury. According to the former Sheriff and bank records obtained, money deposited into this fund included:

Receipts by Type	Amount
Gasconade County fair security	$ 39,720
Prisoner transport	13,789
Donations, fundraisers, and miscellaneous	7,786
Law enforcement services for the City of Bland	2,500
Sex offender compliance	1,680
Partition sale commissions	640
Total	$ 66,115

The former Sheriff indicated he maintained this account to ensure the monies received were used for the benefit of the Sheriff's office.

There is no statutory authority allowing the Sheriff to maintain this account outside the county treasury. Section 50.370, RSMo, requires every county official who receives any fees or other remuneration for official services to pay such monies to the County Treasurer. In addition, Attorney General's Opinion 45-1992 (April 23, 1992) states sheriffs are not authorized to maintain a bank account for law enforcement purposes separate from the county treasury.

1.2 Disbursements

The Sheriff's office did not retain documentation related to the Sheriff's office Reserve Fund bank account. A budget was not prepared for this account and disbursements were not processed through the normal county disbursement process. Payments and withdrawals totaling $71,469 were made from January 1, 2014, through December 31, 2016. The former Sheriff indicated the records were left in the Sheriff's office upon leaving office at the end of his term in December 2016. The current Sheriff indicated the records could not be located. The final bank statement for this account was sent to the home of the former Office Manager instead of to the Sheriff's office. This statement was mailed in January 2017, after the current Sheriff took office. The former Sheriff indicated he did not know why that statement was not mailed to the Sheriff's office. The current Sheriff indicated he became aware of the existence of the account upon taking office in January 2017. We could not ensure the disbursements made from this account were a prudent use of taxpayer dollars due to the lack of documentation other than check images obtained from the bank, interviews with the former Sheriff, and discussions

with select vendors. Several disbursements do not appear to be proper or essential to the administration and operation of the Sheriff's office.

- A cash withdrawal of $4,550 closed the account in December 2016. The former Sheriff indicated he used this money to pay for a Christmas and retirement party and to provide bonuses to the deputies. The cost of the party totaled $1,050. We could not determine if the remaining $3,500 was provided as bonuses. Providing bonuses conflicts with Article III, Section 39 of the Missouri Constitution.

- A payment of $786 to a gun and pawn shop for a limited edition replica pistol based on the revolver used by the Wyatt Earp character in the movie *Tombstone*. The former Sheriff indicated he did not purchase the item and did not know the item was purchased. The current Sheriff indicated he has not seen this pistol and it is not in the office's inventory.

- Donations totaling $1,693 to various charitable causes. Providing donations conflicts with Article VI, Sections 23 and 25 of the Missouri Constitution.

- Payments totaling $6,275 to the former Chief Deputy. The former Sheriff indicated these payments were for purchasing and installing electrical equipment on patrol vehicles.

- Payments totaling $4,326 to local restaurants and grocery stores. The former Sheriff indicated these payments were for food at meetings and lunches with deputies.

- Payments totaling $360 to the former Sheriff and $340 to the former Office Manager. The former Sheriff indicated these payments were to reimburse himself and the former Office Manager for office related expenses.

- Purchases totaling $1,237 from Walmart and $268 from a local convenience store.

- Payments totaling (1) $439 for advertisements at local events and in newspapers, (2) $460 for a local golf tournament, and (3) $287 for memberships in various organizations.

- Payments totaling $303 for flowers and awards and $202 in license renewal fees.

Record retention is necessary to ensure the validity of transactions and provide an audit trail. Section 109.270, RSMo, indicates all records made or received by officials in the course of their public duties are public property

and are not to be disposed of except as provided by law. Taxpayers have placed a fiduciary trust in the county to spend public funds in a necessary and prudent manner. Expending monies outside the county's normal budgeting and disbursement process increases the risk of misuse or unnecessary purchases occurring. Providing bonuses conflicts with Article III, Section 39 of the Missouri Constitution, which prohibits granting any extra compensation, fee, or allowance to employees for services already rendered. Article VI, Sections 23 and 25 of the Missouri Constitution, prohibits the granting of public funds to benefit private individuals. To ensure the validity and propriety of disbursements, adequate supporting documentation should be obtained for all vendor payments.

1.3 Timesheets

Timesheets were not prepared for $36,480 paid to 26 deputies and $2,500 paid to the former Sheriff from January 1, 2014, through December 31, 2016, for providing security for the Gasconade County Fair. Payments to these individuals were handled through the Sheriff's Office Reserve Fund bank account and not through the county's normal payroll process. As a result, the county could not substantiate compliance with Fair Labor Standards Act (FLSA) requirements for these employees. The current Sheriff indicated he now uses timesheets to track time worked and uses the standard payroll process to compensate deputies for time spent providing security for the Gasconade County Fair.

Detailed timesheets would document hours actually worked and provide information necessary to monitor tasks performed, and are beneficial in demonstrating compliance with the FLSA requirements.

1.4 Overtime, payroll reporting, and withholdings

The county may not have properly compensated some former deputies for overtime in compliance with its overtime policy and the FLSA. In addition, the former Sheriff failed to withhold and report payroll and income taxes on payments to former deputies for time worked at the Gasconade County Fair.

To ensure all employee compensation, including overtime, is properly calculated, reported and taxed, all compensation should be paid through the normal county payroll process. The failure to properly report and tax all wages could result in penalty and interest charges assessed against the county. Strict compliance with personnel policies and the FLSA is necessary to ensure employees are treated fairly and are properly compensated.

Recommendations

The County Commission and the Sheriff:

1.1 Ensure the Sheriff does not maintain a bank account outside the county treasury and ensure all monies are disbursed to the County Treasurer timely.

1.2 Ensure disbursement records are properly retained. Additionally, ensure all disbursements are reasonable, necessary, and a prudent use

of public funds. Discontinue granting public funds to private organizations and paying bonuses to employees.

1.3 Continue to require all Sheriff's employees to prepare complete and accurate timesheets.

1.4 Ensure all employee compensation is paid through the county's normal payroll process, properly taxed, and reported to the Internal Revenue Service. In addition, ensure all time worked is used in overtime calculations.

Auditee's Response

The County Commission provided the following response:

We agree and the recommendations have been implemented with the new Sheriff taking office in 2017.

The Sheriff provided the following response:

I agree and have implemented the recommendations. Since taking office, I have not operated the office in this manner.

2. Ex-Officio Recorder of Deeds' Controls and Procedures

Controls and procedures in the office of the Ex-Officio Recorder of Deeds need improvement. The office collected approximately $155,000 for recording documents such as marriage licenses, deeds, and other miscellaneous receipts during the year ended December 31, 2017.

The Ex-Officio Recorder of Deeds does not account for the numerical sequence of all transaction numbers. The Ex-Officio Recorder of Deeds and office staff can void and delete transaction numbers. We noted 2 missing transaction numbers during our review of 9 deposits selected for review and the related daily transaction reports. We expanded our review to include all transaction numbers issued during the year ended December 31, 2017, and we could not account for approximately 3,100 of 5,200 transactions numbers. For example, transaction number 29,593 was followed by transaction number 30,595, resulting in a gap of more than 1,000 transaction numbers that could not be accounted for. The Ex-Officio Recorder of Deeds and software vendor both indicated any large gaps in transaction numbers were due to software glitches. A documented review of deleted transaction numbers is not performed by the Ex-Officio Recorder of Deeds.

Failure to implement adequate receipting and depositing procedures increases the risk that loss, theft, or misuse of monies could occur and go undetected.

Recommendation

The Ex-Officio Recorder of Deeds perform a documented review of accounting records and account for the numerical sequence of all transaction numbers.

Auditee's Response

I agree with the recommendation and am working on implementing the recommendation.

3. Public Administrator's Controls and Procedures

Controls and procedures in the Public Administrator's office need improvement. The Public Administrator is the court-appointed personal representative for wards or decedent estates of the Circuit Court, Probate Division, and was responsible for the financial activity of 28 individuals as of December 31, 2017.

3.1 Annual settlements

The Public Administrator does not always file annual settlements timely. During our review of 10 active cases, we found 6 cases did not have annual settlements filed timely. These 6 settlements were filed from 23 to 96 days after the due date. The Public Administrator records the due dates for the annual settlements in her case management software. In addition, the Circuit Court, Probate Division Clerk sends a notice to the Public Administrator when the annual settlement is 2 weeks past due. Despite these procedures, annual settlements have been filed late.

Sections 473.540 and 475.270, RSMo, require the Public Administrator to file an annual settlement with the court for each ward or estate. Timely filing of annual settlements is necessary for the court to properly oversee the administration of cases and reduce the possibility that errors, loss, theft, or misuse of funds will go undetected.

A similar condition was noted in our prior audit report.

3.2 Disbursements

The Public Administrator lacked adequate documentation for several gift cards purchased for wards during the year ended December 31, 2017. A receipt or other documentation was not obtained indicating wards received gift cards totaling $205.

To ensure payments are valid and proper and to reduce the risk of loss, theft, or misuse of ward assets, adequate supporting documentation should be maintained for all disbursements, including monies or other items of value provided to a ward.

Recommendations

The Public Administrator:

3.1 File annual settlements timely.

3.2 Obtain and retain documentation for monies or other items of value provided to wards.

Auditee's Response

3.1 I will continue to make every effort to file timely settlements. The process involving the 30 day deadline can be challenging.

3.2 I agree and have implemented the recommendation.

4. Electronic Data Security

Controls over county computers are not sufficient. As a result, county records are not adequately protected and are susceptible to unauthorized access or loss of data.

4.1 Passwords

The County Assessor, County Clerk, County Treasurer, Ex-Officio Recorder of Deeds, Prosecuting Attorney, Public Administrator, and Sheriff have not established adequate password controls to reduce the risk of unauthorized access to computers and data. The employees in these offices are not required to change passwords periodically. In addition, employees' passwords in the offices of the Prosecuting Attorney and Public Administrator are shared and not kept confidential. Also, passwords for employees in the offices of the County Assessor, County Collector, County Treasurer, Ex-Officio Recorder of Deeds, and Public Administrator are not required to have a minimum number of characters.

Passwords are required to authenticate access to computers. The security of computer passwords is dependent upon keeping them confidential. However, since passwords in certain offices are not required to be kept confidential and periodically changed, or to contain a minimum number of characters, there is less assurance they are effectively limiting access to computers and data files to only those individuals who need access to perform their job responsibilities. Passwords should be confidential, changed periodically, and contain a minimum number of characters to reduce the risk of a compromised password and unauthorized access to and use of computers and data.

4.2 Security controls

Security controls are not in place to lock computers in the offices of the County Assessor and Public Administrator after a specified number of incorrect logon attempts. In addition, the Public Administrator does not disable the user accounts of employees who no longer work in the office.

Logon attempt controls lock the capability to access a computer after a specified number of consecutive unsuccessful logon attempts and are necessary to prevent unauthorized individuals from continually attempting to logon to a computer by guessing passwords. Without effective security controls and effective procedures to remove user access, there is an increased risk of unauthorized access to computers and the unauthorized use, modification, or destruction of data including confidential data and other sensitive resources.

4.3 Data backups

The Public Administrator does not store data backup files at an off-site location. In addition, backup files are not tested periodically in the offices of the County Clerk, County Treasurer, Ex-Officio Recorder of Deeds, and Public Administrator.

To help prevent loss of information and ensure essential information and computer systems can be recovered, computer data should be stored off-site and tested on a periodic basis.

Recommendations

The County Commission work with other county officials to:

4.1 Require each employee to have a confidential password with a minimum number of characters that is periodically changed.

4.2 Require each county computer to have security controls in place to lock it after a specified number of incorrect logon attempts and ensure user accounts of former employees are promptly disabled.

4.3 Ensure backed-up computer data is stored in a secure off-site location and tested on a regular basis.

Auditee's Response

We agree and will work with county officials to implement these recommendations.

Gasconade County
Organization and Statistical Information

Gasconade County is a county-organized, third-class county. The county seat is Hermann.

Gasconade County's government is composed of a three-member county commission and separate elected officials performing various tasks. All elected officials serve 4-year terms. The county commission has mainly administrative duties in setting tax levies, appropriating county funds, appointing board members and trustees of special services, accounting for county property, maintaining county roads and bridges, and performing miscellaneous duties not handled by other county officials. Principal functions of these other officials relate to law enforcement, property assessment, property tax collections, conduct of elections, and maintenance of financial and other records important to the county's citizens. In addition to elected officials, the county employed 35 full-time employees and 9 part-time employees on December 31, 2017.

In addition, county operations include the Senate Bill 40 Board and the Community Mental Health Services Board.

Elected Officials

The elected officials and their compensation paid for the year ended December 31 (except as noted) are indicated below:

Officeholder	2018	2017
Larry Miskel, Presiding Commissioner	$	29,390
Jim Holland, Associate Commissioner		27,390
Jerry D. Lairmore, Associate Commissioner		27,390
Pamela R. Greunke, Circuit Clerk and Ex Officio Recorder of Deeds (1)		
Lesa Lietzow, County Clerk		41,500
Mary E. Weston, Prosecuting Attorney		51,000
John Romanus, Sheriff		46,000
Michael Feagan, County Treasurer		41,500
Benjamin D. Grosse, County Coroner		14,000
Fay Owsley, Public Administrator		25,000
Shawn Schlottach, County Collector (2), year ended February 28,	56,493	
Joseph M. Mundwiller, County Assessor, year ended August 31,		41,500
Vincent Klott, County Surveyor (3)		

(1) Compensation is paid by the state.
(2) Includes $14,993 of commissions earned for collecting city property taxes.
(3) Compensation on a fee basis.

Financing Arrangement

The county entered into a line of credit with People's Savings Bank on September 14, 2017, to provide funding for replacing the courthouse roof.

The original line of credit was $488,000. The line of credit is renewed annually and is planned to be paid off in 2022. Construction was completed in 2018. The remaining principal outstanding at December 31, 2017, was $488,000. The loan payments are anticipated to be paid from the General Revenue Fund.

Unemployment Insurance System Data Security

Report No. 2019-008
February 2019

auditor.mo.gov

Nicole Galloway, CPA
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the DOLIR Unemployment Insurance System Data Security

User Account Management

Department of Labor and Industrial Relations (DOLIR) management has not fully established controls for the maintenance of user accounts for accessing the UInteract system. Established controls (1) disable a user account when the account has not been accessed for 120 days and (2) limit access to system administrative functions to computers attached to the state's internal network. However, the quarterly review process used by the DOLIR to detect and remove terminated user accounts did not effectively identify all accounts belonging to users not employed by the DOLIR. DOLIR management could reduce the risk of unauthorized access by increasing efforts to identify user accounts assigned to former employees and by providing periodic reminders to agency security coordinators of the importance of promptly removing user access assigned to former employees. Without effective procedures to remove access, terminated employees could continue to have access to critical or sensitive resources or have opportunities to sabotage or otherwise impair entity operations or assets.

In the areas audited, the overall performance of this entity was **Good**.*

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

Management Advisory Report - State Auditor's Finding
- User Account Management 8

NICOLE GALLOWAY, CPA
Missouri State Auditor

Honorable Michael L. Parson, Governor
and
Anna S. Hui, Director
Department of Labor and Industrial Relations
Jefferson City, Missouri

We have audited certain internal controls, including security controls, designed to protect data and information maintained by the Department of Labor and Industrial Relations, Division of Employment Security, Unemployment Insurance system. This audit was conducted in fulfillment of our duties under Chapter 29, RSMo. The objectives of our audit were to:

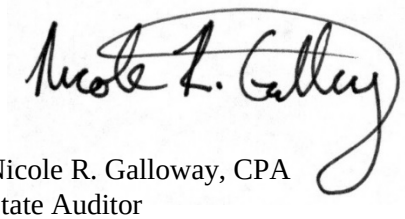
1. Evaluate the system's internal controls over significant management and financial functions, including the security and privacy controls designed to ensure the confidentiality, integrity, and availability of data and information maintained in the Unemployment Insurance system.

2. Evaluate compliance with certain legal provisions.

3. Evaluate the economy and efficiency of certain management practices and information system control activities.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

For the areas audited, we identified (1) deficiencies in internal controls, (2) no significant noncompliance with legal provisions, and (3) no significant deficiencies in management practices and information system control activities. The accompanying Management Advisory Report presents our finding arising from our audit of Unemployment Insurance System Data Security.



Nicole R. Galloway, CPA
State Auditor

The following auditors participated in the preparation of this report:

Director of Audits:	Jon Halwes, CPA, CGFM
Audit Manager:	Jeffrey Thelen, CPA, CISA
In-Charge Auditor:	Patrick M. Pullins, M.Acct., CISA
Audit Staff:	Kristin A. Clink, MBA

Unemployment Insurance System Data Security Introduction

Background

The Missouri Unemployment Insurance (UI) program was created by state statute to provide for the well-being of citizens. State law indicates "Economic insecurity due to unemployment is a serious menace to health, morals, and welfare of the people of this state resulting in a public calamity.[1]" The UI program is administered by the Department of Labor and Industrial Relations (DOLIR), Division of Employment Security (DES), through a federal-state partnership that was founded upon federal law but implemented through state law. In Missouri, the program is funded solely through tax contributions paid by employers, so no deductions are made from employees' paychecks for this insurance. The tax rate paid by each employer is determined by the DES, taking into account the employer's industry, claim history (how many workers have filed for UI benefits), and other adjustments allowed by state law. Taxes are due on only a portion of the wages paid to an employee (the base wage), with the base wage being subject to change based on a formula in state law.[2] In 2018, the base wage was $12,500.

Employees who lose their jobs through no fault of their own or quit for good cause related to the work or employer are eligible to file for unemployment benefits (including employees laid off from their jobs). Additionally, employees must meet certain rules regarding minimum earned wages and time frame of their employment. Employees may receive a maximum of $320 per week in benefits.

The DES utilizes a computer system known as UInteract to administer its UI responsibilities. This system, implemented in November 2016, was acquired from a vendor to replace multiple legacy computer systems that had supported the program for more than 40 years. The contractor completed the initial contract in March 2018; including providing, implementing, and trouble-shooting the system; and subsequently entered into an ongoing contract for continued maintenance of the system.

The UInteract system is web-based and accessible by claimants (employees) looking to file a claim, by employers for reporting and remitting UI taxes, and by state and private sector officials for administering the program and providing assistance to claimants searching for new jobs.

The Government Accountability Office (GAO) has included the security of information systems, including the protection of Personally Identifiable Information (PII), in the office's High-Risk List since 1997.[3] Technological

[1] Section 288.020.1, RSMo.

[2] Section 288.036.2, RSMo. The 2019 base wage decreased to $12,000.

[3] Report GAO-17-317 *Report to Congressional Committees, High Risk Series: Progress on Many High-Risk Areas, While Substantial Efforts Needed on Others,* February 2017, is available at <http://www.gao.gov/assets/690/682765.pdf>, accessed December 4, 2018.

advances, such as lower data storage costs and increasing interconnectivity, have allowed both government and private sector agencies to collect and process extensive amounts of PII more effectively. Risks to PII can originate from unintentional and intentional threats. These risks include insider threats from careless, disgruntled, or improperly trained employees and contractors; the ease of obtaining and using hacking tools; and the emergence of more destructive attacks and data thefts.

Technology advances, combined with the increasing sophistication of individuals or groups with malicious intent, have increased the risk of PII being compromised and exposed. Correspondingly, the number of reported security incidents involving PII in both the private and public sectors has increased dramatically in recent years. At the same time, state agencies are increasingly reliant on technology and information sharing to interact with citizens and to deliver essential services. As a result, the need to protect information, including PII, against cybersecurity attacks is increasingly important.

According to accepted standards, security controls are the management, operational, and technical safeguards or countermeasures prescribed for an information system to protect the confidentiality, integrity, and availability of the system and its information. Confidentiality refers to preserving authorized restrictions on information access and disclosure, including the means for protecting personal privacy and proprietary information. Integrity relates to guarding against improper information modification or destruction, and availability ensures timely and reliable access to and use of information. Effective privacy controls depend on the safeguards employed within the information system that is processing, storing, and transmitting PII and the environment in which the system operates. Organizations cannot have effective privacy without a basic foundation of information security. Without proper safeguards and controls, information systems and confidential data are vulnerable to individuals with malicious intentions who can use access to obtain sensitive data or disrupt operations.

The National Institute of Standards and Technology (NIST) defines cybersecurity as the process of protecting information by preventing, detecting, and responding to attacks[4] while ISACA states cybersecurity encompasses all that protects enterprises and individuals from intentional attacks, breaches, and incidents as well as the consequences.[5] Cybersecurity should be aligned with all other aspects of information security, including

[4] National Institute of Standards and Technology, *Framework for Improving Critical Infrastructure Cybersecurity*, Version 1.1, April 2018, is available at <https://nvlpubs.nist.gov/nistpubs/CSWP/NIST.CSWP.04162018.pdf >, page 45, accessed December 4, 2018.

[5] ISACA, *Transforming Cybersecurity*, 2013, page 11.

governance, management, and assurance. The state of being secure requires maintenance and continuous improvement to meet the needs of stakeholders and the demands of emerging cyber threats.

System conversion and reporting issues

During November 2016, the state implemented a new computer system to support the operations of the DES Unemployment Insurance program. The new system, UInteract, was acquired from a contractor that modified a system previously deployed in other states to meet Missouri's requirements. DOLIR management opted to "cutover" from the legacy system to the new system, without running the two systems concurrently for a period of time in an effort to minimize the risks of data being out-of-synch between the two systems and to reduce the time necessary to complete the conversion. Approximately 2.8 billion records, were converted to the new system from the legacy system.[6]

During the UInteract design and programming phases, DOLIR management elected to custom develop reporting tools rather than utilize the vendor's optional reporting tools. However, these internally-developed reporting tools were not functional when the new system was implemented. Also, at the time of system implementation, certain control functions, such as the capability to reconcile bank account activity or to accurately determine the Maximum Benefit Amount (MBA) allowed to a claimant, were not working correctly in the new system.

During the conversion process, not all of the 2.8 billion records transferred accurately from the legacy system to the new system. DOLIR staff indicated these records were mostly older records previously entered into the legacy system's database without certain controls to ensure data was accurate and met system expectations. For example, if the legacy system accepted a value of "2" for a date in the month of February, but the new system expected "02," the record may not have been processed correctly in the new system.[7] According to DOLIR staff, the new system set these records aside until they could be modified and processed correctly.

As a result of these system implementation issues, the DES could not produce accurate Unemployment Insurance program financial and federal reports from the UInteract system for fiscal year 2017. The State Auditor's Office (SAO) fiscal year 2017 *Statewide Single Audit*[8] and *Comprehensive Annual*

[6] Records converted included several types of benefit file records, such as claims management and payments, and several types of tax file records, such as employer data and wage records.

[7] The example provided is for illustrative purposes only and does not represent the actual issues encountered in the data migration and conversion process.

[8] SAO Report No. 2018-016, *State of Missouri Single Audit, Year Ended June 30, 2017*, issued in March 2018.

Financial Report[9] audit included nine audit findings related to the Unemployment Insurance program and system implementation. Seven of the nine findings were related to system implementation, including five findings related to the new system's reporting capabilities or controls and two related to functions suspended during the conversion. The remaining two issues were for internal controls not directly related to the UInteract system conversion. DOLIR officials agreed with the substance of all findings and implemented corrective actions.

Corrective action

During fiscal year 2018, including during the process of completing the fiscal year 2017 audits, DOLIR officials took actions to remedy the issues identified by the SAO. The DOLIR submitted a Corrective Action Plan for each finding to the Missouri Office of Administration for submission to relevant oversight bodies, including the U.S. Department of Labor (DOL). In September 2018, the DOL issued a Final Determination letter to the state communicating the corrective actions taken were adequate to correct the findings identified during the fiscal year 2017 audits.

During this audit, we reviewed current processes and internal controls in place related to the UInteract system, including items such as risk assessment and security planning. We determined the underlying issues that caused the fiscal year 2017 findings have been corrected. Accordingly, we do not include any discussion of these issues in the Management Advisory Report section of this audit report.

Scope and Methodology

The scope of our audit included evaluating (1) DOLIR management's approach to and management of the UInteract system, including information security, privacy, and other relevant internal controls, (2) policies and procedures, and (3) other management functions and compliance issues in place during the period January 2016 to December 2018.

Our methodology included reviewing written policies and procedures, and interviewing various DOLIR personnel. We obtained an understanding of the applicable controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We tested certain of those controls to obtain evidence regarding the effectiveness of their design and operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violation of contract or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide

[9] State of Missouri, *Missouri Comprehensive Annual Financial Report For The Fiscal Year Ended June 30, 2017*, issued in January 2018, is available at <https://oa.mo.gov/sites/default/files/CAFR%202017.pdf>, accessed December 4, 2018.

reasonable assurance of detecting instances of noncompliance significant to those provisions.

We obtained data files from the UInteract system for user accounts with access to the system as of August 2018. In addition, we obtained employment records of all state employees from July 2000 to September 2018 from the statewide accounting system for human resources (SAM II). We matched these records to determine if any terminated employees had active UInteract accounts. We provided DOLIR officials a list of all terminated employees we found who had active access to the UInteract system. Although we used computer-processed data from the UInteract and SAM II systems for our audit work, we did not rely on the results of any processes performed by these systems in arriving at our conclusions. Our conclusions were based on our review of the issues specific to the audit objectives.

We based our evaluation on accepted state, federal, and international standards and best practices related to information technology security and privacy controls from the following sources:

- Missouri Adaptive Enterprise Architecture (MAEA)
- National Institute of Standards and Technology (NIST)
- U. S. Government Accountability Office (GAO)
- ISACA

User Account Management

Department of Labor and Industrial Relations (DOLIR) management has not fully established controls for the maintenance of user accounts for accessing the UInteract system. Active accounts assigned to terminated users are not always removed timely. As of August 31, 2018, 1,097 accounts were assigned to users employed by the state and federal government or partner agencies, such as local job placement agencies.

The UInteract system disables a user account when the account has not been accessed for 120 days, according to DOLIR staff. In addition, system administrative functions can only be accessed from computers attached to the state's internal network. While these controls help to reduce risk, we found the UInteract system is vulnerable to the risk of unauthorized or inappropriate activity because 52 user accounts of terminated state employees were not disabled timely. This total included 2 users not employed by the DOLIR who left employment for another position in state government. These 2 users could maintain UInteract system access as long as they had continued access to the state computer network and logged in at least once every 120 days.

A terminated user is someone who has left employment and no longer needs access to the system. These 52 users had access to the UInteract system as of August 31, 2018, even though the users had terminated employment prior to August 1, 2018. DOLIR staff detected and removed the access for 44 of these users prior to auditors notifying DOLIR management of this issue.

However, the quarterly review process used by the DOLIR to detect and remove terminated user accounts did not effectively identify all accounts belonging to users not employed by the DOLIR. The remaining 8 users (including the 2 users mentioned above) whose system access had not been detected and removed by DOLIR staff were employed by other state agencies. According to the state human resources system (SAM II), these users left their jobs between April 2017 and July 2018. However, they still had active accounts as of August 31, 2018.

DOLIR management could reduce the risk of unauthorized access by increasing efforts to identify user accounts assigned to former employees and by providing periodic reminders to agency security coordinators of the importance of promptly removing user access assigned to former employees.

According to the Missouri Adaptive Enterprise Architecture (MAEA),[10] agencies must have a procedure in place for the timely notification of

[10] The Enterprise Architecture includes standards, policies, and guidelines established by Office of Administration management. The Enterprise Architecture is made up of several information technology domains, including domains dedicated to security and information. The domains define the principles needed to help ensure the appropriate level of protection for the state's information and technology assets.

administrators when a user no longer needs access. Agencies are responsible for determining which of their employees are given access to the system and for ensuring all individuals who have access still need the access. Although agencies are responsible for notifying the DOLIR to remove user access rights, DOLIR management is ultimately responsible for security of the UInteract system.

Without effective procedures to remove access, terminated employees could continue to have access to critical or sensitive resources or have opportunities to sabotage or otherwise impair entity operations or assets, according to the Government Accountability Office (GAO).

Recommendation

The DOLIR continue to improve the reviews of user accounts to ensure access of terminated or transferred employees is removed timely. In addition, the DOLIR should provide periodic reminders to other agency security coordinators of the importance of promptly requesting the removal of user access assigned to former employees.

Auditee's Response

The DOLIR agrees with the recommendation. Our planned correction actions include:

1. *Receiving a monthly list from the DOLIR Human Resources section that contains all department employees who have left employment during the month. UInteract access will be removed for individuals who are no longer employed by the DOLIR on a monthly basis.*

2. *Creating a formal UInteract System Access form that contains language reminding the requesting agency it must notify the Division of Employment Security, within 30 days, if a user no longer requires access to the UInteract system.*

3. *Sending bimonthly reminders to other agencies' security coordinators of the importance of promptly requesting the removal of user access assigned to staff who no longer require UInteract access.*

Office of Missouri State Auditor

Nicole Galloway, CPA

City of Hamilton

Report No. 2019-007
February 2019

auditor.mo.gov

Nicole Galloway, CPA
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the City of Hamilton

Street Maintenance and Restricted Street Funds	The Board of Aldermen has not developed a formal maintenance plan to adequately maintain and repair city streets, as streets are currently in various states of disrepair.
Disbursements	The Board does not adequately monitor its activities for conflicts of interest. Competitive bids were not solicited for 2 separate construction projects performed by Alderman Trosper's company and public notice was not given as required by state law. Personal financial disclosure forms filed by the Mayor with the Missouri Ethics Commission were inaccurate due to not reporting amounts paid to his wife, and Alderman Trosper did not file his personal financial disclosure form for 2017. The Board did not ensure an affidavit of compliance certifying prevailing wages were paid on the sidewalk construction project was filed timely by Alderman Trosper's company for the project performed for the city during fiscal year 2017. Several city employees perform tasks related to multiple city functions, but the city has no documentation to justify the allocation of salaries and fringe benefit expenses to various funds. Numerous payments by cashier's check were made to the contractor on the swimming pool renovation project instead of a city check. In addition, these transactions did not go through the normal disbursement process. The Board does not require invoices to be marked paid or otherwise canceled.
Utility Controls and Procedures	The city's utility billings were not consistent with city ordinances pertaining to outside city limits connections. The Board has violated bond covenants for its water system bonds by transferring surplus water revenues to the General Fund since at least 2012. City personnel allowed some customers to avoid utility shut off by entering into promise to pay agreements without the Board's approval. Controls over adjustments posted to customer utility accounts need improvement. A listing of refundable customer water deposits held in the Water Fund is not prepared and the city does not maintain records of the deposit amounts being held in the Water Fund. City officials have not metered the treatment plant and do not perform monthly reconciliations of total gallons of water billed to gallons of water pumped.
Accounting Controls and Procedures	The Board has not adequately segregated accounting duties or ensured documented supervisory or independent reviews of work performed by city personnel are performed. The city's procedures for receipting and depositing are poor.
Sunshine Law	The Board did not comply with state law regarding closed meetings. Open meeting minutes did not document the specific reasons or section of law allowing the meetings to be closed for any of the 16 closed meetings held between July 1, 2016, and June 13, 2018. Some issues discussed in closed meetings were not allowable under the Sunshine Law. The Park Board failed to prepared minutes for 4 of the 8 open meetings held during the year ended June 30, 2018.

Electronic Data Security	The City Administrator and City Clerk share the user identification and password for a shared computer used for issuing receipt slips from the accounting system. Security controls are not in place to lock computers after a certain period of inactivity.
Budgeting Practices	City budgets do not include all statutorily required elements and the Park Fund was deficit budgeted in 2019.
City Library	Property taxes received by the city for the library are not distributed timely to the Library Board and the library's annual report for the year ended June 30, 2017 was not filed timely with the city.

In the areas audited, the overall performance of this entity was Fair.*

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

NICOLE GALLOWAY, CPA
Missouri State Auditor

To the Honorable Mayor
and
Members of the Board of Aldermen
City of Hamilton, Missouri

The State Auditor was petitioned under Section 29.230, RSMo, to audit the City of Hamilton. We have audited certain operations of the city in fulfillment of our duties. The city engaged Conrad and Higgins, LLC, Certified Public Accountants, to audit the city's financial statements for the year ended June 30, 2017. To minimize duplication of effort, we reviewed the CPA firm's audit report. The scope of our audit included, but was not necessarily limited to, the year ended June 30, 2017. The objectives of our audit were to:

1. Evaluate the city's internal controls over significant management and financial functions.

2. Evaluate the city's compliance with certain legal provisions.

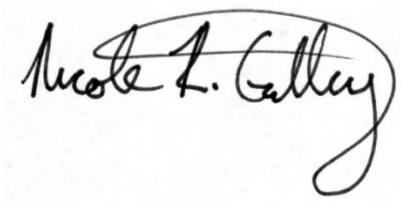
3. Evaluate the economy and efficiency of certain management practices and procedures, including certain financial transactions.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the city, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of applicable contract, grant agreement, or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the city's management and its audited financial report and was not subjected to the procedures applied in our audit of the city.

For the areas audited, we identified (1) deficiencies in internal controls, (2) noncompliance with legal provisions, and (3) the need for improvement in management practices and procedures. The accompanying Management Advisory Report presents our findings arising from our audit of the City of Hamilton.



Nicole R. Galloway, CPA
State Auditor

The following auditors participated in the preparation of this report:

Director of Audits:	Randall Gordon, M.Acct., CPA, CGAP
Audit Manager:	Todd M. Schuler, CPA
In-Charge Auditor:	Tessa Rusatsi, CPA
Audit Staff:	Amanda G. Flanigan, MAcc

1. Street Maintenance Plan

The Board of Aldermen has not developed a formal maintenance plan to adequately maintain and repair city streets. During the 3 years ending June 30, 2018, the city had receipts of $964,795 in the Street Fund. The cash balance for the fund as of June 30, 2018, was $718,025, with $368,060 representing the remaining balance of the proceeds from a lease purchase agreement entered into by the city to pay for a street project completed in the summer of 2018.

City streets are in poor condition but a formal maintenance plan for fixing streets utilizing the dedicated street revenues received by the city has not been developed. In addition to the motor-vehicle related revenues received from the state, the city also receives the proceeds of two 1/2-cent sales taxes restricted for streets. The first sales tax was passed in 1993 and has no expiration and can be used for any street related expenditure, such as street department personnel costs, maintenance, lighting, or snow removal. The second sales tax was passed in 2011 and was in effect until March 2017. A renewal of this tax was approved in 2016 and is in effect until March 2027. This sales tax can be used for capital improvement of streets, but cannot be used to pay for personnel costs of the street department.

We observed city streets in various states of disrepair, noting numerous potholes, cracking and crumbling pavement, and several areas where water pooled during heavy rains. A sidewalk project completed during fiscal year 2017, and other street projects completed prior to that were focused on the business district. The city hired an engineering firm in 2016 to help determine the scope of work for a project recently completed on primarily residential streets. However, the city has not prepared a formal maintenance plan to determine the estimated costs and the extent of work needed on all streets. The street improvements completed in August 2018 were predominately funded through a lease purchase agreement with a local bank for $386,000, that requires monthly payments of $6,972 through July 2023. City officials indicated additional street improvements will be made annually in the next few years, but the specific improvements have not been determined.

A formal maintenance plan should be prepared in conjunction with the annual budget and include a description of the streets needing maintenance, the type of work to be performed, an estimate of the quantity and cost of materials needed, the dates such work could begin, the amount of labor required to perform the work, and other relevant information. The plan should be included in the budget message and approved by the Board. In addition, a public hearing should be held to obtain input from city residents. Also, a long-term maintenance plan, including plans for the next 3 to 5 years, would benefit the city.

Recommendation

The Board of Aldermen establish a formal annual maintenance plan, in conjunction with a comprehensive long-term plan, for repairing and maintaining city streets that efficiently uses available resources. In addition,

the Board should hold a public hearing to discuss streets improvements needed, along with potential methods of financing such improvements.

Auditee's Response

The Board recognizes although there is no statutory requirement for a long-term street maintenance plan having such a plan is a valuable management tool. The Board has in the past in public Board meetings reviewed the street projects for the year and permitted public input. However, the Board commits to preparing and adopting a 5-year street maintenance plan by the end of 2019. The Board further commits to holding one or more public hearings prior to adoption of the plan.

City staff have issued a Request for Qualifications to engineer firms to prepare a 5-year plan. Currently, the Board does not know whether the cost for hiring an engineering firm for such a project is feasible. In the meantime, the Street Superintendent has been requested to review the condition of all streets and make a report to the Board.

Once the street plan is adopted, the Board commits to a comprehensive review of all funding options, including, submitting a bond issue to the voters to determine the voter support for a major street project.

2. Disbursements

Controls and procedures over city disbursements need improvement.

2.1 Conflicts of interest and personal financial disclosures

The Board does not adequately monitor its activities for conflicts of interest. The city paid $14,872 to Alderman Trosper's landscape services company for 2 separate construction projects during the year ended June 30, 2017, without properly soliciting bids as required by state law. The personal financial disclosure form was not properly completed by the Mayor and one Alderman did not complete a personal financial disclosure form during the year ended June 30, 2017.

Conflicts of interest

Competitive bids were not solicited for 2 separate construction projects performed by Alderman Trosper's company and public notice was not given as required by state law.

Alderman Trosper's company was selected to perform work on a storm drain project in February 2017. City personnel indicated bids for this project were solicited by telephone, but no documentation was maintained of the proposals received. The company was paid $5,100 for the work on this project.

The Board also contracted with Alderman Trosper's company to complete a sidewalk replacement project in April 2017. A handwritten note submitted to the current City Administrator by the Public Works Supervisor dated April 12, 2017, indicated 2 contractors were contacted, but only one bid was received. However, no documentation could be provided to us of this bid. The current City Administrator indicated the bid was a verbal bid from Alderman

Trosper and was not in writing. The supervisor was informed in a written note that 1 bid was not sufficient and to attempt to get additional bids. Eventually, 2 written bids were received for the project. One bid, dated April 20, 2017, was submitted by Alderman Trosper's company, and another bid dated April 27, 2017, was submitted from a different company. The bid of $9,900 by Alderman Trosper's company was the lowest bid, and the firm was paid $9,772 after the invoice was adjusted by the city for city materials used on the project.

A complaint was filed with the Missouri Ethics Commission (MEC) regarding these transactions and the MEC issued a findings of fact and conclusions of law regarding Alderman Trosper on June 6, 2018. The MEC found that Alderman Trosper violated Sections 105.458.1 and 105.458.2, RSMo, and a fine of $14,872 was ordered. The fine would be reduced to $1,500 if the fine was paid within 45 days which was done by Alderman Trosper.

Board members serve in a fiduciary capacity and have an obligation to the public to avoid the appearance of impropriety. Personal interests in business matters of the city could create actual or the appearance of conflicts of interest, and a lack of independence could harm public confidence in the Board and reduce its effectiveness. Sections 105.454 and 105.458, RSMo, prohibit financial transactions between the city and elected officials that involve more than $500 per transaction or $5,000 per annum, unless there has been public notice to solicit proposals and competitive bidding, provided the bid or offer accepted is the lowest received.

Personal financial disclosures

Personal financial disclosure forms filed by the Mayor with the MEC were inaccurate due to not reporting amounts paid to his wife, and Alderman Trosper did not file his personal financial disclosure form for 2017. Per city ordinance number 1650, financial disclosure statements are required to be filed with the city and MEC by Board members (or candidates for office) and certain municipal officials in accordance with state law. Personal financial disclosure statements (forms) filings with the MEC are required by Section 105.483, RSMo. The forms require disclosure of any transactions of more than $500 between the city and the filer and/or family. However, the Mayor did not report a $722 payment to his wife in 2016 and 8 payments to his wife, ranging from $550 to $625, during 2017 related to a cleaning contract with the city. A complaint was filed with the MEC regarding these transactions and the MEC issued a findings of fact and conclusions of law regarding the Mayor on January 11, 2019. The MEC found that the Mayor violated Sections 105.458.2 and 105.458.4, RSMo, and a fine of $1,000 was ordered. The fine would be reduced to $100 if the fine is paid within 45 days.

Alderman Trosper did not file a personal financial disclosure form for 2017, that was due by May 1, 2018. This form would have required disclosure of the payments made to him by the city for the contract labor performed during 2017.

The Board's conflict of interest and financial disclosure policy and Sections 105.483 and 105.485.4(1)(a), RSMo, requires Board members and certain city employees to file financial disclosure statements to disclose any transaction in excess of $500 during the year between the city and such person, or any person related to such person within the first degree of consanguinity or affinity.

2.2 Prevailing wages

The Board did not ensure an affidavit of compliance certifying prevailing wages were paid on the sidewalk construction project was filed timely by Alderman Trosper's company for the project performed for the city during fiscal year 2017. State law requires this affidavit be filed by any contractor on a public works project prior to final payment being made by the public body. Work on the sidewalk was completed in June 2017, and final payment was made on June 28, 2017. A sunshine law request was made on November 28, 2017, by a citizen to obtain this affidavit. The Board required Alderman Trosper complete the affidavit and submit it after the sunshine request was received. The affidavit stating compliance with prevailing wages for the sidewalk project was signed, notarized, and submitted to the city on December 5, 2017.

Section 290.290.2, RSMo, requires "each contractor and subcontractor shall file with the contracting public body upon completion of the public work and prior to final payment therefor an affidavit stating that he had fully complied with the provisions and requirements of this chapter, and no public body shall be authorized to make final payment until such affidavit is filed therewith in proper form and order."

2.3 Allocations

Several city employees perform tasks related to multiple city functions, but the city has no documentation to justify the allocation of salaries and fringe benefit expenses to various funds. Public works employees perform various tasks such as street repairs, water meter readings, and sewer line maintenance and the City Administrator performs various administration functions that benefit each of these funds. During the year ended June 30, 2017, the city paid payroll and fringe benefits for the public works employees and the City Administrator from the following funds:

Fund	Amount
Sewer	$ 48,439
Water	44,469
Street	31,661
Total	$ 124,569

Allocations were made for the same employees in fiscal year 2018 but were calculated by charging the salary of the highest paid employee to the Water Fund, next highest paid employee to the Street Fund, and the lowest paid employee to the Sewer Fund. A part-time employee's salary was evenly split

between the 3 funds. The City Administrator estimated how much of her salary should be allocated to each of the 3 funds.

We identified other disbursements where a portion of the cost was either allocated to the Street Fund or paid entirely from the Street Fund without adequate documentation. Lawn care service costs totaling $21,852 during the 3 years ended June 30, 2018, were charged entirely to the Street Fund, and $4,500 of the $7,150 cost of the city's independent audit for the year ended June 30, 2017, was charged to the Street Fund with no explanation. In addition, $1,112 of the cost to repair the city's brush hog (mower) was allocated to the Street Fund with no explanation.

The proper allocation of expenses is necessary for the Board to accurately determine the results of operations of specific activities, thus enabling the Board to establish the level of taxation and/or user charges necessary to meet all operating costs. To ensure restricted funds are used for intended purposes, the allocation of expenditures to city funds should be based on specific criteria, such as the number of hours worked by each employee, if possible, or by determining a reasonable basis to allocate costs for employees. Allocating disbursements to the Street Fund that are unrelated to maintenance of the streets and unallowable reduces the funds available for maintaining the streets.

2.4 Cashier's checks

Numerous payments by cashier's check were made to the contractor on the swimming pool renovation project instead of a city check. In addition, these transactions did not go through the normal disbursement process, were not included on the reports provided to the Board, and it is unclear whether the Board was aware of these payments.

The pool bond bank account was not set up to issue checks by the prior City Administrator. When invoices were submitted by the contractor or architect, the City Clerk would go to the bank to purchase cashier's checks from the pool bond bank account to make the payment. Of the $399,018 spent on the project, $369,036 was paid using cashier's checks. When the current City Administrator was hired she stopped this practice and changed the account to allow checks to be issued. The final payments to the contractor and the architect, totaling $29,982, were made by city checks. Two signatures were used on the cashier's checks and included the City Clerk's signature, and either the signature of the Mayor, Billing Clerk, or the City Administrator. The cashier's checks ranged from $832 to $95,610. The proceeds of the bond issue and the payments made by cashier's checks were not included in the city's accounting system or the budget to actual documents reviewed by city personnel.

Making payments by cashier's checks does not allow the normal checks and balances to be applied to the payment process. In addition, to ensure accounting records are complete and accurate and all payments made by the

city are accounted for properly, all receipts and disbursements of city funds should be recorded in the accounting system.

2.5 Canceling invoices

The Board does not require invoices to be marked paid or otherwise canceled. Canceling invoices and other supporting documentation reduces the likelihood of duplicate payments and reduces the risk of loss, theft, or misuse.

Recommendations

The Board of Aldermen:

2.1 Refrain from entering into business transactions with related parties unless such services or transactions are properly bid in accordance with state law. In addition, financial disclosure statements should be accurately completed and filed by all Board members and city officials.

2.2 Ensure appropriate documentation is submitted in compliance with the prevailing wage law.

2.3 Ensure payroll costs are properly allocated to the applicable city funds and allocations are supported by adequate documentation.

2.4 Continue to ensure all payments made for city expenditures are done through the normal disbursement process and the receipt and disbursement of all city funds are included in the city's accounting system.

2.5 Ensure invoices are marked paid to prevent duplicate payments.

Auditee's Response

2.1 Conflicts of interest

The Board has adopted a new policy requiring all bids be publicly noticed on the city's website. This will eliminate the possible issue when a Board Member or other city official desires to submit a bid. The Board also now requires written documentation on smaller bids, which may be solicited by telephone.

In each case mentioned by the auditors, the Board did accept the low bid and did follow its local bidding ordinance requirements. The Board commits to requiring documentation on any bids awarded to a public official showing the Board has complied with Sections 105.454 and 105.458, RSMo.

Personal financial disclosures

The Board recognizes the importance of having its elected officials comply with the personal financial disclosure requirements. The

Board commits to have the City Clerk, at least 30 days prior to the filing deadline, check that all required filings have been made. In addition, the Board will have the City Administrator meet with city officials each year to review the requirements so that inadvertent errors in the filings are not made. The Board also notes, in the case of the Mayor, amended filings were made to correct the reported errors.

2.2 The Board commits to use the Missouri Department of Labor and Industrial Relations, Division of Labor Standards, public works checklist on all projects to make sure all documents are timely obtained. The incident mentioned was a technical violation and was not a case of failure to properly pay prevailing wages. Additionally, the state law is now changed to no longer require prevailing wages on projects under $75,000.

2.3 The Board commits to provide better documentation on the allocation of costs. As the auditor is aware with a very small group of employees who do numerous jobs for the city, the allocation of such work, without requiring excessive non-productive time being expended to determine the proper allocation, is difficult.

2.4 City staff no longer follow the practice of using cashier's checks for payments. The Board commits to not using cashier's checks for payments of invoices in the future. The Board notes the auditor did not find any improper expenditure of funds but only found the payment process should be changed.

2.5 The Board commits to institute procedures for all invoices to be marked paid or canceled once payment has been made.

3. Utility Controls and Procedures

Utility controls and procedures need improvement. The city collected approximately $1 million in utility revenues during the year ended June 30, 2017.

3.1 Billing calculations

The city's utility billings were not consistent with city ordinances pertaining to outside city limits connections. The sewer rate charged to customers outside city limits was less than the rate set by city ordinance. In July 2016, the city increased sewer rates for customers both inside and outside the city limits, but city personnel indicated they failed to increase the sewer rate for 8 of the 9 customers outside the city limits. This error was identified by city personnel and fixed in September 2016. However, in January 2017, the Board again increased the sewer rate for outside the city limits. Test work performed on outside city limit customers for April 2017 indicated city personnel again failed to update the rate for 8 of the 9 customers outside the city limits. This error was identified and corrected by the city in June 2017. Additionally, in a review of 36 utility billings mailed in May 2017, 2 customers outside the city

limits were inappropriately charged city sales tax. Per city ordinance number 1476, only customers inside the city limits are to be charged sales tax.

Utility rates should be charged in accordance with city ordinance to ensure utility customers are treated fairly and equitably.

3.2 PILOT fee

The Board has violated bond covenants for its water system bonds by transferring surplus water revenues to the General Fund since at least 2012. The city transferred $36,547 and $34,995 of water revenues to the General Fund in the years ended June 30, 2017, and 2018, respectively. The transfers were not a reimbursement of specific expenses or costs paid by the General Fund related to providing water service, but instead a payment in lieu of taxes (PILOT) based on 6 percent of the water total user charges, per city ordinance number 1205. The city has made these transfers for many years using the same percentage. Because these transfers represent a consistent revenue source for the General Fund, it is important for the Board to periodically re-evaluate their impact, not only on the General Fund budget, but also on water rates.

Article VI, Section 602 (g) of the 2017 bond agreement, Article VI, Section 602 (e) of the 2013A bond agreement, and Article VI, Section 602 (e) of the 2012 bond agreement prohibit the transfer of any surplus revenue for any purpose other than a system related expense and paying off the bond itself. In addition, the 2012 bond agreement states "So long as any of the Bonds remain Outstanding, no moneys derived from the operation of the System shall be diverted to general governmental or municipal functions." Failure to follow the bond covenants could result in the bondholders taking action to call the bonds.

3.3 Promise to pay

City personnel allowed some customers to avoid utility shut off by entering into promise to pay agreements without the Board's approval. The City Clerk indicated that a memo is saved to the customer's utility account documenting the reason for an extension. City personnel do not review these agreements to ensure they are enforced and their use is not approved by the Board. The Board does not have a policy or ordinance addressing the use of promise to pay agreements.

To ensure the city applies consistent procedures for past due accounts, the Board should review the use and necessity of promise to pay agreements and consider discontinuing the practice or develop an ordinance or formal policy about the use of such agreements.

3.4 Adjustments

Controls over adjustments posted to customer utility accounts need improvement. Adjustments are sometimes needed to change a customer account balance, including waiving a penalty fee or reducing a balance due to water leaks. The City Clerk is not required to obtain independent approval for adjustments posted to the utility account prior to making the change. We

noted adjustments totaling $991 for the March and April 2017 customer billings that were not independently reviewed and approved. Because the City Clerk also prepares billings and receives and posts payments to customer's utility accounts, the ability to make adjustments without proper oversight increases the risk of loss, theft, or misuse of funds.

To ensure adjustments to utility accounts are valid and approved, adjustment transactions should be approved before they are made and the posted adjustments should later be compared to the list of approved adjustments.

3.5 Customer water deposits

A listing of refundable customer water deposits held in the Water Fund is not prepared and the city does not maintain records of the deposit amounts being held in the Water Fund. As a result, a listing of deposits is not reconciled to deposits being held.

Effective October 2015, the customer water deposit for residential properties is $150 for property owners and $300 for renters. For commercial properties, the deposit is based upon twice the estimated amount of 30 days services requested for new users, and can be adjusted to twice the actual average monthly usage as necessary. The city currently has approximately 840 water accounts. The deposit amount held for each customer is documented in his/her individual account record in the system.

Refundable customer water deposits are restricted funds held for customers. To ensure all deposits received from customers are accounted for properly, the Board should determine the deposit amounts being held in the Water Fund, require an accurate list of deposits held by the city be prepared monthly, and reconcile the list to the record of deposits held in the Water Fund monthly. In addition, performing such reconciliations provides the city assurance the Water Fund account balance is sufficient to cover customer deposit liabilities and ensure the deposits are not used for water operations.

3.6 Water usage reconciliations

City officials have not metered the treatment plant and do not perform monthly reconciliations of total gallons of water billed to gallons of water pumped. We requested information from the city to attempt to perform such a reconciliation, but sufficient information was not available to perform the calculation.

Monthly reconciliations of gallons of water billed to gallons of water pumped are necessary to help detect significant water loss or other problems and ensure all water use is properly billed.

Recommendations

The Board of Aldermen:

3.1 Ensure utility rates are billed in accordance with city ordinance.

3.2 Ensure any future payments from water revenues to the General Fund represent reimbursement of actual costs of operating the water system.

3.3 Review the use and necessity of promise to pay agreements and consider discontinuing the practice or develop an ordinance or formal policy about the use of such agreements.

3.4 Ensure all adjustments are properly approved and compared to actual changes posted to the computer system.

3.5 Determine the amount of customer deposits held in the Water Fund bank account and develop procedures to track the balance of those funds. Ensure a list of customer deposits is prepared and reconciled to the balance of deposits held monthly and differences are promptly investigated.

3.6 Ensure all water use is properly metered, gallons of water pumped is reconciled to gallons billed monthly, and significant differences are promptly investigated.

Auditee's Response

3.1 The Board commits to carefully check all users to be sure that any rate increases are properly made and rates charged are in accordance with ordinances.

3.2 The Board has charged a 6 percent fee to recover costs of other city funds from the water department. The Board recognizes it should have used a more detailed method of computing such costs instead of estimating such costs at 6 percent. The Board commits at least annually to review and document the actual costs to the General Fund, Street Fund, or other funds of the city for the water department, and will only recover those documented costs from the restricted funds.

3.3 The city's promise to pay procedure was used to prevent utility cutoffs to customers and assist customers in avoiding disconnection and reconnection fees. The Board recognizes the need for a formal policy for such procedure to guide its employees as to when a customer is eligible for the program. The Board commits to adopt a formal policy on this program and will have a list of any such agreements reviewed by the Board at least quarterly.

3.4 The Board agrees better controls should be in place. The Board commits to require all adjustments be approved by both the City Clerk and the City Administrator prior to being made. In addition, the Board commits to have the Mayor or a Board Member, at least

monthly, compare the posted adjustments with the list of approved adjustments.

3.5 The Board now realizes the software system does provide a separate accounting of customer deposits. However, the Board commits to have a separate bank account for all deposits so the Mayor and Board can easily determine the amount of these restricted funds. In addition, the Board commits to have the City Clerk and City Administrator, on alternating months, reconcile the funds in the deposit account with the records of customer deposits.

3.6 The Board has already included in the next phase of its long-term water project the installation of a water meter at the water plant. The water the city purchases from the Public Water Supply District is currently metered. The Board will ensure a reconciliation of gallons purchased to gallons sold is performed monthly and will investigate any significant differences identified.

4. Accounting Controls and Procedures

Accounting controls and procedures need improvement. During the year ended June 30, 2017, city receipts totaled approximately $2.5 million for all funds. Of this amount, approximately $1.95 million was handled and processed by employees at City Hall. The other monies were directly deposited into the city's bank accounts.

4.1 Segregation of duties

The Board has not adequately segregated accounting duties or ensured documented supervisory or independent reviews of work performed by city personnel are performed. The City Clerk is responsible for receipting, recording, and depositing monies, along with writing checks and performing bank reconciliations. Reviews of the detailed accounting and bank records are not performed by other city personnel or Board members.

Proper segregation of duties helps ensure all transactions are accounted for properly and assets are adequately safeguarded. If proper segregation of duties cannot be achieved, documented independent or supervisory reviews of accounting and bank records should be performed.

4.2 Receipting and depositing

The city's procedures for receipting and depositing are poor. As a result, there is no assurance all monies collected are properly receipted or deposited.

- City personnel do not always receipt payments received by check to the accounting system timely and checks are not always restrictively endorsed immediately upon receipt. During our cash count performed on April 5, 2018, we identified 4 checks, totaling $183, that had not been receipted to the accounting system and had not been restrictively endorsed at the time of the count.

- Deposits are not always made timely. During March 2017, one deposit, totaling $16,596, contained receipts held up to 5 business days before being deposited. Six other deposits, ranging from $4,000 to $11,000, contained receipts held for 2 to 3 business days before deposit.

- City personnel do not account for the numerical sequence of receipt slips issued by the city's computerized receipting system.

- The composition of receipt slips issued is not reconciled to the composition of deposits by an independent person.

Failure to implement adequate receipting and depositing procedures increases the risk that loss, theft, or misuse of monies will go undetected.

Recommendations

The Board of Aldermen:

4.1 Segregate the accounting duties of the city personnel. If proper segregation cannot be achieved, ensure documented independent or supervisory reviews of detailed accounting and bank records are performed.

4.2 Ensure checks are receipted and restrictively endorsed immediately upon receipt and receipts are deposited timely. In addition, the Board should account for the numerical sequence of transaction numbers, and ensure the composition of receipts is reconciled to the composition of deposits by an independent person.

Auditee's Response

4.1 A full segregation of duties is impossible with the City Clerk and City Administrator as the only employees responsible for receipts and deposits and expenditures. The Board agrees some independent review would be beneficial. The Board commits by the end of 2019 to have a Board member or an outside accountant review the detailed accounting and bank records on a monthly basis.

4.2 City staff have implemented a new procedure to promptly receipt to the accounting system all monies received. Restrictive endorsements are applied to the checks when receipted.

The Board has implemented a procedure to require all funds be deposited within no more than 1 business day of receipt.

The Board commits to account for the numerical sequence of receipt slips issued by the accounting system.

The Board commits to require the composition of all deposits be reconciled with the composition of receipt slips by a person other than the person creating the deposits.

5. Sunshine Law

The Board and Park Board procedures for complying with the Sunshine Law need improvement.

5.1 Closed meetings

The Board did not comply with state law regarding closed meetings.

Reasons for closing meetings

Open meeting minutes did not document the specific reasons or section of law allowing the meetings to be closed for any of the 16 closed meetings held between July 1, 2016, and June 13, 2018. In addition, most meeting notices and agendas included a statement that a closed meeting would be held, in the event the Board wanted to enter closed session, and the statement generally included the same list of potential discussion matters.

Section 610.022, RSMo, of the Sunshine Law, requires public bodies announce the specific reasons allowed by law for going into a closed session and to enter the vote and reason into the minutes. The section also limits discussion topics and actions in closed meetings to only those specifically announced prior to closure.

Allowable topics

Some issues discussed in closed meetings were not allowable under the Sunshine Law. For example, closed meeting minutes indicated the Board discussed utility connections outside city limits on November 9, 2016, and April 12, 2017, in a closed meeting. In addition, the Board also discussed the acceptance of a donation of property to the city on April 12, 2017, in a closed meeting.

Section 610.021, RSMo, provides that the discussion topics and actions in closed meetings should be limited to only those specifically allowed by law.

5.2 Park Board meetings

The Park Board failed to prepared minutes for 4 of the 8 open meetings held during the year ended June 30, 2018. The Park Board did not maintain meeting minutes from July 2016 to December 2016 and it is unclear if any meetings were held during that period.

Section 610.020, RSMo, requires meeting minutes be maintained as a record of business conducted and to provide an official record of actions and decisions.

Recommendations

The Board of Aldermen:

5.1 Ensure specific reasons for closing a meeting are documented in the open minutes and ensure only topics allowed by state law are discussed in closed Board meetings.

5.2 Work with the Park Board to ensure minutes are prepared and retained for all meetings.

Auditee's Response

5.1 The Board respectfully denies that it does not comply with the Sunshine Law. The agendas list the basis for the Board to go into closed meetings and if a closed meeting is to be held the reasons for the meeting are included in the motion to close the meeting. The Board commits to have the motions for closed meetings to include only those statutory reasons for which the meeting will be held and not include statutory reasons that are inapplicable.

The Board has not discussed topics not allowable by law. The issue on utility connections dealt with legal matters and involved discussions between the Board and its legal counsel. The issue on property involved a proposed sale to the city, which is a permitted topic. It appears the minutes may not have fully documented the permitted topics. The Board commits to ensuring the minutes clearly and fully document the topics discussed.

5.2 The Board commits to monitoring the Park Board to ensure if meetings are held minutes will be prepared and filed with the City Clerk.

Auditor's Comment

5.1 While the reasons for the closed meetings may be discussed verbally by the Board when making motions to close a meeting, the specific reason for the closure has not been documented in the open minutes as required by state law.

6. Electronic Data Security

The Board has not established sufficient controls to reduce the risk of unauthorized access to computer systems and electronic data. As a result, city records are not adequately protected and are susceptible to unauthorized access or loss of data.

6.1 User identifications and passwords

The City Administrator and City Clerk share the user identification and password for a shared computer used for issuing receipt slips from the accounting system. While each has access to the receipt function on assigned work computers, which have unique user identification and passwords, receipting is typically done on the shared computer since that computer is the only one with the capability to print prenumbered receipt slips.

While a user identification and password are required to authenticate access, the security of these logon credentials is dependent upon keeping them confidential. Allowing certain users to share logon credentials increases the risk of unauthorized access and/or changes to the system and records and does not provide assurance access is limited to only those individuals who need access to perform their job responsibilities. User identifications should be

unique to each person and passwords should be confidential and changed periodically to reduce the risk of a compromised password and unauthorized access to and use of computers and data.

6.2 Security controls

Security controls are not in place to lock computers after a certain period of inactivity. Inactivity controls are necessary to reduce the risk of unauthorized individuals accessing an unattended computer and having potentially unrestricted access to programs and data files. Without effective security controls, there is an increased risk of unauthorized access to systems and unauthorized use, modification, or destruction of data.

Recommendations

The Board of Aldermen:

6.1 Require unique user identifications for each computer and require passwords remain confidential and be changed periodically.

6.2 Implement security controls to lock computers after a certain period of inactivity.

Auditee's Response

6.1 Because of restrictions on the computer used for issuing receipts the Board does not view the limited sharing of a password for that computer as a significant security risk. However, the Board commits to check with its software vendor to determine if unique passwords for that computer are possible.

6.2 The Board commits to check with its vendor to determine if time sensitive lockouts can be added to restrict access to programs and data files.

7. Budgeting Practices

City budgets do not include all statutorily required elements and the Park Fund was deficit budgeted in 2019.

The 2018 budget did not include the actual beginning and estimated ending cash balances for each fund and information regarding the city's indebtedness. The 2019 budget listed actual beginning and estimated ending cash balances for each fund, but still did not include information on indebtedness. While the General Fund has provided funding to the Park Fund totaling $68,000 during 2017 and 2018, the Park Fund continues to have negative year end cash balances. The Board budgeted a $10,000 transfer from the General Fund in 2019, but the estimated ending cash balance at June 30, 2019, for the Park Fund was ($37,861).

Section 67.010, RSMo, requires the budget to present a complete and accurate financial plan for the ensuing budget year, outlines the various information to be included in the budget, and prohibits deficit budgeting. A complete and well-planned budget, in addition to meeting statutory requirements, can serve

as a useful management tool by establishing specific financial expectations for each area of city operations. It also assists in setting tax levies and informing the public about city operations and current finances.

Recommendation

The Board of Aldermen prepare accurate annual budgets that contain all information required by state law and discontinue approving deficit budgets.

Auditee's Response

The Board commits to adding the items noted to its annual budget and will discontinue approving deficit budgets in the future.

8. City Library

Property taxes received by the city for the library are not distributed timely to the Library Board and the library's annual report was not timely filed with the city.

City library property tax receipts are held in the custody of both the city and the Library Board. The city receives the library's property tax distribution from the Caldwell County Collector monthly but only distributes the money to the Library Board twice a year. As of May 1, 2018, the city was holding $36,830 due to the library. This money should be disbursed to the Library Board monthly, in accordance with state law. The Library Board maintains its own bank accounts and approves and pays bills associated with operating the library.

In addition, state law requires the librarian file an annual report with the Library Board stating the condition of the library and its services, all amounts received and from what sources, and the amount of money spent and for what purpose. This report is to be filed with the Board of Aldermen and the State Library. The report for the year ending June 30, 2017 was not filed with the city as required. After we discussed this issue with city officials, they received the fiscal year 2017 report from the Library Board.

Section 182.200, RSMo, provides all monies received by the city for a city library shall be disbursed to the Library Board Treasurer at least monthly. In addition, Section 182.210, RSMo, states the librarian, within 8 weeks after the close of the fiscal year, shall make an annual report stating the condition of the library and its services on the last day of the fiscal year, the various sums of money received from the library fund and from other sources, and how the moneys have been expended and for what purposes. This report shall be submitted to the governing body of the city.

Recommendation

The Board of Aldermen ensure all monies received for the library are disbursed monthly and the annual report is filed with the city as required.

Auditee's Response

The Board has already implemented a policy to disburse library tax monies received to the Library Fund on a monthly basis.

The Board commits to requiring the City Librarian to file the report timely with the City Clerk.

Auditee's Overall Response

The city appreciates that the auditor's findings did not find any fraud, embezzlement, or other similar loss of funds. Additionally, almost all of the findings are to assist the City of Hamilton Board of Aldermen and city staff in improving its operations and controls, which the Board is committed to implement within a reasonable time.

City of Hamilton
Organization and Statistical Information

The City of Hamilton is located in Caldwell County. The city was incorporated in 1868 and is currently a fourth-class city. The city employed 11 full-time and 3 part-time employees on June 30, 2017.

City operations include utilities (water, sewer and trash), law enforcement services, street maintenance, and recreational facilities (parks and pool).

Mayor and Board of Aldermen

The city government consists of a mayor and 4-member board of aldermen. The members are elected for 2-year terms. The mayor is elected for a 2-year term, presides over the board of aldermen, and votes only in the case of a tie. The Mayor and Board of Aldermen, at June 30, 2017, are identified below. The Mayor is paid $450 per month, and Board of Aldermen members $150 per month. The compensation of these officials is established by ordinance.

Winford Gilliam, Mayor
Travis Trosper, Alderman (1)
Cameron Fast, Alderman
Danny Alexander, Alderman
Sherria Kavanaugh, Alderwoman (2)

(1) Travis Trosper resigned in October 2018 and Misty Doan was appointed to this position in November 2018.

(2) Replaced by Keith Gilbert who was elected in April 2018.

Other Principal Officials

The City Administrator and City Clerk are appointed positions. The city's principal officials at June 30, 2017, are identified below:

Jean Van Iperen, City Administrator
Debra Davis, City Clerk (1)
Robert Cowherd, City Attorney
April Locke, Police Chief

(1) Debra Davis resigned in October 2018 and was replaced by Crystal Dorrel in November 2018.

Financial Activity

Appendix A and B present a summary of the city's financial activity for the year ended June 30, 2017. We obtained this information from the city's audited financial statements.

Appendix A

City of Hamilton, Missouri
Combined Statement of Revenues, Expenditures and Changes in Net Position
All Government Fund Types
For the Year Ended June 30, 2017

	Governmental Fund Types			Totals Primary Government
	General Fund	Special Revenue Fund	Debt Service Fund	(Memorandum Only)
Revenues:				
Property taxes	$ 134,676	$ 40,625	$ 66,069	$ 241,370

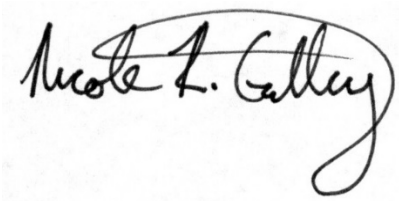
NICOLE GALLOWAY, CPA
Missouri State Auditor

Honorable Michael L. Parson, Governor
and
Members of the General Assembly
Jefferson City, Missouri

The primary objective of this compilation is to report the filing status for political subdivisions other than cities, towns, and villages, required to file a financial report, under Section 105.145, RSMo, and 15 CSR 40-3.030. Section 105.145, RSMo, provides that the State Auditor's Office notify the Department of Revenue if any political subdivision fails to timely submit a copy of its annual financial report. Because of different filing requirements, a separate report is issued for cities, towns, and villages.

The filing status for the 341 political subdivisions required to file a financial report by December 31, 2018, is presented in summary on page 3 and by individual entity in Appendix A. We have not audited the reports submitted and, accordingly, do not express an opinion or any other assurance on them.

This report also includes the updated filing status for political subdivisions, other than cities, towns, and villages, that filed a financial report in December 2018, after their filing deadline. The filing status for these 12 entities is presented in summary on page 3 and by individual entity in Appendix B-E.



Nicole R. Galloway, CPA
State Auditor

The following staff participated in the preparation of this report:

Director of Audits:	Jon Halwes, CPA, CGFM
General Counsel:	Paul Harper, JD
Senior Analyst:	Jill Wilson, MBA

Monthly Report on Political Subdivision Filings
December 2018
Executive Summary

Executive Summary

Section 105.145, RSMo, requires the governing body of each political subdivision in the state, except counties and school districts, to prepare and remit to the state auditor an annual report of financial transactions.

15 CSR 40-3.030 requires the financial report to be remitted to the state auditor within 6 months of the end of the political subdivision's fiscal year. The State Auditor's Office posts individual annual financial reports to its website. A searchable link is available at http://auditor.mo.gov.

Section 105.145, RSMo, requires the state auditor to notify the Department of Revenue if any political subdivision fails to timely submit a copy of its annual financial report. Any political subdivision that fails to timely submit the annual financial report shall be subject to a fine of $500 per day upon notice by the Department of Revenue, except transportation development districts with a gross revenues less than $5,000 in the fiscal year of the annual financial report.

This report includes the filing status for the 341 political subdivisions, other than cities, towns, and villages, with a fiscal year end of June 30, 2018. Cities, towns, and villages have additional filing requirements and their reporting status is included in a separate report. Of the 341 political subdivisions, 245 filed an annual financial report by December 31, 2018.

This report also includes the filing status for 12 political subdivisions, other than cities, towns, and villages, that filed their financial report in December 2018, after their filing deadline.

NICOLE GALLOWAY, CPA
Missouri State Auditor

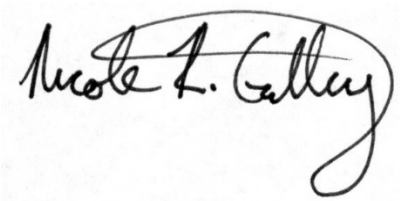
Honorable Michael L. Parson, Governor
and
Members of the General Assembly
Jefferson City, Missouri

The primary objective of this compilation is to report the filing status for the municipalities required to file a financial report by December 31, 2018, under Section 105.145, RSMo, and 15 CSR 40-3.030, and, when applicable, an addendum under Section 479.359, RSMo, and 15 CSR 40-3.170 and a municipal court certification under Section 479.360, RSMo, and 15 CSR 40-3.180.

Section 105.145, RSMo, provides that the State Auditor's Office (SAO) notify the Department of Revenue if any city, town, or village fails to timely submit a copy of its annual financial report. Additionally, Section 479.362, RSMo, provides that the SAO notify the Department of Revenue whether counties, cities, towns, and villages have timely filed under Sections 479.359 and 479.360, RSMo. Because of different filing requirements, a separate report is issued for all other political subdivisions required to file a financial report.

The filing status for 260 cities, 5 towns, and 65 villages is presented in summary on page 3 and by individual entity in Appendix A. This compilation is limited to presenting information submitted to our office. We have not audited the information submitted and, accordingly, do not express an opinion or any other form of assurance on it.

This report includes the updated filing status for municipalities that filed at least one of the items (financial report, addendum, or certification) in December 2018, after their filing deadline. The filing status for these 7 cities and 1 village is presented in summary on pages 4 and by individual entity in Appendixes B to F.



Nicole R. Galloway, CPA
State Auditor

The following staff participated in the preparation of this report:

Director of Audits:	Jon Halwes, CPA, CGFM
General Counsel:	Paul Harper, JD
Senior Analyst:	Jill Wilson, MBA

Executive Summary

Section 105.145, RSMo, requires the governing body of each political subdivision, except counties and school districts, in the state to prepare and remit to the state auditor an annual report of financial transactions. 15 CSR 40-3.030 requires the financial report to be remitted to the state auditor within 6 months of the end of the political subdivision's fiscal year. The State Auditor's Office (SAO) posts individual annual financial reports to its website. A searchable link is available at http://auditor.mo.gov.

Section 105.145, RSMo, requires the state auditor to notify the Department of Revenue if any political subdivision fails to timely submit a copy of its annual financial report. Any political subdivision that fails to timely submit the annual financial report shall be subject to a fine of $500 per day upon notice by the Department of Revenue, except transportation development districts with a gross revenues less than $5,000 in the fiscal year of the annual financial report.

Section 479.359.1, RSMo, requires every county, city, town, and village to annually calculate the percentage of its annual general operating revenue received from fines, bond forfeitures, and court costs for minor traffic violations.

Section 479.359.3, RSMo, provides that all entities having a municipal court file an addendum to the annual financial report containing items listed in 15 CSR 40-3.170, which also provides the procedures to file an addendum.

Section 479.360, RSMo, requires every county, city, town, and village that has a municipal court to file, with its annual financial report, a certification of substantial compliance with 10 municipal court procedures. This certification must be signed by the municipal court judge. 15 CSR 40-3.180 provides the procedure to file the municipal court certification. Any county, city, town, or village that does not have a municipal court judge is not required to file a certification.

Section 479.362, RSMo, requires that the SAO notify the Department of Revenue whether counties, cities, towns, or villages have timely filed their addendums under Section 479.359 and certificates of substantial compliance under Section 479.360, RSMo. Section 479.368, RSMo, provides penalties for counties, cities, towns, and villages that fail to file, including loss of revenue and mandatory ballot measure to dissolve the political subdivision.

This report includes the filing status for the 260 cities, 5 towns, and 65 villages with a fiscal year end of June 30, 2018, whose financial reports, addendums, or certifications were due by December 31, 2018. Of the 330 municipalities required to file an annual financial report, 228 filed the report timely. Of the 230 municipalities required to file an addendum, 93 filed an addendum timely and 2 filed an addendum for a partial fiscal year. Of the 123 municipalities required to file a certification, 61 filed a certification timely and 1 filed a certification for a partial fiscal year.

This report includes the filing status for 7 cities and 1 village that filed at least one of the items (financial report, addendum, or certification) in December 2018, after their filing deadline. Of these entities, 7 filed an annual financial report and 1 filed a certification.

NICOLE GALLOWAY, CPA
Missouri State Auditor

Honorable Michael L. Parson, Governor
and
Members of the General Assembly
and
Anne L. Precythe, Director
Department of Corrections
Jefferson City, Missouri

To address our responsibilities of Section 217.595.6, RSMo, we have audited the revenues and the expenditures of the Working Capital Revolving Fund, as part of our audit of the state's Comprehensive Annual Financial Report (CAFR), as of and for the year ended June 30, 2018, and have issued our report (Report No. 2019-003), dated January 24, 2019. The state's CAFR is comprised of the financial statements of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information (including the Working Capital Revolving Fund) of the state of Missouri, and the related notes to the financial statements.

Our report expressed qualified audit opinions on the governmental activities and the General Fund opinion units and unmodified opinions on the business-type activities, the aggregate discretely presented component units, each major fund excluding the General Fund, and the aggregate remaining fund information (including the Working Capital Revolving Fund) opinion units of the state of Missouri, as of June 30, 2018.

One finding resulted from our audit procedures related to the Working Capital Revolving Fund. The audit finding and management's response will be reported in the state's Single Audit report for the fiscal year ended June 30, 2018.

Stacy Neal
Director

January 24, 2019

The Honorable Michael L. Parson
The Honorable Members of the Legislature
Citizens of the State of Missouri

In accordance with generally accepted accounting principles, I submit to you the Comprehensive Annual Financial Report (CAFR) of the State of Missouri for the fiscal year ended June 30, 2018. This report was prepared by the Office of Administration, Division of Accounting, whose management is responsible for its contents.

The report is prepared to show the financial position and operating results of the State. The State's internal accounting controls provide reasonable assurance regarding the safeguarding of assets against loss from unauthorized use or disposal and the reliability of financial records for preparing financial statements. The concept of reasonable assurance recognizes that the cost of a control should not exceed the resulting benefit. We believe the data presented is accurate in all material respects and that all disclosures necessary to enable the reader to gain a reasonable understanding of the State's financial activities have been included.

An annual audit of the basic financial statements is completed each year by the State Auditor's Office. The State Auditor conducts the audit in accordance with generally accepted government auditing standards, and her opinion has been included in this report. The State Auditor conducts a "Single Audit" of all federal funds in accordance with the Federal Single Audit Act Amendments of 1996 and Title 2 U.S. *Code of Federal Regulations* Part 200, *Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards* (Uniform guidance).

A narrative introduction, overview, and analysis of the basic financial statements is presented in the *Management's Discussion and Analysis (MD&A)* section of this report. This letter of transmittal is intended to complement MD&A and should be read in conjunction with it. The MD&A can be found immediately following the Independent Auditor's Report.

PROFILE OF THE GOVERNMENT

Missouri was organized as a territory in 1812 and was the second state (after Louisiana) of the Louisiana Purchase to be admitted to the Union. Statehood was granted on August 10, 1821, making Missouri the 24th state. The State encompasses 68,945 square miles.

The State operates under three branches of government: executive, legislative, and judicial. The executive branch consists of the Governor, Lieutenant Governor, Secretary of State, State Auditor, State Treasurer, and Attorney General. The legislative branch consists of 34 members of the Senate and 163 members of the House of Representatives. The judicial branch is a three-tier court system: the Supreme Court, the State's highest court, has statewide jurisdiction; a court of appeals that consists of districts established by the General Assembly; and a system of circuit courts that has original jurisdiction over all cases and matters, civil and criminal.

The State provides a range of services in the areas of agriculture, education, health and social services, transportation systems, public safety, judicial systems, economic development, conservation and natural resources, labor relations, and general administration.

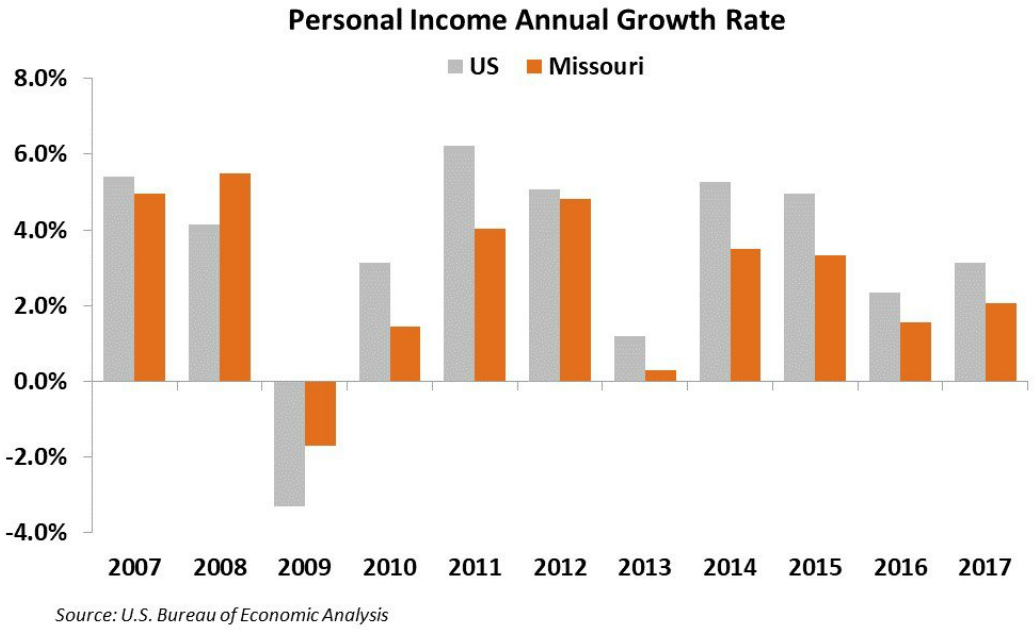
The State operates on a legally adopted budget in order to ensure compliance with legal provisions embodied in the annual appropriated budget passed by the General Assembly and approved by the Governor prior to the beginning of the fiscal year. If appropriations are not sufficient for a fiscal year, supplemental amounts are requested during the next legislative session by the same process that original appropriations are requested. Budgets are established at the program level. Expenditures cannot exceed the individual appropriation amount. The Governor has the authority to reduce the allotments of appropriations in any fund if it appears that the revenue estimate will not be met. Article IV, Section 27 of the Missouri Constitution, amended in 2014, requires the Governor to notify the General Assembly if the Governor reduces allotments when it appears revenues will be less than estimated. This Section then gives the General Assembly the authority to overturn any of the Governor's restrictions with a two-thirds vote, similar to the procedure to overturn a veto. Unexpended appropriations lapse at the end of each fiscal year, unless reappropriated to the following budget fiscal year.

The financial reporting entity of the State includes all of the funds of the primary government as well as component units for which the State is financially accountable. The transmittal letter, MD&A, and the financial statements focus on the primary government and its activities. Although information pertaining to the component units is provided, their separately issued financial statements should be read to obtain a complete overview of their financial position.

ECONOMIC CONDITION AND OUTLOOK

State Economy

Missouri's economy saw its sixth consecutive year of Annual Real GDP growth in 2017. Missouri's GDP was $263.1 billion in inflation-adjusted dollars; this is a 1.1% increase over 2016. Missouri's per capita personal income was $43,661 in 2017, up 1.7% from 2016. The national per capita income is $50,932. While the State's per capita income is lower than the national average, so is the cost of living. In 2017, Missouri ranked 6th lowest in cost of living for states.



Source: MERIC 2018 Missouri Economic Report

In June 2018, Missouri's unemployment rate was 3.5%, its lowest level since September 2000, while the nation's unemployment rate was 4.0%. June 2018 makes 16 consecutive months of unemployment rates below 4%. Between June 2017 to June 2018, Missouri added over 34,300 jobs, a 1.2% employment growth for Missouri.

Long-Term Financial Planning

During the 2014 legislative session, the legislature passed Senate Bill 509 and Senate Bill 496, relating to changes to the State's income tax structure. The legislation reduced the maximum tax rate on personal income and created an income tax deduction for business income. The implementation of the tax cut is gradual with a 0.10% decline each calendar year and will go into effect following fiscal years where net general revenue collections grow at least $150 million. Estimates indicate that the bills will cost at least $620 million annually once fully in effect, which will occur in fiscal year 2023 at the earliest, due to a phased implementation. General revenue growth for fiscal year 2017 triggered the first income tax reduction in tax year 2018. General revenue growth for fiscal year 2018 triggered the second income tax rate reduction for tax year 2019. The estimated income tax revenue reduction for fiscal year 2019 is $240 million.

The Tax Cuts and Jobs Act (JCTA) became effective January 1, 2018. The tax package made multiple changes to the federal individual and corporate tax codes. Due to Missouri's rolling conformity with the majority of the federal tax code, many of the changes will also directly impact Missouri's tax collections. The most notable individual income tax change was an increase, of nearly double, to the standard deduction and elimination of the personal and dependent deductions. Missouri estimates that the individual income tax changes made at the federal level will reduce Missouri tax collections by $58 million annually beginning with fiscal year 2019.

The State has continued to implement a program of renovating capital assets by issuing bonds at historically low interest rates. The Board of Public Buildings issued Series A 2017 for $77,165,000 in August 2017 and Series A 2018 bonds for $47,740,000 in April 2018, utilizing Senate Bill 723 authorization. Senate Bill 723 authorized the Board to issue $314.3 million in bonds to provide continued funding for capital improvement projects for the State Capitol Building, State buildings, Veteran's homes, Correctional facilities, State Parks, and State educational institutions. No new bond issuances are planned for fiscal year 2019.

Relevant Financial Policies

Article X, Sections 16-24 of the Constitution of Missouri (the "Tax Limitation Amendment"), imposes a limit on the amount of taxes that may be imposed by the General Assembly in any fiscal year. This limit is tied to total state revenues for fiscal year 1981, as defined in the Tax Limitation Amendment and adjusted annually based on a formula, which is tied to increases in the personal income of Missouri for certain designated periods. If the revenue limit is exceeded by one percent or more in any fiscal year, the excess revenue will be refunded based on the liability reported on state income tax returns. If the excess revenue collected is less than one percent of the revenue limit, the excess revenue shall be transferred to the General Revenue Fund.

The revenue limit can be exceeded by a constitutional amendment duly adopted by the people or, if the General Assembly approves by a two-thirds vote, an emergency declaration by the Governor. Strong economic growth resulted in revenues above the total state revenue limit in fiscal years 1995-1999. The State has refunded to income taxpayers $979 million in excess revenue for these fiscal years. The revenue limit was not exceeded in fiscal years 2000 through 2018, inclusive. The State is currently $4.06 billion below the limit and does not expect the limit to be exceeded in fiscal year 2019.

Major Initiatives

Missouri will continue to focus on streamlining government functions and investing in its citizens. Major initiatives include a focus on tax reform, education and the well-being of Missouri citizens.

2018 Tax Legislation

- **Individual Income Tax** - The General Assembly passed multiple individual income tax-related bills (HB 1796, HB 1858, HB 2540, SB 573, and SB 882). HB 1796 will grant a first-time home buyer savings contributions income tax deduction. This provision is expected to reduce income tax collections by $2.7 million annually once fully implemented. HB 1858 will change the amount of interest granted to individual income tax refunds that have not been paid within 45 days. HB 1858 is expected to reduce general revenue by $2.7 million annually. HB 2540 will reduce the federal tax deduction granted, offsetting reductions to the top individual income tax rate. This provision is estimated to increase fiscal year 2019 revenues by $1.7 million. Once fully implemented, this legislation will reduce tax collections by an estimated $5.8 million annually. SB 573 will exempt all non-active duty and National Guard military pay from individual income tax. This exemption will be phased in by 20% increments over five years. This provision is estimated to reduce income tax collections by $2.8 to $7.4 million, once fully implemented. SB 882 will allow transfers between certain types of savings accounts to be exempt from individual income tax.

- **Sales Tax** - The General Assembly passed multiple sales tax exemption-related bills (HB 1831, SB 627, and SB 768). HB 1831 will exempt 501(c)(7) organizations from paying sales tax on membership dues and initiation fees. SB 627 will add bison and honey bees to the current agriculture sales tax exemptions. SB 768 will permanently extend the manufacturing sales tax exemption currently granted to telecommunications businesses. These provisions are estimated to reduce general revenue by less than $1 million annually.

- **Corporate Income Tax** - The General Assembly passed three corporate income tax-related bills (SB 769, SB 773, and SB 884). SB 769 will grant a tax rate reduction to financial institutions in the event of a corporate tax rate reduction. SB 769 is estimated to reduce general revenue by $300 thousand once fully implemented. SB 773 will exempt intercompany transactions from corporate income tax. SB 884 will reduce the corporate tax rate, exempt affiliated member transactions from corporate income tax, and require corporations to use a single-sales income apportionment method. SB 884 is estimated to impact general revenue by a range of positive $9.7 million to a loss of $8.8 million, once fully implemented.

- **Tax Credits** - The General Assembly passed three tax credit-related bills. (HB 1288, SB 590, and SB 629). HB 1288 extends existing tax credits and creates two new tax credit programs. HB 1288 is expected to reduce general revenue by more than $3 million once fully implemented. SB 590 makes multiple changes to the historic preservation tax credit program, including reducing the authorization cap from $140 million to $120 million ($90 million for all projects plus an additional $30 million for certain projects). SB 629 reduces the authorization cap for the Missouri Supplemental TIF Fund. SB 629 is estimated to increase general revenue by up to $12 million annually once fully implemented.

Public Infrastructure. Senate Bill 564 allows electrical utility companies to offer discounts to consumers for economic development and caps customer rate increases. It will increase investment from electric companies in Missouri solar facilities while making available rebates for solar power use. House Bill 1991 enacts the Uniform Small Wireless Facility Deployment Act, which will modernize infrastructure by establishing a streamlined statewide framework for internet service providers to work with localities to construct small cell nodes on existing infrastructure in the public right-of-way. These nodes are used to implement 5G wireless technologies in rural and urban communities.

Reforming the State Employee Merit System. Senate Bill 1007 modifies the state employee merit system to make most State of Missouri employees at-will employees and removes barriers to hiring, rewarding, and promoting effective employees. The bill streamlines the employee discipline and appeals process while restructuring and broadening pay scales to grant departments and agencies greater flexibility in compensation. Whistleblower protections for state employees are expanded to protect those who come forward to report improprieties within state agencies.

Federal Reimbursement Allowance. Senate Bill 775 extends the Federal Reimbursement Allowance (FRA) program. Under the program, health care providers pay an assessment to the state, which uses these revenues to earn federal matching dollars to fund the state's Medicaid program. FRA allows the state to draw down additional federal dollars to fund health care for low-income families, children, seniors, and Missourians with disabilities. The state statutes authorizing the program include sunset provisions so the provider assessments can be reviewed periodically.

Labor Reforms. House Bill 1413 modifies the membership dues withholding process for public employees represented by a labor union. Public sector employees will now need to annually opt-in to automatic withholdings from their paychecks rather than opting-out. The bill also reforms the financial reporting requirements for public sector unions to match federal requirements of private and public sector unions and increase transparency. House Bill 1729 reforms Missouri's prevailing wage law for public construction projects to reduce the cost burden of public projects especially for rural communities.

ACKNOWLEDGEMENTS

While the Office of Administration, Division of Accounting, is responsible for the contents of this report, no one division could do it alone. Many people were involved in the compilation of materials necessary to complete the report.

We want to issue a special thanks to all the personnel at the State agencies who provided us with information quickly and accurately so that we could issue the CAFR in a timely manner. We also owe thanks to the professionalism and dedication demonstrated by technical and management personnel within the State Auditor's Office, the State Treasurer's Office, Office of Administration, Information Technology Services Division, and the State Printing Center. We appreciate all their efforts.

Sincerely,

Stacy Neal, CPA
Director

INDEPENDENT AUDITOR'S REPORT

Honorable Michael L. Parson, Governor
and
Members of the General Assembly

Report on the Financial Statements

We have audited the accompanying financial statements of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the state of Missouri, as of and for the year ended June 30, 2018, and the related notes to the financial statements, which collectively comprise the state's basic financial statements as listed in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express opinions on these financial statements based on our audit. We did not audit the financial statements of certain entities. Those statements were audited by other auditors whose reports have been furnished to us, and our opinions, insofar as they relate to the amounts included for those entities, are based solely on the reports of the other auditors. Those entities were:

1. The Missouri Road Fund, a major fund; the Missouri Road Bond Fund; the Conservation Employees' Insurance Plan; the Transportation Self-Insurance Plan; the Missouri State Employees' Insurance Plan; the Missouri Consolidated Health Care Plan; and the Missouri Department of Transportation and Missouri State Highway Patrol Medical and Life Insurance Plan which represent 77 percent of the assets and 11 percent of the revenues of the governmental activities.

2. The State Lottery and the Petroleum Storage Tank Insurance Fund which are both major funds and represent 12 percent of the assets and 73 percent of the revenues of the business-type activities.

3. The aggregate discretely presented component units.

4. The pension (and other employee benefit) trust funds and the Missouri Department of Transportation agency funds which represent 93 percent of the assets and 97 percent of the additions of the fiduciary funds.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement. The financial statements of the Conservation Employees' Insurance Plan, the Missouri State Employees' Insurance Plan, and the Missouri Consolidated Health Care Plan, internal service funds; the Missouri Development Finance Board and the Missouri Agricultural and Small Business Development Authority, discretely presented component units; and the pension (and other employee benefit) trust funds were not audited in accordance with *Government Auditing Standards*.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our qualified audit opinions on the governmental activities and the General Fund opinion units and our unmodified opinions on all remaining opinion units.

Basis for Qualified Opinions on the Governmental Activities and the General Fund

We were not allowed access to tax returns and related source documents for income taxes. Access was denied based on the Department of Revenue's interpretation of the decision rendered by the Missouri Supreme Court in the case of *Director of Revenue v. State Auditor* 511 S.W.2d 779 (Mo. 1974). Approximately 28 percent of governmental activity revenues and 33 percent of General Fund revenues are from this source. We were unable to satisfy ourselves by appropriate audit procedures as to the income tax revenue beyond the amounts recorded.

Qualified Opinions

In our opinion, based on our audit and the reports of other auditors, and except for the possible effects of the matter described in the "Basis for Qualified Opinions on the Governmental Activities and the General Fund" paragraph, the financial statements referred to above present fairly, in all material respects, the financial position of the governmental activities and the General Fund of the state of Missouri, as of June 30, 2018, and the changes in financial position thereof for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Unmodified Opinions

In our opinion, based on our audit and the reports of other auditors, the financial statements referred to above present fairly, in all material respects, the respective financial position of the business-type activities, the aggregate discretely presented component units, each major fund excluding the General Fund, and the aggregate remaining fund information of the state of Missouri, as of June 30, 2018, and the respective changes in financial position and, where applicable, cash flows thereof for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Emphasis of Matter

As discussed in Note 2 to the financial statements, for the fiscal year ended June 30, 2018, the state of Missouri implemented Governmental Accounting Standards Board (GASB) Statement No. 75, *Accounting and Financial Reporting for Postemployment Benefits Other Than Pensions*, and GASB Statement No. 81, *Irrevocable Split-Interest Agreements*. Our opinions are not modified with respect to this matter.

Other Matters

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the Management's Discussion and Analysis; the Budgetary Comparison Schedule-General Fund, Major Special Revenue Funds; the Schedule of Changes in Net Pension Liability and Related Ratios; the Schedule of Proportionate Share of the Net Pension Liability; the Schedule of State Contributions; the Schedule of Changes in Total OPEB Liability and Related Ratios, the Schedule of Changes in Net OPEB Liability and Related Ratios; and the Schedule of Proportionate Share of the Collective Net OPEB Liability, as listed in the table of contents, be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We and other auditors have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Supplementary and Other Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the state of Missouri's basic financial statements. The supplementary information, as listed in the table of contents, and the other information, which consists of the introductory and statistical sections, are presented for purposes of additional analysis and are not a required part of the basic financial statements.

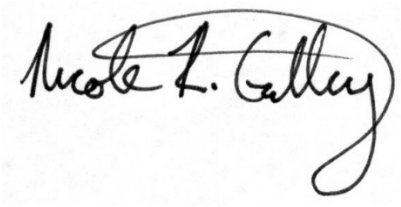
The supplementary information, as listed in the table of contents, is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the audit procedures applied in the audit of the basic financial statements and certain additional procedures,

including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America by us and other auditors. In our opinion, based on our audit, the procedures performed as described above, and the reports of the other auditors, and except for the possible effects on the supplementary information of the matter discussed in the "Basis for Qualified Opinions on the Governmental Activities and the General Fund" paragraph, the supplementary information, as listed in the table of contents, is fairly stated in all material respects, in relation to the basic financial statements as a whole.

The information in the introductory and statistical sections has not been subjected to the audit procedures applied in the audit of the basic financial statements, and accordingly, we do not express an opinion or provide any assurance on it.

Other Reporting Required by *Government Auditing Standards*

In accordance with *Government Auditing Standards*, our report dated January 24, 2019, on our consideration of the state of Missouri's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters is issued under separate cover in the Single Audit Report. The purpose of our report is solely to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the state of Missouri's internal control over financial reporting or on compliance. Our report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the state of Missouri's internal control over financial reporting and compliance.



Nicole R. Galloway, CPA
State Auditor

The ***Management's Discussion and Analysis*** *provides a narrative overview and analysis of the financial activities of the State.*

Management's Discussion and Analysis

The following is a discussion and analysis of the State of Missouri's financial activities for the fiscal year ended June 30, 2018. Readers are encouraged to consider the information presented here in conjunction with additional information that is furnished in the letter of transmittal.

FINANCIAL HIGHLIGHTS – PRIMARY GOVERNMENT

Government-Wide:

- *Net Position.* Assets and deferred outflows of the State of Missouri exceeded liabilities and deferred inflows at the close of fiscal year 2018 by $27.5 billion. Of the $27.5 billion, "unrestricted net position" is reported as a negative $7.1 billion, offset by $4.1 billion in "restricted net position" and $30.5 billion net investment in capital assets. Unrestricted net position declined significantly due to the implementation of GASB Statement No. 75, *Accounting and Financial Reporting for Postemployment Benefits Other Than Pensions*. The total restatement due to the implementation was $1.9 billion.

- *Changes in Net Position.* The State's total net position increased by $283.4 million in fiscal year 2018. Net position for governmental-type activities increased by $186.6 million.

- *Excess of Revenues over (under) Expenses.* During fiscal year 2018, the State's total revenues of $27.6 billion were $271.9 million greater than total expenses of $27.4 billion (excluding capital contributions, transfers, and extraordinary items). Of these expenses, $15.5 billion were covered by program revenues. General revenues, generated primarily from various taxes, totaled $12.1 billion.

Fund-Level:

- *Governmental Funds – Fund Balance.* At the close of fiscal year 2018, the State's governmental fund assets exceeded liabilities by $5.2 billion, an increase of $110.0 million or 2.2% from the prior year. The increase was due to the net effect of several factors. Taxes increased $273.8 million primarily from an increase in individual income tax received. Revenues from Contributions and Intergovernmental increased $317.7 million and related expenditures in Human Services increased $382.4 million due to an increase for Medicaid and Other Assistance Programs. Capital outlay expenditures for Transportation and Law Enforcement increased $142.0 million mainly due to an increase in expenditures for infrastructure.

- *General Fund – Fund Balance.* At the end of the current fiscal year, the State's General Fund reported a balance of $1.5 billion.

Additional information regarding individual funds begins on Page 8.

Debt Issued and Outstanding:

- The primary government's total long-term obligations related to bonds payable decreased $186.7 million, or 6.0%, over the prior year. The outstanding bonds payable represents 30.4% of financial assets (cash, receivables, and investments) and 6.8% of total assets. The Board of Public Buildings issued bonds Series A 2017 and Series A 2018 in the amounts of $77,165,000 and $47,740,000, respectively. Additionally, bond payments of $311,625,000 were made during the fiscal year. Additional detail is available in *Note 12*.

Revenue Limit:

- The State Constitution limits the State's ability to retain revenue collected over an amount set by a constitutional amendment known as Article X. Excess revenue of 1.0% or more must be refunded to the taxpayers each year. During fiscal year 2018, the State did not exceed the revenue limit.

OVERVIEW OF THE FINANCIAL STATEMENTS

The State's basic financial statements are comprised of three components: 1) government-wide financial statements, 2) fund financial statements, and 3) notes to the financial statements. This report also contains other supplementary information in addition to the basic financial statements.

Government-Wide Financial Statements:

The government-wide financial statements are designed to provide readers with a broad overview of the State's finances in a manner similar to a private-sector business.

The *Statement of Net Position* presents information on all of the State's assets, deferred outflows, liabilities, and deferred inflows, with the difference between them reported as *net position.* Increases or decreases in net position may serve as a useful indicator of the State's financial position.

The *Statement of Activities* presents information showing how the State's net position changed during the most recent fiscal year. All changes in net position are reported when the underlying event giving rise to the change occurs, regardless of when the cash is received. Thus, revenues and expenses are reported in the statement for some items that will result in cash flows in future fiscal periods (e.g., uncollected taxes and earned but unused vacation leave).

Both of the government-wide financial statements report three activities:

Governmental Activities are primarily supported by taxes and intergovernmental revenues. They include general government, education, natural and economic resources, transportation and law enforcement, and human services.

Business-Type Activities are intended to recover all or a significant portion of their costs through user fees and charges. They include constructing or operating state park facilities, fairgrounds, historical properties and office buildings, hospital services, warehousing, merchandising, publishing maps and documents, and insurance coverage. Also included are the operations of the State Lottery, Unemployment Compensation, and the Petroleum Storage Tank Insurance funds.

Discretely Presented Component Units are operations for which the State has financial accountability, but are legally separate. They include the college and universities, Missouri Development Finance Board, Missouri Agricultural and Small Business Development Authority, Missouri Transportation Finance Corporation, and Missouri Wine and Grape Board.

Fund Financial Statements:

The fund financial statements present more detailed information about the government's operations than the government-wide statements. The State uses fund accounting to ensure and demonstrate compliance with statutory requirements. The funds of the State can be divided into three categories: governmental, proprietary, and fiduciary.

Governmental funds. Governmental funds are used to account for most of the basic services provided by the State. Unlike the government-wide financial statements, governmental fund financial statements focus on short-term inflows and outflows of current financial resources and utilize the modified accrual basis of accounting. This presentation focuses on when cash will be received and disbursed making the statements useful in evaluating a government's financing requirements in the near future.

Governmental funds include the general, special revenue, capital projects, debt service, and permanent funds. Major funds include general, public education, conservation and environmental protection, and the Missouri Road Fund which are presented in separate columns. Data from other governmental funds are combined into a single column for aggregated presentation. Individual fund data for each of the non-major governmental funds is provided in the form of combining statements in supplementary information.

A user can compare the information presented for *governmental funds* with similar information presented for *governmental activities* in the government-wide financial statements. A reconciliation to facilitate this comparison is provided on the page immediately following each governmental fund financial statement.

Proprietary funds. Proprietary funds are used to account for activities similar to private businesses in which goods and services are sold for specified fees. Generally, the State uses enterprise funds to account for activities that provide goods and services to the general public. These include constructing or operating state park facilities, fairgrounds, historical properties and office buildings, hospital services, warehousing, merchandising, and publishing maps and documents. Also included are the operations of the State Lottery, Unemployment Compensation, and the Petroleum Storage Tank Insurance funds. Internal service funds report activities that provide supplies and services for the State's other programs and activities. The State uses internal service funds to account for insurance and health care plans, as well as administrative services for other state agencies, such as fleet management, data processing, and telecommunication services. Because these services predominately benefit governmental rather than business-type functions, they have been included within governmental activities in the government-wide financial statements.

Proprietary funds focus on economic resources and utilize the full accrual basis of accounting. The proprietary fund financial statements provide separate information for the State Lottery, Unemployment Compensation, and Petroleum Storage Tank Insurance, which are considered major enterprise funds. Non-major enterprise funds are also combined into a single column for aggregated presentation. All internal service funds are combined into a single column in the proprietary fund financial statements. Individual fund data for the non-major enterprise and internal service funds is provided in the form of combining statements in supplementary information.

Fiduciary funds. Fiduciary funds are used to account for resources held for the benefit of parties outside State government. Fiduciary funds are *not* reflected in the government-wide financial statements because the resources of those funds are not available to support the State's own programs. The fiduciary funds are presented using the full accrual basis of accounting.

Notes to the financial statements. The notes provide additional information that is essential to a full understanding of the data provided in the government-wide and fund financial statements.

Other information. In addition to the basic financial statements and accompanying notes, this report also presents required supplementary information (RSI) including a budgetary comparison schedule for the General Fund and major special revenue funds and schedules for pension and other postemployment benefits. Other supplementary information includes the combining statements for the general, non-major governmental, non-major enterprise, internal service, fiduciary, and non-major component unit funds. It also includes the statistical section as well as budgetary comparison schedules for the Missouri Road Fund, non-major special revenue, debt service, capital projects, and permanent funds.

GOVERNMENT-WIDE FINANCIAL ANALYSIS

Net Position:

The State's total net position increased $283.4 million or 1.0% during fiscal year 2018. Cash and cash equivalents and investments increased $431.1 million due to a large influx of sales and withholding tax payments during the latter part of June and due to the uncertainty of cash flows in the capital projects funds. Capital assets increased $367.3 million mainly due to an increase in capital improvements and in the State's infrastructure. Net pension liability increased $337.1 million while bonds payable decreased $186.7 million. The State issued a Board of Public Buildings Bond Series A 2017 and Series A 2018 bonds in the amount of $124.9 million for continued funding for capital improvement of the State's capital assets, while making bond payments in the amount of $311.6 million.

Net investment in capital assets, which includes capital assets, bonds payable, and capital lease obligations, is the largest component of the State's net position at $30.5 billion or 110.9%. These assets include construction in progress, software in progress, infrastructure in progress, land, easements, land improvements, buildings, equipment, software, and trademarks which are not easily converted to cash or readily available to pay state debts as they come due. Net investment in capital assets and restricted net position, which do not represent resources available to pay day-to-day operating expenses, increased by $512.4 million or 1.5%. The increase was primarily due to the increase in capital assets of $367.3 million and a decrease in related outstanding bond and capital lease obligation of $187.8 million.

Restricted net position of the primary government totaled $4.1 billion or 14.8% of total net position vs. 15.1% from the prior year. Net position is restricted for several reasons including constitutional, legal, enabling legislation, or external requirements. Examples of restricted net position include lottery proceeds restricted for public education, funds restricted for debt service, and certain sales taxes restricted for the maintenance of highways or state parks and conservation areas. Also, many federal funds are restricted to funding certain programs.

The following table displays the current and prior year government-wide condensed Statement of Net Position.

Changes in Net Position:

The schedule below reflects how the State's net position changed during the year. The State collected program revenues of $15.5 billion and general revenues of $12.1 billion for total revenues of $27.6 billion during fiscal year 2018. Expenses for the State during fiscal year 2018 were $27.4 billion. Total net position, net of contributions and transfers, increased by $283.4 million.

The following table displays the current and prior year government-wide condensed Statement of Activities.

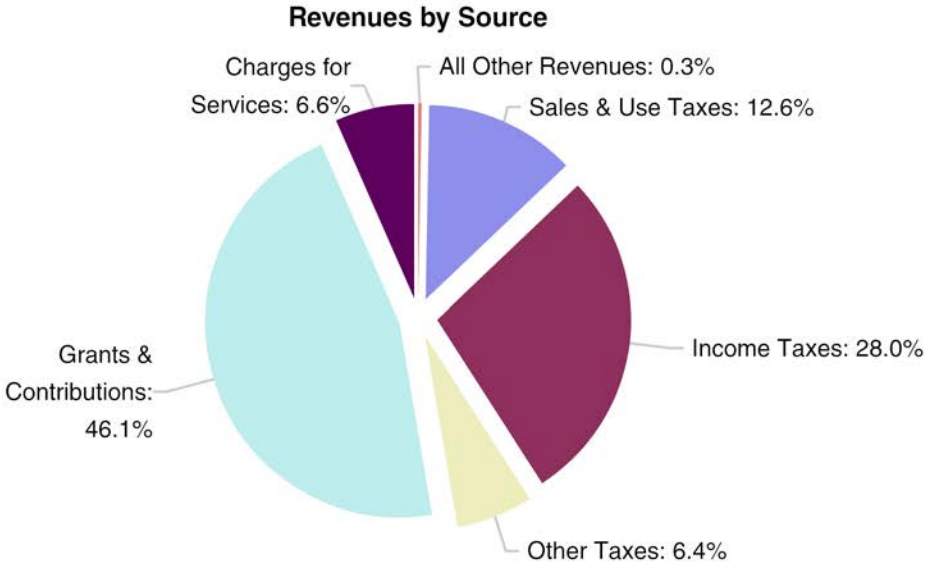
*Fiscal year 2017 amounts have been restated.

Governmental Activities

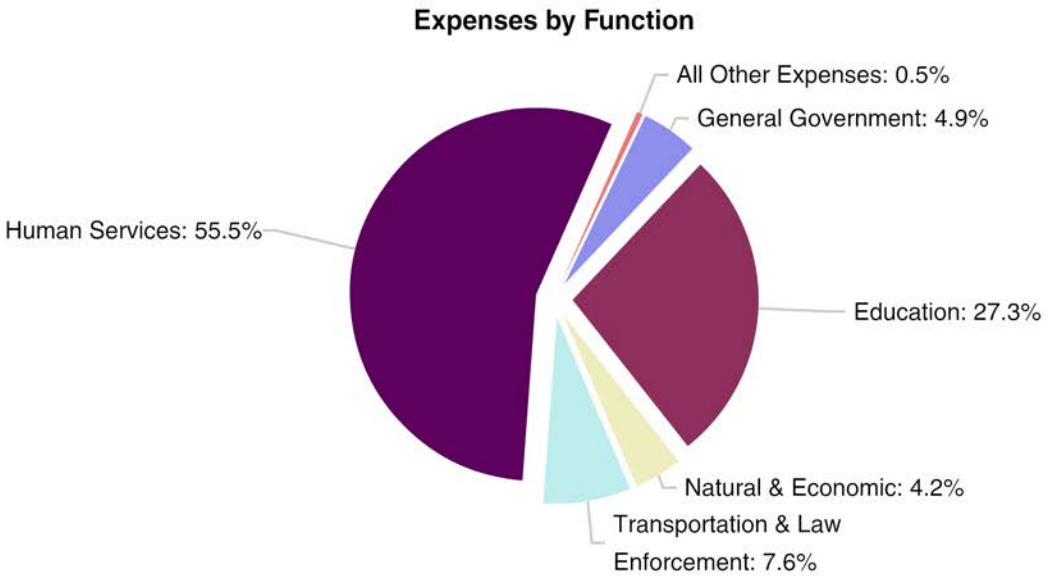
The net position of governmental activities increased $186.6 million in fiscal year 2018. General and program revenues of governmental activities were $596.8 million more in fiscal year 2018 than in fiscal year 2017, due mainly to an increase in operating grants and contributions and income tax.

As shown in the Revenues by Source chart below, approximately 47.0% of revenues from all sources earned came from taxes. Grants and contributions, which represents amounts received from other governments/entities, primarily the federal government, provided 46.1% of total revenue. Charges for services contributed 6.6% and various other revenues provided 0.3% of the remaining governmental activity revenue sources.



The State's governmental activities program expenses for fiscal year 2018 were $527.8 million more than fiscal year 2017. The most notable increase is $657.6 million in Human Services. This is mainly due to an increase for Medicaid and Other Assistance Programs.

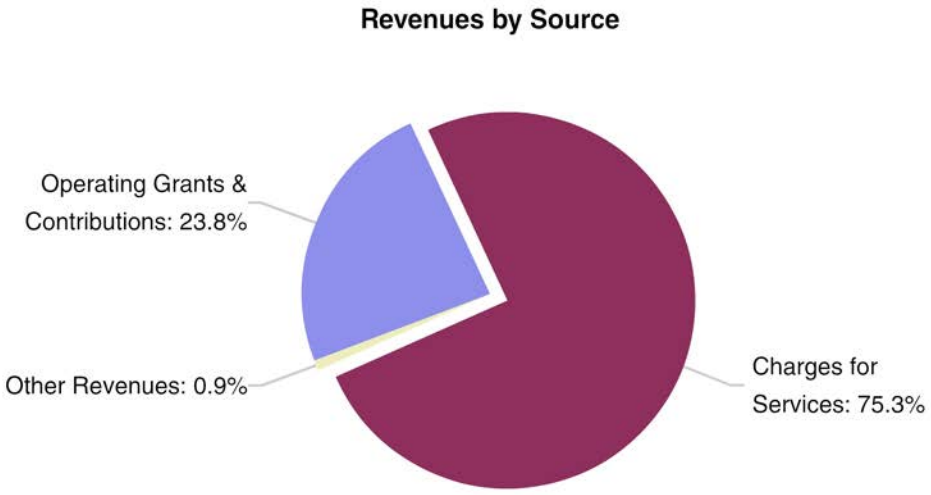
As shown in the Expenses by Function chart below, expense for Human Services makes up the largest portion, 55.5%, of total governmental activities expenses and followed by 27.3% for Education.



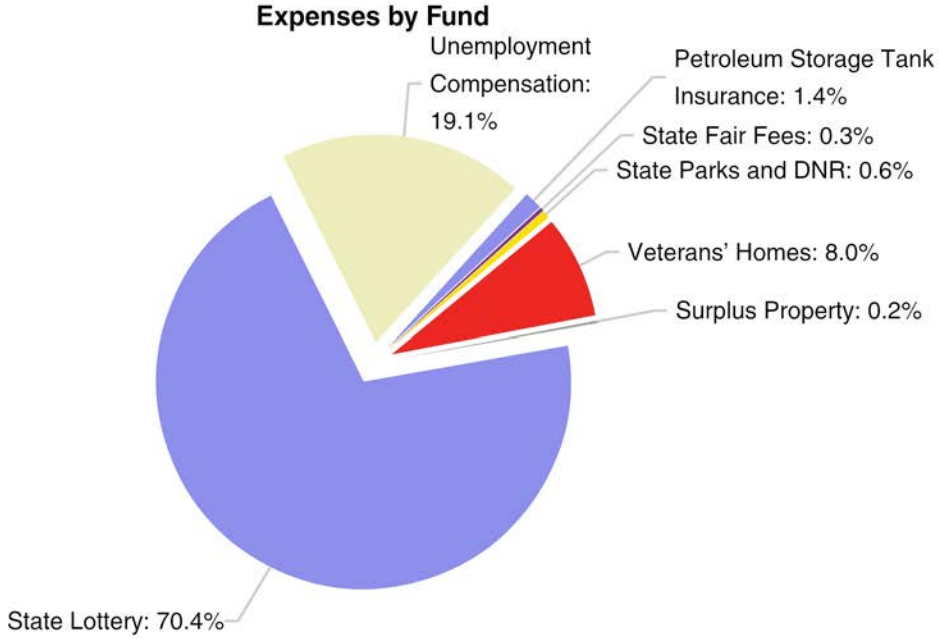
Business-Type Activities

Net position of the State's business-type activities increased $96.8 million in fiscal year 2018, mainly due to an increase in cash in Unemployment Compensation. The increase was due to an improved economy and a low unemployment rate which is allowing excess cash to remain in the fund.

Revenues of business-type activities totaled $2.0 billion. As shown in the Revenues by Source chart below, 75.3% of the revenues came from charges for services. Operating grants and contributions provided 23.8% of the total revenues and all other revenues provided 0.9%.



Expenses of business-type activities totaled $1.5 billion. As shown in the Expenses by Fund chart below, State Lottery makes up the largest portion with 70.4% of total business-type expenses. Unemployment Compensation comes in second at 19.1%, followed by Veterans' Homes at 8.0%, Petroleum Storage Tank Insurance at 1.4%, State Parks and DNR at 0.6%, State Fair Fees at 0.3%, and Surplus Property at 0.2%.



FINANCIAL ANALYSIS OF THE STATE'S INDIVIDUAL FUNDS

Governmental Funds:

At the end of fiscal year 2018, the State's governmental funds reported combined ending fund balances of $5.2 billion. Approximately 62.5% is unrestricted and available for spending at the government's discretion. The remainder of fund balance is nonspendable and restricted to indicate that it is not available for new spending because it has already been allocated for: 1) inventories, 2) to pay debt service, 3) for loans receivable, and 4) for a variety of other purposes.

Fund balances (in thousands) for governmental funds are as follows:

	General Fund	Public Education	Conservation and Environmental Protection	Missouri Road Fund	Non-Major Funds	Total
Nonspendable	$ 48,944	$ 123	$ 380	$ 33,738	$ 61,198	$ 144,383
Restricted	307,913	233,381	140,010	669,740	447,291	1,798,335
Committed	617,661	2,184	1,621,793	—	39,120	2,280,758
Assigned	86,705	46,399	108,411	—	255,376	496,891
Unassigned	457,634	—	—	—	—	457,634
Total	$ 1,518,857	$ 282,087	$ 1,870,594	$ 703,478	$ 802,985	$ 5,178,001

The General Fund is the chief operating fund of the State. At the end of fiscal year 2018, the State's General Fund reported a total fund balance of $1.5 billion, an increase of $84.6 million from fiscal year 2017. Total revenues increased $415.2 million. The increase was due primarily to an increase in individual income tax and sales and use tax and an increase in funds received from the federal government for Medicaid and Other Assistance programs. Total expenditures went from $18.5 billion to $18.9 billion between fiscal years 2017 and 2018, an increase of $340.8 million. The largest component of this increase was in human services of $377.0 million relating to the increase in funds received and related expenditures due to an increase in the number people utilizing Medicaid and Other Assistance Programs.

The Public Education Fund provides general and special education services to the children of the State and other related functions, such as library services and student loans. Total fund balance increased from $278.0 million last year to $282.1 million this year, an increase of $4.1 million or 1.5%. Revenues and expenditures were relatively stable verses fiscal year 2017.

The Conservation and Environmental Protection Fund provides the preservation of the State's wildlife and environment. At the end of fiscal year 2018, the fund balance was $1.9 billion, an increase of $52.0 million from fiscal year 2017. Revenues totaled $404.5 million while expenditures totaled $351.4 million, remaining relatively stable verses fiscal year 2017.

The Missouri Road Fund accounts for revenues from highway users' fees, federal reimbursements for highway projects, and bond proceeds to be used for costs of constructing and maintaining an adequate state highway system. Total fund balance decreased $20.1 million from fiscal year 2017. Revenues totaled $1.3 billion while expenditures totaled $1.8 billion. Total revenues increased by $127.0 million from fiscal year 2017 mostly due to the timing of reimbursements related to project expenditures and preventative maintenance, as well as an increase in the total number of projects billed due to the increase in contractor awards.

Proprietary Funds:

The State has three major proprietary funds: State Lottery, Unemployment Compensation, and the Petroleum Storage Tank Insurance Fund. The State Lottery Fund was established in 1986 to account for the sale of lottery tickets and lottery operations. Since 1992, public education has been the sole beneficiary of lottery proceeds. Unemployment Compensation accounts for contributions and payments collected from Missouri employers under the provision of the "Unemployment Compensation Law." This tax finances benefits for workers who become unemployed through no fault of their own. The Petroleum Storage Tank Insurance Fund accounts for moneys collected from transport load fees and participating owners of petroleum storage tanks. The fund pays cleanup expenses for petroleum leaks or spills from underground storage tanks and certain above ground storage tanks as well as third party property damage or bodily injury resulting from such discharges. This fund is one of the largest insurers of storage tanks in the country.

The State Lottery Fund's net position decreased by $2.0 million in fiscal year 2018, which is partly the result of fluctuations in market yields, which increase or reduce the unrealized gain on investments. Total operating revenues increased by 4.1%, while operating expenses increase by 1.5% in fiscal year 2018. Prize expense increased by $7.4 million, while ticket sales increased by $57.6 million. The sales increase was the result of an increase in Scratchers sales by $37.9 million, or 4.4%, an increase in Draw Game sales by $40.8 million, or 11.1%, and a decrease in Pull-Tab sales by $21.1 million, or 19.7%. The increase in fiscal year 2018 Scratchers sales can be attributed to the launch of a second $30 Scratchers game in late April 2018.

The Unemployment Compensation Fund's net position increased by $103.7 million during fiscal year 2018, which is mainly due to an increase in cash of $126.2 million and a decrease in accounts receivables of $22.0 million. The increase in cash is due to an improved economy and low unemployment rate, which allows excess cash to remain in the fund. During fiscal year 2018, the cash balance in the fund reached the statutorily established levels that trigger contribution rate reductions and decreases in the taxable wage base. The employer contribution rates decreased during fiscal year 2018, from 2.7% to 2.5%, and the taxable wage base decreased from $13,000 to $12,500, which were the main reasons for the accounts receivable decrease.

The Petroleum Storage Tank Insurance Fund's net position decreased by $7.8 million due to an increase in claims paid in fiscal year 2018.

GENERAL FUND BUDGETARY HIGHLIGHTS

The original budget is the appropriated budget that is truly agreed to and finally passed by the legislature, and signed by the Governor at the beginning of the fiscal year. The final budget includes emergency and supplemental appropriations, reverted amounts, and increases to estimated appropriations, which occur during the fiscal year.

Budgeted appropriations for fiscal year 2018 from the General Fund were $26.9 billion original budget and $27.7 billion final budget. Actual spending was $24.6 billion. Reasons for the final budget variances include:

- Appropriation authority exceeded cash available for expenditures.
- Lapse of various appropriations.
- Multiple year grants are appropriated in one year, but the expenditures may occur over several years.
- Capital improvement appropriations were restricted during the budget process.

Budgeted revenues/transfers in for fiscal year 2018 for the General Fund were $26.8 billion original budget and $26.7 billion final budget. Actual revenue/transfers in was $24.9 billion.

Refer to the *Notes to RSI*, Budgetary Reporting, on page 140 for more information on budgetary variances.

GOVERNMENT-WIDE CAPITAL ASSET AND DEBT ADMINISTRATION

Capital Assets:

The State's investment in capital assets for its governmental and business-type activities as of June 30, 2018, was $33.1 billion (net of accumulated depreciation/amortization). This investment in capital assets includes construction in progress, software in progress, infrastructure in progress, land, permanent easements, land improvements, temporary easements, buildings and improvements, equipment, software, trademarks, and infrastructure.

Capital Assets of the State include (in thousands):

	Governmental Activities	Business-Type Activities	Total
Construction in Progress	$ 413,543	$ 14,847	$ 428,390
Software in Progress	99,119	189	99,308
Infrastructure in Progress	1,550,464	—	1,550,464
Land	3,093,739	32,602	3,126,341
Permanent Easements	4,091	—	4,091
Land Improvements	221,328	38,541	259,869
Temporary Easements	1,496	50	1,546
Buildings and Improvements	3,414,850	56,779	3,471,629
Equipment	1,352,483	52,781	1,405,264
Software	251,965	631	252,596
Trademarks	17	—	17
Infrastructure	50,828,842	—	50,828,842
Subtotal	61,231,937	196,420	61,428,357
Less Accumulated Depreciation/ Amortization	(28,217,603)	(69,211)	(28,286,814)
Total Capital Assets, Net	$ 33,014,334	$ 127,209	$ 33,141,543

Additional information on capital assets can be found in *Note 5* of this report.

Debt Administration:

At the end of fiscal year 2018, the primary government had total general obligation and other bonded debt outstanding of $2.9 billion. Of this amount, $104.7 million comprises debt backed by the full faith and credit of the government.

Principal amounts retired or refunded in fiscal year 2018 were $50.1 million for general obligation bonds and $261.5 million for other bonds.

The State of Missouri is proud to have maintained a Triple-A credit rating since 1989 from all three major credit rating agencies (Moody's Investor Services, Inc., Standard and Poor's, and Fitch Ratings, Inc.) on the State's General Obligation Bonds.

Outstanding Bonds Payable of the State include (in thousands):

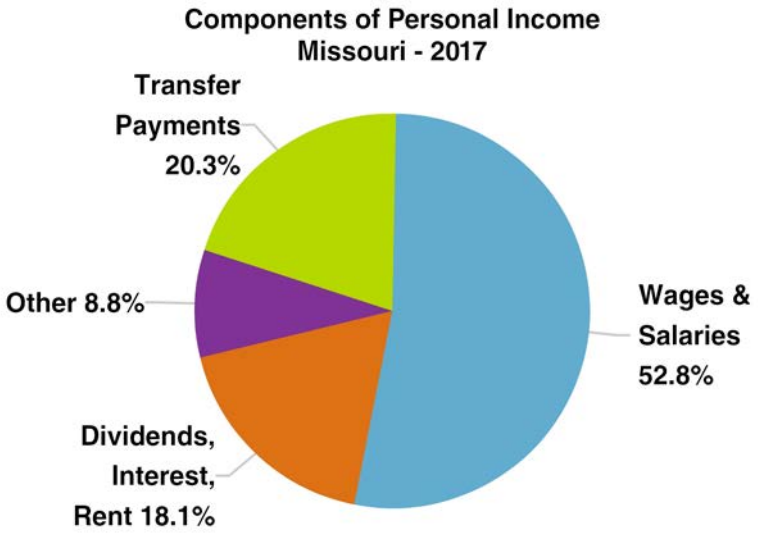
	Governmental Activities	Component Units	Total
General Obligation Bonds	$ 104,695	$ —	$ 104,695
Other Bonds	2,807,240	2,050,869	4,858,109
Total	$ 2,911,935	$ 2,050,869	$ 4,962,804

Additional information on long-term debt can be found in *Notes 11, 12, and 13* of this report.

ECONOMIC OUTLOOK AND NEXT YEAR'S BUDGET

As a major manufacturing, financial, and agricultural state, Missouri's economic health is tied closely to that of the nation. The expansion after the recession that ended in the summer of 2009 has continued, despite European fiscal and geopolitical troubles, volatile stock markets, and national policy uncertainty. Missouri's personal income, which directly impacts individual income tax and sales tax, increased 2.1% in 2017. Personal income growth began to accelerate in 2017, following weak growth during 2016. Missouri's employment stood at 2.9 million in June 2018, about 1.2% above June 2017. The State's seasonally adjusted unemployment rate registered 3.5% in June 2018, compared to 3.7% one year earlier. The national rate was 4.0% in June 2018.

Since 2010, personal incomes have increased, on average, 2.5% annually for the State and 3.6% for the nation. Missouri's per capita personal income grew 1.3% compared to national growth in per capita income of 1.6% from 2016 to 2017. The below graph depicts the components of personal income, with transfer payments (such as social security, Medicare, etc.) comprising 20.3% of the State's total personal income, due in part to the State's aging population.



Source: U.S. Bureau of Economic Analysis 2017

The State of Missouri's net general revenue collections in Fiscal Year 2018 were $9.4 billion, a 5.0% increase from fiscal year 2017 collections.

The State's economic outlook for fiscal year 2019 anticipates continued improvement in employment and wages, with continued growth in state revenue collections. During the fiscal year 2019 budget process, staff from the House, Senate, the University of Missouri and the Division of Budget and Planning developed a revenue estimate of 1.9% growth for fiscal year 2018 and 2.5% growth for fiscal year 2019. The actual fiscal year 2018 revenue collections increased by 5.0% when compared to the fiscal year 2017 collections, well above forecast and amount originally budgeted for fiscal year 2018. Net general revenue collections could decline by 0.5% in fiscal year 2019 and still reach forecast for net collections of $9.4 billion. Because of the conditions listed above, the Governor has begun fiscal year 2019 with no restrictions placed on general revenue spending. However, if necessary, the Governor may restrict spending at some point during the fiscal year.

The outlook for general revenue for fiscal year 2019 remains uncertain. Most economic forecasts are calling for moderate economic growth; however, escalating trade tensions and recent federal and state tax reforms may dampen Missouri growth. Equity markets have been strong in the first half of 2018, but have become more volatile as national and global uncertainty continues. While the number of jobs is steadily improving, the rate of growth has continued to slow as the labor market reaches full employment. Growth in sales tax is expected to be moderate as energy prices and inflation continue to increase.

The General Assembly passed several tax-related bills during the 2018 legislative session. The combined impact to general revenue during fiscal year 2019 ranges from a $1.3 million to $1.7 million gain. Once fully implemented, the legislation could impact general revenue by positive $10.1 million to a loss greater than $31.7 million.

REQUESTS FOR INFORMATION

This financial report is designed to provide a general overview of the State's finances for all those with an interest in the State's finances. Questions concerning any of the information provided in this report or requests for additional financial information should be addressed to the Office of Administration, Division of Accounting, P.O. Box 809, Jefferson City, MO 65102.

*The **Governmental Funds** focus on current financial resources.*

Governmental Fund Financial Statements

Major Funds

General Fund - Accounts for all current financial resources not required by law or administrative action to be accounted for in another fund.

Major Special Revenue Funds:

Public Education - Provides general and special education needs of the State and other related areas such as library services and student loans.

Conservation and Environmental Protection - Provides for the preservation of the State's wildlife and environment.

Major Capital Projects Fund:

Missouri Road Fund - Accounts for revenues from highway users' fees, federal reimbursements for highway projects, and bond proceeds to be used for costs of constructing and maintaining an adequate state highway system.

Non-Major Funds

Non-Major Governmental Funds are presented in the Combining and Individual Fund Statements and Schedules for non-major funds as part of Supplementary Information.

STATE OF MISSOURI
RECONCILIATION OF THE BALANCE SHEET OF
GOVERNMENTAL FUNDS TO THE STATEMENT OF NET POSITION
June 30, 2018
(In Thousands of Dollars)

Total Fund Balances - Governmental Funds		$ 5,178,001
Amounts reported for governmental activities in the Statement of Net Position are different because:		
Capital assets used in governmental funds are not financial resources and are not reported in the funds. These assets consist of (Note 5):		
Construction in Progress	413,204	
Software in Progress	98,040	
Infrastructure in Progress	1,550,464	
Land	3,085,405	
Permanent Easements	4,091	
Land Improvements	217,736	
Temporary Easements	1,496	
Buildings and Improvements	2,922,434	
Equipment	1,221,546	
Software	224,675	
Trademarks	17	
Infrastructure	50,828,842	
Accumulated Depreciation/Amortization	(27,860,161)	
		32,707,789
Deferred inflows of resources related to the State's revenues that will be collected after year-end, but are not available soon enough to pay for the current period's expenditures are deferred in the funds.		1,208,289
Deferred outflows of resources related to pensions and OPEB (Other Postemployment Benefits) are applicable to future reporting periods and therefore, not reported in the funds.		1,815,550
Deferred inflows of resources related to pensions and OPEB are applicable to future reporting periods and therefore, not reported in the funds.		(380,973)
Deferred outflows of resources related to deferred charges or credits on debt refundings are applicable to future reporting periods and therefore, not reported in the funds.		57,242
Deferred inflows of resources related to deferred charges or credits on debt refundings are applicable to future reporting periods and therefore, not reported in the funds.		(632)
Some liabilities are not due and payable in the current period and therefore, not reported in the funds. Those liabilities consist of (Note 11):		
Due to Other Entities	(1,420)	
General Obligation and Other Bonds Payable	(2,911,935)	
Unamortized Bond Premium	(166,876)	
Accrued Interest on Bonds	(26,785)	
Obligation under Lease Purchases	(46,175)	
Pollution Remediation	(46,239)	
Compensated Absences	(168,057)	
Claims Liability	(32,740)	
Contingent Liabilities	(2,002,091)	
Net Other Postemployment Benefit Obligation	(2,897,555)	
Net Pension Liability	(6,076,857)	
		(14,376,730)
Internal service funds are used by management to charge the costs of certain activities, such as insurance and telecommunications, to individual funds. The assets and liabilities are included in governmental activities in the Statement of Net Position.		268,446
Net Position of Governmental Activities		$ 26,476,982

The notes to the financial statements are an integral part of this statement.

The notes to the financial statements are an integral part of this statement.

STATE OF MISSOURI
RECONCILIATION OF THE STATEMENT OF REVENUES, EXPENDITURES, AND CHANGES IN FUND BALANCES IN GOVERNMENTAL FUNDS TO THE STATEMENT OF ACTIVITIES
For the Fiscal Year Ended June 30, 2018
(In Thousands of Dollars)

Net Change in Fund Balances - Total Governmental Funds		$ 110,182
Amounts reported for governmental activities in the Statement of Activities are different because:		
Inventories, which are recorded under the purchases method for governmental fund reporting, are reported under the consumption approach on the Statement of Activities. As a result of this change, the Increase in Reserve for Inventories on the fund statement has been reclassified as a functional expense on the government-wide statement.		(155)
Governmental funds report capital outlays as expenditures. In the Statement of Activities, however, the cost of these assets is allocated over their estimated useful lives and reported as depreciation/ amortization expense. This is the amount that capital outlays of $1,083,057 exceeds depreciation/ amortization of $686,978 in the current period.		396,079
In the Statement of Activities only the gain/loss on the sale of assets is reported, whereas in the governmental funds, the proceeds from the sales increase financial resources. Thus the change in net position differs from the change in governmental fund balance by the net book value of the assets sold.		(24,254)
The net effect of the donation of capital assets increased net position.		82
Deferred inflows do not provide current financial resources and are not recognized as revenues until available in governmental funds.		105,210
Pension and OPEB (Other Postemployment Benefits) contributions are reported as expenditures in the governmental funds when made. However, they are reported as deferred outflows of resources in the Statement of Net Position because the reported net pension liability and OPEB liability are measured a year before the report date. Pension expense and OPEB expense, which are the change in the net pension liability and the net change in OPEB liablity, adjusted for changes in deferred outflows and inflows of resources related to pensions and OPEB, is reported in the Statement of Activities.		
Pension Contributions		534,220
Pension Expense		(874,729)
OPEB Contributions		90,630
OPEB Expense		(180,015)
Proceeds provide current financial resources to governmental funds, but issuing debt increases long-term liabilities in the statement of net position. In governmental funds, repayment of principal is an expenditure, but the repayment reduces long-term liabilities in the Combined Statement of Net Position (Note 11):		
Bonds Issued	(124,905)	
Bond Premiums and Refunding Costs	(9,751)	
Bonds Retired	311,625	
Capital Leases Issued	(6,874)	
Capital Lease Payments	21,854	
		191,949
Some expenses reported in the Statement of Activities do not require the use of current financial resources and therefore, not reported as expenditures in governmental funds (Note 11):		
Amortization of Bond Premium and Refunding Costs	24,022	
Decrease in Accrued Interest	1,806	
Decrease in Pollution Remediation	1,192	
Increase in Due to Other Entities	(59)	
Decrease in Compensated Absences	2,204	
Increase in Contingent Liabilities	(90,755)	
Decrease in Claims Liability	5,249	
		(56,341)
Internal service funds are used by management to charge the costs of certain activities, such as insurance and telecommunications, to individual funds. The net revenue and expense of internal service funds are reported with governmental activities.		(106,276)
Change in Net Position of Governmental Activities		$ 186,582

The notes to the financial statements are an integral part of this statement.

*The **Proprietary Funds** focus on economic resources and are operated in a manner similar to private business enterprises.*

Proprietary Fund Financial Statements

Major Funds

State Lottery - Accounts for proceeds from the sale of lottery tickets and all other moneys credited or transferred to this fund. A minimum of 45% of the moneys are used for prizes.

Unemployment Compensation - Accounts for contributions and payments collected under the provisions of the "Unemployment Compensation Law" to pay benefits.

Petroleum Storage Tank Insurance - Accounts for moneys collected from transport load fees and participating owners of petroleum storage tanks for cleanup of contamination caused by releases from petroleum storage tanks.

Non-Major Funds

Non-major enterprise funds and all internal service funds are presented in our combining non-major fund financial statements as part of Supplementary Information.

Note 1 - Significant Accounting Policies

A. Financial Statements and Reporting Entity

The accompanying financial statements of the State of Missouri (primary government) and its component units have been prepared in conformity with generally accepted accounting principles as prescribed by the Governmental Accounting Standards Board (GASB).

The financial statements include the departments, agencies, boards, commissions, and other organizational units over which the State has financial accountability. GASB set forth the following criteria in Statement No. 14, *The Financial Reporting Entity,* for determining financial accountability: appointment of a voting majority of an organization's governing body and either: 1) the ability to impose the State's will on the organization; or 2) the organization's ability to provide specific benefits to, or impose specific burdens on, the primary government. Where the State does not appoint a voting majority of the governing body, the entity would still be included if it is fiscally dependent on the State. Statement No. 39, *Determining Whether Certain Entities are Component Units,* added a requirement to include all entities whose relationship with the State would make it misleading to exclude it. Statement No. 61, *The Financial Reporting Entity: Omnibus an amendment of GASB Statements No. 14 and No. 34,* improves financial reporting by amending GASB Statement No. 14, *The Financial Reporting Entity,* and Statement No. 34, *Basic Financial Statements – and Management's Discussion and Analysis – for State and Local Governments,* in blending component units: 1) if there is a financial benefit or burden relationship with the primary government; 2) management of the primary government has operational responsibility for the component unit's activities; and 3) if the total outstanding debt is expected to be repaid entirely or almost entirely with the resources of the primary government. GASB Statement No. 80, *Blending Requirements for Certain Component Units - an amendment of GASB Statement No. 14,* requires component units to be blended if they are incorporated as not-for-profit corporations and the primary government is the sole corporate member.

In addition to the legislative, executive, and judicial branches, the following organizations are included in these financial statements:

Component Units (Blended):

Blended component units are legally separate entities from the State, but are so intertwined with the State that they are, for all practical purposes, the same as the State. They are reported as part of the primary government and blended into the appropriate funds. The following component units are blended because they provide services entirely or almost entirely to the primary government:

Governmental Funds:

Board of Fund Commissioners – The Board was created by state law and is comprised of the Governor, Lieutenant Governor, Attorney General, State Treasurer, and the Commissioner of Administration. The Board's purpose is to issue, redeem, and cancel state general obligation bonds and perform other administrative activities related to state general obligation debt as assigned by law. Separate financial statements are not required or issued for the Board.

Board of Private Investigator and Private Fire Investigator Examiners – The Board was created by state law and is charged with the licensure and regulation of the practice of private investigators and private fire investigators in Missouri. The seven member board shall consist of three private investigators, two private fire investigators, and two public members, appointed by the Governor. The Board is appointed by the primary government. It is therefore considered blended special revenue fund and shown in the financial statements as part of the primary government.

Note 1 - Significant Accounting Policies (cont.)

Coordinating Board for Early Childhood – The Board was created by state law within the Missouri Children's Services Commission. The Board's purpose is to develop a comprehensive statewide long-range strategic plan for a cohesive early childhood system, and to work with public and private entities for the purpose of promoting and improving the development of Missouri's children from birth through age five. The 17 member Board is composed of representatives from the Governor's Office; the following departments: Health and Senior Services, Mental Health, Social Services, and Elementary and Secondary Education; the judiciary; the Family and Community Trust Board; the Head Start Program; and nine members appointed by the Governor. The majority of the board members are appointed by the primary government and, therefore, separate financial statements are not required for the Board.

Missouri State Penitentiary Redevelopment Commission – The Commission was established to coordinate the planning and redevelopment of the old Jefferson City Correctional Center. The ten member commission consists of three members appointed by the Jefferson City mayor, three members appointed by the Cole County Commission, and four members appointed by the Governor. The majority of the board members are appointed by the primary government. Therefore, it is considered a blended special revenue fund and is shown in the financial statements as part of the primary government.

Internal Service Funds:

Board of Public Buildings – This is reported with the State Facility Maintenance and Operation Fund. The Board was created by state law and its governing body is made up of the Governor, the Lieutenant Governor, and the Attorney General. Its purpose is to provide state buildings by issuing revenue bonds and to supervise the operations of these facilities. All construction contracts must be approved by the Division of Facilities Management, Design and Construction, and its projects must be approved by the General Assembly. The Board can require state agencies to occupy its projects. The General Assembly appropriates to the Board, on behalf of the state agencies, amounts sufficient to pay the principal and interest on the bonds and pay the costs of operations.

Conservation Employees' Insurance Plan – The Plan provides health and life insurance coverage to eligible employees and retirees of the Missouri Department of Conservation. The Plan is administered by a five member board of trustees made up of three members of the Plan appointed by the Conservation Commission which consist of two Conservation employees and Division Chief, the Chief Financial Officer, and the Human Resources Division Chief. Copies of the Plan's financial statements may be requested from:

Missouri Department of Conservation
P.O. Box 180
Jefferson City, Missouri 65102

Transportation Self-Insurance Plan – The Plan provides fleet vehicle liability, workers' compensation, and general liability insurance. The Plan is administered by the Missouri Department of Transportation. Additional information may be requested from:

Missouri Department of Transportation
Financial Services Division
P.O. Box 270
Jefferson City, Missouri 65102

Note 1 - Significant Accounting Policies (cont.)

Missouri State Employee's Insurance Plan – The Plan was created to provide basic life insurance to eligible members and is administered through the Missouri State Employees' Retirement System (MOSERS). Death benefits, optional life insurance, and long-term disability benefits are also provided by the Plan for certain members. Copies of the System's financial statements may be requested from:

Missouri State Employees' Retirement System
P.O. Box 209
Jefferson City, Missouri 65102-0209

Missouri Consolidated Health Care Plan (MCHCP) – The Plan was created by state law to provide medical benefits to its members and is administered by a board of trustees. The Board consists of two members of the Senate; two members of the House; six members appointed by the Governor; the Director of the Department of Health and Senior Services; the Director of the Department of Insurance, Financial Institutions and Professional Registration; and the Commissioner of Administration. The management of MCHCP is the responsibility of the Executive Director who is appointed by the Board. Copies of the Plan's financial statements may be requested from:

Missouri Consolidated Health Care Plan
P.O. Box 104355
832 Weathered Rock Court
Jefferson City, Missouri 65110-4355

MoDOT/MSHP Medical and Life Insurance Plan – The Plan provides health and life insurance coverage to eligible employees, retirees, and their dependents of the Missouri Department of Transportation (MoDOT) and the Missouri State Highway Patrol (MSHP). The Plan is administered by a board of trustees consisting of four active MoDOT employees, one retired MoDOT employee appointed by the Director of MoDOT, two active MSHP employees, and one retired MSHP employee appointed by the Superintendent of MSHP. Additional information may be requested from:

Missouri Department of Transportation
Financial Services Division
P.O. Box 270
Jefferson City, Missouri 65102

Pension (and other employee benefit) trust funds:

Missouri State Employees' Retirement System (MOSERS) – The System was created by state law and provides retirement, survivor, and disability benefits to its members and is administered by a board of trustees. The Board consists of two members of the Senate, two members of the House, two members appointed by the Governor, three members elected by the System's members, the State Treasurer, and the Commissioner of Administration. The management of MOSERS is the responsibility of the Executive Director who is appointed by the Board. The MOSERS Board of Trustees also oversees the State's Deferred Compensation Plan which is administered by a third party. Copies of the System's financial statements may be requested from:

Missouri State Employees' Retirement System
P.O. Box 209
Jefferson City, Missouri 65102-0209

Note 1 - Significant Accounting Policies (cont.)

Missouri Department of Transportation and Highway Patrol Employees' Retirement System (MPERS) – The System provides retirement, survivor, and disability benefits to qualified employees of the Missouri Department of Transportation, uniformed and non-uniformed members of the Missouri State Highway Patrol, and MPERS staff. The System is administered by a board of trustees consisting of three members of the Missouri Highways and Transportation Commission, the Director of the Missouri Department of Transportation, the Superintendent of the Missouri State Highway Patrol, one member of the Senate, one member of the House, one member elected by MoDOT employees, one member elected by the Missouri State Highway Patrol employees, one retired member elected by retired MoDOT employees, and one retired member elected by retired Missouri State Highway Patrol employees. Copies of the System's financial statements may be requested from:

Missouri Department of Transportation and
Highway Patrol Employees' Retirement System
P.O. Box 1930
Jefferson City, Missouri 65102-1930

Missouri Consolidated Health Care Plan (MCHCP) State Retiree Welfare Benefit Trust – The Trust was established on June 27, 2008, to provide health and welfare benefits for the exclusive benefit of current and future retired employees of the State and their dependents who meet eligibility requirements, except those covered by other State sponsored post-employment benefit plans. The Trust is administered by the MCHCP board of trustees, which also administers the benefits for the active participants of the Plan. The net position and activity related to active participants are reported in an internal service fund. Copies of the Plan's financial statements may be requested from:

Missouri Consolidated Health Care Plan
P.O. Box 104355
832 Weathered Rock Court
Jefferson City, Missouri 65110-4355

Missouri State Public Employees' Deferred Compensation Plan – The Missouri State Public Employees' Deferred Compensation Plan is administered by ICMA-RC and oversight of the Plan is provided by the MOSERS board of trustees. Under this Plan, employees are permitted to defer a portion of their current salary until future years. In addition, eligible employees have the opportunity to participate in the Missouri State Employees' Deferred Compensation Incentive Plan. Under this Plan, the State contributes $25, $30, or $35 per month on behalf of any employee who contributes at least that amount to the Missouri State Public Employees' Deferred Compensation Plan and who has been an employee of the State for at least one year. However, due to budget constraints, the State's contribution amount was suspended in March 2010. Copies of financial statements for both Plans may be requested from:

Plan Administrator
c/o MOSERS
P.O. Box 209
Jefferson City, Missouri 65102-0209

Note 1 - Significant Accounting Policies (cont.)

Component Units (Discretely Presented):

Discretely presented component units are legally separate entities for which the State is financially accountable. The financial data for these entities is reported separately from the financial data of the primary government.

Major

College and Universities - The Coordinating Board for Higher Education has certain responsibilities for these institutions and they receive State support. Following are the public college and universities included in the financial statements:

Harris-Stowe State University
3026 Laclede Avenue
St. Louis, Missouri 63103

Lincoln University
820 Chestnut Street
Jefferson City, Missouri 65102

Missouri Southern State University
3950 East Newman Road
Joplin, Missouri 64801-1595

Missouri State University
901 South National Avenue, Room 119
Springfield, Missouri 65897

Missouri Western State University
4525 Downs Drive
St. Joseph, Missouri 64507

Northwest Missouri State University
107 Administration Building
800 University Drive
Maryville, Missouri 64468-6001

Southeast Missouri State University
One University Plaza, Mail Stop 3200
Cape Girardeau, Missouri 63701

State Technical College of Missouri
One Technology Drive
Linn, Missouri 65051

Truman State University
Business Office
100 East Normal
Kirksville, Missouri 63501

University of Central Missouri
316 Administration Building
Warrensburg, Missouri 64093

University of Missouri System
118 University Hall
Columbia, Missouri 65211

Non-Major

Missouri Development Finance Board - The Board was created by state law as an independent, self-supporting, body corporate and politic to promote economic development of the State and was created within the Department of Economic Development. The Board is empowered to issue taxable, tax-exempt, and public purpose infrastructure industrial revenue bonds or notes; provide loans or loan guarantees to eligible businesses; provide loans and grants to political subdivisions to fund public infrastructure improvements; and issue tax credits against certain state income taxes in exchange for contributions made to the Board. The twelve member board is made up of the Lieutenant Governor and the Directors of the Department of Economic Development, the Department of Natural Resources, and the Department of Agriculture, who serve as ex-officio voting members, and eight members appointed by the Governor and confirmed by the Senate. Copies of the Board's financial statements may be requested from:

Missouri Development Finance Board
Governor Office Building
200 Madison Street, Suite 1000
Jefferson City, Missouri 65102

Note 1 - Significant Accounting Policies (cont.)

Missouri Agricultural and Small Business Development Authority - The Authority was created by state law and is authorized to issue bonds to finance agricultural and small business development loans for property acquisitions/renovations and pollution control facilities throughout the State. If for any reason, the Authority ceases to exist, all rights and properties of the Authority will pass to the State. Its governing body consists of seven members appointed by the Governor with the advice and consent of the Senate. Copies of the Authority's financial statements may be requested from:

Missouri Agricultural and Small
Business Development Authority
P.O. Box 630
1616 Missouri Boulevard
Jefferson City, Missouri 65102

Missouri Transportation Finance Corporation - The Corporation is a not-for-profit corporation organized under the Missouri Nonprofit Corporation Law. The Corporation is financed by federal highway and transit dollars, plus state and local matching funds. It is authorized to issue revenue bonds. The Corporation provides loans to assist public and private entities fund highway and transportation projects throughout the State. Missouri Transportation Finance Corporation's board determines which applicants are extended loans. Copies of the Corporation's financial statements may be requested from:

Missouri Department of Transportation
Central Office, Financial Services
105 West Capitol Avenue
Jefferson City, Missouri 65101

Missouri Wine and Grape Board – The Board was created by state law to further growth and development of the grape growing industry in Missouri and foster the expansion of the grape market for Missouri grapes. The eleven member board consists of seven members representing the grape and wine industry, food service industry, or media marketing industry.
The four other members include the director of the Department of Agriculture and the presidents of the Missouri Grape Growers Association, the Missouri Vintners Association, and the Missouri Wine Marketing and Research Council. Copies of the Board's annual report may be requested from:

Missouri Wine and Grape Board
P.O. Box 630
1616 Missouri Boulevard
Jefferson City, Missouri 65102

Related Organizations

Related organizations are excluded from the financial reporting entity because the State's accountability does not extend beyond appointing a voting majority of the organization's board members. Related organizations of the State of Missouri include:

Missouri Health and Educational Facilities Authority – finances health and educational facilities.

Missouri Higher Education Loan Authority – provides a secondary market for loans made under the Federal Family Education Loan Program.

Missouri Housing Development Commission – finances the purchase, development or rehabilitation of affordable housing and funds housing assistance.

Note 1 - Significant Accounting Policies (cont.)

Missouri Technology Corporation – promotes the modernization of businesses through the development of science and technology applications.

Missouri Public Entity Risk Management Fund – provides liability protection to participating public entities, their officials, and employees.

State Environmental Improvement and Energy Resources Authority – finances, acquires, constructs, and equips projects to reduce, prevent, and control pollution and develop the energy resources of the State.

Jackson County Sports Complex Authority – responsible for construction, operation, and financing of the Jackson County Sports Complex.

Kansas City Regional Sports Complex Authority – responsible for the study and review of all current major sports leagues, clubs, or franchises in Kansas City.

St. Charles County Convention and Sports Facility Authority – responsible for planning, constructing, and managing convention and sports facilities in the St. Charles area.

Missouri Cotton Growers' Organization – organized for boll weevil eradication.

KCT Intermodal Transportation Corporation – organized to pay for a railroad bridge in the Blue Valley Industrial District in Kansas City.

Westside Intermodal Transportation Corporation – organized to pay for rail additions and improvements of the Kansas City Terminal Railway.

Universal Service Board – organized to ensure just, reasonable, and affordable rates for comparable essential local telecommunication services throughout the State.

Interstate Commission for Adult Offender Supervision – responsible for promoting public safety and protecting the rights of victims through the control and regulation of the interstate movement of adults placed under community supervision.

Board of Trustees of the Missouri Mesothelioma Risk Management Fund – provides coverage of liabilities for participating employers relating to mesothelioma awards.

P-20 Council – organized to create a more efficient and effective education system that more adequately prepares students for the challenges of entering the workforce.

Missouri Propane Safety Commission – responsible for developing comprehensive plans and programs for the prevention, control, and abatement of propane-related accidents in Missouri.

Missouri Family Trust Board of Trustees – provides trust services for persons with disabilities.

Note 1 - Significant Accounting Policies (cont.)

B. Government-Wide and Fund Financial Statements

Government-Wide Financial Statements:

The government-wide financial statements focus on the government as a whole. The Statement of Net Position and Statement of Activities report information on all non-fiduciary activities of the primary government and its component units. Primary government activities are distinguished between governmental and business-type activities. Governmental activities generally are financed through taxes, intergovernmental revenues, and other non-exchange revenues. Governmental activities include governmental type funds and internal service funds. Business-type activities are financed in whole or in part by fees charged to external parties for goods or services and consist of enterprise funds.

The Statement of Net Position presents the reporting entity's non-fiduciary, assets, deferred outflows, liabilities, and deferred inflows with the difference reported as net position.

The Statement of Activities demonstrates the degree to which the direct expenses of a given function or segment are offset by program revenues. Direct expenses are those that are clearly identifiable within a specific function. Indirect costs, such as depreciation/amortization expense, are included in the direct expenses reported for individual functions. Program revenues include: 1) charges to customers or applicants who purchase, use, or directly benefit from goods, services, or privileges provided by a given function; and 2) grants and contributions that are restricted to meeting the operational or capital requirements of a particular function. Taxes and other items not meeting the definition of program revenues are instead reported as general revenues.

The government-wide financial statements are presented using the economic resources measurement focus and the accrual basis of accounting. Revenues are recorded when earned and expenses are recognized when incurred. Fiduciary funds have been excluded from the government-wide financial statements because, by definition, the resources of these funds cannot be used to support government operations. Generally, interfund transactions have also been eliminated. Some interfund transactions, such as the exchange of services, were not eliminated because doing so would mistakenly understate both expenses of the buyer and revenues of the seller.

Fund Financial Statements:

Separate financial statements are provided for governmental funds, proprietary funds, and fiduciary funds, even though fiduciary funds are excluded from the government-wide statements. For governmental and proprietary fund financial statements, the emphasis is on major individual governmental and enterprise funds, with each displayed in a separate column. All remaining governmental and enterprise funds are aggregated and reported as non-major funds. Internal service funds are also aggregated and reported in a separate column on the proprietary fund financial statements.

Note 1 - Significant Accounting Policies (cont.)

The governmental fund financial statements are presented using the current financial resources measurement focus and modified accrual basis of accounting. With the current financial resources measurement focus, only current assets and current liabilities are included on the balance sheet. Under the modified accrual basis of accounting, revenues are recognized in the accounting period in which they become both measurable and available to pay current period liabilities. Operating statements of governmental funds present increases (i.e., revenues and other financing sources) and decreases (i.e., expenditures and other financing uses) in fund balance. Material revenues susceptible to accrual include federal grants and sales and income taxes. Expenditures are recognized when the related fund liability is incurred except for the following:

- Principal and interest on general long-term debt is recorded as an expenditure when due.
- Compensated absences (accumulated vacation and compensatory time) and sick pay are recorded as expenditures when paid.
- Inventories are reported as expenditures when purchased, except for the Missouri Road Fund, which updates inventory perpetually under the consumption method.

The proprietary, pension (and other employee benefit) trust, and private-purpose trust fund financial statements are presented using the economic resources measurement focus and accrual basis of accounting. With the economic resources measurement focus, assets, deferred outflows, liabilities, and deferred inflows associated with the operation of these funds are included on the Statement of Net Position. Under the accrual basis of accounting, revenues are recognized in the period earned and expenses are recognized in the period incurred. Proprietary fund-type operating statements present revenues and expenses in total net position. Operating revenues and expenses in proprietary funds are classified as those activities that make up the primary ongoing operations associated with those funds. Non-operating revenues and expenses in proprietary funds are classified as those activities that are deemed incidental or unusual for those funds.

Agency funds are custodial in nature and do not present results of operations or have a measurement focus. The agency fund financial statements are presented on the accrual basis of accounting.

The discretely presented component unit financial statements are presented using the economic resources measurement focus and accrual basis of accounting with the following exception in regard to the college and universities. Revenues and related expenditures in connection with the summer sessions in progress at June 30 are deferred at that date.

The State reports the following major funds categories:

General Fund – accounts for all current financial resources not required by law or administrative action to be accounted for in another fund. Major revenues include contributions and taxes.

Public Education – provides general and special education needs of the State and other related areas such as library services and student loans. Major revenues include contributions and taxes.

Conservation and Environmental Protection – provides for the preservation of the State's wildlife and environment. Major revenues include contributions, taxes and licenses, fees, and permits.

Missouri Road Fund – accounts for revenues from highway users' fees, federal reimbursements for highway projects, and bond proceeds to be used for costs of constructing and maintaining an adequate state highway system. Major revenues are from contributions.

State Lottery – accounts for proceeds from the sale of lottery tickets and all other moneys credited to this fund. A minimum of 45% of the moneys are used for prizes. Major revenues are from sales of lottery tickets.

Note 1 - Significant Accounting Policies (cont.)

Unemployment Compensation – accounts for contributions, payments, and federal loans collected under the provisions of the Unemployment Compensation Law to pay benefits. Major revenues include federal and employer contributions.

Petroleum Storage Tank Insurance – accounts for moneys collected from transport load fees and participating owners of petroleum storage tanks for cleanup of contamination caused by releases from petroleum storage tanks. Major revenues are from fees.

C. Basis of Presentation

The State's financial practices are based upon fund accounting concepts. A fund is defined as a fiscal and accounting entity with a self-balancing set of accounts recording cash and other financial resources, together with all related liabilities and fund balances, and changes therein, that are segregated for the purpose of carrying on specific activities or attaining certain objectives in accordance with special regulations, restrictions, or limitations.

The accompanying financial statements are structured into three categories of funds and discretely presented component units:

Primary Government:

Governmental Funds include the General Fund, special revenue funds, debt service funds, capital projects funds, and permanent funds. These funds account for the revenues and expenditures, capital outlay, and certain debt service of the State.

Proprietary Funds include enterprise funds and internal service funds. These funds account for the cost of certain services provided by the State.

Fiduciary Funds include pension (and other employee benefit) trust funds, private-purpose trust funds, and agency funds. These funds account for assets held by the State in a trustee capacity or as an agent for individuals, other governments, and other entities.

Discretely Presented Component Units:

Major

College and Universities account for moneys from student tuition and fees, federal and state grants, debt proceeds, gifts and contributions, state appropriations, investments, and endowments. Assets, deferred outflows of resources, liabilities, deferred inflows of resources, and net position are accounted for on the Statement of Net Position. Revenues, expenses, gains, and losses are reported on the Statement of Revenues, Expenses, and Changes in Net Position/Statement of Activities.

Non-Major

Non-Major Component Units account for moneys from bond proceeds, loans, contributions, gifts, grants, and other revenue sources. Assets, deferred outflows of resources, liabilities, deferred inflows of resources, and net position are accounted for on the Statement of Net Position. Revenues, expenses, gains, and losses are reported on the Statement of Revenues, Expenses, and Changes in Net Position/Statement of Activities.

D. Cash and Cash Equivalents

For reporting purposes, cash and cash equivalents include bank accounts, petty cash, and all investments with an original maturity of 92 days or less, such as certificates of deposit, money market certificates, and repurchase agreements. Cash and cash equivalents on the Proprietary Funds Statement of Cash Flows are also reported under this definition. This definition excludes Fiduciary funds. Cash balances of most state funds are pooled and invested by the State Treasurer (see *Note 3)*.

Note 1 - Significant Accounting Policies (cont.)

E. Investments

These are long-term investments with an original maturity greater than 92 days which are expected to be held to maturity and redeemed at face value. The majority of investments are reported in pension (and other employee benefit) trust funds, however, investments are held in all fund types. Repurchase agreements held by the State Treasurer's Office are reported at amortized cost. The Missouri State Public Employees' Deferred Compensation Plan and the Missouri State Public Employees' Deferred Compensation Incentive Plan report their Stable Value Funds at contract value. All other investments of the State are reported at fair value.

There are multiple funds that have income from investments which are directed to the General Fund. These funds consist of special revenue, enterprise, internal service, private-purpose, and agency funds.

F. Interfund Receivables/Payables

The State makes various transactions between funds or between the primary government and component units to distribute interest earnings, finance operations, provide services, and acquire capital assets. These receivables at June 30 are classified as "due from other funds" or "due from primary government/component units" on the Balance Sheet and Statement of Net Position. Payables are classified as "due to other funds" or "due to primary government/component units" on the Balance Sheet and Statement of Net Position (see *Note 16)*. These receivables/payables are due within one year. Any receivables/payables that are due to and due from an enterprise fund are eliminated on the face of the Proprietary Funds Statement of Net Position. If any receivables/payables that remain after this elimination are both in the same activity (Governmental), they are eliminated at the Government-Wide Statement of Net Position. Interfund receivables/payables between the primary government and the component units are reclassified as accounts receivable/payable at the government-wide level. Any remaining interfund receivables/payables are reported as internal balances on the Government-Wide Statement of Net Position.

G. Advances to/from Other Funds

Long-term interfund receivables are classified as "advances to other funds" or "advances to primary government/component units" on the Balance Sheet and Statement of Net Position. Long-term interfund payables are classified as "advances from other funds" or "advances from primary government/component units" on the Balance Sheet and Statement of Net Position (see *Note 16)*. These receivables/payables are eliminated if both the receivable and payable are in the same activity (Governmental). Advances to/from that are between the primary government and the component units are reclassified as accounts receivable/payable at the government-wide level. Any remaining long-term interfund receivables/payables are reported as internal balances on the Government-Wide Statement of Net Position.

H. Inventories

Inventories in the governmental funds consist of expendable supplies held for consumption, the cost of which is recorded as an expenditure at the time of purchase, except for the Missouri Road Fund, which updates inventory perpetually under the consumption method. Inventory balances for governmental funds are shown in the nonspendable fund balance classification. Inventories in the proprietary funds consist of both expendable supplies held for consumption and the cost of goods held for resale, the cost of which is recorded as an expense as they are used. Inventories are valued at cost using various methods such as moving average; weighted average; and first-in, first-out.

Note 1 - Significant Accounting Policies (cont.)

I. Capital Assets

Capital assets, which include construction in progress, software in progress, infrastructure in progress, land, land improvements, permanent and temporary easements, buildings and improvements, equipment, software, trademarks, and infrastructure assets, are valued at historical cost or estimated historical cost if actual historical cost is not available. The estimate of historical cost was based on current appraised value indexed to the date of acquisition. Donated capital assets are reported at estimated acquisition value at the time received. Capital assets acquired through lease agreements are capitalized at the inception of the agreement (see *Notes 5 and 6)*.

Infrastructure assets (including highways, bridges, streets and sidewalks, drainage systems, lighting systems, and similar items) are capitalized. Interest costs incurred during construction of capital assets are not capitalized.

The capitalization threshold for all capital assets is as follows: land improvements – $15,000, buildings and improvements – $15,000, software and trademarks – $5,000, and equipment – $1,000. No dollar threshold is set for land, easements, or infrastructure.

Capital assets are depreciated/amortized using the straight-line method of depreciation/amortization over the following useful lives: buildings – 40 to 50 years, land improvements and building improvements – 15 to 20 years, temporary easements – term of easement, equipment – 2 to 5 years, software – 3 to 5 years, trademarks – 10 years, and infrastructure – 12 to 50 years. Construction in progress, software in progress, infrastructure in progress, land, and permanent easements are not depreciated/amortized.

Most works of art and historical treasures are not capitalized or depreciated/amortized. The State's non-capitalized collections include the historical artifacts at the various state museums and historical sites, monuments, and other art throughout the capitol grounds. Assets that were previously capitalized continue to be reported in the government-wide financial statements.

Component unit capital assets are stated at cost and are depreciated/amortized using the straight-line method of depreciation/amortization over the following useful lives: buildings – 40 years, land improvements and building improvements – 20 years, equipment – 5 to 15 years, and software – 3 to 5 years.

J. Deferred Outflow of Resources and Deferred Inflow of Resources

In addition to assets, the Statement of Net Position/Balance Sheet may report a separate line item for deferred outflows of resources. Deferred outflows of resources consist of the decrease of net position by the State that is applicable to a future reporting period and will not be recognized as outflow of resources (expense/expenditure) until then.

In addition to liabilities, the Statement of Net Position/Balance Sheet may report a separate line item for deferred inflows of resources. Deferred inflows of resources consist of the increase of net position by the State that is applicable to a future reporting period and will not be recognized as inflow of resources (revenue) until then.

K. Unearned Revenues

Unearned revenues are amounts collected in advance of the year in which earned.

Note 1 - Significant Accounting Policies (cont.)

L. Long-Term Debt

Long-term liabilities that will be financed from governmental funds are not reported on the fund financial statements. However, the long-term liabilities are reported on the government-wide financial statements. The reconciliation between fund financial statements and government-wide financial statements includes a line item for the long-term liabilities of governmental funds. These long-term liabilities include the following:

1. Due to Other Entities includes outstanding principal on advances from other governments and contractual obligations to other governments. The expenditures are recorded in the appropriate governmental funds when the liability is paid (see *Note 11)*.

2. Outstanding principal for general obligation debt. The expenditure for payment of principal and interest for general obligation debt is recorded in the debt service funds when paid (see *Note 12)*.

3. Outstanding principal for bonds issued by the Board of Public Buildings, bonds issued by the Health and Educational Facilities Authority, the Regional Convention and Sports Complex Authority, the Missouri Development Finance Board, and the State Road Bonds issued by the Missouri Highways and Transportation Commission. The expenditure for payment of principal and interest for these bonds is recorded in the appropriate governmental funds when paid (see *Note 12)*.

4. Bond premiums are deferred and amortized over the life of the bonds using the effective interest rate method in the government-wide financial statements. Bonds payable are reported net of the applicable bond premium.

   In the fund financial statements, governmental fund types recognize bond premiums during the current period. Premiums on debt issuances are reported as other financing sources (see *Note 11)*.

5. Obligations under lease/purchases reported include the present value of net minimum future lease payments, which will be paid from the General Fund, various special revenue funds, proprietary funds, and the Missouri Road Fund (see *Notes 6 and 11)*.

6. Pollution remediation liabilities are measured based on the pollution remediation outlays expected to be incurred to settle those liabilities. These liabilities include all remediation work that the State expects to perform, including work expected to be performed for other responsible parties or potentially responsible parties, whether or not the State is required to do that work. For goods or services used for pollution remediation activities, amounts that are normally expected to be liquidated with expendable available financial resources are recognized as liabilities upon receipt of those goods and services (see *Note 11 and 23)*.

7. Compensated absences include accumulated unpaid vacation and compensatory time accruals and related employer payroll taxes. These amounts are not accrued in the governmental funds, but are recorded as expenditures when paid (see *Note 11)*.

   Vacation leave is accumulated at a rate of 10 to 14 hours per month depending on the number of years of employment. Accumulated vacation leave cannot exceed twice the number of vacation hours earned annually. Compensatory time is accumulated as earned by an individual employee.

   Sick leave is accumulated at a rate of 10 hours per month with no limit to the amount which can be accumulated. Accumulated sick leave is not paid upon employee termination and does not represent a liability of the State. However, unused sick leave may be converted to additional credited service upon retirement (usable only for benefit computation, not eligibility).

Note 1 - Significant Accounting Policies (cont.)

8. Claims and contingent liabilities include estimates of the risk of loss related to tort liability, general liability, motor vehicle liability, contractor liability, and injuries to employees. These liabilities are reported when it is probable that a loss has occurred and the amount of loss can be reasonably estimated. These losses include an estimate of claims that have been incurred, but not reported. Expenditures are recorded in the fund from which the liability is paid (see *Notes 11, 22, and 24)*.

9. The State provides postemployment health care (OPEB) and life insurance benefits to the majority of employees who either retire from the State or receive long-term disability benefits. These benefits are administered by the Missouri Consolidated Health Care Plan (MCHCP), the Missouri State Employees' Retirement System (MOSERS), the MoDOT/MSHP Medical and Life Insurance Plan (MHPML), and the Conservation Employees' Insurance Plan (CEIP). MCHCP is a cost-sharing multiple-employer defined benefit plan, while MHPML and CEIP are single-employer defined benefit plans. Health care benefits and MOSERS life insurance benefits are funded through both employer and employee contributions. The University of Missouri's OPEB plan is a single-employer defined benefit plan for all qualified employees.

   For the purposes of measuring the total/net OPEB liability, deferred outflows of resources and deferred inflows of resources related to OPEB, and OPEB expense, information about the fiduciary net position and additions to/deductions from have been recognized on the same basis as they are reported by the plans. Employer contributions are recognized as revenue and reported when due and payable. Benefits are recognized when due and payable in accordance with the terms of the plan. Investments are reported at fair value (see *Note 8)*.

10. The State has two major retirement systems which cover substantially all State employees and a retirement plan for University of Missouri employees. These systems are the Missouri State Employees' Retirement System (MOSERS) and the Missouri Department of Transportation and Highway Patrol Employees' Retirement System (MPERS). The Missouri State Employees' Plan (MSEP) is a cost-sharing multiple employer defined benefit public employee retirement plan administered by MOSERS. MOSERS also administers the Judicial Plan, a single-employer defined benefit public employee retirement plan. MPERS is a single-employer defined benefit public employee retirement plan. The University of Missouri Retirement, Disability, and Death Benefit Plan is a single-employer defined benefit plan for all qualified employees.

    For purposes of measuring the net pension liability, deferred outflows of resources and deferred inflows of resources related to pensions, and pension expense, information about the fiduciary net position and additions to/deductions from the fiduciary net position have been determined on the same basis as they are reported. For this purpose, benefit payments (including refunds of employee contributions) are recognized when due and payable in accordance with the benefit terms. Investments are reported at fair value (see *Note 7)*.

Long-term liabilities of all proprietary, pension (and other employee benefit) trust, and private-purpose trust funds are accounted for in the respective funds.

M. Net Position and Fund Balance

The difference between fund assets, deferred outflows, liabilities, and deferred inflows is reported as "Net Position" on the government-wide, proprietary, and fiduciary fund statements and "Fund Balance" on the governmental fund financial statements.

Net Position is reported in three categories:

Net Investment in Capital Assets – An account used to segregate the portion of net position attributable to capital assets and related debt. It consists of capital assets, net of accumulated depreciation/amortization and reduced by outstanding balances of bonds, notes, and other debt that are attributed to acquisition, construction, or improvement of those assets.

Note 1 - Significant Accounting Policies (cont.)

Restricted Net Position – An account used to segregate the portion of net position that have constraints on their use, which are either externally imposed by creditors, grantors, contributors, and the like, or imposed by law through enabling legislation.

Enabling legislation authorizes the State to assess, levy, charge, or otherwise mandate payment of resources (from external resource providers) and includes a legally enforceable requirement that those resources be used only for the specific purposes stipulated in the legislation. At June 30, 2018, net position restricted by enabling legislation equaled $500,692,000 for governmental activities.

Unrestricted Net Position – An account used to segregate the portion of net position that does not meet the definition of the two preceding categories.

When both restricted and unrestricted resources are available for use, generally the State uses restricted resources first, then unrestricted resources as they are needed. However, there may be instances in which restricted funds may only be spent in proportion to unrestricted funds spent.

Governmental Fund Balance Classifications

The State's fund balances are classified as:

Nonspendable – Amounts that are not expected to be converted to cash or amounts that are legally or contractually required to be maintained intact.

Restricted – Amounts that are restricted for specific purpose due to constraints that are externally imposed by creditors, grantors, contributors, laws and regulations of other governments, or imposed by law through constitutional provisions or enabling legislation.

Committed – Amounts that can only be used for specific purposes pursuant to constraints imposed by a formal action of the legislature. Committed amounts cannot be used for other purposes unless the General Assembly passes legislation to remove the restraints.

Assigned – Amounts that are constrained by the legislature's intent to be used for a specific purpose, but do not meet the criteria for restricted or committed. The constraint for assigned fund balance is established by the Revised Statutes of the State of Missouri.

Unassigned – Amounts that do not meet the criteria of any of the classifications listed above.

Negative Fund Balance

A negative fund balance is prohibited in all fund balance classifications except Unassigned. When a negative fund balance exists, the shortfall would be covered by the next fund balance classification for that specific purpose.

N. Interfund Transactions

During the fiscal year, the State incurs various transactions between funds, including expenditures and transfers of resources to distribute interest earnings, finance operations, provide services, service debt, and acquire capital assets. Interfund transactions consist of these three types:

1. Transactions that would be treated as revenues or expenditures/expenses, if they involved organizations external to the State, are similarly treated when involving other funds of the State. Major transactions that fall into this category include payments to internal service funds from other funds for services rendered and to agency funds for contributions for employee benefits.

2. Transactions that reimburse another fund for an expense reduce the expenses of the fund that is being reimbursed and increase the expenses for the fund doing the reimbursement. Therefore, they are not shown on the face of the statements.

Note 1 - Significant Accounting Policies (cont.)

3. Operating subsidies and transfers from funds receiving revenues to funds through which the resources are to be expended are classified as transfers (see *Note 17)*. These transactions are eliminated on the face of the financial statements if the transfer in and transfer out are either both in governmental funds or both in enterprise funds. Of the remaining transfers, any transfers in and transfers out that are within the governmental activities are eliminated at the Government-Wide Statement of Activities.

O. Property Taxes

Presently there is a state property tax of three cents on each hundred dollars assessed valuation on all real estate and personal property. The tax collected is deposited into the Blind Pension Fund, which is a component of social assistance.

Property taxes in Missouri are levied by October 31 of each year on assessed valuation as of January 1 of that year. Property taxes are due and payable by December 31 and penalties on unpaid taxes are imposed after that date. Assessed values are established by each county assessor's office and are calculated as a percent of market value except for agricultural land which is calculated on productive capability. The percentage for real property varies according to use: residential at 19%, commercial at 32%, and agricultural at 12%. Personal property is assessed according to type with the majority at 33 1/3% of market value.

Note 2 - Reporting Changes and Classifications

The State of Missouri implemented the following new accounting standards issued by the Governmental Accounting Standards Board (GASB) for the fiscal year ending June 30, 2018:

- GASB Statement No. 75, *Accounting and Financial Reporting for Postemployment Benefits Other than Pensions*, which replaces existing and establishes new accounting and financial reporting standards for other postemployment benefits (OPEB) that are provided to the employees of state and local governmental employers. This Statement establishes standards for recognizing and measuring liabilities, deferred outflows of resources, deferred inflows of resources, and expense/expenditures. For defined benefit OPEB, this Statement identifies the methods and assumptions that are required to be used to project benefit payments, discount projected benefit payments to their actuarial present value, and attribute that present value to periods of employee services. Note disclosure and required supplementary information requirements for OPEB are also addressed. The implementation of this statement is reflected in *Note 8 - Other Postemployment Benefits* of the financial statements.

- GASB Statement No. 81, *Irrevocable Split-Interest Agreements*, which provides standards for the recognition and measurement requirements for irrevocable split-interest agreements. The implementation of this statement resulted in the University of Missouri to record a Deferred Inflow of Resources for changes in the University's remainder interest.

- GASB Statement No. 85, *Omnibus 2017*, which addresses practice issues that have been identified during implementation and application of certain GASB statements. The topics addressed include issues related to blending component units, goodwill, fair value measurement and application, and OPEB. The implementation of this statement did not have an impact on the financial statements.

- GASB Statement No. 86, *Certain Debt Extinguishment Issues*, which provides accounting and financial reporting standards for transactions in which cash and other monetary assets acquired with only existing resources or acquired with refunding debt proceeds are placed in an irrevocable trust for the sole purpose of extinguishing debt. It also addresses accounting and financial reporting requirements for prepaid insurance related to debt extinguishment. Additional disclosures are required for all in-substance defeasance transactions as well. The implementation of this statement did not have an impact on the financial statements.

Note 3 - Deposits and Investments

The State Treasurer's Office maintains a cash and short-term investment pool that is used by substantially all state funds of the primary government. These funds do not include accrued interest. Certain organizational units are authorized to administer assets designated to their organization in a manner similar to the deposit and investment activities of the State as a whole. Summarized on the following page is the portfolio that represents the "Cash and Cash Equivalents," "Investments," "Restricted Assets – Cash and Cash Equivalents," and "Restricted Assets – Investments" as reported at June 30, 2018.

A. Deposits

The State minimizes custodial credit risk by restrictions set forth in state law and stipulations in the State Treasurer's Office Investment Policy. Custodial credit risk is risk that, in the event of the failure of a depository financial institution, the State will not be able to recover deposits or will not be able to recover collateralized securities that are in the possession of an outside party. Statutes restrict the State Treasurer's Office to deposit funds in financial institutions that are physically located in Missouri, which are selected based on financial stability and community involvement. The financial institution's loan to deposit ratio must exceed 50% at the time of deposit and deposits must be collateralized at least 100% in excess of FDIC coverage with approved securities. Deposits must have a maturity of five years or less and earn interest at varying rates based on State law.

Primary Government

At June 30, 2018, the bank balance of the primary government's deposits was $1,575,317,000. Of the bank amount, $19,485,000 was exposed to custodial credit risk by being uninsured and collateralized with securities held by the pledging financial institutions, $918,533,000 was held by the U.S. Treasury, and the remainder was not exposed to custodial risk.

Fiduciary

At June 30, 2018, the bank balance of the deposits of the fiduciary funds was $96,660,000.

Component Units

Information on the component units' deposits is available within their individual financial statements.

B. Investments

Statutes authorize the State Treasurer's Office to invest in U.S. Treasury or Agency securities maturing within five years, commercial paper and banker's acceptances maturing within 180 days, or in repurchase agreements maturing within 90 days secured by U.S. Treasury, or Agency securities of any maturity. There have been no violations of these investment restrictions during fiscal year 2018.

The State Treasurer's Office minimizes credit risk, the risk of loss due to the failure of the security issuer or backer, by establishing a pre-approved list of financial institutions and companies that will be used to purchase commercial paper. The State Treasurer's Office also conducts regular credit monitoring, pre-qualifies the financial institutions and brokers/dealers with which the State Treasurer's Office will do business for broker services and repurchase agreements, and diversifies the portfolio to reduce potential losses on individual securities.

Custodial credit risk is the risk that, in the event of failure of the counterparty to a transaction, the State will not be able to recover the value of their investment or collateral securities that are in the possession of an outside party. The State Treasurer's Office minimizes custodial credit risk by requiring that all securities be held in the State's name at the State's custodial bank, Wells Fargo Bank, National Association, or at one of the State Treasurer's Office approved collateral custodians.

Note 3 - Deposits and Investments (cont.)

Primary Government

At June 30, 2018, the reported amount of the primary government's investments was $3,699,058,000. Of this amount, $156,866,000 was exposed to custodial credit risk because it was uninsured and unregistered with securities held by the State's counterparty.

Fiduciary

At June 30, 2018, the reported amount of the fiduciary funds investments was $17,303,744,000.

Component Units

Information on the component units investments is available within their individual financial statements.

The following table (in thousands of dollars) provides information about the interest rate risks associated with the State's investments. Statutes also authorize investment of funds not held by the State Treasurer's Office. The externally-held internal service funds, the agency and pension (and other employee benefit) trust funds, and the component units, in accordance with statutory authority, invest primarily in U.S. government securities, repurchase agreements, preferred and common stocks, bonds, real estate, fixed income securities, mutual funds, and investments in limited partnerships. The investments include certain short-term cash equivalents, various long-term items, and restricted assets by maturity, or in certain instances, a weighted average maturity in years. The State Treasurer's Office minimizes the risk of the market value of securities falling due to changes in interest rates by maintaining an effective duration of less than 2.5 years, and holding at least 25% of the portfolio's total market value in securities with a maturity of 12 months or less.

	Maturity in Years					
	Less than 1	1-5	6-10	More than 10	No Maturity	Total Fair Value *

Total Investments	$ 6,688,487	$ 5,267,623	$ 157,230	$ 2,005,208	$ 6,884,254	$ 21,002,802

*The State Treasurer's Office reports their repurchase agreements in the amount of $1,167,000 at amortized costs. The Missouri State Public Employees Deferred Compensation Plan and the Missouri State Public Employees Deferred Compensation Incentive Plan reports their Stable Value Funds in the amounts of $470,000 and $349,000 respectively, at contract value.

The State minimizes concentration of credit risk, the risk attributed to the magnitude of an investment in a single issuer. State statute prohibits the State Treasurer's Office from investing more than 10% of the total time deposits with any single financial institution. State investment policy limits investment in commercial paper to 5% of the total portfolio per issuer and no more than 15% of the total portfolio may be invested in repurchase agreements with a single counterparty. There are no restrictions in the amount that can be invested in U.S. securities. During fiscal year 2018, the State did not have any instances of noncompliance with these requirements and policies.

Note 3 - Deposits and Investments (cont.)

Fair Value Measurement

The State of Missouri categorizes its fair value measurements within the fair value hierarchy established by GASB Statement No. 72, *Fair Value Measurements and Application.* The hierarchy is based on the valuation inputs used to measure the fair value of the asset and give the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements).

- Level 1 – Unadjusted quoted prices for identical instruments in active markets.
- Level 2 – Quoted prices for similar instruments in active markets; quoted prices for identical or similar instruments in markets that are not active; and model-derived valuations in which all significant inputs are unobservable.
- Level 3 – Valuations derived from valuation techniques in which significant inputs are unobservable.

Investments that are measured at fair value using the net asset value per share (or its equivalent) as a practical expedient are not classified in the fair value hierarchy.

The categorization of investments within the hierarchy is based upon the pricing transparency of the instrument and should not be perceived as the particular investment's risk.

In instances where inputs used to measure fair value fall into different levels in the fair value hierarchy, fair value measurements in their entirety are categorized based on the lower level input that is significant to the valuation. The State's assessment of the significance of particular inputs to these fair value measurements requires judgment and considers factors specific to each asset or liability.

The State Treasurer's Office uses the market approach for the determination of the fair value of investments, except for repurchase agreements, which are measured at amortized costs.

Debt, equities, and investment derivatives classified in level 1 of the fair value hierarchy are valued using prices quoted in active markets for those securities.

Debt securities and liabilities classified in level 2 have non-proprietary information that was readily available to market participants from multiple independent sources, which are known to be actively involved in the market. Pricing inputs may include market quotations, yields, maturities, call features, and ratings. A portion of the derivative securities classified in level 2 are securities whose values are derived daily from associated traded securities. Other investments listed as level 2 include debt securities where an independent pricing evaluator had direct observable information, including: trading volume, multiple sources of market data and benchmark spreads. FX forwards are included due to the valuation coming from observable forward rates on the underlying currencies. The equity index swap is included because valuation inputs include an observable interest rate and the underlying index.

Private equity securities classified at level 2 are valued at the price observed in subsequent market activity.

Investments listed as level 3 include debt securities where an independent pricing evaluator did not have direct observable information for comparable securities. Significant inputs used in the valuation are not available aside from the evaluator providing the price. Direct investments in private equity, real estate, credit, and real assets are included because the valuation techniques utilize discounted cash flows or other non-observable market information.

The following is a description of valuation methodologies used for assets recorded at fair value.

[1]Activist equity – This value is 100% from MPERS. Consisting of 2 funds, this strategy focuses on obtaining publicly traded shares of companies and effecting changes within the companies that it owns whether that be value creation through operational, financial or corporate governance changes. One fund's focus is on North American companies and the other fund's focus is on European and Nordic companies. Due to contractual lock-up restrictions and the necessity for activist managers to retain capital in order to realize desired company changes, 50% of this strategy's investments are eligible for redemption on a rolling 3-year basis. The remaining 50% are eligible for redemption on a rolling 1-year basis.

[2]Commodity trading advisors – This value is 100% from MPERS. Consisting of 1 fund, the focus is on a systematic strategy that follows medium-term trends. The value of this investment is eligible for redemption in the next 2 months.

Note 3 - Deposits and Investments (cont.)

[3]Long/short equity hedge funds – This value is 94.9% from MOSERS and 5.1% from MPERS. Consisting of 3 funds for MOSERS and 1 fund for MPERS, this strategy invests both long and short in U.S. and global equity securities, with a goal of adding growth and minimizing market exposure. Due to contractual lock-up restrictions, these investments remain restricted ranging anywhere from 4 to 12 months for MOSERS and within 6 months for MPERS.

[4]Equity market neutral hedge fund – This value is 86.5% from MOSERS and 13.5% from MPERS. For MOSERS, this consists of 1 fund whereby the strategy invests both long and short in U.S. and global equity securities, with the goal of having little to no net market exposure. This investment is redeemable quarterly and is not subject to lockup restrictions. For MPERS, this consists of 1 fund whereby the strategy invests in both long and short equities capturing price differences and seeks to maintain a neutral exposure to the market by having no sector, industry, market capitalization, or country biases. Due to contractual lock-up restrictions, the value of these investments is eligible for redemption in the next 4 months.

[5]Event driven hedge funds – This value is 94.4% from MOSERS (with a redemption period of 60-65 days) and 5.6% from MPERS (with a redemption period of 90 days). Consisting of 1 fund for MOSERS and 1 fund for MPERS, this strategy seeks to gain an advantage from pricing inefficiencies that may occur in the onset or aftermath of a merger, corporate action, or related event. Due to contractual lock-up restrictions, (a) approximately 19% of the value of these investments are eligible for redemption quarterly, with the remaining 81% of the value of these investments remaining restricted for 4 to 20 months for MOSERS and (b) the value of these investments is eligible for redemption in the next 4 months for MPERS.

[6]Fund-of-funds – This value is 100% from MOSERS. Consisting of 1 fund, this fund seeks to provide diversification by holding a number of funds within a single fund structure. This investment is redeemable monthly and is not subject to lock-up restrictions.

[7]Global asset allocation – This value is 100% from MPERS. Consisting of 1 fund, this strategy is highly diversified and uses fundamental research to develop systematic rules for trading positions. Due to contractual lock-up restrictions, the value of these investments is eligible for redemption in the next 35 days.

[8]Pending liquidated hedge funds – This value is 98.5% from MOSERS and 1.5% from MPERS. MOSERS has 11 hedge funds that have been fully redeemed as of June 30, 2018, which are awaiting final distribution of the proceeds. MPERS has a small investment in 2 hedge funds that are in liquidation and have been closed, which are awaiting the sale of the final assets.

[9]Macro hedge funds – This value is 100% from MOSERS. Consisting of 2 funds, this strategy seeks to take advantage of macroeconomic dislocations between countries by trading a number of different markets and financial instruments. This investment is redeemable monthly and quarterly and is not subject to lock-up restrictions.

[10]Merger arbitrage hedge fund – This value is 100% from MOSERS. Consisting of 1 fund, this strategy invests in the common stock of companies that are involved in publicly announced mergers and seeks to generate attractive returns while dampening volatility. This investment is redeemable monthly and is not subject to lock-up restrictions.

[11]Multi-strategy hedge fund – This value is 100% from MPERS. Consisting of 2 funds, these investments aim to pursue varying strategies in order to diversify risks and reduce volatility. Due to contractual lock-up restrictions, the value of these investments are eligible for redemption in the next 6 months.

[12]Risk parity funds – This value is 100% from MOSERS. Consisting of 2 funds, these strategies attempt to build a more efficient portfolio through an equal risk methodology. They take long only positions across equity indices, developed nominal bonds, TIPS, commodities and credit. Diversification benefits decrease both the expected return and volatility thus requiring leverage to maintain a similar return to a more conventional portfolio. These investments are redeemable monthly and are not subject to lock-up restrictions.

[13]Risk premia hedge funds – This value is 100% from MOSERS. Consisting of 1 funds, this strategy seeks to capture hedge fund betas through the use of systematic, bottoms up security selection across major hedge fund strategies. Style premia such as value, momentum and carry help build the long/short portfolios. This investment is redeemable at least monthly and is not subject to lock-up restrictions.

Note 3 - Deposits and Investments (cont.)

[14]Structured credit – relative value – This value is 100% from MPERS. Consisting of 1 fund, this strategy's main focus is to benefit from valuation discrepancies that may be present in related financial instruments by simultaneously purchasing or selling these instruments. Due to contractual lock-up restrictions, all funds are eligible for redemption within the next six months.

[15]Commingled international equity funds – This value is 73.3% from MOSERS (with a redemption period of 1-30 days) and 26.7% from MPERS (with a redemption period of 0-30 days and 90 days). These international equity funds (3 for MOSERS and 3 for MPERS) are considered to be commingled in nature. For MOSERS, each are valued at the net asset value held at the end of the period based upon the fair value of the underlying investments. For MPERS, due to contractual lock-up restrictions, 70% of this capital is eligible for redemption in 1 month; the remaining 30% has daily liquidity.

[16]MOSERS Investment Portfolio (MIP) fund - This value is 86.4% from the Deferred Compensation Plan and 13.6% from the Deferred Compensation Incentive Plan. Participant transactions (purchases and sales) may occur monthly. The significant investment strategies are designed to achieve long-term total returns, comprised of capital appreciation and income. There are no unfunded commitments. There are generally no restrictions as to the redemption of these investments nor do the Plans have any contractual obligations to further invest in any of these funds.

[17]Missouri target date funds - This value is 77.5% from Deferred Compensation Plan and 22.5% from the Deferred Compensation Incentive Plan. Participant transactions (purchases and sales) may occur daily. The significant investment strategies of the funds are to seek the highest total return over time, consistent with the fund's asset mix. The asset allocations within these target date funds adjust automatically over time. Each fund invests more aggressively in its early years and becomes more conservative as it reaches its time horizon. There are no unfunded commitments. There are generally no restrictions as to the redemption of these investments nor are there any contractual obligations to further invest in any of these funds.

[18]Private equity, real estate and timber funds – This value is 100% from MOSERS. MOSERS' private equity portfolio consists of 46 funds with exposure to buyout funds, distressed funds, infrastructure, energy, royalty funds, and special situations. The real estate portfolio, comprised of five funds, invests mainly in U.S. commercial real estate. The timber portfolio consists of 3 funds which invests in global timberland. The fair values of the majority of these funds has been determined using net assets valued 1 quarter in arrears plus current quarter cash flows. These funds are not eligible for redemption. Distributions are received when underlying investments within the funds are liquidated, which on average, can occur over the span of 5 to 10 years.

The State Treasurer's Office requires investments in commercial paper and bankers' acceptances to have the highest letter and numerical ranking (such as A1/P1) as rated by at least two Nationally Recognized Statistical Rating Organizations (NRSROs). The Treasurer does not have any additional policies regarding credit ratings of investments.

Note 3 - Deposits and Investments (cont.)

Note 3 - Deposits and Investments (cont.)

Foreign currency risk is the risk that changes in exchange rates will adversely affect the fair value of an investment or a deposit. The State Treasurer's Office does not have any deposits or investments in foreign currency and therefore does not have a policy regarding foreign currency risk. The Missouri State Employees' Retirement System and the Missouri Department of Transportation and Highway Patrol Employees' Retirement System do have foreign currency deposits and investments which may be used for hedging purposes. The following table (in thousands of dollars) provides information on deposits and investments held in various foreign currencies, which are stated in U.S. dollars.

C. Securities Lending Program

Missouri State Employees' Retirement System:

The Missouri State Employees' Retirement System's (MOSERS) board of trustees' investment policies permit the pension trust funds to participate in a securities lending program. Certain securities of the pension trust funds are loaned to participating brokers who provide collateral in the form of cash, U.S. Treasury or government agency securities, or letters of credit issued by approved banks. Collateral must be provided in the amount of 102% of market value for domestic loans and 105% of market value for international loans. MOSERS does not have the authority to pledge or sell collateral securities without borrower default.

Deutsche Bank AG, New York Branch served as the agent for the fixed income, domestic equity, and international equity securities lending programs. MOSERS reduces credit risk by allowing Deutsche Bank to lend these securities to a diverse group of dealers on behalf of MOSERS. Deutsche Bank provides indemnification against dealer default. With each of MOSERS' securities lending programs, a majority of loans are open loans and can be terminated on demand by either MOSERS or the borrower. Net income from the three lending programs is split on a 90/10 basis between MOSERS and Deutsche Bank, respectively.

Daily monitoring of securities that are on loan ensure proper collateralization levels and mitigate counterparty risk. Cash collateral from all three programs is commingled and invested in a separately managed short-term investment account for MOSERS. The cash collateral account is managed by Deutsche Bank. On June 30, 2018, there were no securities on loans or cash collateral held in the account. At June 30, 2018 and June 30, 2017, MOSERS had earned $0 and $22,000, respectively, on the securities lending program.

Missouri Department of Transportation and Highway Patrol Employees' Retirement System:

In accordance with the investment policies set by the board of trustees, the Missouri Department of Transportation and Highway Patrol Employees' Retirement System (MPERS), lends its securities to broker-dealers and banks pursuant to a form of loan agreement. MPERS custodial bank, Northern Trust, is authorized to lend available securities to approved broker-dealers and banks subject to the receipt of acceptable collateral.

MPERS may lend securities and receive cash, securities insured or guaranteed by the U.S. government or its agencies, and irrevocable bank letters of credit as collateral. MPERS cannot pledge or sell non-cash collateral unless a borrower defaults. Borrowers are required to deliver collateral for each loan equal to: 1) 102% of the fair value of the loaned securities plus any accrued interest in the case of loaned securities denominated in United States dollars or whose primary trading market is located in the United States, and 2) 105% of the fair value of the loaned securities plus any accrued interest in the case of loaned securities not denominated in United States dollars or whose primary trading market was not located in the United States.

MPERS did not impose any restrictions during the fiscal year on the amount of the loans that the custodial bank made on its behalf. There were no known failures by any borrowers to return loaned securities or pay distributions thereon during the year.

MPERS and borrowers maintained the right to terminate all securities lending transactions on demand. At June 30, 2018, the cash collateral fund had a fair value of $133,616,000.

At June 30, 2018 and June 30, 2017, MPERS had earned $193,000 and $278,000, respectively, on the securities lending program.

Component Units:

Information on the component units securities lending program is available within their individual financial statements.

Note 3 - Deposits and Investments (cont.)

D. Derivatives

Missouri State Employees' Retirement System:

While the Board has no formal policy specific to derivatives, Missouri State Employees' Retirement System (MOSERS), through its external investment managers, holds investments in futures contracts, swap contracts and forward foreign currency exchange contracts. MOSERS does not anticipate additional significant market risk from the derivative arrangements. The forward foreign currency exchange contracts are used primarily to hedge against changes in exchange rates related to foreign equities. For the year ended June 30, 2018, the change in fair value of the foreign exchange contracts resulted in $600,000 of investment loss. MOSERS could be exposed to risk if the counterparties to the contracts are unable to meet the terms of the contracts. MOSERS anticipates that the counterparties will be able to satisfy their obligation as credit evaluations and credit limits are monitored by the investment managers. MOSERS also invests in mortgage-backed securities to diversify the portfolio and increase the return while minimizing the extent of risk. At June 30, 2018, MOSERS Foreign Currency Forward Contracts had a pending receivable of $19,335,000 and a pending payable of $20,061,000 resulting in a final liability of $726,000.

The following table (in thousands of dollars) summarizes the various contracts in MOSERS portfolio as of June 30, 2018. The investments are reported at fair value and are included on the Statement of Fiduciary Net Position of the pension (and other employee benefit) trust funds.

Futures Contracts:

Notional Amount	Exposure
$680,052	$20,087

Swap Contracts:

Notional Amount	Counterparty Exposure
$2,530,067	$(76)

Foreign Currency Forward Contracts:

Notional Amount	Exposure
$(726)	$(726)

Missouri Department of Transportation and Highway Patrol Employees' Retirement System:

MPERS has an investment policy which holds investments in future contracts, swap contracts, options contracts, and forward foreign currency exchange contracts. Derivative financial instruments involve credit risk and market risk. The notional value related to these derivative instruments are generally not recorded on the financial statements; however, the change in market value of these instruments is incorporated in performance.

The following table (in thousands of dollars) summarizes the various contracts in MPERS portfolio as of June 30, 2018. The investments are reported at fair value and are included on the Statement of Fiduciary Net Position of the pension (and other employee benefit) trust funds.

Type	Notional/Fair Value	Unrealized Gain (Loss)
Futures Contracts	$ 193,829	$ (415)
Swap Contracts	89,654	(143)
Foreign Currency Forward Contracts	(19,713)	(415)
Total	$ 263,770	$ (973)

Note 3 - Deposits and Investments (cont.)

Through the use of derivatives, MPERS is exposed to risk if the counterparties involved in the contracts are unable to meet the term of their obligation. MPERS investment managers seek to control this risk through counterparty credit evaluations and approvals, counterparty credit limits, and exposure monitoring procedures. MPERS anticipates the counterparties will be able to satisfy their obligations under the contracts. The associated counterparty's credit rating is an A-.

Component Units:

Information on the component units derivatives is available within their individual financial statements.

E. Assets Held in Escheat

The Unclaimed Property Division of the Missouri State Treasurer's Office holds unclaimed stocks, bonds, mutual fund positions, and other securities that have been turned over by their holders on behalf of the securities' owners. The State takes custody of these securities until the owner claims them or if unclaimed, liquidates them after 18 to 24 months. The State holds the securities in order to return them to their owners. The State does not report these securities as investments because they do not meet the Governmental Accounting Standards Board's definition of "investments". This is because the State does not hold the securities for income or profit, nor do the securities have a present service capacity for the State. A total of $12,653,000 of these unclaimed securities is shown as "Assets Held in Escheat" on the private-purpose trust funds combining statement of fiduciary net position in Unclaimed Property.

Note 4 - Governmental Fund Balance

Fund Balance Classifications by Purpose – In the basic financial statements, the fund balance classifications are presented in the aggregate. The following displays the fund balances by major purpose (in thousands of dollars):

A. Budget Reserve Fund

The Budget Reserve Fund is established in Article IV, Section 27(a) of the Missouri Constitution. The Commissioner of Administration may transfer amounts from the Budget Reserve Fund to any other fund when necessary to meet the cash requirements of the State. However, the Budget Reserve Fund must be paid back with interest prior to May 16th of the fiscal year in which the transfer was made.

Budget stabilization expenditures may occur in a fiscal year in which the Governor reduces the expenditures of the State or any of its agencies below their appropriation or in which there is a budget need due to a natural disaster as proclaimed by the Governor to be an emergency. An appropriation from the Budget Reserve Fund may be granted by a two-thirds vote of the members elected to each house. The maximum amount which may be appropriated at any one time for budget stabilization purposes is one-half the sum of the balance of the Budget Reserve Fund and any amounts appropriated or otherwise owed to the fund, less all amounts owed to the fund for budget stabilization purposes but not yet appropriated for repayment to the fund. One-third of the amount expended or transferred from the Budget Reserve Fund for budget stabilization purposes plus interest shall stand appropriated to the Budget Reserve Fund during each of the next three fiscal years from the fund which received the budget stabilization appropriation. The balance of the Budget Reserve Fund at June 30, 2018, was $614,386,000.

Note 5 - Capital Assets

Capital asset activity for the year ended June 30, 2018, was as follows (in thousands of dollars):

	*Balance July 1, 2017	Increases	Decreases	Balance June 30, 2018
Governmental Activities:				
Capital Assets not being Depreciated/Amortized:				
Construction in Progress	$ 308,270	$ 164,560	$ (59,287)	$ 413,543
Software in Progress	88,312	26,306	(15,499)	99,119

Infrastructure	808,653	—	808,653
Total Capital Assets being Depreciated/Amortized	9,601,790	79,215	9,681,005
Less Total Accumulated Depreciation/Amortization	(4,586,131)	(21,314)	(4,607,445)
Total Capital Assets being Depreciated/Amortized, Net	5,015,659	57,901	5,073,560
Discretely Presented Component Units – Capital Assets, Net	$ 5,391,156	$ 65,978	$ 5,457,134

Capital Asset Impairment

Two application development projects were canceled during the fiscal year. The first project was stopped due to changing application requirements, which resulted in an impairment of $10,000. The second project was stopped when contracting out the application support with a current service provider became a better option, which resulted in an impairment of $48,000. These would be reported as a program expense in the government-wide financial statements.

Due to significant damage to the Oak Place Apartment buildings, owned by the University of Missouri, an impairment amount of $17,908,000 is reported as an extraordinary item in the Component Units Statement of Revenues, Expenses, and Changes in Net Position/Statement of Activities.

Note 6 - Leases

Capital

The State has entered into various agreements to lease land, buildings, equipment and software. GASB Statement No. 62, *Codification of Accounting and Financial Reporting Guidance Contained in Pre-November 30, 1989 FASB and AICPA Pronouncements,* requires a lease that transfers substantially all of the benefits and risks of ownership to the lessee to be accounted for as the acquisition of a capital asset and the incurrence of an obligation by the lessee (a capital lease liability).

Capital leases for the internal service funds, enterprise funds, and college and universities are reported as a long-term obligation in those funds along with the related assets. Capital leases and the related assets are not reported on the fund financial statements of governmental type funds. However, the capital leases and related assets of governmental funds are included on the government-wide financial statements and they are shown on the reconciliation between fund financial statements and government-wide statements.

Following is a summary of the future minimum lease payments for capital leases (in thousands of dollars):

Fiscal Year Ending June 30	Governmental Funds	Internal Service Funds	College and Universities
2019	$ 7,722	$ 3,171	$ 7,341
2020	7,047	2,162	6,111
2021	6,667	1,428	5,708
2022	4,952	319	5,466
2023	2,801	319	5,444
2024-2028	4,550	802	14,296
2029-2030	1,498	241	913
Total Minimum Lease Payments	35,237	8,442	45,279
Less Amount Representing Interest	(2,587)	(432)	(5,228)
Present Value of Net Minimum Lease Payments	$ 32,650	$ 8,010	$ 40,051

The State has entered into a lease with the Missouri Development Finance Board. The State's obligation under this lease does not constitute a general obligation or other indebtedness of the State. Payments under the lease agreement have been structured in amounts sufficient to pay principal and interest on the Leasehold Revenue Bonds issued by the Board. In November 2005, the Board issued $28,995,000 of Leasehold Revenue Bonds Series 2005 for the purpose of purchasing buildings in Florissant, St. Louis, and Jennings. In May 2006, the Board issued $9,865,000 of Leasehold Revenue Bonds Series 2006 for the purpose of purchasing one building in St. Louis. In June 2013, the Board issued $21,820,000 of Leasehold Revenue Refunding Bonds Series A 2013 and $7,450,000 of Leasehold Revenue Refunding Bonds Series B 2013 for the purpose of refunding $20,805,000 of Leasehold Revenue Bonds Series 2005 and $7,100,000 of Leasehold Revenue Bonds Series 2006, respectively. The payments on these leases are subject to annual appropriation by the State legislature.

Note 6 - Leases (cont.)

Following is a summary of the future minimum lease payments to pay interest and principal of the Leasehold Revenue Bonds (in thousands of dollars):

Fiscal Year Ending June 30	Internal Service Funds
2019	$ 2,416
2020	2,412
2021	2,414
2022	2,413
2023	2,409
2024-2028	12,038
2029-2031	7,217
Total Minimum Lease Payments	31,319
Less Amount Representing Interest	(5,544)
Present Value of Net Minimum Lease Payments	$ 25,775

Series A 2005 Refunding Certificates of Participation dated March 1, 2005, in the amount of $120,490,000 refunded $13,945,000 of Missouri Public Facilities Corporation Certificates of Participation (Acute Care Psychiatric Hospital Project) Series A 1994, $13,400,000 of Missouri PRC Corporation Certificates of Participation (Psychiatric Rehabilitation Center Project) Series A 1995, $9,915,000 of Northwest Missouri Public Facilities Corporation Certificates of Participation (Northwest Missouri Psychiatric Rehabilitation Center Project) Series B 1995, and $83,480,000 of Missouri Public Facilities Corporation II Certificates of Participation (Bonne Terre Prison Project) Series A 1999. The State issued Refunding Certificates of Participation Series A 2011 dated June 7, 2011, in the amount of $76,910,000. The Refunding Certificates of Participation refunded $76,065,000 of Series A 2005 Refunding Certificates of Participation.

The State's obligation under these leases does not constitute a general obligation or other indebtedness of the State. The certificates of participation represent proportionate ownership interests of the certificate holders in the lease agreement. The certificates do not constitute a pledge of the full faith and credit of the State. Payments under the lease agreement have been structured in amounts sufficient to pay principal and interest on the certificate and are subject to annual appropriation by the State legislature.

Following is a summary of the future minimum lease payments for the Certificates of Participation (in thousands of dollars):

Fiscal Year Ending June 30	Governmental Funds
2019	$ 13,669
Total Minimum Lease Payments	13,669
Less Amount Representing Interest	(144)
Present Value of Net Minimum Lease Payments	$ 13,525

Note 6 - Leases (cont.)

Assets acquired through these capital lease agreements are recorded as capital assets at the lower of the present value of the minimum lease payments or the fair value at the time of acquisition. The following is the value of the property under capital lease by asset category as of June 30, 2018 (in thousands of dollars):

	Governmental Funds	Internal Service Funds	College and Universities
Land	$ —	$ —	$ 518
Buildings	196,481	40,508	64,407
Equipment	3,392	7,979	16,622
Software	3,971	4,633	—
	$ 203,844	$ 53,120	$ 81,547

Operating

The State has entered into various operating leases for land, buildings, and equipment. Most of these leases are classified as operating, because the lease period is one year with multiple renewal options. Future minimum commitments due under operating leases as of June 30, 2018, were as follows (in thousands of dollars):

Fiscal Year Ending June 30	Governmental Funds	Enterprise Funds	Component Units
2019	$ 20,665	$ 350	$ 14,175
2020	961	172	10,610
2021	916	62	8,858
2022	892	59	7,398
2023	501	57	6,516
2024-2028	1,607	5	13,879
2029-2033	52	—	8,183
2034-2038	50	—	4,828
2039-2043	50	—	—
2044-2048	50	—	—
2049-2053	50	—	—
2054-2058	50	—	—
2059-2063	50	—	—
Total Minimum Commitments	$ 25,894	$ 705	$ 74,447

Expenditures for rent under operating leases for the years ended June 30, 2018 and June 30, 2017 were $23,048,000 and $22,740,000, respectively.

Note 6 - Leases (cont.)

Rental Revenue

The State leases certain state owned facilities to entities outside the State. These lessor arrangements are generally long-term commitments which either generate revenue from otherwise idle property or better serve Missouri's citizens by providing convenient access to products and services. The total asset value of the leased facilities and land is $91.7 million less accumulated depreciation of $24.5 million for component units. The Department of Natural Resources (DNR) has $72,000 in income from easements on DNR property. This income will be received in perpetuity. The contract conditions and amount for each individual easement can change with the sale of the property requiring the easement. New contracts will be negotiated with new property owners. Future minimum receivables, payable from lessor arrangements as of June 30, 2018, were as follows (in thousands of dollars):

Fiscal Year Ending June 30	Component Units
2019	$ 4,174
2020	3,816
2021	3,745
2022	3,676
2023	3,679
2024-2028	17,769
2029-2033	17,551
2034-2038	17,478
2039-2043	14,226
2044-2048	7,217
2049-2053	2,132
2054-2058	2,132
2059-2063	1,729
2064-2068	500
2069-2073	500
2074-2078	500
2079-2083	500
2084-2088	500
2089-2093	450
Total Minimum Receivables	$ 102,274

Note 7 - Retirement Systems

The State has two major retirement systems which cover substantially all State employees. These systems are the Missouri State Employees' Retirement System (MOSERS) and the Missouri Department of Transportation and Highway Patrol Employees' Retirement System (MPERS). MOSERS is comprised of the Missouri State Employees' Plan (MSEP), a cost-sharing multiple-employer, defined benefit public employee retirement plan and the Judicial Plan, a single-employer defined benefit public employee retirement plan. MPERS is a single-employer defined benefit public employees' retirement plan.

Plan Descriptions

The Missouri State Employees' Plan (MSEP) is a cost-sharing multiple-employer, defined benefit public employee retirement plan administered by MOSERS. The Plan is administered in accordance with Sections 104.010 and 104.312-104.1215, RSMo.

The MSEP has three benefit structures known as MSEP (closed plan), MSEP 2000, and MSEP 2011. The MSEP covers all full-time employees hired before July 1, 2000, who are not covered under another state-sponsored retirement plan. MSEP 2000 covers all full-time employees hired on or after July 1, 2000 and before January 1, 2011. MSEP 2011 covers all full-time employees first hired on or after January 1, 2011. Members of the closed plan have the option at retirement to choose between the benefit structure of the MSEP or MSEP 2000.

Note 7 - Retirement Systems (cont.)

The Judicial Plan is a single-employer, defined benefit public employee retirement plan administered by MOSERS. The Plan is administered in accordance with Sections 476.445 to 476.690, RSMo. The Judicial Plan covers eligible members appointed/elected before January 1, 2011. The Judicial Plan 2011 covers eligible members appointed/elected for the first time on or after January 1, 2011.

MOSERS provides retirement, survivor, and disability benefits to its members. General employees are fully vested after 5 years of creditable service if covered by the MSEP and MSEP 2000 plans and after 10 years (5 years effective January 1, 2018) of creditable service for active members if covered by the MSEP 2011 plans. Elected officials are fully vested after 4 years of creditable service and Members of the General Assembly are fully vested after 6 years of creditable service. The base retirement benefits are calculated by multiplying the employee's final average pay by a specific factor multiplied by the years of credited service. The retirement eligibility requirements are as follows for general employees:

MSEP

Age 65 and active with 4 years of service
Age 65 with 5 years of service
Age 60 with 15 years of service
Age 48 with age and service equaling 80 or more (Rule of 80)
Employees may retire early at age 55 with at least 10 years of service with reduced benefits.
The base benefit in the general employee plan is equal to 1.6% multiplied by the final average pay multiplied by years of credited service.

MSEP 2000

Age 62 with 5 years of service
Age 48 with age and service equaling 80 or more (Rule of 80)
Employees may retire early at age 57 with at least 5 years of service with reduced benefits.
The base benefit in the general employee plan is equal to 1.7% multiplied by the final average pay multiplied by years of credited service.

MSEP 2011

Age 67 with 10 years of service (5 years effective January 1, 2018)
Age 55 with age and service equaling 90 or more (Rule of 90)
Employees may retire early at age 62 with at least 10 years of service with reduced benefits (5 years effective January 1, 2018).
The base benefit in the general employee plan is equal to 1.7% multiplied by the final average pay multiplied by years of credited service.

Judicial Plan

Age 62 with 12 years of service
Age 60 with 15 years of service
Age 55 with 20 years of service
Employees may retire early at age 62 with less than 12 years of service or age 60 with less than 15 years of service with a reduced benefit that is based upon years of service relative to 12 or 15 years.
The base benefit for members with 12 or more years of service is equivalent to 50% of compensation on the highest court served.

Judicial Plan 2011

Age 67 with 12 years of service
Age 62 with 20 years of service
Employees may retire early at age 67 with less than 12 years of service with reduced benefits or age 62 with less than 20 years of service with a reduced benefit based on years of service.
The base benefit for members with 12 or more years of service is equivalent to 50% of compensation on the highest court served.

For members hired prior to August 28, 1997, cost of living adjustments (COLAs) are provided annually based on 80% of the percentage increase in the average Consumer Price Index (CPI) from one year to the next, with a minimum rate of 4% and a maximum rate of 5%, until the cumulative amount of COLAs equals 65% of the original benefit, thereafter the 4% minimum rate is eliminated. For members hired on or after August 28, 1997, COLAs are provided annually based on 80% of the percentage increase in the average CPI from one year to the next, up to a maximum rate of 5%. Qualified, terminated-vested members of MSEP and the Judicial Plan may make a one-time election to receive the present value of their benefit in a lump sum payment. To qualify, a member must have left state employment on or after October 1, 1984 and prior to September 1, 2002, have less than 10 years of service, not be within 5 years of retirement eligibility, meet age requirements, and have a benefit present value of less than $10,000.

Note 7 - Retirement Systems (cont.)

The Missouri Department of Transportation and Highway Patrol Employees' Retirement System (MPERS) is a single-employer, defined benefit public employee retirement plan administered in accordance with Sections 104.010-104.1093, RSMo.

MPERS is considered a single-employer plan because its membership is composed of qualified employees of the Missouri Department of Transportation, uniformed and non-uniformed members of the Missouri State Highway Patrol, and MPERS staff.

MPERS provides retirement, survivor, and disability benefits to its members. The MPERS has three benefit structures known as the Closed Plan, the Year 2000 Plan, and the Year 2000 Plan-2011 Tier. Generally, the Closed Plan covers employees hired before July 1, 2000. The Year 2000 Plan generally covers employees hired on or after July 1, 2000 and before January 1, 2011. The Year 2000 Plan-2011 Tier covers employees hired on or after January 1, 2011. Employees covered by the Closed Plan and the Year 2000 Plan are fully vested after 5 years of creditable service. Employees covered by the 2011 Tier are fully vested after 10 years (5 years effective January 1, 2018) of creditable service for active members.

The retirement eligibility requirements are as follows:

Closed Plan

MoDOT and non-uniformed patrol members:	**Uniformed patrol members:**
Age 65 and active with 4 or more years of service	Age 55 and active with 4 or more years of service
Age 65 with 5 or more years of service	Age 55 with 5 or more years of service
Age 60 with 15 or more years of service	Age 48 with sum of age and service equaling 80 or more (Rule of 80)
Age 48 with sum of age and service equaling 80 or more (Rule of 80)	Mandatory retirement at age 60

All non-uniformed members may retire early with reduced benefits at age 55 with at least 10 years of service.

The base benefit in the Closed Plan is equal to 1.6% multiplied by the final average pay multiplied by years of creditable service. For members of the uniformed patrol, the base benefit is calculated by applying the same formula, then multiplying the product by 1.33%.

For members employed prior to August 28, 1997, cost of living adjustments (COLAs) are provided annually based on 80% of the increase in the Consumer Price Index for all urban consumers for the United States (CPI-U) with a minimum rate of 4% and a maximum rate of 5%, until the cumulative amount of COLAs equals 65% of the original benefit. Thereafter, the 4% minimum rate is eliminated and the annual COLA rate will be equal to 80% of the increase in the CPI-U (annual maximum of 5%). For members employed on or after August 28, 1997, COLAs are provided annually based on 80% of the increase in the CPI-U, up to a maximum rate of 5%.

Year 2000 Plan

MoDOT and non-uniformed patrol members:	**Uniformed patrol members:**
Age 62 with 5 or more years of service	Age 48 with sum of age and service equaling 80 or more (Rule of 80)
Age 48 with sum of age and service equaling 80 or more (Rule of 80)	Mandatory retirement at age 60 with 5 or more years of service

All members may retire early with reduced benefits at age 57 with at least 5 years of service.

Note 7 - Retirement Systems (cont.)

The base benefit in the Year 2000 Plan is equal to 1.7% multiplied by the final average pay multiplied by years of creditable service. Members retiring under the Rule of 80, and uniform patrol members retiring at the mandatory retirement age (currently 60), receive an additional temporary benefit until age 62. The temporary benefit is equivalent to 0.8% multiplied by final average pay multiplied by years of creditable service. COLAs are provided annually based on 80% of the change in the CPI-U, up to a maximum rate of 5%.

Year 2000 Plan-2011 Tier

MoDOT and non-uniformed patrol members:	**Uniformed patrol members:**
Age 67 with 10 or more years of service (5 years effective January 1, 2018)	Age 55 and active with 10 or more years of service (5 years effective January 1, 2018)
Age 55 and active with sum of age and service equaling 90 or more (Rule of 90)	Mandatory retirement at age 60 with no minimum service amount, active only.

Active MoDOT and non-uniformed patrol members may retire early with reduced benefits at age 62 with at least 10 years of service. Terminated and vested uniformed patrol members may retire at age 67 with 10 or more years of service. COLAs are provided annually based on 80% of the change in the CPI-U, up to a maximum rate of 5%.

The base benefit in the 2011 Tier is equal to 1.7% multiplied by the final average pay multiplied by years of creditable service. Members retiring under the Rule of 90, and uniform patrol members retiring at the mandatory retirement age (currently 60) or at age 55 with 10 years (5 years effective January 1, 2018) of creditable service, receive an additional temporary benefit until age 62. The temporary benefit is equivalent to 0.8% multiplied by final average pay multiplied by years of creditable service.

Single-Employer Plans:

Employees Covered by Benefit Terms – Single-Employers Only

As of June 30, 2017 valuation, membership consisted of the following:

	Judicial Plan	MPERS
Retirees, beneficiaries, and the disabled currently receiving benefits	559	8,831
Terminated employees entitled to, but not yet receiving benefits	26	2,324
Active		
Vested	410	5,261
Nonvested	—	2,195
Total Membership	995	18,611

Contributions

Per Chapter 104.436, RSMo, contribution requirements of the active employees and the participating employers are established and may be amended by the MOSERS Board. Employees in the MSEP 2011 Plan are required to contribute 4.00% of their annual pay. The State's required contribution rate for the MSEP and the Judicial Plan for the year ended June 30, 2017, were 16.97% and 58.45% of annual payroll, respectively. The contribution rates as a percentage of covered payroll for the MSEP and the Judicial Plan for the year ended June 30, 2017, were 16.97% and 58.50%, respectively. Contributions to the pension plan from the MSEP Plan and the Judicial Plan were $274,510,000 and $34,247,000 respectively, for the year ended June 30, 2017.

Note 7 - Retirement Systems (cont.)

Per Chapter 104.070, RSMo, contribution requirements of the active employees and the participating employers are established and may be amended by the MPERS Board of Trustees. Beginning January 1, 2011, employee contributions of 4.00% of gross pay are required for those covered by the Year 2000 Plan-2011 Tier. Employer contributions are determined through annual actuarial valuations. Administrative expenses are financed through contributions from participating employers and investment earnings. The state's required contribution rate, as adopted by the MPERS Board of Trustees, for the year ended June 30, 2017, was to be at least 58.00%. The contribution rate as a percentage of covered payroll for the MPERS plan year ended June 30, 2017, was 58.00%. Contributions to the pension plan from the MPERS plan were $206,563,000.

For the portion of the MSEP Plan relating to the State's component units, the required contribution rate for the year ended June 30, 2017, was 16.97%. The contribution rates as a percentage of covered payroll for the year ended June 30, 2017, range from 16.93% to 16.97%. Contributions to the pension plan were $58,246,000 for the year ended June 30, 2017.

Pension Liabilities, Pension Expense, and Deferred Outflows of Resources and Deferred Inflows of Resources

Cost-Sharing Multiple Employer Plan:

At June 30, 2018, a liability was reported for the State's proportionate share of the net pension liability for the MSEP and the MSEP-CU plans based on an actuarial valuation as of June 30, 2017. The State's proportionate share of the net pension liability was based on the State's actual share of contributions to the pension plan relative to the actual contributions of all participating employers for plan year ended June 30, 2017.

The State reported the following proportionate share of the net pension liability and the pension expense for the fiscal year ended June 30, 2018 (in thousands of dollars):

	MSEP	MSEP-CU
Pension Expense	$ 724,501	$ 156,206
Proportionate share: 2018	82.19%	17.44%
Net Pension Liability	$ 4,279,391	$ 908,000

Note 7 - Retirement Systems (cont.)

Single-Employer Plans:

The State's net pension liability and related information for the Judicial and MPERS plans for the fiscal year ended June 30, 2018 (in thousands of dollars):

	Judicial Plan Increase (Decrease)			MPERS Increase (Decrease)		
	Total Pension Liability (a)	Plan Fiduciary Net Pension (b)	Net Pension Liability (a) – (b)	Total Pension Liability (a)	Plan Fiduciary Net Pension (b)	Net Pension Liability (a) – (b)
Balances at June 30, 2017	$ 547,621	$ 132,056	$ 415,565	$3,761,733	$ 1,992,074	$ 1,769,659
Changes for the year:						
Service Cost	12,946	—	12,946	45,713	—	45,713
Interest	40,617	—	40,617	283,569	—	283,569
Differences between expected and actual experience	(10,687)	—	(10,687)	(37,287)	—	(37,287)
Changes of Assumptions	7,906	—	7,906	—	—	—
Contributions – Employer	—	34,247	(34,247)	—	206,563	(206,563)
Contributions – Employee	—	787	(787)	—	4,892	(4,892)
Net Income Investment	—	4,680	(4,680)	—	220,302	(220,302)
Benefit payments, including refunds of employee contributions	(33,985)	(33,985)	—	(246,939)	(246,939)	—
Disability Premiums	—	—	—	(1,620)	(1,620)	—
Administrative Expense	—	(150)	150	—	(4,516)	4,516
Net Transfers to Other Retirement Systems	—	—	—	(2,725)	(981)	(1,744)
Net Changes	16,797	5,579	11,218	40,711	177,701	(136,990)
Balances at June 30, 2018	$ 564,418	$ 137,635	$ 426,783	$3,802,444	$ 2,169,775	$ 1,632,669

For the year ended June 30, 2018, the Judicial Plan and MPERS recognized pension expense of $62,414,000 and $136,009,000, respectively.

At June 30, 2018, deferred outflows of resources and deferred inflows of resources related to pensions were reported from the following sources (in thousands of dollars):

	Deferred Outflows of Resources				Deferred Inflows of Resources			
	MSEP	Judicial	MPERS	MSEP-CU	MSEP	Judicial	MPERS	MSEP-CU
Difference between expected and actual experience	$ 23,708	$ 930	$ —	$ 5,030	$ 67,399	$ 10,289	$ 55,761	$ 14,301
Changes of assumptions	375,511	31,553	—	79,676	10,740	—	—	2,279
Net difference between projected and actual earnings on pension plan investments	716,864	13,716	102,667	152,104	—	—	92,183	—
Changes in proportion and differences between pension plan contributions and proportionate share of contributions	15	—	—	6,630	2,674	—	—	4,136
Contributions subsequent to the measurement date	313,167	36,895	204,955	63,393	—	—	—	—
Total	$ 1,429,265	$ 83,094	$ 307,622	$ 306,833	$ 80,813	$ 10,289	$147,944	$ 20,716

Note 7 - Retirement Systems (cont.)

Amount reported as deferred outflows of resources related to pensions resulting from contributions subsequent to the measurement date will be recognized as a reduction of the net pension liability for the measurement period of the year ended June 30, 2018. Other amounts reported as deferred outflows of resources and deferred inflows of resources related to pensions will be recognized in pension expense as follows (in thousands of dollars):

Fiscal Year Ended June 30	Net Deferred Outflows/Inflows of Resources			
	MSEP	Judicial	MPERS	MSEP-CU
2019	$ 338,909	$ 16,529	$ (35,864)	$ 74,175
2020	464,187	15,778	5,941	99,079
2021	177,720	2,551	1,234	37,913
2022	54,469	1,052	(16,588)	11,557
Totals	$ 1,035,285	$ 35,910	$ (45,277)	$ 222,724

Actuarial Assumptions

The total pension liability at June 30, 2018, is based upon the June 30, 2017, actuarial valuation for MOSERS and MPERS using the entry age normal actuarial cost method. Significant actuarial assumptions used in the June 30, 2017, actuarial valuations are the following:

	MSEP and MSEP-CU	Judicial	MPERS
Price Inflation	2.5%	2.5%	3.0%
Salary Increases	3.25-8.75%	3.0-5.2%	3.5-11.0%
Investment Rate of Return	7.50%	7.50%	7.75%

The actuarial assumptions used in the June 30, 2017 valuation were based on the results of an actuarial experience study for the period July 1, 2010 to June 30, 2015, for MOSERS. In addition, the Board reaffirmed its previous decision to reduce the investment return assumption from 7.65% to 7.50% for the June 30, 2017 valuation. There were no other changes in assumptions. MOSERS mortality rates were based on the RP-2014 Healthy Annuitant Mortality table, projected to 2026 with scale MP-2015 and scaled by 120%. The pre-retirement mortality table was the RP-2014 Employee Mortality table, projected to 2026 with scale MP-2015 and scaled by 95% for males and 90% for females.

Amounts reported in the June 30, 2017, actuarial report are assumptions reflecting adjustments to expected rates of withdrawal, disability, normal and early retirement, mortality, and merit and seniority pay for MPERS. The actuarial assumptions were based on the results of an actuarial experience study for the period July 1, 2007, through June 30, 2012. Mortality rates, for post-retirement mortality, used in evaluating allowances to be paid to non-disabled pensioners were the RP-2000 Combined Healthy Mortality Tables projected 16 years and set back one year for males and females. Pre-retirement mortality rates used was 70% for males and 50% for females of the post-retirement tables set back 1 year for males and set back 1 year for females. Disabled pension mortality was based on PBGC Disabled Mortality tables. The healthy mortality tables include a margin for mortality improvement. The margin is in the 16-year projection. The disabled mortality tables do not include a margin for mortality improvement.

Note 7 - Retirement Systems (cont.)

The long-term (30 year) expected rate of return on pension plan investments was determined using a building-block method in which best-estimate rates of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. Best estimates of geometric real rates of return for the MSEP and Judicial Plan and arithmetic real rates of return for MPERS for each major asset class included in the target allocation are summarized in the table below:

	MSEP and MSEP-CU		Judicial		MPERS	
Asset Class	Target Allocation	Long-Term Expected Real Rate of Return	Target Allocation	Long-Term Expected Real Rate of Return	Target Allocation	Long-Term Expected Real Rate of Return
Global Equity	38.0%	5.5%	38.0%	5.5%	30.0%	4.80%
Private Equity					15.0%	6.50%
Fixed Income					20.0%	0.50%
Real Assets					7.5%	4.75%
Real Estate					10.0%	2.75%
Hedge Funds					10.0%	2.75%
Opportunistic Debt					7.5%	4.50%
Nominal Bonds	44.0%	1.0%	44.0%	1.0%		
Commodities	20.0%	4.5%	20.0%	4.5%		
Inflation-linked Bonds	39.0%	0.8%	39.0%	0.8%		
Alternative Beta	31.0%	4.5%	31.0%	4.5%		
	172.0%		172.0%		100.0%	

Discount Rate

A single discount rate based on the expected rate of return on pension investments of 7.50%, 7.50%, and 7.75% was used to measure the total pension liability for MSEP, Judicial Plan, and MPERS, respectively. The projection of cash flows used to determine the discount rate assumed that plan member contributions will be made at the current contribution rate and the employer contributions will be made at rates equal to the difference between actuarially determined contribution rates and the member rate for MPERS. The projection of cash flows used to determine the discount rate assumed that employee contributions at the current contribution rate and that contributions from employers will be made at required rates, actuarially determined for MOSERS. Based on these assumptions, the pension plan's fiduciary net position was projected to be available to make all projected future benefit payments of current plan members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability.

Note 7 - Retirement Systems (cont.)

Sensitivity of the Net Pension Liability to Changes in the Discount Rate

Regarding the sensitivity of the net pension liability to changes in the single discount rate, the following presents the plan's net pension liability, calculated using a single discount rate, as well as, what the plan's net pension liability would be if it were calculated using a single discount rate that is 1-percentage-point lower or 1-percentage-point higher (in thousands of dollars):

	1% Decrease	Current Single Discount Rate Assumption	1% Increase
	6.50%	7.50%	8.50%
MSEP Net Pension Liability	$5,509,815	$4,279,391	$3,244,456
	6.50%	7.50%	8.50%
Judicial Plan Net Pension Liability	$484,553	$426,783	$377,354
	6.75%	7.75%	8.75%
MPERS Net Pension Liability	$2,075,475	$1,632,669	$1,262,286
	6.50%	7.50%	8.50%
MSEP-CU Net Pension Liability	$1,169,071	$908,000	$688,408

Payables to the Pension Plan

As of June 30, 2018, the State had payables of $14,959,000 to MOSERS for the outstanding amount of contributions to the pension plan, relating to a two week lag in payroll.

Pension Plan Fiduciary Net Position

Detailed information about the pension plan's fiduciary net position is available in the separate financial reports issued by MOSERS and MPERS:

University of Missouri Retirement System

Plan Description

The University of Missouri Retirement, Disability, and Death Benefit Plan is a single-employer defined benefit plan for all qualified employees. As authorized by Section 172.300, RSMo, the University's Board of Curators administers the Retirement Plan and establishes its terms.

Note 7 - Retirement Systems (cont.)

Full-time employees vest in the Retirement Plan after five years of credited service and become eligible for benefits based on age and years of service. A vested employee who retires at age 65 or older is eligible for a lifetime annuity calculated at a certain rate times the credited service years times the compensation base (average consumption for the five highest consecutive salary years). The rate is 2.2% if the employee was hired before October 1, 2012, or 1.0% if the employee was hired after September 30, 2012. Academic members who provide summer teaching and research service receive additional summer service credit. The Board of Curators may periodically approve increases to the benefits paid to existing pensioners. However, vested members who leave the University prior to eligibility for retirement are not eligible for these pension increases. Vested employees who are at least age 55 and have ten years or more of credited service, or age 60 with at least five years of credited service may choose early retirement with a reduced benefit. However, if the employee retires at age 62 and has at least 25 years of credited service, the benefit is not reduced. Up to 30% of the retirement annuity can be taken in a lump sum payment. In addition the standard annuity can be exchanged for an actuarially-equivalent annuity selected from an array of options with joint and survivor, period certain, and guaranteed annual increase features.

As of June 30, 2018, membership consisted of the following:

Vested members	18,135
Inactive vested members	4,659
Pensioners and beneficiaries	9,763
Total Membership	32,557

Contributions

The University's contributions to the Retirement Plan are equal to the actuarially determined contribution rate (ADC). The ADC for those employees hired before October 1, 2012 averaged 9.4% of covered payroll for the year ending June 30, 2018. The ADC for those employees hired after September 30, 2012, averaged 5.5% of covered payroll for the year ended June 30, 2018. Employees are required to contribute 1% of their salary up to $50,000 in a calendar year and 2% of their salary in excess of $50,000. An actuarial valuation of the Plan is performed annually and the University's contribution rate is updated on July 1 at the beginning of the University's fiscal year, to reflect the actuarially determined funding requirement from the most recent valuation, as of the preceding October 1. This actuarial valuation reflects the adoption of any Retirement Plan amendments during the previous fiscal year. The University contributed $92,200,000 during the fiscal year ended June 30, 2018.

Employees hired after September 30, 2012, participate in a single employer, defined contribution plan. Each year the University contributes 2% of each employee's eligible salary to a 401(a) plan. The University will match up to 3% of the employee contribution to the 457(b) plan with those going into the 401(a) plan. Employees are immediately 100% vested in their contributions. The University's base contributions and matching contributions vest following three years of consecutive or nonconsecutive service. The defined contribution plan recognized $17,579,000 of pension expense net of $3,211,000 of forfeitures for the year ended June 30, 2018.

Net Pension Liability

The Retirement Plan's net pension liability was measured as of June 30, 2018. The total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of October 1, 2017. Roll-forward procedures were used to measure the Retirement Plan's net pension liability as of June 30, 2018. For the year ended June 30, 2018, fiduciary net position as a percentage of the total pension liability amounted to 83.43%.

Note 7 - Retirement Systems (cont.)

Changes in net pension liability (in thousands of dollars):

	Total Pension Liability (TPL)	Fiduciary Net Pension (FNP)	Net Pension Liability (NPL)
Balances at June 30, 2017	$ 4,008,189	$ 3,485,925	$ 522,264
Changes for the year:			
Service Cost	63,624	—	63,624
Interest	305,781	—	305,781
Differences between expected and actual experience	11,704	—	11,704
Changes in assumptions	257,616	—	257,616
Contributions – Employer	—	92,200	(92,200)
Contributions – Employee	—	15,299	(15,299)
Net Income Investment	—	322,297	(322,297)
Benefit payments, including refunds of employee contributions	(233,083)	(233,083)	—
Net Changes	405,642	196,713	208,929
Balances at June 30, 2018	$ 4,413,831	$ 3,682,638	$ 731,193

Pension Expense

Annual pension expense consists of service cost and interest on the pension liability less employee contributions and projected earnings on pension plan investments. The difference between actual and expected earnings is recorded as a deferred outflow/inflow of resources and recognized in pension expense over a five year period.

For the year ended June 30, 2018, the Retirement Plan recognized pension expense of $142,185,000. At June 30, 2018, deferred outflows of resources and deferred inflows of resources related to pensions were reported from the following sources (in thousands of dollars):

	Deferred Outflows of Resources	Deferred Inflows of Resources
Difference between expected and actual experience	$ 14,290	$ 34,921
Changes in assumptions	210,657	—
Net difference between projected and actual earnings on pension plan investments	24,426	—
Total	$ 249,373	$ 34,921

The University recognizes differences between actual and expected investment performance included in deferred outflows/inflows of resources on a straight-line basis over five years. Differences between expected and actual experience on actuarial assumptions are amortized over the average expected remaining service life of the University's employees. The following table summarizes the future recognition of these items:

Fiscal Year Ended June 30	Net Deferred Outflows/Inflows of Resources Recognition
2019	$ 99,084
2020	54,894
2021	4,188
2022	32,600
2023	23,686
Totals	$ 214,452

Note 7 - Retirement Systems (cont.)

Actuarial Assumptions

The October 1, 2017, actuarial valuation utilized the entry age actuarial cost method. During fiscal year 2018, the Board of Curators approved a change in the discount rate from 7.75% to 7.20%. The change resulted in an increase in the Net Pension Liability of $257,616,000 and will be recognized in pension expense over the average expected remaining service lives of employees. Actuarial assumptions included:

Inflation	2.20%
Salary Increases	3.6% - 4.5%
Investment Rate of Return	7.20%

For purposes of determining actuarially required contributions, the actuarial value of assets was determined using techniques that spread effects of short-term volatility in the market value of investments over a five-year period. The underfunded actuarial accrued liability is being amortized as a level dollar amount on a closed basis over 26 years from the October 1, 2017, valuation date. Mortality rates were based on the RP-2014 Combined Health Mortality Table projected using Scale MP-2017 and RP-2000 Combined Health Mortality Table projected to 2023 using Scale BB for the October 1, 2017 valuation date.

The actuarial assumptions used in the October 1, 2017, valuation were based on the results the most recent quinquennial study of the University's own experience covering 2018 to 2012.

The annual money-weighted rate of return is calculated as the internal rate of return on pension investments, net of pension plan investment expense. The money-weighted rate of return expresses investment performance, net of pension plan investment expense, adjusted for the changing amounts actually invested. The annual money-weighted rate of return on pension plan investments for the years ended June 30, 2018, was 10.2%. The following table provides long-term expected rates of real return:

Asset Class	Target Allocation	Long-Term Expected Real Rate of Return
Domestic large cap equity	14.5%	4.7%
International developed equity	14.5%	9.7%
Emerging markets equity	3.0%	8.6%
Private equity	10.0%	7.8%
Sovereign bonds	15.0%	3.1%
Domestic inflation linked bonds	10.0%	2.9%
Global inflation linked bonds	7.0%	2.6%
Private debt	3.0%	6.5%
Risk balanced	10.0%	9.7%
Commodities	5.0%	4.3%
Core private real estate	1.6%	4.6%
Value add private real estate	4.8%	6.6%
Opportunistic private real estate	1.6%	8.6%
	100.0%	

Note 7 - Retirement Systems (cont.)

Discount Rate

The discount rate used to measure the total pension liability was 7.20%. The projection of cash flows used to determine the discount rate assumed that employee contributions will be made at the current contribution rate and that the University contributions will be made at rates equal to the difference between actuarially determined contribution rates and the employee rate. Based on these assumptions, the pension plan's fiduciary net position was projected to be available to make all projected future benefit payments of current active and inactive employees. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability. For the October 1, 2017, actuarial valuation, 7.20% was used as the net long-term expected rate of return.

Sensitivity of the Net Pension Liability to Changes in the Discount Rate

Regarding the sensitivity of the net pension liability to changes in the single discount rate, the following presents the plan's net pension liability, calculated using a single discount rate, as well as, what the plan's net pension liability would be if it were calculated using a single discount rate that is 1-percentage-point lower or 1-percentage-point higher (in thousands of dollars):

	1% Decrease	Current Single Discount Rate Assumption	1% Increase
	6.20%	7.20%	8.20%
MU Net Pension Liability	$1,287,184	$731,193	$262,755

Separate financial statements are not prepared for the Plan.

Detailed information concerning the Plan is presented in the University's 2018 financial report, which is publicly available. Copies of this report may be requested from:

Note 8 - Other Postemployment Benefits

In addition to the retirement benefits described in Note 7, the State provides postemployment health care and life insurance benefits, in accordance with State statutes, to the majority of employees who either retire from the State or receive long-term disability benefits. These benefits are administered by the Missouri Consolidated Health Care Plan (MCHCP), the Missouri State Employees' Retirement System (MOSERS), the Missouri Department of Transportation and Highway Patrol Employees' Medical and Life Insurance Plan (MHPML), and the Conservation Employees' Insurance Plan (CEIP). MCHCP is a cost-sharing multiple-employer, defined benefit other postemployment benefits plan, MOSERS is an insured, defined benefit insurance plan, and MHPML and CEIP are single-employer defined benefit public employees' other postemployment benefits plans.

Note 8 - Other Postemployment Benefits (cont.)

Plan Descriptions

Missouri Consolidated Health Care Plan (MCHCP) operates a cost-sharing multiple-employer, defined benefit Other Postemployment Benefits Plan (OPEB), the State Retiree Welfare Benefit Trust (SRWBT). Employees may participate at retirement, if eligible to receive a monthly retirement benefit from either Missouri Employees' Retirement System (MOSERS) or another retirement system whose members grandfathered for coverage under the MCHCP by law. The terms and conditions governing postemployment benefits, are vested with the MCHCP Board of Trustees within the authority granted under 103.003 through 103.178, RSMo. MCHCP provides medical, dental, and vision benefits, and the Strive Employee Life & Family program for the exclusive benefit of current and future retired employees of the state and their dependents who meet eligibility requirements, except those retired members covered by other OPEB plans of the state. Covered categories include active employees, participants and spouses in payment status, participants with a deferred benefit, and disabled participants.

The Missouri Department of Transportation and Highway Patrol Employees' Medical and Life Insurance Plan (MHPML) is a single-employer, defined benefit OPEB plan administered in accordance with Section 104.270, RSMo. MHPML is not a separate legal entity and is self insured. The plan does not maintain assets in a trust and pays expenses on a pay-as-you-go basis. The plan assets are neither legally protected from creditors nor are they dedicated to providing OPEB benefits. The State has no legal obligation to pay the benefits. MHPML provides healthcare insurance benefits to employees who retired from the Department who participated in the Medical and Life Insurance Plan when they were an active employee and had a minimum of five years creditable service. Coverage categories include retirees, certain disabled employees, spouses, certain dependents and survivors of deceased employees and retirees. At June 30, 2017, the number of participants covered by the plan included 6,211 retirees or beneficiaries currently receiving benefits, 90 retirees entitled to but not yet receiving benefits, and 7,558 active employees.

The Conservation Employees' Benefits Plan (CEIP) is a single-employer defined benefit OPEB plan administered by the Conservation Employees' Benefits Plan Board of Trustees in accordance with Article IV, Section 42 of the Missouri Constitution. No assets are accumulated in a trust that meets the criteria in paragraph 4 of GASB Statement No. 75, *Accounting and Financial Reporting for Postemployment Benefits Other Than Pensions*. The benefit plan for the Department of Conservation is not irrevocable.

CEIP provides for continuation of medical insurance benefits for retirees and their dependents. Coverage categories include active employees, retirees and surviving spouses, and spouses of current retirees. At June 30, 2017, 1,301 active employees, 714 retirees and surviving spouses, and 404 spouses of current employees were participating in the plan.

Contributions

Contributions are established and may be amended by the MCHCP Board of Trustees with the authority granted under 103.003 through 103.178, RSMo. Contributions to MCHCP by the State are not legally or contractually required. For the fiscal year end June 30, 2017, employers contributed 4.26% for the period July 1, 2016 through December 31, 2016, and 4.02% for the period January 1, 2017, through June 30, 2017, of covered payroll. Retiree contribution rates are established based on projected claims experience and funding provided by employer contributions. Contributions to the OPEB plan for MCHCP and MCHCP-CU was $67,099,000 and $18,000, respectively for the year ended June 30, 2017.

The contribution requirements for MHPML are recommended by the Medical and Life Insurance Plan's Board of Trustees and are approved by the Missouri Highways and Transportation Commission. The Commission contributes a percentage of medical premiums for retirees. For those who retired prior to January 1, 2015, an amount ranging from 40.0% to 57.0% of the premium is contributed, dependent on the level of coverage. Medical premiums, for employees who retire on or after January 1, 2015, are based on total years of service, with the Commission contributing 2.0% per year of service, not to exceed 50.0% of the total premium, with the retiree responsible for the remaining balance of the premiums. Benefit projections for financial reporting purposes are based on the benefits provided under the terms of the substantive plan in effect at the time of each valuation and the historical pattern of cost sharing between employer and the plan members to that point. Contributions to the Plan for the year ended June 30, 2017 was $21,186,000.

Note 8 - Other Postemployment Benefits (cont.)

The contribution requirements for CEIP are established by a trust agreement between the Conservation Commission and the Conservation Employees' Benefits Plan Board of Trustees, which grants the authority to establish and amend benefit terms and financing requirements to the Board of Trustees. The Commission contribution toward retiree medical premium is based on tenure or years of service with the State. At the time of retirement, employees who have 25+ years of service receive a 35% contribution, 20-24 years of service receive a 30% contribution, 15-19 years of service receive a 25% contribution, vested status up to 14 years of service receive a 20% contribution, and employees who retired prior to January 1, 2013 continue to receive a 35% contribution towards their premium. Benefit projections for financial reporting purposes are based on an established policy of the retiree's paying the premium amount less any direct subsidy paid by the Commission based on years of service and date of retirement. Contributions to the Plan for the year ended June 30, 2017 was $3,006,000.

OPEB Liabilities, OPEB Expense, and Deferred Outflows of Resources and Deferred Inflows of Resources

Cost-Sharing Multiple Employer Plan:

At June 30, 2018, a liability was reported for the State's proportionate share of the collective net OPEB liability for the MCHCP and the MCHCP-CU plans based on an actuarial valuation as of June 30, 2017. The State's proportionate share of the collective net OPEB liability was calculated by dividing the State's contribution to the SRWBT by the total contributions from all applicable employers during the measurement period. During the actuarial calculations associated with the employer schedule of allocations, it was determined that the census file for active participants was valued with 5 additional months of service and that additional service related for administrative law judges and retired legislators should be included. These net adjustments to the actuarial valuation resulted in a decrease in the beginning net OPEB liability of approximately $9 million dollars. Also, from the previous valuation, the discount rate changed from 5.70% to 5.71%.

The State reported the following proportionate share of the collective net OPEB liability and the OPEB expense for the fiscal year ended June 30, 2018 (in thousands of dollars):

	MCHCP	MCHCP-CU
OPEB Expense	$ 123,276	$ 32
Proportionate share: 2018	99.56%	0.03%
Net OPEB Liability	$ 1,756,787	$ 484

Single-Employer Plans:

The State's total OPEB liability and related information for the MHPML and CEIP plans for the fiscal year ended June 30, 2018 (in thousands of dollars):

	MHPML	CEIP
	Total OPEB Liability	Total OPEB Liability
Balances at June 30, 2017	$ 1,222,196	$ 137,344
Changes for the year:		
Service Cost	49,483	3,109
Interest	35,941	4,975
Changes of assumptions or other inputs	(165,036)	(7,665)
Benefit payments	(21,185)	(3,006)
Net Changes	(100,797)	(2,587)
Balances at June 30, 2018	$ 1,121,399	$ 134,757

Note 8 - Other Postemployment Benefits (cont.)

For the year ended June 30, 2018, the MHPML and CEIP recognized OPEB expense of $58,457,000 and $6,844,000, respectively.

At June 30, 2018, deferred outflows of resources and deferred inflows of resources related to OPEBs were reported from the following sources (in thousands of dollars):

	Deferred Outflows of Resources				Deferred Inflows of Resources			
	MCHCP	MHPML	CEIP	MCHCP-CU	MCHCP	MHPML	CEIP	MCHCP-CU
Difference between expected and actual experience	$ —	$ —	$ —	$ —	$ (3,188)	$ —	$ —	$ (1)
Changes of assumptions	—	—	—	—	—	(138,069)	(6,425)	—
Net difference between projected and actual earnings on plan investments	—	—	—	—	(171)	—	—	—
Changes in proportion and differences between employer contributions and proportionate share of contributions	59	—	—	—	(58)	—	—	(18)
Contributions subsequent to the measurement date	68,522	22,866	3,993	20	—	—	—	—
Total	$ 68,581	$ 22,866	$ 3,993	$ 20	$ (3,417)	$ (138,069)	$ (6,425)	$ (19)

Amount reported as deferred outflows of resources related to OPEB resulting from contributions subsequent to the measurement date will be recognized as a reduction of the net OPEB liability for the measurement period of the year ended June 30, 2018. Other amounts reported as deferred outflows of resources and deferred inflows of resources related to OPEB will be recognized in OPEB expense as follows (in thousands of dollars):

Fiscal Year Ended June 30	Net Deferred Outflows/Inflows of Resources			
	MCHCP	MHPML	CEIP	MCHCP-CU
2019	$ (431)	$ (26,967)	$ (1,241)	$ (2)
2020	(430)	(26,967)	(1,240)	(2)
2021	(431)	(26,967)	(1,240)	(2)
2022	(430)	(26,966)	(1,240)	(3)
2023	(388)	(26,966)	(1,241)	(2)
Thereafter	(1,248)	(3,236)	(223)	(8)
Totals	$ (3,358)	$ (138,069)	$ (6,425)	$ (19)

Note 8 - Other Postemployment Benefits (cont.)

Actuarial Assumptions

The total OPEB liability at June 30, 2018, is based upon the June 30, 2017, actuarial valuation date for MCHCP and CEIP, and July 1, 2017 for MHPML, using the entry age normal actuarial cost method. Significant actuarial assumptions used in the actuarial valuations are the following:

	MCHCP and MCHCP-CU
Price Inflation	3.0%
Salary Increases	4.0%
Investment Rate of Return	5.71%
Healthcare Cost Trend Rate	Non-Medicare is 6.5% for fiscal year 2017; the rate decreases by 0.25% per year to an ultimate rate of 5.0% in fiscal year 2023 and later. Medicare is 7.5% for fiscal year 2017; the rate decreases by 0.25% per year to an ultimate of 5.0% in fiscal year 2027 and after.

	MHPML
Price Inflation	2.0%
Salary Increases	2.5%
Investment Rate of Return	3.58%
Healthcare Cost Trend Rate	8.4% for 2017, decreasing to 4.6% for 2018 and later years.

	CEIP
Price Inflation	2.3%
Salary Increases	4.0%
Investment Rate of Return	3.87%
Healthcare Cost Trend Rate	Pre-65 rate of 6.6% for 2017, gradually decreasing to an ultimate rate of 4.1% for 2084 and beyond. Post-65 trend rate of 6.8% for 2017, gradually decreasing to an ultimate rate of 4.3% for 2090 and beyond.

MCHCP's actuarial assumptions used in the June 30, 2017 valuation for SRWBT involve estimates of the value of reported amounts and assumptions about the probability of occurrence of events far into the future. The valuation to determine the SRWBT's total OPEB liability is required to be performed at least every two years. Projections of benefits for financial reporting purposes are based on the substantive plan (the plan as understood by the employer and plan members) and include the types of benefits provided at the time of the valuation and the historical pattern of sharing of benefit costs between the employer and plan members to that point. The actuarial methods and assumptions used include techniques that are designed to reduce the effects of short term volatility in actuarial liabilities and the actuarial value of assets, consistent with the long term perspective of the calculations. The collective total OPEB liability for June 30, 2017 measurement date was determined by an actuarial valuation as of January 1, 2017, with updated procedures used to roll forward the total OPEB liability to June 30, 2017. The cost method utilized for the valuation year June 30, 2017, was the entry age normal, level percentage of payroll. Mortality rates were based on RP-2016 for Employees/Annuitants without collar adjustments using Scal MP-2016. The last experience study was conducted for the period July 1, 2008 through June 30, 2012. The last independent actuarial review of the reasonableness and accuracy of actuarial assumptions, actuarial cost methods, and valuations was conducted as of June 30, 2016.

MHPML's actuarial assumptions used in the June 30, 2017 valuation were determined using a measurement date of July 1, 2017 with a roll forward to June 30, 2018. The inflation rate was based on the actuary's long-term estimate of inflation as of July 1, 2016 and July 1, 2017. The salary increases were based on projected salaries, which include COLA's. The discount rate was based on Bond Buyer General Obligation 20-Bond Municipal Bond Index. Mortality rates were based on the RP 2014 Employees and Health Annuitants Mortality table, headcount weighted, fully generational projected by Scale MP-2016. The actuarial assumptions used in the July 1, 2017 valuation were based on the results of an actuarial experience study for the period July 1, 2016 - June 30, 2017. Changes of assumptions and other inputs reflect a change in the discount rate from 2.85% in 2017 to 3.58% in 2018.

Note 8 - Other Postemployment Benefits (cont.)

CEIP's actuarial assumptions used in the June 30, 2017 valuation were determined using a measurement date of June 30, 2018. The discount rate was based on the 20-year Bond General Obligation Index. Mortality rates were based on RP-2014 Mortality for Employees and Healthy Annuitants, with generational projection per Scale MP-2017. The plan has not had a formal actuarial experience study performed.

For MCHCP, the long-term expected rate of return on OPEB plan investments was determined as a blend of the plan sponsor's best estimate on the expected return on plan assets and the 20-year high quality municipal bond rate as of the measurement date. The target asset allocation and best estimates of arithmetic real rate of returns for each major asset class are listed below.

	MCHCP and MCHCP-CU	
Asset Class	Target Allocation	Long-Term Expected Real Rate of Return
Large Cap Stocks	20.0%	5.7%
Mid Cap Stocks	10.0%	6.0%
Small Cap Stocks	10.0%	6.0%
High-Yield Bonds	10.0%	2.6%
BarCap Aggregate Bonds	20.0%	1.0%
Long Government/Credit	25.0%	1.4%
Cash Equivalants	5.0%	0.3%
	100.0%	

Discount Rate

A single discount rate based on the expected rate of return on OPEB investments of 5.71%, 3.58%, and 3.87% was used to measure the total OPEB liability for MCHCP, MHPML, and CEIP, respectively. For MCHCP, the projection of cash flows used to determine the discount rate assumed that employee contributions at the current contribution rate and that contributions from employers will be made at required rates, actuarially determined. For years where the expected benefit payments can be covered by projected trust assets, expected returns are used. For years where payments are not expected to be covered by trust assets, the municipal Bond Buyer 20-Bond General Obligation Index rate is utilized.

Sensitivity of the Net OPEB Liability to Changes in the Discount Rate

Regarding the sensitivity of the net OPEB liability for MCHCP and total OPEB liability for MHPML and CEIP, to changes in the single discount rate, the following presents the State's liability, calculated using a single discount rate, as well as, what the plan's liability would be if it were calculated using a single discount rate that is 1-percentage-point lower or 1-percentage-point higher (in thousands of dollars):

	1% Decrease	Current Single Discount Rate Assumption	1% Increase
	4.71%	5.71%	6.71%
MCHCP Net OPEB Liability	2,074,806	1,756,787	1,505,080
	2.58%	3.58%	4.58%
MHPML Total OPEB Liability	1,356,435	1,121,399	941,641
	2.87%	3.87%	4.87%
CEIP Total OPEB Liability	163,978	134,757	112,431
	4.71%	5.71%	6.71%
MCHCP-CU Net OPEB Liability	571	484	414

Note 8 - Other Postemployment Benefits (cont.)

Sensitivity of the Net OPEB Liability to Changes in the Healthcare Cost Trend Rates

Regarding the sensitivity of the net OPEB liability for MCHCP and the total OPEB liability for MHPML and CEIP, to changes in healthcare cost trend rates, the following presents the plan's liability, calculated using healthcare cost trend rates, as well as, what the plan's net OPEB liability would be if it were calculated using healthcare cost trend rates that are 1-percentage-point lower or 1-percentage-point higher (in thousands of dollars):

	1% Decrease	Current Health Care Cost Trend Rates	1% Increase
MCHCP Net OPEB Liability	1,497,398	1,756,787	2,085,312
MHPML Total OPEB Liability	919,386	1,121,399	1,392,141
CEIP Total OPEB Liability	112,514	134,757	164,184
MCHCP-CU Net OPEB Liability	412	484	574

OPEB Plan Fiduciary Net Position

Detailed information about the OPEB plan's fiduciary net position is available in the separate financial reports issued by MCHCP:

Missouri Consolidated Health Care Plan
P.O. Box 104355
Jefferson City, Missouri 65110-4355
www.mchcp.org

Missouri State Insured Defined Benefit Insurance Plan

The Missouri State Insured Defined Benefit Insurance Plan is administered through The Standard, which is a third party administrator with oversight by Missouri State Employees Retirement System (MOSERS). In the event that the Standard becomes insolvent, the Missouri Guarantee Association will work with the Standard to see what assets are available to handle their liabilities and the MO Guarantee Association would handle the open and unpaid claims up to the maximum outlined in Section 376.717 RSMo.

Retiree Life Insurance

Members who retire on or after October 1, 1985 or retirees of the Department of Labor and Industrial Relations (DOLIR) who retire on or after January 1, 1996 are eligible for $5,000 of state-sponsored basic life insurance coverage if they retire directly from active employment. This group plan is financed on a percentage of payroll and is purchased as a group policy through competitive bids. Premiums are contributed as provided by Section 104.515, RSMo. Retirees of the DOLIR who retire prior to January 1, 1996 are eligible for state-sponsored insured defined benefit coverage in the same amount of coverage they were receiving through the DOLIR. The coverage for this closed group is purchased as a group policy at a current cost of $2.07 per thousand dollars of coverage, per month as provided by Section 288.225 RSMo. OPEB expense for fiscal year 2018 was $1,902,000.

Long-Term Disability Insurance (LTD)

MOSERS provides (LTD) coverage for eligible members and generally includes those active members of MOSERS' retirement plans who do not have other disability coverage and are not yet eligible to receive normal (unreduced) retirement benefits. There were 32,836 members covered under the program, as of June 30, 2018. This insured defined-benefit coverage is billed on percentage of covered payroll (0.55%). Purchased as group policy through competitive bids, LTD is administered by The Standard Insurance Company. The cost for the year ended June 30, 2018 was $8,130,000. Premiums are contributed by the state and its component employers as provided for by Section 104.515, RSMo.

Note 8 - Other Postemployment Benefits (cont.)

University of Missouri System

Plan Description

In addition to the retirement benefits described in *Note 7,* the University of Missouri operates a single-employer, defined benefit Other Postemployment Benefits (OPEB) Plan. The assets of the OPEB Trust Fund are irrevocable and legally protected from creditors and dedicated to providing postemployment benefits in accordance with the plan. The OPEB plan provides postemployment medical, dental, and life insurance benefits to employees who retire from the University after attaining age 55 and before reaching age 60 with ten or more years of service, or after age 60 with five or more years of service. As of January 1, 2018, employees must be 60 years old and have 20 years of service at the date of retirement to access the same percentage subsidy as retirees prior to January 1, 2018. Employees with age plus years of service less than 80, but with more than 5 years of service as of January 1, 2018 will receive a subsidy of $100 per year of service up to a maximum of $2,500 annually. Employees with less than 5 years of service as of January 1, 2018 will not receive an insurance subsidy or be eligible to participate in the University's plans.

As of June 30, 2018 and 2017, 8,603 and 7,517 retirees, respectively, were receiving benefits, and an estimated 10,649 active University employees may become eligible to receive benefits under the plan. Post-employment medical, dental and life insurance benefits are also provided to long-term disability claimants who were vested in the University's Retirement Plan at the date the disability began, provided the onset date of the disability was on or after September 1, 1990. As of June 30, 2018 and 2017, 210 and 166 long-term disability claimants, respectively, met those eligibility requirements. The terms and conditions governing the postemployment benefits to which employees are entitled are at the sole authority and discretion of the University's Board of Curators. The OPEB plan does not issue a separate financial report.

Contributions

Postemployment benefits are funded through both employer and employee contributions. Contribution requirements of employees and the University are established and may be amended by the University's Board of Curators. For employees retiring prior to September 1, 1990, the University contributes 2/3 of the medical benefits premium and 1/2 of the dental plan premium. For employees who retire on or after September 1, 1990, the University contributes towards premiums based on the employee's length of service and age at retirement.

The University makes available two group term life insurance options. Option A coverage is equal to the retiree's salary at the date of retirement, while Option B is equal to two times the amount. For each Option, graded decreases in coverage are made when the retiree attains specific age levels. The University pays the full cost of Option A and approximately 91% of Option B coverage. Coverage for group term life insurance ends on January 1 following the retiree's 70th birthday.

For the years ended June 30, 2018 and 2017, participant contributions were $16,480,000 and $14,750,000 or approximately 49.9% and 47.5% respectively, of the total premiums through their required contributions, which vary depending on the plan and coverage selection. In fiscal years 2018 and 2017, the contribution rate as a percentage of covered payroll was 2.58% and 2.72%, respectively, and the University contributed $18,590,000 and $21,394,000, respectively.

The University also makes available two long-term disability options to its employees. Option A coverage is equal to 60% of the employee's salary on the date the disability began, when integrated with benefits from all other sources. Option B coverage is equal to 66-2/3% of the employee's salary, integrated so that benefits from all sources will not exceed 85% of the employee's salary. Both options have a 149-day waiting period and provide benefits until age 65. The University pays the full cost of the Option A premium, while employees enrolled in Option B pay the additional cost over the Optional A premium.

OPEB Liabilities, OPEB Expense, and Deferred Outflows of Resources and Deferred Inflows of Resources

At June 30, 2018, the net OPEB liability for the University was based on an actuarial valuation as of June 30, 2018 and measured as of that date. For the year ended June 30, 2018, fiduciary net position as a percentage of the net OPEB liability amounted to 7.68%.

Note 8 - Other Postemployment Benefits (cont.)

Changes in net OPEB liability (in thousands of dollars):

	Total OPEB Liability (TOL)	Fiduciary Net Pension (FNP)	Net OPEB Liability (NOL)
Balances at June 30, 2017	$ 498,407	$ 36,144	$ 462,263
Changes for the year:			
Service Cost	4,991	—	4,991
Interest	17,434	—	17,434
Changes in assumptions	(18,998)	—	(18,998)
Contributions – Employer	—	18,590	(18,590)
Contributions – Employee	—	16,480	(16,480)
Net Investment Income	—	790	(790)
Benefit payments, including refunds of employee contributions	(22,828)	(35,031)	12,203
Administrative Expenses	—	(172)	172
Net Changes	(19,401)	657	(20,058)
Balances at June 30, 2018	$ 479,006	$ 36,801	$ 442,205

For the year ended June 30, 2018, the University recognized OPEB expense of $15,947,000. At June 30, 2018, deferred outflows of resources and deferred inflows of resources related to OPEBs were reported from the following sources (in thousands of dollars):

	Deferred Outflows of Resources	Deferred Inflows of Resources
Changes in assumptions	$ —	$ 33,795
Net difference between projected and actual earnings on OPEB plan investments	—	1,180
Total	$ —	$ 34,975

The University recognizes differences between actual and expected investment performance included in deferred outflows/inflows of resources on a straight-line basis over five years. Differences between expected and actual experience on actuarial assumptions are amortized over the average expected remaining service life of the University's employees. The following table summarizes the future recognition of those items (in thousands of dollars):

Fiscal Year Ended June 30	Net Deferred Outflows/Inflows of Resources Recognition
2019	$ (6,478)
2020	(6,478)
2021	(6,478)
2022	(6,295)
2023	(5,978)
Thereafter	(3,268)
Totals	$ (34,975)

Note 8 - Other Postemployment Benefits (cont.)

Actuarial Assumptions

The total OPEB liability at June 30, 2018, is based upon the June 30, 2018, using the entry age normal, as a level percentage of pay, actuarial cost method. Significant actuarial assumptions used in the actuarial valuations are the following:

Price Inflation	2.2%
Salary Increases	Varies based on age: 0.5% to 4.6% (including inflation) for academic and administrative; 0.2% to 3.0% (including inflation) for clerical and service
Investment Rate of Return	3.87%
Retiree Health PPO Plan, Healthy Savings, and Rx Healthcare Cost Trend Rate	8.75% decreasing by 0.25% per year until ultimate trend of 4.5% is reached.
Pre-65 Rx trend rate	9.75% decreasing by 0.25% per year until ultimate trend of 4.5% is reached.
Medicare Advantage Plans medical trend rate	4.6% and 37.5% for Base Plan; 5.6% and 24.2% for Buy-Up Plan; then 6.5% decreasing by 0.25% per year until an ultimate trend of 4.5% is reached
EWP Rx trend rate	8.75% decreasing by 0.25% per year until an ultimate trend of 4.5% is reached
Dental trend rates	3.0% all years.

The University's actuarial assumptions used in the June 30, 2018 valuation involve estimates of the value of reported amounts and assumptions about the probability of occurrence of events far into the future. Benefit projections for financial reporting purposes are based on the benefits provided under the terms of the substantive plan in effect at the time of each valuation and the historical pattern of cost sharing between the employer and plan members to that point. The actuarial methods and assumptions used include techniques that are designed to reduce the effects of short term volatility in actuarial liabilities and the actuarial value of assets, consistent with the long term perspective of the calculations. For healthy retiree mortality rates, the RP-2014 Healthy Employee/Annuitant Mortality Table projected generationally using Scale MP-2017 was used. For disabled retiree mortality rates, the RP-2014 Disabled Annuitant Mortality Table projected generationally using Scale MP-2017 was used.

Discount Rate

The discount rate used to measure the total OPEB liability was 3.87% for the year ended June 30, 2018. The projection of cash flows used to determine the discount rate assumed that the University would not make additional contributions to the OPEB Trust and would continue to fund the plan on a pay-as-you-go basis, therefore the University's investments related to OPEB are considered cash and cash equivalents. For the June 30, 2018 actuarial valuation, 3.87% was used as the long-term expected rate of return. Based on these assumptions, the OPEB Plan's fiduciary net position was not projected to cover a full year of projected future benefit payments. Therefore, all future benefit payments are discounted at the current index rate for 20 year, tax exempt general obligation municipal bonds with an average rating of AA/Aa or higher.

Sensitivity of the Net OPEB Liability to Changes in the Discount Rate

Regarding the sensitivity of the net OPEB liability for the University, to changes in the single discount rate, the following presents the University's liability, calculated using a single discount rate, as well as, what the plan's liability would be if it were calculated using a single discount rate that is 1-percentage-point lower or 1-percentage-point higher (in thousands of dollars):

	1% Decrease	Current Single Discount Rate Assumption	1% Increase
	2.87%	3.87%	4.87%
Net OPEB Liability	513,279	442,205	387,166

Note 8 - Other Postemployment Benefits (cont.)

Sensitivity of the Net OPEB Liability to Changes in the Healthcare Cost Trend Rates

Regarding the sensitivity of the net OPEB liability for the University, to changes in healthcare cost trend rates, the following presents the University's liability, calculated using healthcare cost trend rates, as well as, what the plan's net OPEB liability would be if it were calculated using healthcare cost trend rates that are 1-percentage-point lower or 1-percentage-point higher (in thousands of dollars):

	1% Decrease	Current Health Care Cost Trend Rates	1% Increase
Net OPEB Liability	395,187	442,205	502,943

Detailed information concerning the Plan is presented in the University's 2018 financial report, which is publicly available. Copies of this report may be requested from:

University of Missouri System

Columbia, Missouri 65211
www.umsystem.edu

Note 9 - Deferred Compensation

Missouri State Public Employees' Deferred Compensation Plan:

In accordance with Internal Revenue Code Section 457, the State offers all employees the opportunity to participate in the Missouri State Public Employees' Deferred Compensation Plan. Under the Plan, employees are permitted to defer a portion of their current salary until future years.

All amounts of compensation deferred under the Plan must be held in a trust, custodial account, or annuity contract for the exclusive benefit of Plan participants and their beneficiaries. Investments are managed by the Plan's trustee under one of several investment options, or a combination thereof. The choice between the investment option(s) available by the Plan is made by the participants.

Copies of the Plan's financial statements may be requested from:

Plan Administrator
c/o MOSERS
P.O. Box 209
907 Wildwood Drive
Jefferson City, Missouri 65102-0209

Note 9 - Deferred Compensation (cont.)

Missouri State Public Employees' Deferred Compensation Plan:

The Plan was established by the Missouri State Public Employees' Deferred Compensation Commission in July 1995 pursuant to Section 401(a) of the Internal Revenue Code.

Under the Plan provisions, any employee of the State is eligible to participate in the Plan if he/she has been an employee of the State for at least 12 consecutive months preceding any employer contributions to the Plan, and is making continuous monthly deferrals of at least $25 to the Missouri State Public Employees' Deferred Compensation Plan. As of March 2010, employer incentive (match) associated with the State of Missouri Deferred Compensation Plan was suspended. Participating employees are 100% vested.

The first employer contributions to the Plan were made in January 1996. The Plan receives contributions from employers as well as rollovers from other qualified plans. During fiscal year 2018, net rollovers and contributions to ICMA-RC were $62,226,000.

Copies of the Plan's financial statements may be requested from:

Plan Administrator

*Beginning balances as of June 30, 2017 have been restated (see *Note 18*).

Note 12 - Bonds Payable

Bonds are long-term liabilities and are reconciling items from governmental fund financial statements to government-wide financial statements. On the Government-Wide Statement of Net Position, the long-term liabilities are shown as the amounts due within one year from the date of the statement and the amounts due in more than one year from the date of the statement.

Note 12 - Bonds Payable (cont.)

General Obligation Bonds:

The Board of Fund Commissioners of the State of Missouri, upon voter approval and subsequent authorization of the General Assembly, issues general obligation bonds that are secured by a pledge of the full faith, credit, and resources of the State. The principal and interest amounts are transferred one year in advance from the General Fund or other funds to the debt service funds from which principal and interest payments are made. Three types of general obligation bonds are currently outstanding. Proceeds from the Water Pollution Control Bonds were used to provide funds for the protection of the environment through the control of water pollution. Proceeds from the Fourth State Building Bonds were used to provide funds for improvements of buildings and property of higher education institutions, Department of Corrections, and the Division of Youth Services. Proceeds from the Stormwater Control Bonds were used to provide funds to protect the environment through the control of stormwater.

To take advantage of lower interest rates, the Board of Fund Commissioners has issued bonds to refund various outstanding bond issues. The following indicates the refunding bonds issued by the Board (in thousands of dollars):

	Date Issued	Amount Issued	Series Refunded	Amount Refunded
Water Pollution Control Bonds:				
Series A 2010-Refunding	7/27/10	$ 81,450	A 2001	$ 15,030
			A 2002	20,225
			B 2002-Refunding	12,990
			A 2005-Refunding	8,595
			A 2007	31,385
Series A 2012-Refunding	9/27/12	62,460	A 2002	3,225
			B 2002-Refunding	64,080
Fourth State Building Bonds:				
Series A 2010-Refunding	7/27/10	9,060	A 2002-Refunding	8,970
			A 2005-Refunding	1,470
Series A 2012-Refunding	9/27/12	100,395	A 2002-Refunding	110,535
Stormwater Control Bonds:				
Series A 2010-Refunding	7/27/10	15,150	A 2001	7,320
			A 2002	8,475
			A 2005-Refunding	905

Note 12 - Bonds Payable (cont.)

The additional principal amount of the refunding bonds does not decrease the amount of the authorization.

As of June 30, 2018, $594,494,240 of the Water Pollution Control Bonds; $250,000,000 of the Fourth State Building Bonds; and $45,000,000 of the Stormwater Control Bonds have been issued. The remaining authorization for the Water Pollution Control Bonds is $130,505,760 and for Stormwater Control Bonds is $155,000,000. There is no remaining authorization for the Fourth State Buildings Bonds.

General obligation bonds issued and outstanding as of June 30, 2018, were as follows (in thousands of dollars):

	Interest Rates	Payment Dates	Issue Date	Final Maturity Date	Issued	Outstanding
Water Pollution Control Bonds:						
Series A 2007	4.0 - 5.0%	6/1; 12/1	11/07	12/1/21	$ 50,000	$ 7,435
Series A 2010-Refunding	4.0 - 5.0%	12/1; 6/1	7/10	12/1/22	81,450	42,365
Series A 2012-Refunding	3.0 - 4.0%	10/1; 4/1	9/12	10/1/19	62,460	3,670
Fourth State Building Bonds:						
Series A 2010-Refunding	4.0 - 5.0%	12/1; 6/1	7/10	12/1/22	9,060	4,710
Series A 2012-Refunding	2.0 - 4.0%	10/1; 4/1	9/12	10/1/21	100,395	38,640
Stormwater Control Bonds:						
Series A 2010-Refunding	4.0 - 5.0%	12/1; 6/1	7/10	12/1/22	15,150	7,875
Total General Obligation Bonds					$ 318,515	$ 104,695
Less: Amount in Sinking Fund for payment of Principal						(42,619)
						$ 62,076

As of June 30, 2018, general obligation debt service requirements for principal and interest in future years were as follows (in thousands of dollars):

Fiscal Year Ended June 30	Principal	Interest	Totals
2019	$ 38,575	$ 3,712	$ 42,287
2020	21,590	2,445	24,035
2021	15,880	1,666	17,546
2022	16,560	964	17,524
2023	12,090	302	12,392
Totals	$ 104,695	$ 9,089	$ 113,784

Note 12 - Bonds Payable (cont.)

Other Bonds:

The Board of Public Buildings of the State of Missouri, upon the approval of the General Assembly, issues revenue bonds for building projects and commits state agencies to lease space in these buildings. The General Assembly appropriates to the Board, on behalf of the state agencies, amounts sufficient to pay the principal and interest on the bonds, maintain certain required reserves, and to pay the costs of operations. The total amount authorized for the Board equals $1,545,000,000.

To take advantage of lower interest rates, the Board of Public Buildings has issued bonds to refund various outstanding bond issues. The following indicates the refunding bonds issued by the Board (in thousands of dollars):

	Date Issued	Amount Issued	Series Refunded	Amount Refunded
Board of Public Buildings:				
Series A 2011-Refunding	09/27/11	$ 143,020	A 2001	$ 126,850
			A 2003	12,620
			A 2006	3,175
Series A 2012-Refunding	08/23/12	278,835	A 2003	285,340
Series A 2013-Refunding	10/11/13	29,370	A 2003	30,195
Series A 2014-Refunding	08/19/14	88,680	A 2006	87,225
Series A 2015-Refunding	04/01/15	20,250	A 2011-Refunding	21,380

The additional principal amount of the refunding bonds does not decrease the amount of the authorization.

As of June 30, 2018, the Board of Public Buildings Bonds had issued $1,192,915,000 of the bond authorization. The remaining authorization is $352,085,000.

The Board of Public Buildings Bonds issued and outstanding as of June 30, 2018, were as follows (in thousands of dollars):

	Interest Rates	Payment Dates	Issue Date	Final Maturity Date	Issued	Outstanding
Board of Public Buildings:						
Series A 2011-Refunding	1.0 - 5.0%	4/1; 10/1	9/11	10/1/28	$ 143,020	$ 82,940
Series A 2012-Refunding	2.0 - 5.0%	4/1; 10/1	8/12	10/1/28	278,835	219,565
Series A 2013-Refunding	2.0 - 5.0%	4/1; 10/1	10/13	10/1/28	29,370	23,120
Series A 2014-Refunding	1.0 - 5.0%	4/1; 10/1	8/14	10/1/30	88,680	80,930
Series A 2015-Refunding	5.0%	4/1; 10/1	4/15	10/1/24	20,250	20,250
Series A 2015	3.0 - 5.0%	4/1; 10/1	4/15	10/1/39	36,805	34,180

Series A 2017	2.0 - 5.0%	4/1; 10/1	9/17	4/1/32	77,165	72,300
Series A 2018	3.0 - 5.0%	4/1; 10/1	5/18	4/1/38	47,740	47,740
Total Board of Public Buildings Bonds					$ 881,865	$ 718,360

Note 12 - Bonds Payable (cont.)

As of June 30, 2018, the debt service requirements for principal and interest in future years for the Board of Public Buildings Bonds were as follows (in thousands of dollars):

Fiscal Year Ended June 30	Principal	Interest	Totals
2019	$ 48,610	$ 25,789	$ 74,399
2020	50,595	23,645	74,240
2021	52,880	21,267	74,147
2022	55,220	18,828	74,048
2023	57,480	16,573	74,053
2024-2028	304,060	48,612	352,672
2029-2033	118,580	11,354	129,934
2034-2038	26,620	3,018	29,638
2039-2040	4,315	152	4,467
Totals	$ 718,360	$ 169,238	$ 887,598

The Missouri Health and Educational Facilities Authority (MOHEFA) issued $35,000,000 of Educational Facilities Revenue Bonds (University of Missouri-Columbia Arena Project) Series 2001, dated November 1, 2001, to fund the design, acquisition, construction, furnishing, and equipping of a sports arena facility and related facilities on the University of Missouri-Columbia campus. The Missouri Health and Educational Facilities Authority (MOHEFA) issued $20,125,000 of Educational Facilities Refunding Revenue Bonds Series 2011, dated November 17, 2011. The Refunding Educational Facilities Revenue bonds refunded $22,770,000 of Educational Facilities Revenue Bonds Series 2001. These bonds are special, limited obligations of the Authority and do not constitute a pledge of the full faith and credit of the State. However, under a financing agreement, the Office of Administration will request that the Governor's annual budget request to the General Assembly include the State's financing amount for principal and interest each year.

The Educational Facilities Revenue Bonds issued and outstanding as of June 30, 2018, were as follows (in thousands of dollars):

	Interest Rates	Payment Dates	Issue Date	Final Maturity Date	Issued	Outstanding
Educational Facilities Revenue Bonds:						
Series 2011-Refunding	2.0 - 5.0%	4/1; 10/1	11/11	10/1/21	$ 20,125	$ 9,145

As of June 30, 2018, the debt service requirements for principal and interest in future years for the Educational Facilities Revenue Bonds (based on the financing agreement between the State and the Authority) were as follows (in thousands of dollars):

Fiscal Year Ended June 30	Principal	Interest	Totals
2019	$ 2,115	$ 404	$ 2,519
2020	2,225	296	2,521
2021	2,340	182	2,522
2022	2,465	62	2,527
Totals	$ 9,145	$ 944	$ 10,089

Note 12 - Bonds Payable (cont.)

The Regional Convention and Sports Complex Authority issued $132,910,000 of Convention and Sports Facility Project Bonds Series A 1991, dated August 15, 1991, to finance the costs of acquiring land and constructing a multi-purpose convention and indoor sports facility in downtown St. Louis, Missouri. On December 15, 1993, the Authority issued $121,705,000 of Convention and Sports Facility Project Refunding Bonds Series A 1993 for the purpose of refunding the callable portions of the outstanding bonds issued in August 1991 and to pay the costs of additions and enhancements to the project. The outstanding principal amount refunded was $101,410,000. On August 1, 2003, the Authority issued $116,030,000 of Convention and Sports Facility Project Refunding Bonds Series A 2003 for the purpose of refunding Convention and Sports Facility Project Bonds Series A 1991 and Series A 1993 refunding bonds and to pay the costs of additions and enhancements to the project. The outstanding principal amount refunded was $2,845,000 for the Series A 1991 bonds and $113,170,000 for the Series A 1993 refunding bonds. On August 20, 2013, the Authority issued $65,195,000 of Convention and Sports Facility Project Refunding Bonds Series A 2013 for the purpose of refunding Convention and Sports Facility Project Refunding Bonds Series A 2003. The principal amount refunded was $64,385,000. These bonds are limited obligations of the Authority and do not constitute a pledge of the full faith and credit of the State.

The Convention and Sports Facility Project Bonds issued and outstanding as of June 30, 2018, were as follows (in thousands of dollars):

	Interest Rates	Payment Dates	Issue Date	Final Maturity Date	Issued	Outstanding
Convention and Sports Facility Project Bonds:						
Series A 2013-Refunding	2.0 - 5.0%	2/15; 8/15	8/13	8/15/21	$ 65,195	$ 35,450

As of June 30, 2018, the debt service requirements for the principal and interest in future years for the Convention and Sports Facility Project Bonds were as follows (in thousands of dollars):

Fiscal Year Ended June 30	Principal	Interest	Totals
2019	$ 8,225	$ 1,567	$ 9,792
2020	8,635	1,145	9,780
2021	9,070	703	9,773
2022	9,520	238	9,758
Totals	$ 35,450	$ 3,653	$ 39,103

Note 12 - Bonds Payable (cont.)

Under a financing agreement dated August 1, 1991, the Office of Administration will request that the Governor's annual budget request to the General Assembly include the State's financing amount of $10,000,000 for principal and interest and $2,000,000 for maintenance each year. Future payments to the Authority related to the bond repayment were as follows (in thousands of dollars):

Fiscal Year Ended June 30	State Debt Service Payments
2019	$ 10,000
2020	10,000
2021	10,000
2022	5,000
Total	$ 35,000

The Missouri Development Finance Board (MDFB) issued $92,660,000 of Series 2014 Bonds dated December 10, 2014 and $97,225,000 of Series 2016 Bonds dated December 15, 2016, to fund the replacement of the Fulton State Hospital. These bonds are special, limited obligations of the Board and do not constitute a pledge of the full faith and credit of the State. However, under a financing agreement, the Office of Administration will request that the Governor's annual budget request to the General Assembly include the State's financing amount for principal and interest each year.

The MDFB – Fulton State Hospital Project Bonds issued and outstanding as of June 30, 2018, were as follows (in thousands of dollars):

	Interest Rates	Payment Dates	Issue Date	Final Maturity Date	Issued	Outstanding
Fulton State Hospital Project Bonds:						
Series 2014	2.25 - 5.0%	4/1; 10/1	12/14	10/1/39	$ 92,660	$ 85,700
Series 2016	4.0 - 5.0%	4/1; 10/1	12/16	10/1/39	97,225	94,810
Total Fulton State Hospital Bonds					$ 189,885	$ 180,510

As of June 30, 2018, the debt service requirements for principal and interest in future years for the Fulton State Hospital Project Bonds (based on the financing agreement between the State and the Board) were as follows (in thousands of dollars):

Fiscal Year Ended June 30	Principal	Interest	Totals
2019	$ 5,095	$ 7,252	$ 12,347
2020	5,355	6,991	12,346
2021	5,625	6,717	12,342

2023	6,210	6,125	12,335
2024-2028	34,935	26,667	61,602
2029-2033	42,445	19,059	61,504
2034-2038	51,340	10,118	61,458
2039-2040	23,595	969	24,564
Totals	$ 180,510	$ 90,326	$ 270,836

Note 12 - Bonds Payable (cont.)

The Missouri Development Finance Board (MDFB) issued $33,800,000 of Series A 2016 Bonds dated March 11, 2016, to fund the State Historical Society project. These bonds are special, limited obligations of the Board and do not constitute a pledge of the full faith and credit of the State. However, under a financing agreement, the Office of Administration will request that the Governor's annual budget request to the General Assembly include the State's financing amount for principal and interest each year.

The MDFB – State Historical Society Project Bonds issued and outstanding as of June 30, 2018, were as follows (in thousands of dollars):

	Interest Rates	Payment Dates	Issue Date	Final Maturity Date	Issued	Outstanding
State Historical Society Project Bonds:						
Series A 2016	2.0 - 5.0%	4/1; 10/1	3/16	10/1/35	$ 33,800	$ 31,405

As of June 30, 2018, the debt service requirement of the State for principal and interest in future years for the State Historical Society Project were as follows (in thousands of dollars):

Fiscal Year Ended June 30	Principal	Interest	Totals
2019	$ 1,290	$ 1,039	$ 2,329
2020	1,350	973	2,323
2021	1,415	903	2,318
2022	1,480	831	2,311
2023	1,530	779	2,309
2024-2028	8,295	3,168	11,463
2029-2033	9,605	1,738	11,343
2034-2036	6,440	300	6,740
Totals	$ 31,405	$ 9,731	$ 41,136

State Road Bonds:

The Missouri Highways and Transportation Commission authorized by Article IV, Section 29-34 of the Missouri Constitution and Section 226.133 of the State Highway Act, issues bonds for highway construction and repairs. Under the Missouri Constitution, the principal and interest of the State Road Bonds are payable solely from the revenues of the Missouri Road Fund. State Road Bonds have the following levels of priority: Senior Bonds, First Lien Bonds, Second Lien Bonds, and Third Lien Bonds. Proceeds from State Road Bonds are used for the purpose of constructing and maintaining the State's highways. As of June 30, 2018, the Missouri Highways and Transportation Commission had issued $3,812,195,000.

Note 12 - Bonds Payable (cont.)

To take advantage of lower interest rates, the Missouri Highways and Transportation Commission has issued Bonds to refund various outstanding bond issues. The following indicates the refunding bonds issued by the Commission (in thousands of dollars):

	Date Issued	Amount Issued	Series Refunded	Amount Refunded
Senior Lien State Road Bonds:				
Series 2006-Refunding	12/13/06	$ 394,870	A 2000	$ 135,980
			A 2001	105,075
			A 2002	109,165
			A 2003	57,390
Series C 2010-Refunding	11/10/10	130,390	A 2001	11,135
			A 2002	18,405
			A 2003	111,760
Series A 2014-Refunding	6/3/14	589,015	A 2006	149,150
			B 2006	503,330
Series B 2014-Refunding	6/3/14	311,975	2007	325,290

The State Road Bonds issued and outstanding as of June 30, 2018, were as follows (in thousands of dollars):

Total Missouri Highways and Transportation Commission					$ 2,653,985	$ 1,832,370

Note 12 - Bonds Payable (cont.)

As of June 30, 2018, debt service requirements for principal and interest in future years for the Missouri Highways and Transportation Commission were as follows (in thousands of dollars):

Fiscal Year Ended June 30	Principal	Interest	Totals
2019	$ 209,355	$ 92,447	$ 301,802
2020	170,340	82,413	252,753
2021	183,515	74,224	257,739
2022	196,330	65,170	261,500
2023	199,720	55,530	255,250
2024-2028	643,185	145,947	789,132
2029-2033	229,925	35,328	265,253
Totals	$ 1,832,370	$ 551,059	$ 2,383,429

Component Units' Long-Term Debt - The following bonds are included in the balance sheet of the college and universities and the non-major component units.

Major

College and Universities:

The college and universities of the State issue revenue bonds for various projects on each respective campus. Bonds are payable, both principal and interest, only out of net income and revenues arising from operations of facilities funded by the bonds. As of June 30, 2018, debt service requirements for principal and interest for the college and universities were as follows (in thousands of dollars):

Fiscal Year Ended June 30	Principal	Interest	Totals
2019	$ 65,444	$ 90,594	$ 156,038
2020	173,123	85,836	258,959
2021	62,475	81,092	143,567
2022	62,794	78,691	141,485
2023	67,588	76,172	143,760
2024-2028	386,913	336,250	723,163
2029-2033	322,833	260,885	583,718
2034-2038	260,388	194,078	454,466
2039-2043	329,044	111,257	440,301
2044-2048	153,115	35,591	188,706
2049-2053	—	31,778	31,778
2054-2057	150,000	9,533	159,533
Totals [1]	$ 2,033,717	$ 1,391,757	$ 3,425,474

[1] The bond schedule does not include notes payable, therefore, it differs from the bonds and notes payable amount reported in the statements.

Note 12 - Bonds Payable (cont.)

Non-Major

Missouri Development Finance Board:

In December 2000, the Board issued $6,500,000 in St. Louis Convention Center Hotel Series 2000B, taxable infrastructure facilities revenue bonds and $14,600,000 in St. Louis Convention Center Hotel Series 2000C, tax-exempt infrastructure facilities revenue bonds, respectively for the purpose of paying the costs of acquiring land and constructing a parking garage. Bonds are payable, both principal and interest, out of revenues derived from the operation of the parking garage.

In April 2010, the Board issued $9,000,000 in Seventh Street Garage Series 2010A, tax exempt infrastructure facilities revenue bonds.

The Missouri Development Finance Board Revenue Bonds issued and outstanding as of June 30, 2018, were as follows (in thousands of dollars):

	Interest Rates	Payment Dates	Issue Date	Final Maturity Date	Issued	Outstanding
Missouri Development Finance Board:						
Revenue Bonds						
Series 2000B	Variable	12/1	12/00	12/1/20	$ 6,500	$ 3,910
Series 2000C	Variable	12/1	12/00	12/1/20	14,600	5,410
Series 2010A	Variable	monthly	4/10	5/1/40	9,000	7,832
Total Missouri Development Finance Board Revenue Bonds					$ 30,100	$ 17,152

As of June 30, 2018, the debt service requirements for principal and interest in future years for the Missouri Development Finance Board Revenue Bonds were as follows (in thousands of dollars):

Fiscal Year Ended June 30	Principal	Interest	Totals
2019	$ 223	$ 250	$ 473
2020	232	247	479
2021	9,562	244	9,806
2022	252	101	353
2023	264	98	362
2024-2028	1,501	426	1,927
2029-2033	1,855	306	2,161
2034-2038	2,292	157	2,449
2039-2040	971	14	985
Totals [1]	$ 17,152	$ 1,843	$ 18,995

[1]The bond schedule does not include notes payable, therefore, it differs from the bonds and notes payable amount reported in the statements.

Note 12 - Bonds Payable (cont.)

The annual debt service schedule assumes an interest rate of 0.098%, representing the interest rate at June 30, 2018, for the Series 2000B and Series 2000C bonds. The annual debt service also assumes an interest rate of 4.25%, representing the interest rate as of June 30, 2018, for the Seventh Street Garage Series 2010A bonds. As of June 28, 2012 through April 30, 2015, the Board entered into an interest deferral agreement whereby the bond interest rate for the Seventh Street Garage Series 2010A bonds is the lesser of the modified pay rate or 4.25% annually.

Bond Transactions of the State of Missouri - The following schedule is a summary of bond activity for the fiscal year ended June 30, 2018 (in thousands of dollars):

	Governmental Funds		Component Units	
	General Obligation Bonds	Other Bonds	Revenue Bonds	Totals
Bonds Payable at July 1, 2017	$ 154,830	$ 2,943,825	$ —	$ 3,098,655
Bond Issuance	—	124,905	—	124,905
Bonds Retired	(50,135)	(261,490)	—	(311,625)
Subtotal	104,695	2,807,240	—	2,911,935
College and Universities [1]	—	—	2,033,717	2,033,717
Missouri Development Finance Board	—	—	17,152	17,152
Bonds Payable at June 30, 2018	$ 104,695	$ 2,807,240	$ 2,050,869	$ 4,962,804

[1] Detailed information for college and universities are not shown.

Note 13 - Defeased Debt

A. Current Year Debt Defeasance

On December 20, 2017, Missouri State University issued $36,190,000 of Auxiliary Enterprise System Revenue Bonds, Series 2017A, with interest rate ranging from 2.15% to 2.63%. As a result of the refunding, the University reduced its total debt service payments by $2,659,129 to obtain an economic gain (difference between the present values of the old and the new debt service payments) of $2,120,193.

B. Cumulative Debt Defeasances

Various bond issues have been defeased by the advance refunding of bonds. Irrevocable escrow accounts, containing proceeds of the refunding bond issues in the form of cash and U.S. government securities, are used to pay principal, interest, or redemption prices of the defeased bonds as and when due.

For financial reporting purposes, the following debt has been defeased and therefore removed as a liability from the governmental activities and college and universities Statement of Net Position.

Governmental Activities - As of June 30, 2018, bonds outstanding of $21,380,000 are defeased.

College and Universities - As of June 30, 2018, bonds outstanding of $309,010,000 are defeased.

Note 14 - Payables and Receivables

A summary of accounts payable and accounts receivable at June 30, 2018, is shown below (in thousands of dollars):

	Governmental Activities	Business-Type Activities	Balance June 30, 2018
Accounts Payable:			
Taxpayers	$ 165,378	$ 85	$ 165,463
Other Governments	96,754	1	96,755
Vendors	1,128,200	25,829	1,154,029
Employees	115,347	3,278	118,625
Other	79,097	6	79,103
Total Accounts Payable	$ 1,584,776	$ 29,199	$ 1,613,975
Accounts Receivable with expected date of receipt within one year:			
Taxpayers	$ 1,912,622	$ 1,678	$ 1,914,300
Other Governments	844,703	6,388	851,091
Vendors	129,324	—	129,324
Customers	181,575	161,822	343,397
Other	1,382,427	567	1,382,994
	4,450,651	170,455	4,621,106
Accounts Receivable with expected date of receipt greater than one year:			
Taxpayers	111,822	—	111,822
Other Governments	16	—	16
Vendors	25,952	—	25,952
Customers	148,322	20	148,342
Other	23,187	—	23,187
	309,299	20	309,319
Accounts Receivable	4,759,950	170,475	4,930,425
Amounts not expected to be collected	(532,052)	—	(532,052)
Accounts Receivable, net	$ 4,227,898	$ 170,475	$ 4,398,373

The Accounts Receivable amounts greater than one year for taxpayers increased from FY17 due to an error correction.

Note 15 - Deferred Inflows and Outflows

Deferred outflows of resources are defined as consumption of net assets by the government that is applicable to a future reporting period. Deferred inflows of resources are defined as acquisition of net assets by the government that is applicable to a future reporting period. Deferred outflows increase net position, similar to assets and deferred inflows decrease net position, similar to liabilities.

Note 15 - Deferred Inflows and Outflows (cont.)

The components of deferred outflows of resources and deferred inflows of resources reported in the government-wide financial statements as of June 30, 2018, are as follows (in thousands):

	Primary Government			
	Governmental Activities	Business-Type Activities	Total	Component Units
Deferred Outflows of Resources				
Pension Differences Between Expected and Actual Experience	$ 23,753	$ 876	$ 24,629	$ 19,320
Net Differences Between Projected and Actual Earnings on Pension Plan Investments	806,507	26,490	832,997	176,530
Changes in Proportion and Differences Between Pension Plan Contributions and Proportionate Share of Contributions	15	—	15	6,630
Pension Changes in Assumptions	393,057	13,876	406,933	290,333

Note 16 - Interfund Assets and Liabilities

A summary of interfund assets and liabilities at June 30, 2018, is shown below (in thousands of dollars):

	Due From Other Funds, Component Units, and Primary Government					
	Public Education	Conservation and Environmental Protection	Non-Major Governmental Funds	Non-Major Enterprise Funds	Internal Service Funds	Totals
Due to Other Funds, Component Units, and Primary Government						
General Fund	$ —	$ —	$ —	$ 46	$ 4,942	$ 4,988
Public Education	—	—	—	—	14	14
Conservation and Environmental Protection	—	—	—	329	222	551
Missouri Road Fund	—	—	—	—	227	227
Non-Major Governmental Funds	—	—	—	—	1,189	1,189
State Lottery	27,950	—	—	—	57	28,007
Unemployment Compensation	—	—	630	—	—	630
Petroleum Storage Tank Insurance	—	—	—	2	4	6
Non-Major Enterprise Funds	—	—	—	—	87	87
Internal Service Funds	—	—	—	3	275	278
Non-Major Component Units	—	250	—	—	2	252
Totals	$ 27,950	$ 250	$ 630	$ 380	$ 7,019	$ 36,229

	Advance From Component Units
	Non-Major Component Units
Advance To Component Units	
Conservation and Environmental Protection	$ 267

The loans from the component units were for animal waste treatment systems.

During the consolidation process for the Government-Wide Statement of Net Position, interfund payables and receivables were eliminated as follows: $2,000 on the face of the Proprietary Funds Statements of Net Assets and governmental activities in the amount of $6,869,000.

The $26.4 million increase in the amount due to the Lottery Proceeds Fund from the State Lottery is due to increased lottery ticket sales during fiscal year 2018 and the timing of actual cash transfers in the year end cash to accrual adjustments.

Note 17 - Interfund Transfers

All transfers must be legally authorized by the legislature through transfer appropriations. Interfund transfers for the fiscal year ended June 30, 2018, were as follows (in thousands of dollars):

	Transfers In:				
Transfers Out:	General Fund	Public Education	Conservation and Environmental Protection	Missouri Road Fund	Non-Major Governmental Funds
General Fund	$ —	$ 1,007,870	$ 2,074	$ —	$ 292,836
Public Education	27,513	—	—	—	—
Conservation and Environmental Protection	1,532	—	—	—	1,702
Non-Major Governmental Funds	22,103	5,050	—	463,282	5,611
State Lottery	—	332,453	—	—	—
Unemployment Compensation	—	—	—	—	7,277
Non-Major Enterprise Funds	327	—	—	—	721
Internal Service Funds	2,121	—	—	—	80
Totals	$ 53,596	$ 1,345,373	$ 2,074	$ 463,282	$ 308,227

Continues Below

Transfers Out:	State Lottery	Non-Major Enterprise Funds	Internal Service Funds	Totals
General Fund	$ —	$ 698	$ 79	$ 1,303,557
Public Education	—	—	—	27,513
Conservation and Environmental Protection	—	—	—	3,234
Non-Major Governmental Funds	—	8,400	—	504,446
State Lottery	—	—	—	332,453
Unemployment Compensation	—	—	—	7,277
Non-Major Enterprise Funds	—	—	—	1,048
Internal Service Funds	49	—	35	2,285
Totals	$ 49	$ 9,098	$ 114	$ 2,181,813

Principal reasons for interfund transfers include:

- moving general revenue funds to support elementary and secondary education
- moving state lottery funds to support elementary and secondary education
- moving general revenue funds to support social assistance programs reported in non-major governmental funds
- moving funds related to the construction of capital assets

There were transfers of capital assets for $11,463,000 from a non-major special revenue fund to the enterprise funds. These are reported as capital contributions in the enterprise funds and excluded from the non-major special revenue funds; therefore these transfers are also not included in the reconciliation.

Note 18 - Restatements

During fiscal year 2018, additional information became available which required fund equity amounts. The following table presents a summary of these restatements by fund (in thousands of dollars):

	June 30, 2017 Fund Balance/ Net Position Previously Reported	Prior Period Adjustments	June 30, 2017 Fund Balance/ Net Position Restated
GOVERNMENTAL FUNDS

College and Universities	$ 6,200,528	$ (295,303)	$ 5,905,225
Non-Major	219,765	(471)	219,294
Total Component Units	$ 6,420,293	$ (295,774)	$ 6,124,519

Breakdown of restatements by type:

- General Fund, the restatement was due to a decrease in cash of $3,000, a decrease in accounts receivable of $3,239,000, an increase in interest receivable of $1,362,000, a decrease of inventories of $1,335,000, and an increase of escheat/unclaimed property of $507,000.
- Public Education, the restatement was due to a decrease in accounts receivable of $49,000 and an increase of interest receivable of $513,000.
- Conservation and Environmental Protection, the restatement was due to a decrease in accounts receivable of $126,000.
- Non-major special revenue funds, the restatement was due to a decrease in accounts receivable of $383,000 and a decrease of inventories of $1,328,000.
- State Lottery, the restatement due to the implementation of GASB Statement No. 75, *Accounting and Financial Reporting for Postemployment Benefits Other Than Pensions*, decreased net position of $6,972,000.
- Unemployment Compensation, the restatement was due to a decrease of cash and cash equivalents of $96,000, an increase in accounts receivable of $1,365,000, and an increase in accounts payable of $622,000.
- Petroleum Storage Tank Insurance, the restatement due to the implementation of GASB Statement No. 75, *Accounting and Financial Reporting for Postemployment Benefits Other Than Pensions*, decreased net position of $830,000.

Note 18 - Restatements (cont.)

- Non-major enterprise funds, the restatement was due to an increase in accounts receivable of $34,000, a decrease in inventory of $63,000, and a decrease in capital assets (net of accumulated depreciation/amortization) of $1,916,000. The restatement due to the implementation of GASB Statement No. 75, *Accounting and Financial Reporting for Postemployment Benefits Other Than Pensions*, decreased net position of $43,578,000.
- Non-major internal service funds, the restatement was due to a decrease in accounts receivable of $120,000, a decrease of capital assets (net of accumulated depreciation/amortization) of $1,774,000, and a decrease of obligations under lease purchase of $481,000. The restatement due to the implementation of GASB Statement No. 75, *Accounting and Financial Reporting for Postemployment Benefits Other Than Pensions*, decreased net position of $46,933,000.
- Fiduciary funds - pension (and other employee benefit) trust funds, the restatement due to the implementation of GASB Statement No. 75, *Accounting and Financial Reporting for Postemployment Benefits Other Than Pensions*, decreased net position of $7,777,000.
- Fiduciary funds - private-purpose trust funds, the restatement due to the implementation of GASB Statement No. 75, *Accounting and Financial Reporting for Postemployment Benefits Other Than Pensions*, decreased net position of $508,000.
- Discretely presented component units - colleges and universities, the restatement due to the implementation of GASB Statement No. 75, *Accounting and Financial Reporting for Postemployment Benefits Other Than Pensions,* decreased net position of $282,320,000. For the University of Missouri, the implementation of GASB Statement No. 81*, Irrevocable Split-Interest Agreements,* decreased net position of $12,983,000.
- Discreetly presented component units - non-major funds, the restatement due to the implementation of GASB Statement No. 75, *Accounting and Financial Reporting for Postemployment Benefits Other Than Pensions*, decreased net position of $471,000.

Purpose for restatements:

The items on the schedule were restated as a result of additional information received this year related to prior year corrections.

On the Government-Wide Statement of Activities, net position for the governmental activities were restated by the amounts shown on the restatement schedule for governmental funds and internal service funds. In addition, capital assets (net of accumulated depreciation/amortization) decreased by $17,969,000, obligations under lease purchase increased by $481,000, deferred outflows of resources for refunding bonds decreased by $5,631,000, unamortized bond premium decreased by $4,730,000, and internal balance increased by $13,000. The restatement due to the implementation of GASB Statement No. 75, *Accounting and Financial Reporting for Postemployment Benefits Other Than Pensions*, decreased net position by $1,770,181,000.

On the Government-Wide Statement of Activities, net position for the business-type activities were restated by the amounts shown on the restatement schedule for enterprise funds and by a decrease in internal balance of $13,000.

Note 19 - Fund Deficit

The following funds had a deficit balance:

Enterprise Fund – Petroleum Storage Tank Insurance – At June 30, 2018, this fund had a net position deficit of $40,982,000. The deficit at June 30, 2017 was $33,136,000. The deficit occurred when transport load fees collected were not sufficient to cover the estimated claims liability for clean up of petroleum storage tank leaks. This liability amount is the cumulative result of numerous years of petroleum storage tank leaks. Per Section 319.129, RSMo, this fund will not accept new claim liabilities after December 31, 2020, or upon revocation of federal regulation 40 CFR, whichever occurs first, unless extended by action of the General Assembly. Under Section 319.132, RSMo, the Board of Trustees has authority to increase the transport load fee to a maximum of $60 per 8,000 gallons. In addition, under Section 319.133, RSMo, the Board can increase annual participation fees to a maximum of $500 per tank per year. These facts, along with the knowledge that PSTIF's claim reserves are set using very conservative assumptions, assure that adequate revenues will be available to meet its liabilities. Per Section 319.131, RSMo, the liability of the Petroleum Storage Tank Insurance Fund is not the liability of the State. Upon dissolution of this fund, the liability would be liquidated.

Note 19 - Fund Deficit (cont.)

Enterprise Funds – State Lottery and Missouri Veterans' Homes, and Internal Service Funds – Natural Resources Cost Allocation, Economic Development Administrative, Professional Registration Fees, Missouri State Employees Insurance Plan and Missouri Consolidated Health Care Plan – At June 30, 2018, these funds had a net position deficit of $12,196,000, $102,762,000, $15,235,000, $2,599,000, $7,565,000, $46,000 and $20,386,000 respectively. These funds, except for the Missouri State Employees Insurance Plan and Missouri Consolidated Health Care Plan, have deficit balances due to the fiscal year 2015 implementation of GASB 68 and the reporting of net pension liabilities and the fiscal year 2018 implementation of GASB 75 and the reporting of OPEB liabilities. It is expected that these liabilities will be funded over time. The Missouri State Employees Insurance Plan has a deficit due to administrative costs allocated exceeded reimbursement received. The Missouri Consolidated Health Care Plan (MCHCP) had a poor claims experience during fiscal year 2018, due to a few high claimants. This issue is being resolved with a $62.6 million increase in appropriations to MCHCP and by employee health care plan design changes.

Note 20 - Tax Abatements

The State has entered into various agreements to provide tax abatements through certain programs that provide economic benefit to the State.

Tax Abatement Program	Amount of Taxes Abated during Fiscal Year 2018 (in thousands)	
Housing		
Missouri Low Income Housing Tax Credit	$ 169,139	
Neighborhood Preservation Tax Credit	3,293	
Business Recruitment		
Missouri Quality Jobs	68,229	
Missouri Works - Business Incentives	56,399	
Missouri Works New Jobs Training	5,600	
Missouri Works Job Retention Training	3,521	
Missouri Manufacturing Jobs Act	15,638	
Business Use Incentives for Large-Scale Development	9,818	
Enhanced Enterprise Zone	5,569	
Business Facility Tax Credit	6,330	
Amateur Sports Ticket Sales Tax Credit	1,276	
Rebuilding Communities Tax Credit	359	
Development Tax Credit	542	
Data Center Sales Tax Exemption	—	*
Redevelopment		
Historic Preservation Tax Credit	56,483	
Brownfield Remediation	3,160	
Distressed Areas Land Assemblage	68	
TOTAL	$ 405,424	
Chapter 100 Personal Property Tax Exemption - maximum amount exemption certificates issued	$ 268	

*Confidential

Note 20 - Tax Abatements (cont.)

Housing

The Missouri Low Income Housing Tax Credit (MOLIHTC) is authorized by Sections 135.350-135.363, RSMo, and provides a tax credit to qualified owners of affordable rental housing. To qualify upon application, a development must 1) rent at least 20% of its units to families earning 50% of the area median family income or 2) rent at least 40% of its units to families earning 60% of the area median family income, each adjusted for family size. The MOLIHTC generates equity investments that are purchased by the private sector for the development of new or rehabilitated rental housing which enables owners to lower rents to affordable levels for low-income families. The investor of the MOLIHTC can redeem the credit by applying it dollar for dollar to the following types of tax liabilities: income tax, corporate franchise tax, insurance premium tax, other financial institutions tax, or express company tax. MOLIHTC properties must comply with tenant eligibility, property maintenance, and fair housing law throughout a 15-year period. The Missouri Housing Development Commission monitors the properties for compliance and reports non-compliance to the Internal Revenue Service and Missouri Department of Revenue. Property owners found to be out of compliance are subject to recapture through the provisions of Section 135.355, RSMo and IRS §42. The MOLIHTC reduced state taxes by $169,139,000 during fiscal year 2018.

The Neighborhood Preservation Tax Credit is authorized by Sections 135.475-135.487, RSMo, and provides incentives for homeowners in lower income areas who rehabilitate or construct owner-occupied homes in qualifying or eligible areas of the State. Upon application, the eligible property must be in a qualifying area with a median household income of less than 70% of the median household income for the metropolitan statistical area (MSA) or non-MSA; or be located in an eligible area with a median household income of 70-89% of the median household income for the applicable MSA or non-MSA. Recipients are eligible to receive a credit for 15% of eligible costs up to $25,000 per residence for new residences in eligible areas; 15% of eligible costs up to $40,000 per residence for new residences in qualifying areas; 25% of eligible costs with a minimum of $10,000 and not to exceed $25,000 per residence for substantial rehabilitation in eligible areas; 35% of eligible costs with a minimum of $5,000 or 50% of purchase price and not to exceed $70,000 per residence for substantial rehabilitation in qualifying areas; and 25% of eligible costs with a minimum of $5,000 and not to exceed $25,000 per residence for non-substantial rehabilitation in qualifying areas. The abatements can be applied against income tax, corporate franchise tax, bank tax, insurance premium tax, or other financial institutions tax. A taxpayer, other than the owner-occupant who receives a certificate of tax credit, shall have 30 days within the date of the sale to furnish satisfactory proof that the residence was sold at market to the Director of the Department of Economic Development (DED). If the Director determines that the residence was not in good faith intended for long-term owner occupancy, then the Director may revoke any tax credits issued and seek recovery of those credits pursuant to Section 620.017, RSMo. There are no other commitments made as part of the agreement. The Neighborhood Preservation Tax Credit reduced state taxes by $3,293,000 during fiscal year 2018.

Business Recruitment

Missouri Quality Jobs is authorized by Sections 620.1875-620.1890, RSMo and provides tax incentives to qualified companies for facilitating the creation of new jobs or the retention of existing jobs in the State. This program has been replaced by Missouri Works, except for current projects. To qualify, the company must create a minimum number of jobs within the project facility within 2 to 3 years after the approval of the Notice of Intent and must maintain those jobs for the duration of the benefit. The average wage of the new jobs must equal or exceed the average county wage and the company must offer health insurance and pay at least 50% of the premium. The company must also submit an annual report. Companies may retain 100% of withholding tax that would otherwise be paid into the State or receive tax credits based on the percentage of new payroll or a combination of both for the new or retained jobs approved. The credits can be applied against income tax, bank tax, insurance premium tax, or other financial institutions tax. There are no provisions for recapture and no other commitments are made as part of the agreement. Missouri Quality Jobs reduced state taxes by $68,229,000 during fiscal year 2018.

Note 20 - Tax Abatements (cont.)

The Missouri Works - Business Incentives is authorized by Sections 620.2000-620.2020, RSMo and provides tax incentives for qualified companies to create or retain jobs in the State. To qualify for the credit, a company must create or retain a minimum number of new jobs at the project facility with average wages of 80%, 90%, 120%, or 140% of the county average wage, must offer health insurance and pay at least 50% of the premium, must meet the required number of jobs within 2 years of the Approval of the Notice of Intent, must maintain those minimums for the duration of the benefit, and must submit an annual report. Companies may retain 100% of withholding tax that would otherwise be paid into the State or receive tax credits based on the percentage of new payroll or a combination of both for the new or retained jobs approved. The credits can be applied against income tax, bank tax, insurance premium tax, or other financial institutions tax. Taxes may be recaptured due to misrepresentation, out-of-state relocation, or failure to file an annual report. The agreement requires 100% of the benefits received to be repaid within 60 days for misrepresentation or out-of state location or one year for failure to file an annual report. There are no other commitments made as part of the agreement. Missouri Works - Business Incentives reduced state taxes by $56,399,000 during fiscal year 2018.

Missouri Works New Jobs Training and Job Retention Training are authorized by Sections 620.800-620.809, RSMo. New Jobs Training provides assistance to eligible companies to train workers in newly created jobs. To qualify, the company must create new jobs in the state; the project must include eligible training costs, as well as other eligibility criteria such as types of occupations, wage rates, and turnover rates. Job Retention Training provides training assistance to eligible companies for job retention efforts. To qualify, a project must be for an existing Missouri company making a capital investment of at least 5 times the total project costs, retaining at least 100 eligible jobs at the facility for at least one year, be located in a border community, or be determined to represent substantial risk of relocation. Eligible companies for both programs include manufacturing, research and development, or those engaged in interstate commerce. The company must retain the eligible jobs in the project for at least 5 years and use the funding only toward eligible project costs. These programs are administered locally through community colleges. While the recipient's taxes are not actually reduced, a portion of normal withholding payments (paid to the Department of Revenue) are deferred to pay for eligible project costs. The amount that can be deferred is 2.5% of the payroll for the first 100 jobs in the project and 1.5% of the payroll for the remaining jobs in the project. The company may file withholding claims for the project until the budgeted project funds are disbursed; typically for a period of 3-5 years, with maximum limit of 8 years. There are no other commitments under these programs. Recapture provisions apply in accordance with Section 620.017, RSMo in which the recipient shall repay training funds under these programs if the jobs included in the project are moved out of Missouri or are eliminated within five years of the date the project is approved by DED. The Director of the Division of Workforce Development within DED shall have the authority and discretion to exempt the recipient in whole or in part of such repayment. Missouri Works New Jobs Training and Job Retention Training reduced state taxes by $5,600,000 and $3,521,000, respectively, during fiscal year 2018.

The Missouri Manufacturing Jobs Act is authorized by Section 620.1910, RSMo and provides incentives in the form of retaining withholding taxes to expand manufacturing facilities for an existing product or the creation of a new product. This program sunset in 2016 and no new applications are being accepted. To qualify, manufacturing companies must have a North American Industry Classification System (NAICS) of 33611, which is an establishment primarily engaged in (1) manufacturing complete automobile and light duty motor vehicles or (2) manufacturing automobile and light duty motor vehicle chassis. The company must manufacture goods at a facility in the state throughout the period benefits are received, and make a capital investment at a facility of at least $75,000 per retained job for the manufacture of a new product within 2 years of beginning to retain withholding taxes or commit to make a capital investment of at least $50,000 per retained job at the facility for the modification or expansion of the manufacture of an existing product within 2 years of beginning to retain withholding taxes. Qualified suppliers of an eligible manufacturer must attest to DED that they derive more than 10% of its total annual sales revenue from sales to a qualified manufacturing company, add 5 or more new jobs for a period of 3 years, pay wages for the new jobs equal to or exceeding the county average wage using the NAICS industry classification, but are not less than 60% of the statewide average wage, and the company must offer health insurance and pay at least 50% of the premium. If qualified, the company is allowed to retain 100% of the withholding tax that would otherwise have been paid in to the state for those jobs for 10 years for qualified manufacturers or 3 to 5 years for qualified suppliers. There are no provisions for recapture and no other commitments are made as part of the agreement. The Missouri Manufacturing Jobs Act reduced state taxes by $15,638,000 during fiscal year 2018.

Note 20 - Tax Abatements (cont.)

Business Use Incentives for Large-Scale Development (BUILD) is authorized by Sections 100.700-100.850, RSMo. The incentives offered by the BUILD Missouri Program are designed to offset infrastructure and other capital costs of certain large projects by making the cost of investing in Missouri more competitive. The costs are financed through the issuance of Board of Certificates (bonds or notes), where the principal and interest will be repaid by the business. Businesses are then reimbursed for these repayments through the issuance by the Board of Missouri state income tax credits. The businesses may use these credits against taxes, which would otherwise be due, or to obtain a refund if the business has insufficient Missouri income tax liability to offset the credit. A business can apply these credits against income tax, bank tax, insurance premium tax, or other financial institutions tax. To qualify, an eligible industry in manufacturing, processing, assembly, research and development, agricultural processing or services in interstate commerce must invest a minimum of $15 million; or $10 million for an office industry in an economic development project; and create a minimum of 100 new jobs at the project facility within 3 years, or a minimum of 500 jobs if the project is an office industry, or a minimum of 200 new jobs if the project is an office industry located within a distressed community as defined in Section 135.530, RSMo. The tax credits become subject to recapture if the company does not expend the minimum investment on or before the first test date established in the program agreement, or create and maintain the minimum number of new jobs on or before the first test date. The first test date is the last day of the closest calendar quarter ending 3 years following bond closing. The tax credits are also subject to recapture if the company eliminates or announces its intention to eliminate all the new jobs at the project within 2 years of the first test date. If subject to recapture, the company shall, within 30 days following written demand from the Board, reimburse the Board in full for the face amount of the tax credits received from the date of execution of the program agreement to the date of such demand. There are no other commitments made as part of the agreement. The BUILD program reduced state taxes by $9,818,000 during fiscal year 2018.

The Enhanced Enterprise Zone is authorized by Sections 135.950-135.973, RSMo and provides tax credits to new or expanding businesses in enhanced enterprise zones. To qualify, a company must create or maintain at least 2 new jobs and make at least $100,000 in eligible investments. In addition, a Notice of Intent must be approved by DED, and the business must submit an annual report. Eligibility for the credit is determined by the zone based on creation of sustainable jobs in a targeted industry or demonstrated impact on local industry cluster development. Taxes are reduced by claiming a tax credit against the Missouri income tax liability owed to the state. The tax credits are calculated at 2% of new payroll and 0.5% of new investment. There are no provisions for recapture and no other commitments are made as part of the agreement. The Enhanced Enterprise Zone reduced state taxes by $5,569,000 during fiscal year 2018.

The Business Facility Tax Credit is authorized by Sections 135.100-135.150 and Section 135.258, RSMo and provides to facilitate the expansion of new or existing facilities in Missouri. To qualify, a Notice of Intent must be approved by DED; the facility must create at least 2 new jobs and make $100,000 in eligible investments or pursuant to House Bill 191 (2009), for “headquarters” that commence operations and “headquarters” of certain “employee-owned” businesses that commence or expand operations must create 25 new jobs and make $1,000,000 in new investment. The company must submit an annual report to DED. Taxes are reduced by claiming a tax credit against the Missouri tax liability owed to the state. The tax credits are calculated as $75 to $150 per new job and $75 to $150 for each $100,000 in new investment for up to 10 years. The tax credits for headquarters are calculated as the greater of $400 per new job plus 4% of new investment or $500 per new job plus $500 per each $100,000 in new investment for up to 10 years. The credit may be applied against income tax, insurance premium tax, or insurance company retaliatory tax. This program has sunset as of January 1, 2005 except headquarters that commence or expand operations on or before December 31, 2019 may be eligible for the program. There are no provisions for recapture and no other commitments are made as part of the agreement. The Business Facility Tax Credit reduced state taxes by $6,330,000 during fiscal year 2018.

Note 20 - Tax Abatements (cont.)

The Amateur Sports Ticket Sales Tax Credit is authorized by Section 67.3000, RSMo and provides an incentive to encourage the location of competitively bid amateur sporting events in Missouri. Upon application, applicants must submit predictions on the anticipated economic benefit to the state. Applicants will be evaluated based upon anticipated and verified economic performance. The program is available to one or more certified sponsors, endorsing counties, endorsing municipalities, or a local organizing committee, acting individually or collectively. The program provides tax credits equal to the lesser of: $5 per admission ticket sold to the event; or 100% of eligible costs incurred by the applicant. The recipient is able to reduce their outstanding tax liability in an amount equal to the value of the tax credit and may be taken against income tax, bank tax, insurance premium tax, and other financial institutions tax. There are no provisions for recapture and no other commitments are made as part of the agreement. The Amateur Sports Ticket Sales Tax Credit reduced state taxes by $1,276,000 during fiscal year 2018.

The Rebuilding Communities Tax Credit is authorized by Section 135.535, RSMo and provides a tax credit for eligible businesses locating, relocating, or expanding within a distressed community. This program has been replaced by Missouri Works, except for current projects. To qualify, a business must have fewer than 100 full-time employees, 75% of which must be located in the distressed community; be primarily engaged in manufacturing, biomedical, medical devices, scientific research, animal research, computer software design, computer software development or computer programming, which includes Internet, web hosting, and other information technology, wireless, wired or other telecommunications, or a professional firm. The business must submit an annual tax credit application documenting eligible expenditures on the project to DED. Once approved, the tax credit is calculated at 40% or 25% of the qualifying expenditures and may be applied against income tax, corporate franchise tax, bank tax, insurance premium tax, or other financial institutions tax. There are no provisions for recapture and no other commitments are made as part of the agreement. The Rebuilding Communities Tax Credit reduced state taxes by $359,000 during fiscal year 2018.

The Development Tax Credit is authorized by Sections 32.100-32.125, RSMo and provides incentives to facilitate a business project in order to create new jobs. This program has been replaced by Missouri Works, except for current projects. Tax credits are issued to approved taxpayers that make an eligible donation to a non-profit corporation. The non-profit leases assets to an approved company. The company must create a specified number of jobs within 2 years and be in a distressed or blighted area. In many instances, the taxpayer that makes the donation is also the company that is creating the economic impact. The donor that makes the contribution must submit a tax credit application to DED. Once approved, taxes are reduced by claiming a tax credit against Missouri tax liability owed to the state. The tax credit is calculated at 50% of the eligible donation and may be applied against income tax, corporate franchise tax, bank tax, insurance premium tax, other financial institutions tax, or express company tax. No other commitments are made as part of the agreement. DED may recapture tax credits up to the amount issued if the non-profit fails to complete the project or comply with the agreement. The non-profits only and not the donors are subject to the recapture. The Development Tax Credit reduced state taxes by $542,000 during fiscal year 2018.

Note 20 - Tax Abatements (cont.)

Chapter 100 Personal Property Tax Exemption is authorized by Section 144.054 (2), RSMo and provides a state and local sales tax exemption on tangible personal property leased by a company from the City or County. To qualify, cities and counties may apply to DED on behalf of eligible companies for which Chapter 100 bond proceeds are used to purchase tangible personal property, which is leased back to the company. DED may apply discretionary benefit exemption if the benefit contained in a formal DED proposal is accepted by the company. Since DED cannot enact the sales tax exemption on the lease without the underlying Municipality Chapter 100 in place, any inclusion in a formal DED proposal will be coordinated with the Municipality and their economic developer. The proposal must have been accepted by the company prior to any project announcements, no approval or issuance of the bonds may have taken place, and the tangible personal property may not have been purchased prior to the acceptance of the proposal. The project must also be competitive, have comprehensive local incentive participation, have above average wages with benefits, be located in an economically distressed or blighted area, have a positive state fiscal impact, and have an indication that the municipality has offered the local Chapter 100 exemptions. The company receives the exemption on sales tax as the facility, construction materials, and certain tangible personal property may be purchased as exempt by the City or County and then leased back to the company. The company will be responsible for the payment of sales tax on purchases exceeding the maximum accepted in the proposal, ineligible purchases, or the revenue stream generated by lease of ineligible personal property. There are no provisions for recapture and no other commitments are made as part of the agreement. For fiscal year 2018, DED has provided certificates for the exemption of state sales tax related to lease payments of tangible personal property under a Chapter 100 structure for 1 project. The sales tax is applicable to the lease payments made over a period not to exceed 20 years by statute and restricted further by local ordinance. The sales tax exemptions are only applicable if tangible personal property purchases are made within established project time periods, as listed on the certificate. The fiscal year 2018 project certificates total a cumulative amount of state sales tax not to exceed $268,000 over the terms of the respective leases.

Data Center Sales Tax exemption is authorized by Section 144.810, RSMo and incentivizes the location and expansion of data centers in the state by providing an exemption of the sales and use taxes associated with a variety of activities necessary to build a new facility or expand an existing facility. To qualify, companies must create 5 new jobs and $5 million in investment for expanding facilities or create 10 new jobs and $25 million in investment for new facilities within certain time frames. A company is refunded their sales and use taxes for new purchases related to the data center project for the period prior to meeting the threshold for participation and then are exempt for a period of no more than 10 years for expanding facilities or 15 years for a new facility. Taxes may be subject to recapture if the full investment projected is not met or if the jobs created are not maintained, causing the cost/benefit to the State to be negative, or if the company does not meet the minimum thresholds. Taxes will be recaptured up to the amount that creates a positive cost/benefit to the state, or if the company does not meet the minimum thresholds, the full exemptions to date must be repaid. No other commitments are made as part of the agreement. The amount that state taxes were reduced is confidential under Section 32.057, RSMo.

Redevelopment

The Historic Preservation Tax Credit is authorized by Sections 253.545-253.561, RSMo and provides an incentive for the redevelopment of commercial and residential historic structures in the state. Upon application, the eligible property must be listed on the National Register of Historic Places, be certified by the Department of Natural Resources (DNR) as contributing to the historical significance of a certified historic district listed on the National Register, or located within a local historic district that has been certified by the U.S. Department of Interior. The costs and expenses associated with the rehabilitation must exceed 50% of the total basis of the property. All approved applicants must commence rehabilitation within 2 years of the date of issuance of the letter of approval from DED. The program provides state tax credits equal to 25% of eligible costs and expenses of the rehabilitation of approved historic structures, which the recipient is able to use to reduce their outstanding tax liability in an amount equal to the value of their tax credit. The credit may be applied against income tax, bank tax, insurance premium tax, or other financial institutions tax. There are no provisions for recapture and no other commitments are made as part of the agreement. The Historic Preservation Tax Credit reduced state taxes by $56,483,000 during fiscal year 2018.

Note 20 - Tax Abatements (cont.)

Brownfield Remediation is authorized by Sections 447.700-447.718, RSMo and provides incentives to businesses or developers to redevelop property contaminated with hazardous waste. To qualify, the property must be abandoned or underutilized for at least 3 years, and contaminated with hazardous substance, the applicant cannot be a responsible party, the project must be accepted into DNR Voluntary Cleanup Program, the project must be endorsed by city or county government, must create at least 10 new jobs or retain 25 jobs, the project must create a positive net state economic benefit, and must demonstrate need for the credits. The recipient is able to reduce their outstanding tax liability in an amount equal to the value of the tax credit. The tax credits may be issued for up to 100% of eligible costs and expenses for remediating the project property. The tax credit may also include up to 100% of the costs of demolition that are not directly part of the remediation activities. The amount of the credit available for demolition not associated with remediation cannot exceed the total amount of credits approved for remediation including demolition required for remediation. DED will issue 75% of the credits upon adequate proof of payment of the costs; the remaining 25% will not be issued until a clean letter has been issued by DNR. The tax credits may be applied against income tax, corporate franchise tax, bank tax, insurance premium tax, or other financial institutions tax. The tax credits may be subject to recapture in the event the owner sells the abandoned or underutilized property within a 5 year period after the receipt of remediation tax credits, grants, loans or loan guarantee. Subject to Sections 447.700-447.718, RSMo, the owner shall repay a portion of the tax credits and grant funds provided based on the percentage of the owner's investment for the project to DED's total financial assistance, upon achieving an annual internal rate of return of 25%. The internal rate of return calculation shall be documented by the owner's capital gains tax calculation. Owner investment is equity and debt for the eligible project. At the end of the project, a purchaser who has performed voluntary remediation action certifies to DNR that the goals of the purchaser's voluntary remediation plan have been attained. DNR verifies the remediation plan goals are achieved and issues a certificate that states that the site has been cleaned up to DNR standards pertaining to the property itself and therefore protects both current and future owners of the property. Brownfield Remediation reduced state taxes by $3,160,000 during fiscal year 2018.

Distressed Areas Land Assemblage is authorized by Section 99.1205, RSMo and provides incentives to redevelop blighted areas. This program has sunset and no new applications are being accepted. To qualify, the area must be at least 75 acres; at least 80% of the area must be within a Distressed Area or a federal Qualified Census Tract; the redeveloper must acquire at least 50 acres of the area; the average parcels per acre must be 4 or more; and less than 5% of the acreage for acquisition by the redeveloper under the redevelopment plan shall consist of owner-occupied residences. The recipient is able to reduce their outstanding tax liability in an amount equal to the value of the tax credit. The tax credits are provided to the redeveloper based on 50% of the acquisition costs, including maintenance costs, and 100% of the interest costs incurred for a period of 5 years after the acquisition of an eligible parcel. The credits may be applied against income tax, bank tax, insurance premium tax, or other financial institutions tax. Any funds generated through the use or sale of the tax credits issued shall be used to redevelop the eligible project area. There are no provisions for recapture and no other commitments are made as part of the agreement. Distressed Areas Land Assemblage reduced state taxes by $68,000 during fiscal year 2018.

Note 21 - Commitments

Contracts

The Department of Conservation had contracts outstanding of $300,000 for construction at June 30, 2018. These contracts are funded through the special revenue funds from specific sales tax, fees, and permits.

The Department of Natural Resources had construction contracts outstanding at June 30, 2018 of $54,000. This project is funded through a special revenue fund.

The Department of Transportation had long-term contracts of $697,915,000 outstanding at June 30, 2018. These contracts are paid from capital projects funds with approximately 84% federal reimbursement expected.

Note 21 - Commitments (cont.)

The Office of Administration, Division of Facilities Management, Design and Construction, had construction contracts outstanding at June 30, 2018 of $42,314,000. Approximately 29.5% will be paid from the General Fund, 4.7% from special revenue funds, 65.5% from the capital projects funds, and 0.3% will be paid from enterprise funds.

On March 10, 1988, the State of Missouri entered into a contract with the United States Army Corps of Engineers confirming an assurance agreement of April 8, 1965. The State obtained rights to a portion of the water supply storage from the Clarence Cannon Dam and Mark Twain Lake Project. The State agreed to pay up to $10.8 million plus interest for the investment costs allocated to the water supply storage, the amount of such payments to be determined by the portion of the water storage space put in use by the State for that purpose. The contract provided a ten year interest free period running from 1984 to 1994. In fiscal year 1995, the State began making interest payments. The interest payment amount for fiscal year 2018 was $364,000. Payment of principal and interest must be completed by March 2038.

As of June 30, 2018, the University of Missouri had outstanding commitments for the usage and ongoing support of the University Health System's information technology environment totaling $190,170,000. The payments are as follows:

2019	$	24,554,000
2020		25,378,000
2021		26,229,000
2022		27,109,000
2023		28,017,000
2024-2025		58,883,000

Truman State University had approximately $5,721,000 in outstanding commitments for various construction contracts at June 30, 2018.

Southeast Missouri State University had outstanding commitments of approximately $10,050,000 related to construction contracts at June 30, 2018.

Missouri State University had approximately $16,807,000 in outstanding commitments for various construction contracts at June 30, 2018.

University of Central Missouri had approximately $6,968,000 in outstanding commitments related to construction contracts at June 30, 2018.

Northwest Missouri State University had approximately $7,203,000 in outstanding commitments related to various construction contracts at June 30, 2018.

Note 22 - Risk Management and Insurance

The state is exposed to various risks of loss related to tort, general, motor vehicle, and contractor liability and injuries to employees. The state assumes its own liability for risks except for the purchase of surety bond, aircraft, and boiler coverage. The State's Office of Administration (OA), Risk Management Unit, self-insures its workers' compensation program for all state employees, with the exception of the Missouri Department of Transportation (MoDOT) and the State Highway Patrol. Liability insurance is also provided by OA-Risk Management, pursuant to state statute, through the State's Legal Expense Fund, which is a component of the General Fund in this report. This insurance covers all state employees.

Note 22 - Risk Management and Insurance (cont'd)

The Workers' Compensation and Legal Expense Fund claims liability is based upon actual claims that have been submitted to OA-Risk Management. Incurred but not reported (IBNR) liability is not included since workers' compensation and liability insurance claims are reported timely, and therefore any potential IBNR liability amount would be considered immaterial. The state has not had any insurance settlements exceed the coverage. OA-Risk Management also procures property insurance for approximately 3% of all State buildings, with the remainder uninsured. The buildings are insured through purchased property insurance and through the Property Preservation Fund. Buildings insured through the Property Preservation Fund are backed with bonded debt through the Board of Public Buildings.

The Transportation Self-Insurance Plan covers workers' compensation for employees of MoDOT and the State Highway Patrol, and covers vehicle liability and general liability insurance for the employees of MoDOT. The Transportation Self-Insurance Plan is presented as an internal service fund. Liabilities are reported when it is probable that a loss has occurred and the amount of the loss can be reasonably estimated. Estimated claims payable is based on known claims pending as well as an estimate of IBNR claims from data provided by an actuary. Liabilities are reported at their discounted value, assuming an investment yield of 2%.

The Missouri Consolidated Health Care Plan (MCHCP) provides health care insurance to all state employees, except for MoDOT, the State Highway Patrol, and the Department of Conservation. The Plan is presented as an internal service fund. Estimated claims payable is based on known medical claims pending as well as an estimate of IBNR claims from data provided by an actuary.

The MoDOT and MSHP Medical and Life Insurance Plan (MHPML) accounts for the medical coverage provided on a self-insured basis and life insurance benefits, underwritten by a commercial insurance company, for employees of MoDOT and the State Highway Patrol. The Plan is presented as an internal service fund. Estimated claims payable is based on known insurance claims pending as well as an estimate of IBNR claims from data provided by an actuary.

The Conservation Employees' Insurance Plan (CEIP) provides health care and life insurance to employees of the Department of Conservation. The Plan is presented as an internal service fund. Estimated claims payable is based on known claims pending as well as an estimate of IBNR claims.

The Petroleum Storage Tank Insurance Fund (PSTIF) has claims liability for the cost of contamination cleanup for policyholders and other eligible site owners who have submitted notice of a contamination. The PSTIF is presented as a major enterprise fund.

The University of Missouri System provides workers' compensation, liability, and medical insurance for its employees. The University funds this through a combination of self-insurance and commercially purchased insurance. The amount of coverage is based upon analysis of historical information and actuarial estimates. Settled claims have not exceeded commercial coverage in any of the past three fiscal years. The claims liability is the present value of the claims, using discounted rates ranging between 0.75% and 3.25% based on future investment yields. The University of Missouri System is included with college and universities as a major component unit of the State.

Missouri State University is exposed to various risks of loss. These include loss related to torts; business interruption; employee injuries and illnesses; employee health, dental and accidental benefits; natural disasters; damage to and destruction of assets; and errors and omissions. Commercial insurance coverage is purchased for claims arising from such matters other than those related to natural disasters and employee health benefits, general liability, and workers' compensation. Settled claims have not exceeded the commercial coverage in any of the three preceding years. Additional coverage is provided through the State Self-Insurance Program, through the Risk Management Unit of the Office of Administration. The State of Missouri self-insures the workers' compensation benefits for all state employees, including University employees.

Note 22 - Risk Management and Insurance (cont.)

Changes in the balances of claims liability (in thousands of dollars) during the current and prior fiscal years are as follows:

	Type of Insurance Claims	Fiscal Year Claims Liability 6/30/2017	Current Year Claims and Estimated Changes	Claim Payments	Fiscal Year Claims Liability 6/30/2018
Governmental Activities					
OA Workers Compensation Fund	Workers Comp.	$ 29,767	$ 30,319	$ (31,028)	$ 29,058
OA Legal Expense Fund	Liability	8,222	5,053	(9,593)	3,682
Transportation Self-Insurance Plan	Workers Comp. and Liability	82,576	20,180	(21,312)	81,444
MCHCP	Health Care	42,221	302,935	(299,019)	46,137
MHPML	Health Care	12,300	129,546	(129,346)	12,500
CEIP	Health Care	2,592	17,855	(17,315)	3,132
Total Governmental Activities		$ 177,678	$ 505,888	$ (507,613)	$ 175,953
Business-Type Activities					
PSTIF	Contamination Cleanup	$ 81,868	$ 15,244	$ (13,094)	$ 84,018
Component Units					
University of Missouri System	Workers Comp. and Liability	$ 89,082	$ 220,389	$ (223,625)	$ 85,846
Missouri State University	Health Care, Workers Comp. and Liability	1,807	20,292	(20,675)	1,424
Total Component Units		$ 90,889	$ 240,681	$ (244,300)	$ 87,270

Note 22 - Risk Management and Insurance (cont.)

	Type of Insurance Claims	Fiscal Year Claims Liability 6/30/2016	Current Year Claims and Estimated Changes	Claim Payments	Fiscal Year Claims Liability 6/30/2017
Governmental Activities					
OA Workers Compensation Fund	Workers Comp.	$ 35,633	$ 25,175	$ (31,041)	$ 29,767
OA Legal Expense Fund	Liability	2,250	16,102	(10,130)	8,222
Transportation Self-Insurance Plan	Workers Comp. and Liability	90,646	8,307	(16,377)	82,576

Component Units					
University of Missouri System	Workers Comp. and Liability	$ 85,887	$ 218,074	$ (214,879)	$ 89,082
Missouri State University	Health Care, Workers Comp. and Liability	2,680	18,736	(19,609)	1,807
Total Component Units		$ 88,567	$ 236,810	$ (234,488)	$ 90,889

Risk Management Pool:

The State of Missouri participates in the property program of the Midwestern Higher Education Compact (MHEC) as defined in Section 173.700, RSMo. This program was formed to expand coverage, reduce costs, and stabilize property insurance rates over extended time periods at higher education institutions in all member states. The program offers loss limit coverage tailored to individual institutions as well as self-insured retention by institution. The MHEC Risk Management Oversight Committee directs the major operations of the program overseeing the development of program policies, premium allocations, new program memberships, and selection of program administrators and insurance underwriters.

Note 23 - Pollution Remediation and Landfill Closure and Postclosure

The State has an obligation to address current or potential detrimental effects of existing pollution by participating in pollution remediation activities.

The Missouri Department of Natural Resources (DNR) was compelled to assess and oversee the cleanup of contaminated sites subject to federal law under the Resource Conservation and Recovery Act (RCRA), also known as the Superfund Law, administered by the U.S. Environmental Protection Agency (EPA). Under this law, the State is required to pay or ensure payment of 10% of the costs of remediation action and 100% of the costs of operations and maintenance at sites where the party responsible for the contamination is unknown, uncooperative, or insolvent. Similarly, Section 260.371.7, RSMo, states that the public should bear a portion of the cost to pay for the State's share of Superfund cleanup to be appropriated from general revenue. At the end of fiscal year 2018, the State was participating in the cleanup of sixteen Superfund sites. Total pollution remediation obligation for these sites totaled approximately $46.2 million. The basis for these costs are State Superfund contracts that list the estimated cost of cleanup, or actual costs if cleanup is complete, less any payments that have been made to the EPA. Estimated costs will change as actual costs become available. The Hazardous Waste Fund is a component of Conservation and Environmental Protection.

The Office of Administration (OA), Division of Facilities Management, Design and Construction, performed soil and groundwater testing and remediation for one State site during fiscal year 2018. The remaining obligation as of June 30, 2018 is $17,000. These costs were based on contractual pricing estimates and are subject to change if the pollution remediation requires more time or material than was estimated.

The Missouri Department of Transportation (MoDOT) is aware of a contaminated site (related to building and grounds) due to a fuel leak. The potential for pollution remediation exists; however, at this time, MoDOT's portion of the costs for the cleanup cannot be determined.

The Department of Public Safety, Office of the Adjutant General, has been named as a potentially responsible party in the Pools Prairie Superfund site in Newton County, Missouri. The site is listed on the National Priorities List (NPL) and is governed by the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). At this time, the Department of Public Safety's portion of the costs for the cleanup cannot be determined.

Changes in the balances of pollution remediation liability (in thousands of dollars) during the current fiscal year are as follows:

Governmental Activities	Type of Pollution Remediation	Fiscal Year Remediation Liability 6/30/2017	Current Year Assessments and Estimated Changes	Payments	Fiscal Year Remediation Liability 6/30/2018	Due Within One Year
Hazardous Waste Fund	Superfund Sites	$ 47,431	$ 32	$ (1,241)	$ 46,222	$ 1,783
Facilities Maintenance Reserve Fund	Soil and Groundwater Testing and Remediation	—	17	—	17	—
Total Governmental Activities		$ 47,431	$ 49	$ (1,241)	$ 46,239	$ 1,783

Note 23 - Pollution Remediation and Landfill Closure and Postclosure (cont.)

Each landfill owner/operator is required to obtain a financial assurance instrument, which is held by the State as security in the case of a default or forfeiture. Financial assurance instruments can include financial guarantee or performance bonds, letters of credit, insurance policies, corporate guarantees, contracts of obligations, trust funds, and escrow accounts. At June 30, 2018, the DNR, Solid Waste Program tracked the value of the secured financial assurance instruments held by the State to be $334,512,000. This amount is disclosed, but not reported in the financial statements, because the State does not perform the investment function and does not have significant administrative involvement. While the State maintains possession of the financial assurance instruments, it does not meet criteria to be reported in a fiduciary fund.

At June 30, 2018, eleven Municipal Solid Waste Landfills (MSWLFs) and two waste tire facilities have defaulted. The owners/operators failed to properly close or maintain post-closure care for these facilities; therefore, the State took possession of the forfeited financial assurance instruments to initiate the closure or post-closure activities as required by Section 260.228, RSMo. The State will monitor and pay post-closure care costs of these facilities for the next 30 years in accordance with the DNR Solid Waste Management Law and Regulations. At June 30, 2018, it is expected that $1,492,000 will be paid over the remaining monitoring periods. This is the amount of the assigned fund balance that has been designated on the General Fund balance sheet for forfeited assets.

The University of Missouri System has been working with the Voluntary Cleanup Program at DNR to characterize subsurface contamination on a University owned property. The University received the results of the two-year sampling process in fiscal year 2016. The University is awaiting a determination from DNR. The site is now on the National Regulatory Commission (NRC) license and must be decommissioned. Upon further review of the documents, the University determined that it does not believe that the documents support the decision to add the site to the NRC license. The University made a formal request to remove the site from the NRC license. NRC responded with a request for more information including a dose assessment, which is estimated at a cost of $15,000. If the NRC finds the dose assessment to be unacceptable, then the University will be required to fully decommission the site, including a sampling plan. The cost of a sampling plan to characterize the chemical contamination is estimated at $1,000,000. The University has not commenced any actions requiring the recognition of a liability for this property.

Note 24- Contingencies

Contingent claims liabilities are reported when it is probable a loss has occurred and the amount can be reasonably estimated. These losses include estimates of claims which have been incurred but not reported, including the effects of specific, incremental claim adjustment expenditures/expenses, salvage, subrogation, and other allocated or unallocated claim adjustment expenditures/expenses. Liabilities of governmental funds are reported as a reconciling item to the Government-Wide Statement of Net Position. Expenditures are recognized as payments are made.

As of June 30, 2018, the amount of contingent liabilities was $48.9 million. Changes in reported liability since June 30, 2017, resulted from the following (in thousands of dollars):

	Beginning of Fiscal Year Liability	Current Year Claims and Changes in Estimates	Claim Payments	Balance Fiscal Year End
2017-2018	$ 71,150	$ 4,368	$ (26,595)	$ 48,923
2016-2017	39,040	59,672	(27,562)	71,150
2015-2016	19,921	35,216	(16,097)	39,040

Note 24- Contingencies (cont.)

Section 287.220.8, RSMo, requires an actuarial study of the Second Injury Fund be made every year to determine solvency of the fund. Figures presented below for current year claims and changes in estimates are based on the 2017 actuarial study. As at June 30, 2018, the amount of liabilities for Second Injury Fund was $2.0 billion. Changes in reported liability since June 30, 2017, resulted from the following (in thousands of dollars):

	Beginning of Fiscal Year Liability	Current Year Claims and Changes in Estimates	Claim Payments	Balance Fiscal Year End
2017-2018	$ 1,840,186	$ 213,633	$ (100,651)	$ 1,953,168
2016-2017	1,732,685	206,662	(99,161)	1,840,186
2015-2016	1,684,732	151,464	(103,511)	1,732,685

The State receives federal grants which are subject to review and audit by federal grantor agencies. This could result in requests for reimbursements by the grantor agency for expenditures disallowed under grant agreements. The State believes such disallowances, if any, would be immaterial in the next fiscal year.

Sales and Use Tax Lawsuits:

Southwestern Bell Telephone Company vs. Director of Revenue (Case No. SC83859 and follow up Case No. SC86441): the Supreme Court ruled that Southwestern Bell Telephone Company was entitled to a refund of use tax paid on machinery and equipment used to create its digital phone service product. Manufacturing was found to include producing taxable services as well as tangible personal property products. A settlement was reached regarding some claims, filed by multiple taxpayers, related to the Southwestern Bell cases. No current liability remains as of June 30, 2018. Refund claims related to similar cases filed by other companies are still pending verification. Exclusive of interest, which could be substantial, the negative financial impact on the State is estimated at $9.5 million, of which $8.8 million is related to the General Fund.

The Attorney General, on behalf of other state agencies, is involved in litigation for tort claims including wrongful death, motor vehicle accidents, medical malpractice, assault and battery, and deliberate indifference, as well as employment discrimination claims not included in the 2018 liability amount. It is reasonably possible an adverse court decision may incur an estimated loss of $12.7 million.

Tobacco Master Settlement Agreement:

Under the 1998 Tobacco Master Settlement Agreement ("MSA"), Missouri receives annual settlement payments in perpetuity from Participating Manufacturers ("PMs") of tobacco products. Each year on or about April 15th, Missouri receives an annual payment typically between $120 and $140 million. Annual MSA payments are subject to a downward adjustment if the PMs lose more than 2% of their pre-MSA market share to Non-Participating Manufacturers ("NPMs"). Individual states may avoid their share of this "NPM Adjustment" by enacting and diligently enforcing model legislation, which imposes certain escrow obligations on NPMs.

The tobacco manufacturers contest Missouri's enforcement of the model legislation for 2004 and subsequent years, each of which is subject to binding arbitration. Arbitration regarding diligent enforcement for 2004 is ongoing and set for hearing in March 2019. If the panel finds that Missouri was not diligent in 2004, the State will face a downward adjustment on the annual payment following the panel's determination. The ultimate resolution of the 2004 proceeding, the timing of the panel's decision, and the outcome of any subsequent arbitration proceedings between the tobacco manufacturers and Missouri cannot be predicted with any degree of certainty.

Note 24- Contingencies (cont.)

Department of Corrections Settlements:

Hootselle v. Department of Corrections, No. 12AC-CC00518 (Cole County Circuit Court). This lawsuit was filed on August 14, 2012 by several corrections officers alleging that the Missouri Department of Corrections failed to compensate them for pre- and post-shift activities, including passing through security checkpoints and retrieving equipment such as keys and radios. The officers' union was later added as a plaintiff and asserted claims for breach of its collective bargaining agreement. It is reasonably possible an adverse court decision may incur an estimated loss of $45 million.

Natural Resource Settlements:

The Department of Natural Resources works jointly with the United States Fish and Wildlife Service and United States Forest Service to recover damages from parties responsible for causing injuries to natural resources. Funds from these settlements are typically held in the federal treasury in a joint account administered by the United States Department of Interior. Expenditures of these funds may only be by mutual agreement of the Missouri Trustee Council (the Department of Natural Resources, the United States Fish and Wildlife Service and, at times, United States Forest Service) and such funds may only be used to restore, replace, or acquire natural resources similar to those that were injured. As of June 30, 2018, the balance of Missouri-related joint settlement funds in the Department of Interior restoration fund is approximately $49 million.

Department of Health and Senior Services

The Nurse Student Loan Program provides forgivable student loans to eligible Missouri undergraduate, graduate, post-graduate, and doctoral nursing students in exchange for service in underserved communities and facilities in the state. Current annual award levels, based on statute, are a one-time amount of $2,500 for LPN students and $5,000 for professional nursing students. Loans are repaid either through service in an underserved area, or via cash repayment at 9.5% simple interest. For repayment via service, participants provide one year of professional service for each school year a loan is received, up to a maximum of 5 years. The number of loans awarded per year varies based upon available funding, number of previous students anticipating continued funding, and number of eligible new applicants.

The Health Professional Student Loan Program is a competitive state program that awards forgivable loans to students pursuing health care training leading to Missouri licensure. Eligible disciplines are primary care physicians, primary care dentists, and dental hygienists. The amount of funding provided depends upon the student's chosen discipline and educational status. Repayment of loans can be completed either through obtaining employment to earn forgiveness or through cash repayment at 9.5% simple interest. Forgiveness is based upon the number of loans received and is earned at a rate of one year of professional service for each loan received, up to a maximum of 5 years. Qualifying employment is considered as full-time, direct patient care at a facility located in an area of need also referred to as a Health Professional Shortage Area.

The purpose of the Missouri Health Professional State Loan Repayment Program (SLRP) is to improve access to primary care by assisting rural and underserved communities with recruitment and retention of primary care providers. SLRP offers eligible healthcare providers an opportunity to receive up to $50,000 in financial assistance towards the repayment of their qualifying educational loans in exchange for a minimum two-year commitment to provide healthcare services at an ambulatory public, nonprofit or private nonprofit primary care practice site located in a federally designated Health Professional Shortage Area (HPSA).

The Missouri Nurse Loan Repayment Program (NLRP) offers Registered Nurses (RNs) and Advanced Practice Registered Nurses (APRNs) an opportunity to receive financial assistance towards the repayment of their qualifying educational loans in exchange for a minimum two-year commitment to provide healthcare services in an area of defined need in the State of Missouri.

Note 24- Contingencies (cont.)

For all types of loan programs, in the event of a default, i.e. the loanee does not complete the service agreement, the loan status changes to repayment. In the event the loanee does not repay according to the terms of their agreement, the Department of Health and Senior Services will work with the Attorney General's Office to try to collect the outstanding receivables. The current total amount of loans outstanding is $6.9 million; the total amount in repayment is $2.8 million. There is no correlation between who will or will not repay their debt once a default has occurred since it is subject to each individual case and the legal remedies pursued. Therefore the amount of loss cannot be reasonably estimated.

Note 25 - Nonexchange Financial Guarantees

The following nonexchange financial guarantees are extended by the Missouri Agricultural and Small Business Development Authority (MASBDA) and the Missouri Department of Agriculture (MDA). The exchange financial guarantees are not recognized as a liability, which indicates that the State will most likely not be required to make a payment related to the nonexchange financial guarantees. As of June 30, 2018, the State extends the following financial guarantees:

Programs	Maximum Guarantee Period	Total Number of Loans Outstanding	Total Dollar Amount of Loans Outstanding (in thousands)	Total Dollar Amount Guaranteed by the State (in thousands)
Missouri Value-Added Loan Guarantee Program	10 Years	4	$ 576	$ 288
Single-Purpose Animal Facilities Loan Guarantee Program	10 Years	5	364	288
Crop and Livestock Loan Guarantee Program	2 Years	20	54	27

Missouri Value-Added Loan Guarantee Program

The Missouri Value-Added Loan Guarantee Program provides up to a 50% first-loss guarantee on loans, of $250,000 or less, made by lenders for the purpose of agricultural business development. The loan guarantee is for a duration of up to 10 years. The program is intended to create new economic activity by creating or retaining jobs. Loans guaranteed by the value-added loan guarantee program can be used to finance agricultural property, which includes land, buildings, structures, improvements, and equipment used for the purpose of processing, manufacturing, marketing, exporting, or adding value to an agricultural product. Loans may also be guaranteed to buy stock in a new generation processing entity that processes an agricultural product. In the event of a default, the MASBDA will work with the Attorney General's Office or the loan recipient's bank to try to collect. There were three loan defaults under this program in fiscal year 2018. The outstanding balance on judgments for amounts owed to the State totals $28,000.

Single-Purpose Animal Facilities Loan Guarantee Program

The Single-Purpose Animal Facilities Loan Guarantee Program is designed to provide banks and other lenders with a 50% first-loss guarantee on loans of up to $250,000 for up to 10 years. Independent livestock producers may use the loans to finance, refinance or restructure breeding or feeder livestock, earthworms, land, buildings, facilities, equipment, machinery and animal waste systems for producing poultry, swine, beef and dairy cattle, or other livestock. In the event of a default, the MASBDA will work with the Attorney General's Office or the loan recipient's bank to try to collect. There were no loan defaults under this program in fiscal year 2018.

Note 25- Nonexchange Financial Guarantees (cont.)

Crop and Livestock Loan Guarantee Program

The Crop and Livestock Loan Guarantee Program, authorized in Section 261.027(3), RSMo, is a 50% guarantee on a loan made to a 4-H and Future Farmers of America (FFA) member who borrows money to purchase livestock, input, etc., for their Supervised Agriculture Education (SAE) project. Loans eligible for the program are limited to the purchase of livestock, feed, seed, fertilizer, and other miscellaneous out-of-pocket expenses directly related to the project. In the event of a default, the MDA will work with the Attorney General's Office or the loan recipient's bank to try to collect. As of June 30, 2018, there are five loan defaults under this program. The outstanding balance on judgments for amounts owed to the State totals $2,580.

Note 26 - Joint Ventures

The Regional Convention and Sports Complex Authority was created by state law for the purpose of financing, constructing, operating, and maintaining a multipurpose convention and sports facility to be located in the City of St. Louis. The Authority operates under a board of commissioners of whom five are appointed by the Governor of the State, three by the County Executive of St. Louis County, and three by the Mayor of the City of St. Louis. The Authority is granted all rights and powers necessary to plan, finance, construct, equip, and maintain the facility.

The Authority is considered a joint venture of the State, County, and City because it constitutes a contractual agreement for public benefit in which the State, County, and City retain an ongoing financial responsibility for the Convention and Sports Facility Project Bonds. In August 1991, the Authority issued $258,670,000 of Convention and Sports Facility Project Bonds. The bonds were sponsored in the amount of $132,910,000 by the State (Series A), $65,685,000 by the County (Series B), and $60,075,000 by the City (Series C). In December 1993, the Authority issued $181,885,000 in Convention and Sports Facility Project and Refunding Bonds to advance refund $101,410,000 and $50,275,000 of the outstanding 1991 Series A and Series B bonds, respectively, and for additional construction costs. The bonds were sponsored in the amount of $121,705,000 by the State (Series A) and $60,180,000 by the County (Series B). In February 1997, the Authority issued $61,285,000 in Series C refunding bonds to advance refund $47,155,000 of the outstanding 1991 Series C bonds. In August 2003, the Authority issued $116,030,000 of Convention and Sports Facility Project and Refunding Bonds Series A 2003 to refund $2,845,000 and $113,170,000 of Series A 1991 and Series A 1993 refunding bonds, respectively, and for additional construction costs. In May 2007, the Authority issued $49,585,000 in Series C 2007 refunding bonds to refund $61,285,000 of original principal of the Series C 1997 refunding bonds. In August 2013, the Authority issued $65,195,000 in Series A 2013 refunding bonds to refund $65,385,000 of Series A 2003 bonds and issued $32,560,000 in Series B 2013 refunding bonds to refund $32,180,000 of Series B 2003 bonds.

Pursuant to a financing agreement entered into in August 1991, and terminating in August 2021, the Authority leased the facility to the sponsors who subleased the facility back to the Authority. The payments made by the State, County, and City under the financing agreement are sufficient to pay the principal and interest on the bonds. See *Note 12* for the specific debt service requirements that make up the State's ongoing financial responsibility for this joint venture.

Note 26 - Joint Ventures (cont.)

Summary financial information for the Authority as of and for the fiscal year ended December 31, 2017, is presented below (in thousands of dollars):

Total Assets	$	176,280
Total Deferred Outflows of Resources		686
Total Assets and Deferred Outflows of Resources	$	176,966
Total Liabilities	$	80,743
Total Net Position		96,223
Total Liabilities and Net Position	$	176,966
Total Revenues	$	24,562
Total Expenses		15,888
Net Increase in Net Position	$	8,674

Copies of the Authority's financial statements may be requested from:

St. Louis Regional Convention
and Sports Complex Authority
901 North Broadway
St. Louis, Missouri 63101

Note 27 - Endowments

Donor-restricted endowments for Missouri reside primarily within the higher education institutions, which are reported as a major component unit of the State. For the college and universities, except the University of Missouri, the net appreciation/depreciation of the endowments is $3,006,000. Of this amount, $1,612,000 is reported as restricted non-expendable, $1,379,000 is reported as restricted expendable, and $15,000 is reported as unrestricted net position. The University of Missouri reported a net appreciation/depreciation of restricted non-expendable net position in the amount of $96,277,000 which consisted of both realized and unrealized gains and losses on investment. For detailed information on the college and universities, please see the individual financial statements. The Revised Statutes of Missouri authorize the acceptance of donations at State agencies or public institutions. The governing boards of these institutions and the donor agreements determine whether net appreciation can be spent and the acceptable spending rate as detailed in Section 402.134, RSMo. These policies are entity specific and vary with each institution.

Note 28 - Conduit Debt

As of June 30, 2018, the Missouri Development Finance Board issued $1,637,968,000 in Private Activity Bonds and $2,624,104,000 in Public Purpose and Refunding Revenue Bonds. The outstanding balances on these bonds and notes as of June 30, 2018, were approximately $382,493,000 and $1,016,018,000 respectively.

The Missouri Development Finance Board and the State have no liability for repayment of these revenue bonds and funding notes aside from reserve fund deposits and, accordingly, these bonds and notes have not been recorded as a liability on the financial statements for the Missouri Development Finance Board. The debtor pays all debt service requirements. Security for the bondholders consists of insurance, letters of credit, annual appropriation pledges, and certain funds held through trustees under the various indentures.

Note 28 - Conduit Debt (contl)

The State Environmental Improvement and Energy Resources Authority, a related organization of the State of Missouri, issues Water Pollution Control and Drinking Water Revenue Bonds on behalf of the Department of Natural Resources. The outstanding balance on these bonds as of June 30, 2018, is $579,335,000.

The State of Missouri has no liability for repayment of these revenue bonds beyond the resources provided by related loan programs. The bonds are limited obligations of the State Environmental Improvement and Energy Resources Authority.

Note 29 - Subsequent Events

University of Missouri

On July 27, 2018, MU Health Care signed a non-binding letter of intent to purchase two hospitals, SSM Health St. Mary's - Audrain and SSM Health St. Mary's - Jefferson City, from SSM Health. The proposed closing date would be the later of December 31, 2018 or ten days after all governmental approvals and third party consents for material contract assignments have been received, not to exceed June 30, 2019. The closing of the proposed transaction is conditioned upon the negotiation and execution of a mutually satisfactory definitive agreement and subject to reasonable and customary due diligence.

Missouri Western State University

On August 23, 2018, the University Board of Governors voted to refund $3,765,000 of the outstanding 2008 Auxiliary Revenue bonds. The Auxiliary System Refunding Revenue Bonds Series 2018 mature on October 1, 2029, with an interest rate of 3.53%.

University of Central Missouri

On August 29, 2018, the University issued the following debt: $7,075,000 in Educational Facilities Revenue Bonds, Series 2018A, with interest rates ranging from 3.375% - 5.0% with principal maturities continuing until October 1, 2033 and $3,670,000 in Educational Facilities Revenue Bonds, Series 2018 B, with interest rates ranging from 3.25% - 4.0% with principal maturities continuing until October 1, 2034.

Missouri State University

On October 19, 2018, the Board of Governors approved purchase and sale agreements for certain buildings in the area commonly known as Brick City located in Springfield, Missouri, for a purchase price of $17,700,000 with a closing scheduled for January 23, 2019. The Board of Governors also approved the declaration of official intent towards the issuance of educational facilities revenue bonds to purchase these buildings.

Missouri Development Finance Board

In August 2018, the Board approved a commitment to make a loan in an amount not to exceed $6.1 million, to Missouri State University (MSU) to support a portion of the construction costs of a parking garage necessary for an expansion of the Jordan Valley Innovation Center (JVIC). If originated, the principal of the loan will be amortized over the term of the loan, not to exceed 20 years from the date of closing, with annual payments of principal and interest to correspond with special assessments of tax from a Transportation Development District formed by the Board. The Board will also require a first mortgage on the parking garage and an assignment of all rents and revenues of the parking garage. MSU must own and control the parking garage for 20 years and, along with the City of Springfield and property developer, each must covenant not to build or offer alternate parking unless the parking garage is regularly and routinely full.

Note 29 - Subsequent Events (cont.)

Retirement Systems

The MOSERS Board approved the reduction of their assumed rate of return (ARR) on investments from 7.50% to 7.25%, effective June 30, 2018. This change includes the intention to further reduce the ARR to 7.10%, effective June 30, 2019, and then to 6.95%, effective June 30, 2020. The Board approved utilizing a 5-year closed asset smoothing method with a 7-year transition period for previous losses. The Board also approved resetting the amortization period for the unfunded liability from 26 years to a layered 30-year closed period.

Department of Corrections Settlements

The lawsuit Hootselle v. Department of Corrections was filed on August 14, 2012 by several corrections officers alleging that the Missouri Department of Corrections failed to compensate them for pre- and post-shift activities. The officers' union was later added as a plaintiff and asserted claims for breach of its collective bargaining agreement. Following a jury trial on the plaintiffs' breach of contract claims in August 2018, the court entered judgment against the State of $113,715,000. The State filed a notice of appeal on October 26, 2018. Appellate briefs have not yet been submitted and oral argument have not been scheduled.

Required Supplementary Information (RSI) *includes the Budgetary Comparison Schedule for the General Fund and Major Special Revenue Funds, as well as the Budget to Generally Accepted Accounting Principles (GAAP) reconciliation, Schedule of Changes in Net Pension Liability and Related Ratios, Schedule of Proportionate Share of the Net Pension Liability, Schedule of State Contributions, Schedule of Changes in Total OPEB Liability and Related Ratios, Schedule of Changes in Net OPEB Liability and Related Ratios, Schedule of Proportionate Share of the Collective Net OPEB Liability, and the Notes to RSI on Budgetary Reporting.*

Budgetary Presentation:

A Budgetary Comparison Schedule is presented as Required Supplementary Information for the State's General Fund and Major Special Revenue Funds. Revenues and expenditures are reported on a budgetary basis where actual revenues are recognized when cash is received, and actual expenditures are recognized for cash disbursements. The accounting principles applied for reporting on a budgetary basis differ from those used to present the financial statements in accordance with GAAP. A reconciliation of the two for the fiscal year ended June 30, 2018, has been presented at the bottom of the Budgetary Comparison Schedule.

The budgetary expenditures are included in the current year's Appropriation Activity Report, which demonstrates legal compliance with the current year's budget. This report can be viewed at http://oa.mo.gov/accounting/reports/annual-reports/appropriation-activity-reports. The original budget expenditures and transfers are for what was originally appropriated for each fund. The final budget expenditures and transfers takes into account any increases and decreases to appropriations during the fiscal year less the Governor's amounts reverted (withheld) for each fund less any reappropriations to the next fiscal year.

Once a year, the Office of Administration-Division of Budget and Planning receives budgeted revenues from state agencies for each of their funds as well as a revised revenue estimate in the spring for the State's General Revenue Fund. The revised revenue estimate is used in the final budget column for the General Fund and is very comparable to actual revenue resulting in a small negative variance on this Schedule.

In accordance with State statute, all state funds must have an appropriation before amounts can be expended or transferred to another state fund; therefore, variances between budgeted and actual expenditures on the budgetary schedule will always be positive.

For budget purposes, interfund activity is not eliminated. A summary of interfund eliminations at June 30, 2018, is shown below (in thousands):

	Final Budget Transfer		Actual Transfer	
	In	Out	In	Out
GENERAL FUND	$ 3,260,520	$ (3,260,520)	$ 2,556,861	$ (2,556,861)
SPECIAL REVENUE FUNDS				
Public Education	405,981	(405,981)	390,031	(390,031)
TOTAL	$ 3,666,501	$ (3,666,501)	$ 2,946,892	$ (2,946,892)

Budgetary Control:

Budgetary control is maintained at the departmental level; each Department of the Missouri government formulates a budget to be submitted for approval by the General Assembly prior to the beginning of the fiscal year. These budgets are prepared essentially on the cash basis. The legislature reviews, revises, and legally adopts these budgets. The Governor then has the authority to approve or veto each budget, subject to legislative override.

Budgeted expenditures cannot exceed estimated revenues and other sources of funding, including beginning fund balances. In the event that actual revenues are insufficient to cover budgeted expenditures, the Governor must order budget reductions or call a special session of the legislature to address the issue.

Unexpended appropriations lapse at the end of each appropriation year, unless reappropriated to the following appropriation year.

*After post-valuation adjustments.

Note: Schedule revised to show by most recent fiscal year end rather than the measurement date.

Note: This schedule is ultimately required to show information for ten years. However, until a full ten-year trend is compiled, only the years that information is available will be reported.

Notes to the Schedule:

Changes of benefit terms. Senate Bill 62 (SB 62), which contained changes to the benefit structure for Missouri State Employees' MSEP 2011 Plan and the Missouri Department of Transportation and Highway Patrol Employees' Retirement System Year 2000 Plan-2011 Tier, was passed by the 2017 legislature (effective January 1, 2018). The provisions of the bill decreased vesting from ten to five years of service, but also included provisions that essentially offset the cost of the vesting change. As a result, SB 62 had no impact on the employer contribution rate and created a decrease to the UAAL for the MSEP 2011 Plan of $1.6 million. There are no changes to benefit terms in the plans for the year ended June 30, 2017.

Changes of assumptions.

For MOSERS: The board reduced the investment return assumption used in the June 30, 2017 valuation to 7.5%.
For MPERS: No changes in assumptions.
For MU: The board reduced the discount rate used in the October 1, 2017 valuation to 7.20%.

Component Unit's proportionate share of the collective net OPEB liability as a percentage of its covered payroll		275.00%
Plan fiduciary net position as a percentage of the total OPEB liability		6.64%

*Based on a measurement date and actuarial valuation as of the end of the preceding fiscal year.

Note: This schedule is ultimately required to show information for ten years. However, until a full ten-year trend is compiled, only the years that information is available will be reported.

Notes to the Schedules:

Neither MHPML or CEIP have assets that are accumulated in a trust that meets the criteria in paragraph 4 of GASB Statement No. 75, *Accounting and Financial Reporting for Postemployment Benefits Other Than Pensions*.

Changes of benefit terms. There were no changes in benefit terms.

Changes of assumptions.
For MCHCP: The discount rate changed from 5.70% to 5.71%, in the June 30, 2017 valuation.
For CEIP: The discount rate went from 3.58% to 3.87% in the June 30, 2017 valuation.
MHPML: None
For MU: The 75% pre-65 medical participation assumption was split to 90% in the Retiree Health PPO Plan and 10% in the Healthy Savings Plan. The 90% post-65 participation assumption was split to 33% in the Base Plan and 67% in the Buy-Up Plan at the January 1, 2017 effective date. Also, in the interest rate used for the valuations was changed from 3.58% as of June 30, 2017 to 3.87% as of June 30, 2018.

Supplementary Information *includes the Budgetary Comparison Schedule and Reconciliation for the Major Capital Projects Fund (Missouri Road Fund), as well as the Combining and Individual Fund Statements and Schedules for the General Fund and all Non-Major Funds.*

Major Funds

General Fund - Accounts for all current financial resources not required by law or administrative action to be accounted for in another fund.

Non-Major Funds

This includes all non-major governmental and enterprise funds, as well as the non-major component units. It also includes all internal service and fiduciary funds because the "major fund" classification, created under GASB Statement 34, does not apply to these funds.

A budgetary comparison schedule is provided for all non-major governmental funds with the exception of capital projects funds.

*The **Special Revenue Funds** account for the proceeds of specific revenue sources that are legally restricted to expenditures for specified purposes. The State has numerous individual Special Revenue Funds. Therefore, the funds have been combined into specific functional areas.*

Non-Major Special Revenue Funds:

Professional Registration - Provides for the control and regulation of various professions. Each profession has its own fund to account for its operation.

Judicial Protection and Assistance - Provides for protection of public employees by the Attorney General's Office, conviction of criminal offenders by prosecuting attorneys and assistance to victims of criminal offenses.

Agriculture and State Fair - Provides for inspections of products, market development, and awards for competition at the State Fair.

Social Assistance - Provides financial, health, and other services to qualifying individuals.

Transportation and Law Enforcement - Provides transportation services, road construction and maintenance, and the enforcement of vehicle laws and traffic safety.

Unemployment and Workers' Compensation - Provides for the administration of these laws and benefits to workers who qualify for workers' compensation.

Reimbursements and Other - Provides various reimbursements of costs to other governments and various regulatory commissions not included in other functional areas.

*The **Permanent Funds** account for resources that are legally restricted to the extent that only earnings, and not principal, may be used for purposes that support the government's programs.*

Permanent Funds:

Arrow Rock State Historic Site Endowment - Accounts for moneys transferred from the State Parks Earnings Fund, as well as other moneys or property received by grant, gift, donation, or bequest specified for the enhancement of the Arrow Rock State Historic Site.

Confederate Memorial Park - Accounts for the income from investments acquired by gifts, donations, and bequests to be used for the maintenance of the Confederate Memorial Park.

State Public School - Accounts for all moneys, bonds, lands, and other properties belonging to or donated to the State for public school use in establishing and maintaining free public schools.

Smith Memorial Endowment Trust - Accounts for moneys bequeathed for the use and benefit of the Crippled Children's Service.

*The **Enterprise Funds** account for operations that are financed and operated in a manner similar to private business enterprises.*

Non-Major Enterprise Funds:

State Fair Fees - Accounts for the fairground admission fees used to improve the grounds and to pay the operating costs of the State Fair.

State Parks - Accounts for park concessions and contributions which are used to acquire and operate state parks.

Natural Resources Revolving Services - Accounts for moneys received from the delivery of services and the sale or resale of maps, plats, reports, studies, records, and other publications and documents.

Historic Preservation Revolving - Accounts for gifts, grants, and contributions used to acquire, preserve, restore, maintain, or operate any historical properties.

Missouri Veterans' Homes - Accounts for fees to provide services for persons confined to one of the veterans' homes.

State Agency for Surplus Property - Accounts for the surplus property operation.

Department of Revenue Information - Accounts for fees received by the Department of Revenue for publications and used to pay the costs of providing this information.

*The **Internal Service Funds** account for the financing of goods or services provided by one department or agency to other departments or agencies of the State on a cost-reimbursement basis.*

Internal Service Funds:

Natural Resources Cost Allocation - Accounts for the administrative costs of the Department of Natural Resources.

Mental Health Interagency Payments - Accounts for moneys received through interagency agreements for services provided by other agencies.

State Facility Maintenance and Operation - Accounts for moneys collected from tenants for rent to cover the costs of operations in state-owned office buildings and institutions, charges to tenants in leased space to cover costs of real estate administrative services, and charges to capital improvement projects to cover the costs of project management services.

Office of Administration Revolving - Accounts for the following operations: printing services, flight operations, vehicle management, garage services, data processing and telecommunication services, building and grounds, insurance services, postage, and personnel administration.

Working Capital Revolving - Accounts for the operation of correctional industry programs and correctional farm programs.

General Government Revolving - Accounts for various service operations of the House of Representatives, Supreme Court, Adjutant General, Senate, Treasurer, and Department of Corrections.

Social Services Administrative Trust - Accounts for moneys transferred or paid to the Department of Social Services from any governmental entity or the public for goods and services provided.

Economic Development Administrative - Accounts for moneys collected for goods and services provided to other divisions and used to pay the cost of providing such services.

Professional Registration Fees - Accounts for moneys received from the professional boards for administrative services.

Conservation Employees' Insurance Plan - Accounts for health insurance coverage on a self-insured basis and life insurance coverage by a third party provider for Department of Conservation employees.

Transportation Self-Insurance Plan - Accounts for highway and highway patrol moneys used to pay workers' compensation claims. Moneys are also used to pay auto claims against the Department of Transportation.

Missouri State Employees' Insurance Plan - Accounts for long-term disability and death benefits provided on a self-insured basis for state employees.

Missouri Consolidated Health Care Plan - Accounts for medical care benefits provided on a self-insured basis for active state employees.

MoDOT and MSHP Medical and Life Insurance Plan - Accounts for the medical coverage provided on a self-insured basis and death benefits provided on an insured basis to Department of Transportation employees and members of the Missouri State Highway Patrol.

*The **Fiduciary Funds** account for assets held by the State in a trustee or agent capacity.*

Pension (and Other Employee Benefit) Trust Funds:

Missouri State Employees' Retirement System:

Missouri State Employees' Plan - Accounts for retirement, survivor, and disability benefits paid to employees of the State who are not covered under another state-sponsored retirement plan.

Judicial Plan - Accounts for retirement, survivor, and disability benefits to judges in the State of Missouri.

Missouri Department of Transportation and Highway Patrol Employees' Retirement System - Accounts for retirement, survivor, and disability benefits paid to Department of Transportation employees and members of the Missouri State Highway Patrol.

Missouri Consolidated Health Care Plan State Retiree Welfare Benefit Trust - Accounts for health and welfare benefits paid for the exclusive benefit of current and future retired employees of the State who are not covered under another state-sponsored other post-employment benefit plan.

Missouri State Public Employees' Deferred Compensation Incentive (IRC 401a) Plan - Accounts for retirement benefits paid to employees of the State.

Missouri State Public Employees' Deferred Compensation (IRC 457) Plan - Accounts for deposits from State employees, which are invested for the benefit of the employees until properly authorized to distribute.

Private-Purpose Trust Funds:

Alternative Care Trust - Accounts for all moneys received and spent by the Division of Family Services on behalf of children in their custody.

Johnson-Travis Memorial Trust - Accounts for all moneys, stocks, and securities given to the State by Miss Pansy Johnson or for the benefit of the Pansy Johnson-Travis Memorial State Gardens. Moneys will be used solely to establish, develop, and maintain the gardens.

Unclaimed Property - Accounts for moneys unpaid or unclaimed within one year after final settlement of any executor or administrator, assignee, sheriff or receiver and all unclaimed deposits, dividends, and interest of banks unable to locate the owners.

Agency Funds:

Social Security Contributions - Accounts for the receipt of contributions from various state funds for the State's share of social security contributions, which are due to the Federal Social Security Administration.

Missouri State Employees' Voluntary Life Insurance - Accounts for moneys withheld from employees' compensation for the contracts entered into with life insurance companies.

Program - Accounts for the receipt of various taxes, refundable deposits, and other moneys to be held until the State has the right or obligation to distribute them to various entities or individuals.

Institution - Accounts for deposits to various institutional accounts and other receipts held by the State until there is proper authorization to disburse them directly to others.

*The **Statistical Section** presentations include Financial Trends, Revenue Capacity, Debt Capacity, Demographic and Economic Information, and Operating Information trends. The statistical data presented is intended to provide report users with a broader understanding of the environment in which the State operates.*

STATE OF MISSOURI
STATISTICAL SECTION
June 30, 2018

Index and Overview

This part of the State's Comprehensive Annual Financial Report presents detailed information as a context for understanding what the information in the financial statements, note disclosures, and required supplementary information says about the State's overall financial health.

Financial Trends
These schedules contain trend information to help the reader understand how the State's financial performance and fiscal health have changed over time.

Net Position by Component 214
Changes in Net Position 215
Fund Balances - Governmental Funds 217
Changes in Fund Balances - Governmental Funds 218

Revenue Capacity
These schedules contain information to help the reader understand the State's capacity to raise revenues and the sources of those revenues.

Revenue Base - Taxable Sales by Industry 220
Revenue Base - Personal Income by Industry 221
Personal Income Tax Revenue 222
Personal Income Tax Rates 223
Revenue Payers by Industry 224
Personal Income Tax Filers/Liability 225

Debt Capacity
These schedules present information to help the reader understand and assess the State's levels of outstanding debt and the State's ability to issue additional debt in the future.

Ratios of Outstanding Debt 226
Pledged Revenue Coverage 228

Demographic and Economic Information
These schedules contain demographic and economic indicators to help the reader understand the environment within which the State's financial activities take place.

Demographic Indicators 229
Economic Indicators 230
Principal Employers 231

Operating Information
These schedules contain operating data to help the reader understand how the information in the State's financial report relates to the services it provides and the activities it performs.

State Employees by Function 232
Operating Indicators by Function 233
Capital Asset Statistics by Function 235

Sources: Unless otherwise noted, the information in these schedules is derived from the State of Missouri Comprehensive Annual Financial Report for the years shown.

N/A = not available

[1] Revenues for Missouri Road Fund consist of a portion of the taxes and fees received by the State from the motor fuel tax, sales tax on motor vehicles, use tax on motor vehicles, revenue derived from motorists for their usage of the highways of the State, federal grants, and bond proceeds.

[2] Operating Expenses do not include depreciation/amortization.

[3] Coverage equals net available revenue divided by debt service.

Office of Missouri State Auditor

Nicole Galloway, CPA

Miller County

Report No. 2019-002
January 2019

auditor.mo.gov

Nicole Galloway, CPA
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of Miller County

Financial Condition	The financial condition of the 911 Emergency and Jail Funds remains poor. The amount of restricted Capital Improvement Fund monies used to support the 911 Emergency and Jail Funds is significant. As a result, the Capital Improvement Fund may not have the monies needed to pay off outstanding debt.
Capital Improvement Sales Tax	Some capital improvement sales tax revenue may have been spent for purposes not allowable under state law. The county did not track transfers to the 911 Emergency or Jail Funds to ensure the funding was spent in accordance with state law.
County Collector's Controls and Procedures	The County Collector did not prepare bank reconciliations during the year ended February 28, 2018. Also, the County Collector did not prepare a monthly list of labilities for the bank accounts with liabilities.
Property Tax System	The County Collector is consistently not filing an annual settlement, one of his main responsibilities, which also violates state law. The County Clerk did not prepare the land and personal tax, back tax, or railroad and utility aggregate abstracts for 2014, 2015, 2016, or 2017. The county has not adequately restricted property tax system access.
Sheriff's Controls and Procedures	The Sheriff has not adequately segregated accounting duties and does not ensure supervisory reviews of detailed accounting and bank records are performed. Controls and procedures over receipting and depositing need improvement. The Sheriff does not disburse fees monthly to the County Treasurer as required by state law. The Sheriff's office does not prepare a monthly list of liabilities of inmate balances for the 2 commissary accounts, and consequently, liabilities are not reconciled to the commissary's available cash balances and commissary net proceeds are not turned over to the county as required by state law. The Sheriff has not performed a physical inventory of seized property since 2015.
Senate Bill 40 Board's Controls and Procedures	The Senate Bill 40 Board did not advertise or obtain bids for the remodeling of the group home kitchen costing approximately $7,300. The SB40 Board awards gifts to employees in violation of the Missouri Constitution.
Sunshine Law	The County Commission did not always comply with the Sunshine Law.
Prosecuting Attorney's Controls and Procedures	The Prosecuting Attorney's bank account had $5,346 of unidentified monies at December 31, 2017. The Prosecuting Attorney has not established procedures to routinely follow up on outstanding checks.

Additional Comments

Because counties are managed by several separately-elected individuals, an audit finding made with respect to one office does not necessarily apply to the operations in another office. The overall rating assigned to the county is intended to reflect the performance of the county as a whole. It does not indicate the performance of any one elected official or county office.

In the areas audited, the overall performance of this entity was **Fair***

***The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

Organization and Statistical Information 15

NICOLE GALLOWAY, CPA
Missouri State Auditor

County Commission
and
Officeholders of Miller County

We have audited certain operations of Miller County in fulfillment of our duties under Section 29.230, RSMo. In addition, Stopp & VanHoy, Certified Public Accountants and Business Advisors, LLC, was engaged to audit the financial statements of Miller County for the 2 years ended December 31, 2017. The scope of our audit included, but was not necessarily limited to, the year ended December 31, 2017. The objectives of our audit were to:

1. Evaluate the county's internal controls over significant management and financial functions.

2. Evaluate the county's compliance with certain legal provisions.

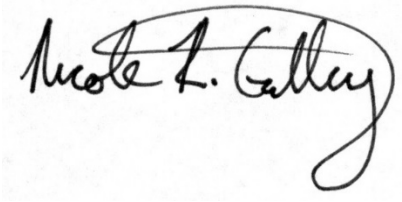
3. Evaluate the economy and efficiency of certain management practices and procedures, including certain financial transactions.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the county, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We tested certain of those controls to obtain evidence regarding the effectiveness of their design and operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of applicable contract, grant agreement, or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the county's management and was not subjected to the procedures applied in our audit of the county.

For the areas audited, we identified (1) deficiencies in internal controls, (2) noncompliance with legal provisions, and (3) the need for improvement in management practices and procedures. The accompanying Management Advisory Report presents our findings arising from our audit of Miller County.



Nicole R. Galloway, CPA
State Auditor

The following auditors participated in the preparation of this report:

Director of Audits:	Randall Gordon, M.Acct., CPA, CGAP
Audit Manager:	Lori Melton, M.Acct., CPA
In-Charge Auditor:	James M. Applegate, MBA
Audit Staff:	Sherrye Lesmes
	Sacha Tejan
	Charles J. Miller

1. Financial Condition

The financial condition of the 911 Emergency (E911) and Jail Funds remains poor. The amount of restricted Capital Improvement (CI) Fund monies used to support the E911 and Jail Funds is significant. As a result, the CI Fund may not have the monies needed to pay off outstanding debt. The following table reflects the activity of these funds for 2017 according to the audited financial statements, as well as the projected ending cash balances for 2018 from the county's budget.

	E911 Fund		Jail Fund	
	Year Ended December 31,			
	2018 (budget)	2017 (actual)	2018 (budget)	2017 (actual)
Beginning balance	$ (7,018)*	(24,707)	1	(27,206)
Receipts	240,200	224,963	699,150	815,457
Transfers in	678,925	658,733	607,000	357,169
Disbursements	905,883	858,988	1,295,675	1,145,419
Ending balance	$ 6,224	1	10,476	1

* The beginning balance of the 2018 budget for the E911 Fund was not the same amount as the ending balance per the audited financial statements.

If the county had not made these transfers, the E911 and Jail Funds would have had negative balances. In addition, sales tax monies in the CI Fund are restricted for capital improvement use only and cannot legally be used to cover deficits in other funds (see MAR finding number 2).

It is essential that the County Commission continue to address the financial condition of the E911 and Jail Funds in both the immediate and long-term future. To ensure the financial condition of the funds is improved, the County Commission should reduce spending where possible, evaluate controls and management practices to ensure efficient use of county resources, maximize all sources of revenue, and closely monitor county budgets.

A similar condition was noted in our 3 prior audit reports. In addition, Report No. 2015-035, *Follow-Up Report on Audit Findings - Miller County*, issued in June 2015, reported the status, at that time, as in progress.

Recommendation

The County Commission closely monitor and take necessary steps to improve the financial condition of the 911 Emergency and Jail Funds. The County Commission should also perform immediate and long-term planning and ensure receipts are maximized and disbursements closely monitored.

Auditee's Response

Due to declining tax revenues and increased equipment costs, the E911 Fund required support from the CI Fund. The Jail Fund experienced declining revenues because not all beds in the facility were filled and likewise required support from the CI Fund. The county has since increased the daily rate to

other counties for the boarding of prisoners, and is working to ensure revenues are maximized to improve the financial condition of the county.

2. Capital Improvement Sales Tax

Some capital improvement sales tax revenue may have been spent for purposes not allowable under state law. Approximately $2,000,000 was collected from the capital improvement sales tax during the year ended December 31, 2017.

Section 67.700, RSMo, allows counties to impose a sales tax for any capital improvement purpose designated by the county in a ballot submitted to voters, and requires the monies received from the sales tax to be deposited in a separate account and used solely for the designated purpose. Pursuant to this state law, Miller County voters extended a 1/2-cent capital improvement sales tax levy in August 2010, for a period of 20 years. The ballot language specified the tax monies were to be used "for the purpose of funding capital improvements to county-owned buildings and paying costs of maintenance and utilization thereof. . . ."

The county did not track transfers to the E911 or Jail Funds to ensure the funding was spent in accordance with state law. According to the county's audited financial statements, the county transferred $658,733 during the year ended December 31, 2017, from the CI Fund to the E911 Fund, and $357,169 to the Jail Fund to subsidize those funds. The County Commission orders authorizing these transfers stated the transfers were for utilization of the Justice Center, but did not demonstrate how the amounts were determined. The County Commissioners stated operating costs of the county courthouse and jail (including salaries of employees) are allowable utilization costs of capital improvement sales tax monies. However, no documentation was available supporting how these expenditures met the purposes allowed by the capital improvement sales tax ballot of August 3, 2010. As a result, it is not possible to determine if the county spent this money for allowable purposes.

A similar condition was noted in our prior audit report. In addition, Report No. 2015-035, *Follow-Up Report on Audit Findings - Miller County*, issued in June 2015, reported the status, at that time, as partially implemented.

Recommendation

The County Commission implement procedures to ensure capital improvement sales tax monies are tracked and spent in accordance with state law, whether transferred or spent from the Capital Improvement Fund.

Auditee's Response

The County Clerk implemented earmarks for specific line items on the budget to track the expenditures. The purposes of the funding will be included in any future transfer documentation from the Capital Improvement Fund.

3. County Collector's Controls and Procedures

As noted in our 2 prior audit reports, controls and procedures for the County Collector's office need improvement. The County Collector did not prepare bank reconciliations during the year ended February 28, 2018. Also, the County Collector did not prepare a monthly list of liabilities for the bank accounts with liabilities. The County Collector indicated he reviews bank statements to ensure financial activity agrees with accounting records, but his review is not documented. The following table lists the bank balances at February 28, 2018.

Account	Bank Balance
Main account	$ 15,773,641
Tax maintenance account	105,579
Lodging tax account	463
Bankruptcy account	317
Tax collection account - Bank No. 1 (1)	65,053
Tax collection account - Bank No. 2 (1)	36,429
Tax collection account - Bank No. 3 (1)	24,823
Tax collection account - Bank No. 4 (1)	101,657
Total	$ 16,107,962

(1) The County Collector has agreements with local banks to accept tax payments during the months of November and December.

Without preparing monthly bank reconciliations and lists of liabilities, there is less assurance receipts and disbursements have been properly handled and recorded. In addition, accounting and bank errors may not be detected and corrected timely. Further, without regular identification and comparison of liabilities to the reconciled bank balance, there is less likelihood errors will be identified and the ability to both identify liabilities and resolve errors is diminished.

Recommendation

The County Collector ensure monthly bank reconciliations and lists of liabilities are prepared, and reconcile the list of liabilities to the reconciled bank balance. Any differences should be promptly investigated.

Auditee's Response

The County Collector agrees and will endeavor to implement this recommendation.

4. Property Tax System

Controls and procedures of the property tax system need improvement. Property taxes and other monies collected by the County Collector totaled approximately $19.5 million during the year ended February 28, 2018.

4.1 Annual settlements

The County Collector is consistently not performing one of his main responsibilities, which also violates state law. The County Collector has not filed an annual settlement for the years ended February 28 (29), 2015, 2016,

2017, and 2018. The annual settlement for the year ended February 28, 2014, was not filed with the County Commission until March 26, 2015, after the issuance of our prior audit report.

Because the County Collector does not file annual settlements, the County Clerk cannot ensure taxes charged and credited to the County Collector each year are accounted for properly, and the County Clerk and County Commission cannot verify the County Collector's accounts.

To help ensure the validity of tax book charges, collections, and credits, and for the County Clerk and County Commission to properly verify these amounts, it is imperative the County Collector file annual settlements. Section 139.160, RSMo, requires the County Collector to annually settle with the County Commission the accounts of all monies received from taxes and other sources. In addition, Section 139.190, RSMo, requires the County Commission to carefully and fully examine the annual settlement of the County Collector and the County Clerk to certify the amounts to the state. Such procedures are intended to establish checks and balances related to the collection of property taxes.

4.2 Aggregate abstracts

The County Clerk did not prepare the land and personal tax, back tax, or railroad and utility aggregate abstracts for 2014, 2015, 2016, or 2017. After we requested these reports, the County Clerk prepared the land and personal tax aggregate abstracts for 2016 and 2017 in May 2018, as well as the back tax aggregate abstracts for 2015 and 2016 in April 2018. However, land and personal tax abstracts for 2014 and 2015, the back tax abstracts for 2014 and 2017, and the railroad and utility tax aggregate abstracts for all 4 years have not been prepared.

Section 137.295, RSMo, requires the County Clerk to prepare these reports and forward them to the Department of Revenue and State Tax Commission upon completion of current and delinquent tax books.

4.3 Property tax system changes

The county has not adequately restricted property tax system access. The County Collector's office has access rights in the property tax system to make changes such as additions, abatements, and deletions, but can also make corrections or changes to information entered into the property tax system. Because the County Collector is responsible for collecting tax monies, the ability of personnel within this office to make changes to the property tax system represents a significant weakness in internal controls. Good internal controls require the County Collector and other office personnel not have access rights allowing alteration or deletion of information.

The County Collector and his Deputy Collector indicated the data systems used by the County Collector's and the County Assessor's offices do not interface, so it is necessary for the County Collector's office to make changes

to the tax statements. Although all changes are printed by the County Assessor and sent to the County Clerk's office for review, neither the County Clerk nor the County Commission reviews the changes made in the property tax system.

Sections 137.260 and 137.270, RSMo, assign responsibility to the County Clerk for making changes to the tax books with the approval of the County Commission. If it is not feasible for the County Clerk to make corrections to the tax books, an independent reconciliation of approved changes to actual changes made to the property tax system would help ensure changes are proper.

Similar conditions previously reported

A condition similar to section 4.1 was noted in our 3 prior audit reports and section 4.3 in our prior audit report. In addition, Report No. 2015-035, *Follow-Up Report on Audit Findings - Miller County* (sections 3.1 and 4.1), issued in June 2015, reported the status, at that time, as in progress.

Recommendations

4.1 The County Collector prepare and file annual settlements in accordance with state law. In addition, the County Commission should ensure the annual settlements are filed and are carefully and fully examined to ensure tax book charges and credits are accurately reported.

4.2 The County Clerk prepare the back tax, land and personal tax, and railroad and utility aggregate abstracts and timely file them with the Department of Revenue and State Tax Commission.

4.3 The County Commission and the County Clerk develop procedures to ensure all property tax changes are properly approved and monitored. In addition, the County Commission should work with the County Collector to ensure property tax system access rights are limited to only what is needed for the users to perform their job duties and responsibilities.

Auditee's Response

The County Collector provided the following responses:

4.1 I agree and will work to correct this problem.

4.3 I agree with this recommendation. A new data system has been implemented that interfaces with the County Assessor's system. However, my staff still need access to perform additions and abatements in case this process does not work correctly. We will provide monthly reports of changes made in the system to the County Clerk for review.

The County Commission provided the following response:

4.1 We will ensure the County Collector's annual settlements are reviewed when received.

The County Clerk provided the following response:

4.2 The County Clerk has completed all outstanding annual aggregate abstracts and will ensure timely completion in the future.

The County Commission and County Clerk provided the following response:

4.3 If a report of changes is provided by the County Collector, we will compare that report to the changes that have been approved.

5. Sheriff's Controls and Procedures

Controls and procedures for the Sheriff's office need improvement. The Sheriff's office collected monies for civil fees, concealed carry weapon (CCW) permits, jail phone commissions, commissary commissions, and other miscellaneous receipts totaling approximately $503,000 for the year ended December 31, 2017.

5.1 Segregation of duties

The Sheriff has not adequately segregated accounting duties and does not ensure supervisory reviews of detailed accounting and bank records are performed. One clerk is responsible for receipting, recording, and depositing monies; making disbursements; and preparing the monthly bank reconciliation for the bond/fee bank account. Another clerk is responsible for the same duties for the commissary account and the CCW account.

Proper segregation of duties is necessary to ensure transactions are accounted for properly and assets are adequately safeguarded. Internal controls would be improved by segregating the duties of receiving, recording, depositing, disbursing, and reconciling monies. If proper segregation of duties cannot be achieved, documented independent or supervisory reviews of detailed accounting and bank records are essential and should include comparing daily receipt activity to deposits and disbursements to supporting documentation.

5.2 Receipting and depositing

Controls and procedures over receipting and depositing need improvement. Sheriff's office personnel do not obtain a report of receipts from the inmate money kiosks when removing money from the kiosks for deposit. The Administrative Assistant prepares each deposit slip to equal the amount removed, with no documentation to support the amount.

Failure to implement adequate receipting and depositing procedures increases the risk that loss, theft, or misuse of monies received will go undetected.

5.3 Disbursements

The Sheriff does not disburse fees monthly to the County Treasurer as required by state law. For example, the county portion of CCW permit fees of $398 collected in January 2017 was not disbursed to the County Treasurer until March 10, 2017.

To ensure all disbursements are accounted for properly and reduce the risk of loss, theft, or misuse of funds, fees received should be disbursed timely. Section 50.370, RSMo, requires all county officials who receive fees or any other remuneration for official services to pay such monies monthly to the County Treasurer.

5.4 Commissary liabilities

The Sheriff's office does not prepare a monthly list of liabilities of inmate balances for the 2 commissary accounts, and consequently, liabilities are not reconciled to the commissary's available cash balances and commissary net proceeds are not turned over to the county as required by state law.

At our request, the Sheriff's office generated a list of inmate balances for the commissary accounts totaling $11,357 as of April 30, 2018. The April 30, 2018, reconciled bank balances for the accounts totaled $73,142. After subtracting the inmate balances from the account balances, the accounts contain undistributed commissary net proceeds totaling $61,785.

Regular identification and comparison of liabilities to the available cash balance is necessary to ensure accounting records are in balance, all amounts received are disbursed, and monies are available to satisfy all liabilities. Differences must be adequately investigated and explained. Section 221.102, RSMo, requires each county jail to keep revenues from its commissary in a separate account and pay for goods and other expenses from that account, allows retention of a minimum amount of money in the account for cash flow purposes and current expenses, and requires deposit of the remaining funds (net proceeds) into the county Inmate Prisoner Detainee Security Fund held by the County Treasurer.

5.5 Seized property

The Sheriff has not performed a physical inventory of seized property since 2015.

Considering the often sensitive nature of seized property, adequate internal controls are essential and would significantly reduce the risk of loss, theft, or misuse of the property. Periodic physical inventories should be performed and the results compared to inventory records to ensure seized property is accounted for properly.

Similar conditions previously reported

Conditions similar to sections 5.1 and 5.4 were noted in at least our 4 prior audit reports, section 5.2 in our 3 prior audit reports, and section 5.5 in our prior audit report. In addition, Report No. 2015-035, *Follow-Up Report on Audit Findings - Miller County* (sections 5.1, 5.3, 5.5, and 5.6), issued in June

2015, reported the status, at that time, as implemented for sections 5.1 and 5.3, and in progress for sections 5.5 and 5.6.

Recommendations

The Sheriff:

5.1 Segregate accounting duties or ensure adequate independent or supervisory reviews of detailed accounting and bank records are performed and documented.

5.2 Reconcile money received through the inmate kiosk to deposits and kiosk reports.

5.3 Disburse fees monthly to the County Treasurer in accordance with state law.

5.4 Prepare a monthly list of liabilities for the commissary account and reconcile it to the available cash balance. Any differences between accounting records and reconciliations should be promptly investigated and resolved. In addition, ensure existing and future commissary net proceeds not necessary to meet cash flow needs or current operating expenses are disbursed to the County Treasurer for deposit in the Inmate Prisoner Detainee Security Fund.

5.5 Ensure a periodic inventory of seized property is conducted and reconciled to the list of seized property, and investigate any differences.

Auditee's Response

5.1, 5.3, & 5.4 We agree and have implemented this recommendation.

5.2 Our prior commissary vendor did not have this capability, but this has been implemented with our new vendor.

5.5 We agree and have performed an annual spot check inventory, but do not have the manpower for a full inventory at this time.

6. Senate Bill 40 Board's Controls and Procedures

Improvement is needed in the Miller County Senate Bill 40 Board's (SB40 Board) controls and procedures over expenditures.

6.1 Bidding

The SB40 Board did not advertise or obtain bids for the remodeling of the group home kitchen costing approximately $7,300. The SB40 Board Secretary indicated she hired and made payment to the contractor for the work without any discussion or approval by the SB40 Board.

Section 50.660, RSMo, provides bidding requirements, including advertising for bids involving expenditures greater than $6,000. Routine use of a competitive procurement process for major purchases ensures the Board has made every effort to receive the best and lowest price and all interested parties are given an equal opportunity to participate in SB40 Board's business. Documentation of the various bids received, the SB40 Board's selection process, and criteria should be retained to demonstrate compliance with applicable laws or regulations and support decisions made.

6.2 Staff incentives

The SB40 Board awards gifts to employees in violation of the Missouri Constitution. During the year ended December 31, 2017, the SB40 Board purchased 21 gift cards totaling $525 for employees as Christmas gifts.

These gifts represent additional compensation for services previously rendered and, as such, are in violation of Article III, Section 39, Missouri Constitution. Attorney General's Opinion No. 72, from June 14, 1955, states, ". . . a government agency deriving its power and authority from the constitution and laws of the state would be prohibited from granting extra compensation in the form of bonuses to public officers after the service has been rendered." Additionally, Article VI, Sections 23 and 25, prevent local government from granting public money to any private individual, except as otherwise provided by law.

Recommendations

The Senate Bill 40 Board:

6.1 Ensure projects are bid, including advertising for bids when applicable in accordance with state law, and maintain adequate documentation of decisions made.

6.2 Discontinue the practice of giving gift cards to employees.

Auditee's Response

6.1 This will be done prior to the next project the SB40 Board undertakes. Several persons were contacted for the contract work performed to no avail.

6.2 Nothing staff related comes out of the SB40 tax monies. SB40 tax money was not used to purchase gift cards. Gift cards were purchased from respective programs. These programs are Residential and Targeted Case Management.

Auditor's Comment

6.2 The SB40 Board's response states the gift cards were not purchased with property tax monies. However, all funds of the SB40 Board are public funds and subject to the criteria specified in the finding.

7. Sunshine Law

The County Commission did not always comply with the Sunshine Law. The County Clerk prepared minutes for only 63 County Commission meetings out of an estimated 144 possible meetings held during the year ended December 31, 2017. Since minutes were not available for the remaining dates, it was unclear if meetings were held for all dates. Without minutes of all meetings, there is no record of the discussions held or support for the decisions made, and less assurance to the public that various statutory provisions are followed.

Section 610.020.7, RSMo, requires meeting minutes be maintained as a record of business conducted and to provide an official record of actions and decisions.

Recommendation

The County Commission ensure meeting minutes are prepared and maintained for all County Commission meetings.

Auditee's Response

The Presiding Commissioner now keeps notes to provide all information required by the Sunshine Law, and provides those notes to the County Clerk after each meeting to prepare official minutes.

8. Prosecuting Attorney's Controls and Procedures

Controls and procedures in the Prosecuting Attorney's office need improvement. The office collected approximately $23,000 in bad check restitution and fees, and $64,000 in court-ordered restitution and fees during the year ended December 31, 2017.

8.1 Unidentified monies

The Prosecuting Attorney's bank account had $5,346 of unidentified monies at December 31, 2017. The Prosecuting Attorney's clerical staff reconciles the bank balance to the identified liabilities on a monthly basis, and has documented unidentified balances accumulated by the prior Prosecuting Attorney. Since records are not sufficient to identify to whom this money is owed, it should be disposed of in accordance with state law.

Maintaining unidentified balances in the bank accounts increases the risk of loss, theft, or misuse of such funds. Various statutory provisions address the disposal of unidentified monies.

8.2 Outstanding checks

The Prosecuting Attorney has not established procedures to routinely follow up on outstanding checks. As of December 31, 2017, 9 checks totaling $1,014 had been outstanding for more than a year, with some checks dating back to 2014.

Procedures to routinely follow up on outstanding checks are necessary to prevent the accumulation of monies in the account and ensure monies are appropriately disbursed to the payee or as otherwise provided by state law.

Similar conditions previously reported

A condition similar to section 8.1 was noted in our 2 prior audit reports and section 8.2 in our prior audit report.

Recommendations

The Prosecuting Attorney:

8.1 Disburse unidentified monies in accordance with state law.

8.2 Establish procedures to routinely investigate outstanding checks. Old outstanding checks should be voided and reissued to payees that can be readily located. If payees cannot be located, the monies should be disposed of in accordance with state law.

Auditee's Response

8.1 The current audit identifies $5,346 in unidentified funds in the Prosecuting Attorney bank account and recommends disposal of the money according to law. The money was immediately disbursed to the State Treasurer's Office in accordance with the abandoned property law.

8.2 It is the Prosecuting Attorney's understanding based upon the State Treasurer's Office website that government entities such as the Prosecuting Attorney's office are required to hold property for 3 years before submission to the State Treasurer's Office. As such, unidentified money is often in the Prosecuting Attorney's bank account for extended periods to locate proper recipients. However, upon clarification from the State Treasurer's Office and the State Auditor's Office, monies may be submitted to the State Treasurer's Office sooner, so we will seek to return money on a 1-year basis as opposed to the past policy.

Miller County
Organization and Statistical Information

Miller County is a county-organized, third-class county. The county seat is Tuscumbia.

Miller County's government is composed of a three-member county commission and separate elected officials performing various tasks. All elected officials serve 4-year terms. The county commission has mainly administrative duties in setting tax levies, appropriating county funds, appointing board members and trustees of special services, accounting for county property, maintaining county roads and bridges, and performing miscellaneous duties not handled by other county officials. Principal functions of these other officials relate to law enforcement, property assessment, property tax collections, conduct of elections, and maintenance of financial and other records important to the county's citizens. In addition to elected officials, the county employed 119 full-time employees and 5 part-time employees on December 31, 2017.

In addition, county operations include a Senate Bill 40 Board and a Senior Citizens Service Board.

Elected Officials

The elected officials and their compensation paid for the year ended December 31 (except as noted) are indicated below:

Officeholder	2018	2017
Tom Wright, Presiding Commissioner	$	32,175
Darrell Bunch, Associate Commissioner		30,145
Travis Lawson, Associate Commissioner		29,700
Deb Wiles, Recorder of Deeds		45,675
Clinton Jenkins, County Clerk		45,000
Benjamin Winfrey, Prosecuting Attorney		137,073
Louie Gregoire, Sheriff		50,000
Phil Lawson, County Treasurer		45,675
Timothy Bradley, County Coroner		16,000
Theresa Lupardus, Public Administrator		45,000
William Harvey, County Collector, year ended February 28,	45,675	
Joseph Cochran, County Assessor, year ended August 31,		45,675
Rick Wilson, County Surveyor (1)		

(1) Compensation on a fee basis.

Missouri State Highway Patrol's Use of Highway Funds

Year Ended June 30, 2018

Report No. 2019-001

January 2019

auditor.mo.gov

Nicole Galloway, CPA
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the Department of Public Safety-Missouri State Highway Patrol's Use of Highway Funds

Background	Missouri state law requires the Missouri State Auditor to examine whether State Highways and Transportation Fund appropriations to the Missouri State Highway Patrol are used in accordance with the Missouri Constitution, which limits the use of these funds to activities related to administering and enforcing state motor vehicle laws or traffic regulations.
Methodology	Audit staff reviewed policies and procedures, financial records and other pertinent documents; interviewed agency personnel; and tested selected transactions. Auditors also reviewed highway patrol calculations of amounts spent for non-highway activities; and the amounts spent for highway-related activities from other funding sources.
Conclusions	The audit determined the Missouri State Highway Patrol complied with legal provisions related to the use of this funding for the 2018 fiscal year.

Because of the limited objective of this review, no overall rating is provided.

State Auditor's Report 2

Background, Methodology, and Conclusions 3

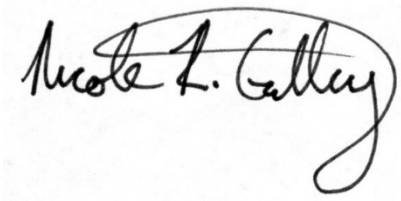
NICOLE GALLOWAY, CPA
Missouri State Auditor

Honorable Michael L. Parson, Governor
and
Members of the General Assembly
and
Sandra K. Karsten, Director
Department of Public Safety
and
Lieutenant Colonel Eric T. Olson, Interim Superintendent
Missouri State Highway Patrol
Jefferson City, Missouri

We have audited the Department of Public Safety, Missouri State Highway Patrol's Use of Highway Funds, as required by Section 226.200.3, RSMo. The scope of our audit included, but was not necessarily limited to, the year ended June 30, 2018. The objective of our audit was to determine whether the agency is in compliance with legal provisions related to the use of Highway Funds.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The Background, Methodology, and Conclusions present our comments concerning the overall compliance related to the Department of Public Safety, Missouri State Highway Patrol's Use of Highway Funds.



Nicole R. Galloway, CPA
State Auditor

In-Charge Auditor:	Joyce Thomson

Missouri State Highway Patrol's Use of Highway Funds Background, Methodology, and Conclusions

Background

The State Auditor is required to determine whether appropriations from the State Highways and Transportation Fund (State Highway Fund) to the Missouri State Highway Patrol (MSHP) are used for administering and enforcing state motor vehicle laws and traffic regulations pursuant to the constitution.

Limitations and requirements

Article IV, Section 30(b), Missouri Constitution, limits the MSHP's use of highway funds to activities related to administering and enforcing state motor vehicle laws or traffic regulations. In addition, Section 226.200.3, RSMo, provides, in part:

" . . . Appropriations allocated from the state highways and transportation department fund to the highway patrol shall only be used by the highway patrol to administer and enforce state motor vehicle laws or traffic regulations. Beginning July 1, 2007, any activities or functions conducted by the highway patrol not related to enforcing or administering state motor vehicle laws or traffic regulations shall not be funded by the state highways and transportation department fund, but shall be funded from general revenue or any other applicable source. Any current funding from the highways and transportation department fund used for activities not related to enforcing state motor vehicle laws or traffic regulations shall expire on June 30, 2007. The state auditor shall annually audit and examine the appropriations made to the highway patrol to determine whether such appropriations are actually being used for administering and enforcing state motor vehicle laws and traffic regulations pursuant to the constitution. The state auditor shall submit its annual findings to the general assembly by January fifteenth of each year."

During the year ended June 30, 2018, the MSHP used appropriations from the State Highway Fund as follows:

		Appropriation Authority	Expenditures	Lapsed Balances*
Enforcement personal service	$	72,208,910	67,334,894	4,874,016
Enforcement expense and equipment		6,748,812	6,685,455	63,357
Technical services personal service		14,521,316	13,356,937	1,164,379
Technical services expense and equipment		13,677,138	13,451,796	225,342
Vehicle and driver safety personal service		11,112,828	10,293,357	819,471
Vehicle and driver safety expense and equipment		1,020,875	914,359	106,516
Refund unused motor vehicle inspection stickers		100,000	34,578	65,422
Administration personal service		6,145,488	5,933,075	212,413
Administration expense and equipment		422,589	381,705	40,884
Crime laboratories personal service		3,878,874	3,570,733	308,141
Crime laboratories expense and equipment		1,209,249	1,172,972	36,277
Law Enforcement Academy personal service		1,344,722	1,245,446	99,276
Law Enforcement Academy expense and equipment		73,576	65,829	7,747
Fringe benefits personal service		81,049,718	74,874,325	6,175,393
Fringe benefits expense and equipment		6,516,441	6,305,004	211,437
Vehicle replacement expense and equipment		6,573,075	5,039,912	1,533,163
Gasoline expenses		4,837,264	3,558,322	1,278,942
Interoperable system highway		5,000,000	4,891,209	108,791
Interoperable ongoing highway		4,100,000	3,975,769	124,231
Total	$	240,540,875	223,085,677	17,455,198

* The lapsed balances include withholdings made at the Governor's request totaling $4,383,776.

Methodology

Our methodology included reviewing written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the agency; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objective and assessed whether such controls have been properly designed and placed in operation. We tested certain of those controls to obtain evidence regarding the effectiveness of their design and operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objective, and we assessed the risk that illegal acts, including fraud, and violations of other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

To determine whether the MSHP complied with the limitations on the use of highway funds, we reviewed the MSHP calculations of amounts expended from the State Highway Fund for non-highway activities and the amounts expended by the MSHP for highway-related activities from other funding

sources. We compared the amounts used in the MSHP calculations to expenditures recorded in the state accounting system (SAM II) and other supporting documentation. In addition, we tested certain expenditures to determine if the expenditures were properly recorded.

Conclusions

We concluded the MSHP appears to be in compliance with legal provisions related to the use of Highway Funds. During fiscal year 2018, the MSHP spent approximately $2,660,000 appropriated from the State Highway Fund for expenditures not related to highway activities. This amount included non-highway personal service and fringe benefit expenditures made from the State Highway Fund for the Crime Laboratory Division and Administrative Services Bureau; and some gasoline and expense and equipment expenditures from the Administrative Services Bureau. However, these expenditures were more than offset by personal service, fringe benefit, and expense and equipment expenditures of approximately $5,389,000 incurred by the Crime Laboratory Division, Training Division, and Technical Services Bureau that were related to highway activities but not paid from the State Highway Fund. As a result, approximately $2,729,000 more was spent on highway-related activities than was paid from highway funds during fiscal year 2018.
